IT'S ALL ABOUT UNDERSTANDING GENETICS

Our objective is to make quality diagnostic tools for making cytogenetic analysis convenient, easy and accurate.

Karyotyping media are a series of ready-to-use media developed for short term in vitro culture of peripheral blood lymphocytes bone marrow cells and amniotic fluid cells for cytogenetic studies.

Viral Transport Media & Kits

HiViral™ Transport Media

Antibacterial and antifungal agents prevents bacterial and fungal contamination
Avoids drying up of the sample
Allows long survival of the present virus
Prevents the growth of other bacteria and fungi present in the specimen
Stabilizes the viruses and offers maximum recovery

Swabs

SUITABLE FOR NASOPHARYNGEAL, NASAL OR TRACHEAL SAMPLES

Patient Friendly Design : Ergonomic design and soft texture for maximum yield. Improves patient comfort and specimen collection
Uptake and Transfer : Quantitative measurement and improved test sensitivity
Release : Spontaneous elution of sample into liquid media
Applications : Rapid antigen testing, EIA, molecular-based assays, DFA, cytology testing, bacteriology and virology culture

Manufactured in GMP, ISO 13485 and ISO 9001 Certified facility

CE Marked for IVD (98/79/EC)

Guaranteed Functionality, Sensitivity and Specificity

Designed according to WHO Directive (Annex 8) and ICMR guidelines

Validated by reputed Indian Institutes such as NIV and ICMR

Validated by European, Middle Eastern and Hong Kong authorities

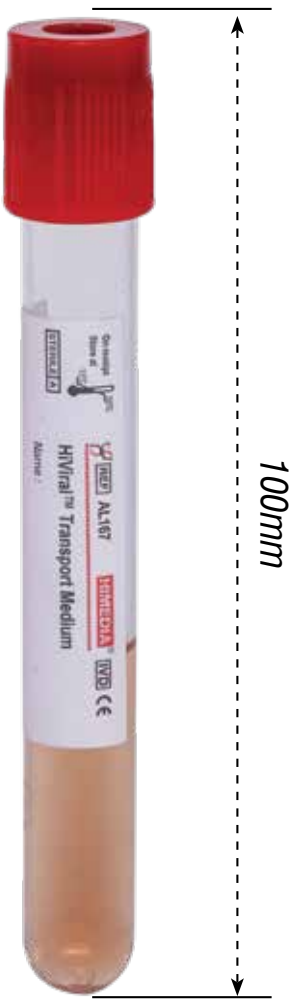
Swabs

Nasopharyngeal Nylon Flocked Swab

Breakpoint at 89mm from tip — PW1172

Oropharyngeal Viscose Swab

Available without & with breakpoint (breakpoint at 80mm, 65mm & 30mm from tip) — PW043/B/C/D



Oropharyngeal Nylon Flocked Swab

Breakpoint at 30mm from tip — PW1374

CELLBIO™

COVID*Safe*™

Virus Inactivation Medium

INACTIVATE... AND BE COVID*Safe*™ !

COVID*Safe*™ is a stabilization, inactivation and transportation medium designed for potentially infectious viruses in suspected samples.

Specially designed for molecular testing, it rapidly inactivates pathogen infectivity and minimizes risk of accidental disease spread

On-spot inactivation of viral virulence

Risk-free sample handling

Biosafety level III Not required

Cold chain NOT required for transportation

CE Marked for IVD 98 / 79 / EC

HIMEDIA®

Advantages

Safety

Risk of accidental spillage/ exposure increases in case of any pandemic, where large volume of samples are collected and handled. On-the-spot inactivation of samples minimizes such risks of accidental spread of disease.

Ease of handling

Due to inactivation, sample virulence is lost and samples can be processed under Biosafty Level II.

Easy and economical transport

Samples can be stored and shipped at ambient temperature, thereby, eliminating the need of cold chain maintenance and reducing shipping/ packing costs.

Storage and shelf life

Store at room temperature, away from bright light. Use before date of expiry given on the product label.

Sample collected can be stored at:

Ambient Temperature	08 Days
2 – 8°C	15 Days
-20°C	1 Month
-80°C	1 Year

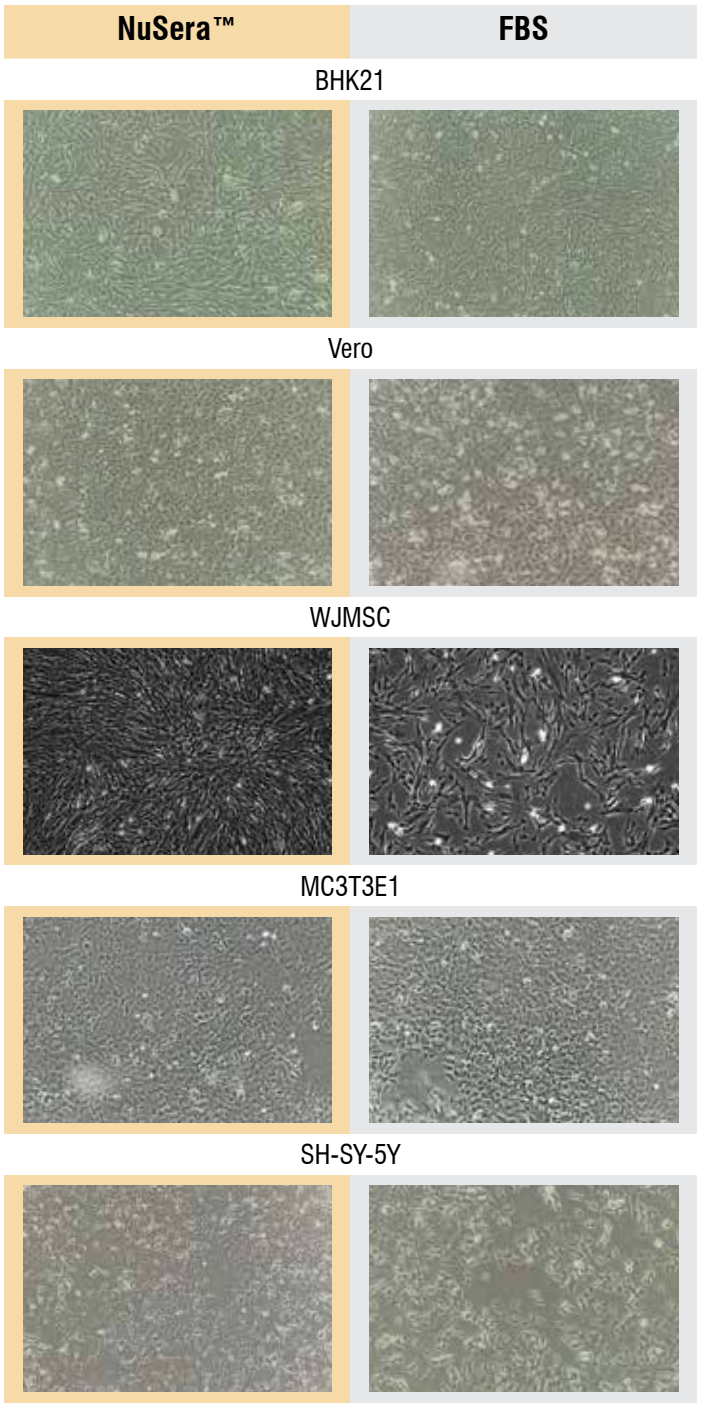
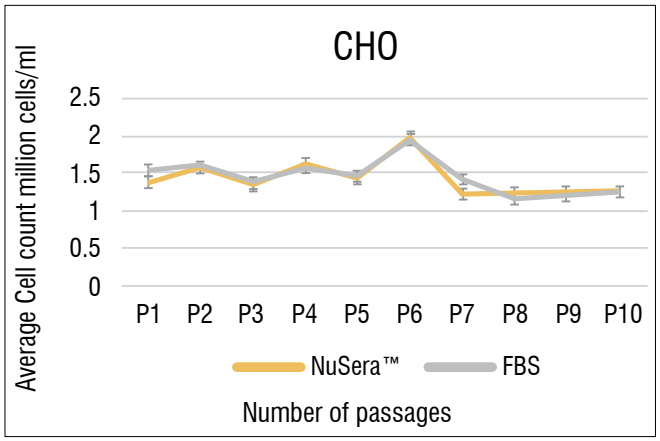
Growth Promotion

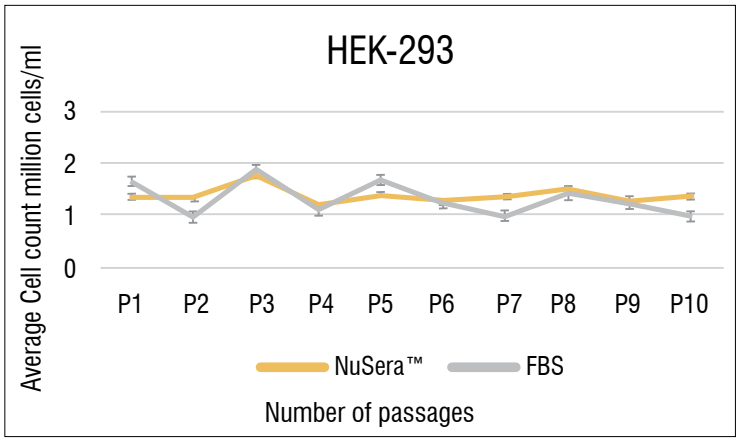


Growth promtion capacity of NuSera™ Vs FBS

Each cell line was seeded in 96WP at a fixed cell density, incubted at 37°C, 5 % CO_2. Cell density was determined after every 24 hours. Peak cell densities are represented in the graphs given above.



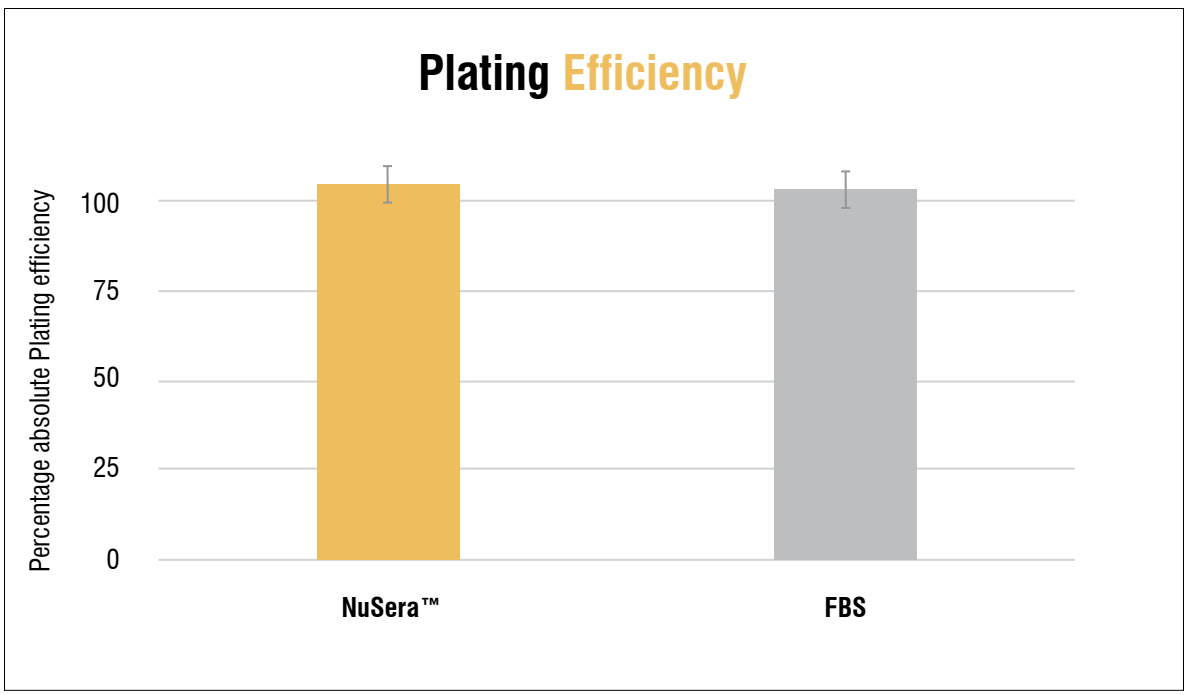
Cell Morphology



Cell morphology in NuSera™ Vs FBS supplemented cultures

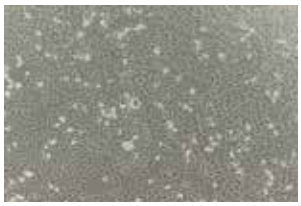
Phase contrast (10X) images of representative cell lines cultured in NuSera™ and FBS supplemented media.

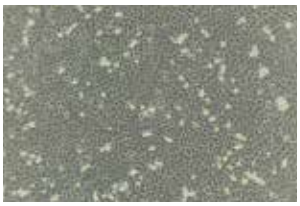
Long-term Proliferation

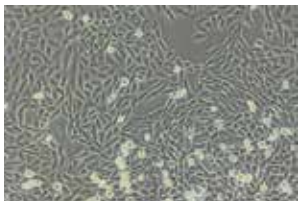


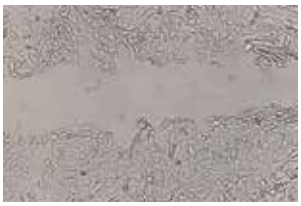
Long-term Proliferation in NuSera™ vs FBS

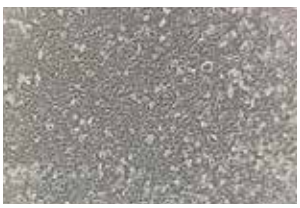
Long term proliferation ability of NuSera™ serum replacement solution was determined by maintaining CHO and HEK cells till passage 10. NuSera™ provide favorable conditions long-term proliferation of CHO & HEK-293 cells

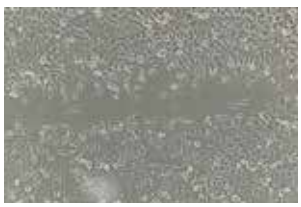


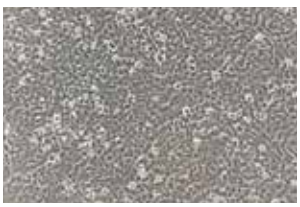












Plating Efficiency

Plating Efficiency in NuSera™ vs FBS

A549 was seeded at density 20 cells/cm2 in 48 well plate. Percentage absolute plating efficiency in A549 cells was high when supplemented with NuSera™

Research Grade & Sure Fetal Bovine Sera

Research Grade, Fetal Bovine Sera

An economical alternative for your research!

HiMedia's Research Grade FBS Sera provides exceptional value and quality for everyday applications. This sera helps to meet your research needs and budget requirements, offering the best value for basic cell culture, specialty research, and specific assays.

Sure Fetal Bovine Sera

Certified serum for commercial applications

Sure Fetal Bovine Sera are manufactured from countries with negligible BSE risk zones following stringent manufacturing and quality control procedures. They are triple 0.1μm sterile filtered with endotoxin not more than 5EU/ml. Suitable for many cell culture applications, this serum is comprehensively tested for performance and quality assurance. This premium FBS grade features sterility test, comprehensive biological testing and includes an extensive array of biochemical profile.

Serum Origin & Significance

Serum is a very complex product and greatly impact the quality and reproducibility of cell culture work. Fetal Bovine Sera (FBS) of different origin are available in the market. Serum origin refers to the country in which the raw blood is collected. It should not be mistaken with the country in which blood is processed.

The World Organization For Animal Health (OiE) evaluates the Geographical BSE Risk. The GBR assessment evaluates the likelihood that an animal within a country or a zone of the country is infected with BSE. For many years US was in the moderate risk category whereas United Kingdom in the highest risk category. The most recent standings of OiE indicates that countries like US, Brazil fall under negligible BSE risk just like Australia and New Zealand whereas zones of UK – England and Wales fall under controlled BSE risk.

New Zealand & Australian Sera

Australian Origin Sera is sourced from Australian abattoirs approved by the U.S. Department of Agriculture (USDA) or Australian Quarantine and Inspection Service (AQIS). Australia is an isolated continent, thus making animal disease and control management easier than in most areas of the world. Their methods of animal husbandry exhibit excellent animal nutrition and healthcare. As a result, Australia is recognized by the United States Department of Agriculture as being free of Foot and Mouth Disease (FMD), Rinderpest, Swine Vesicular Disease (SVD) and Bovine Spongiform Encephalopathy (BSE).

BSE Risk Status	*Countries*
Negligible BSE risk	Argentina, Australia, Austria, Belgium, Brazil, Bulgaria, Chile, Colombia, Costa Rica, Denmark, Germany, India, Israel, Italy, Japan, Korea, Mexico, New Zealand, Nicaragua, Panama, Paraguay, Peru, Poland, Portugal, Singapore, Spain, Sweden, Switzerland, Netherlands, United States of America, Urugway
Controlled BSE risk	Canada, Chinese Taipei, France, Greece, Ireland

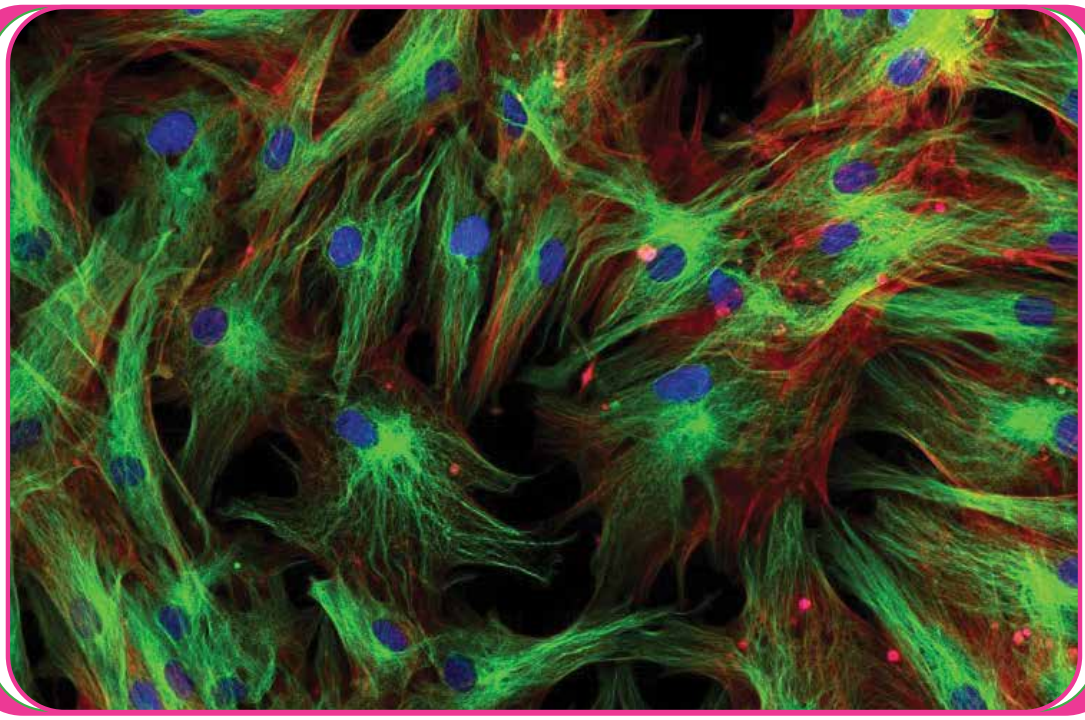
Stem Cells and Primary Cells

HiMedia offers a comprehensive array of Stem Cells and Primary Cells which have distinct advantage of being representatives of **Indian genetic pool**, **ethically approved**, **affordable**. We supply cells after stringent Quality Control and Performance Testing, thereby, assuring the purity and performance of cells. To ensure that viability of cells is not compromised during transport, we transport the cryopreserved cells in **dry vapor shipper** and **liquid nitrogen**.



Stem Cells : HiMedia provides HiFi™ Mesenchymal Stem Cells isolated from four sources - Wharton's Jelly, Adipose Tissue, Dental Pulp and Bone Marrow. For successful culture of these cells, we offer specialized media in form of classical, reduced serum, serum-free and xeno-free formulations. Along with that we provide HiDiff™ Differentiation Media for differentiation of stem cells into specific lineages and their corresponding lineage specific EZstain™ Staining Kits.

Primary Cells : Primary Cells are ideal systems for variety of applications such as drug discovery and drug development, high throughput screening assays, development of therapeutics for pharma, biopharma and academic research. The Primary Cells retain *in vivo* properties of tissue more closely as compared to continuous secondary cell lines. We have a broad portfolio of human Primary Cells which includes Endothelial Cells (umbilical vein and artery), Fibroblast Cells, Keratinocytes and Melanocytes, Peripheral Blood Mononuclear Cells (PBMCs) and Mmammary Epithelial Cells. HiMedia is also offering subtypes of PBMCs which includes T Cells (CD3+,CD4+ and CD8+), NK Cells, Dendritic Cells and Monocytes. Prescreened Human Umbilical Cord Endothelial Cells (HUVEC) for VEGF response are also available to study angiogenesis and tube formation assay.

Primary Cell Platform is further extended to Cryopreserved Primary Hepatocytes from human as well as animal source.

We offer both fresh as well as Cryopreserved Primary Cells and required cell density which can be customized as per user request.

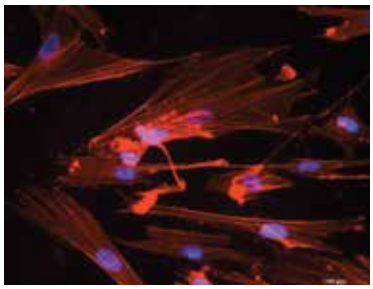
HIMEDIA®



Mesenchymal Stem Cell (MSC) Platform

HiFi™ cells are performance tested using HiMedia media and reagents. We recommend using the product codes mentioned in individual product datasheets for optimum performance and reliability. Users must ensure proper handling, storage and use of the product. HiMedia is not liable for any damage to the culture arising from improper storage or mishandling. We DO NOT guarantee the performance of cells if any modifications are made to the mentioned protocols.

- Post-thaw viability > 80%.
- Characterized by marker expression of $CD90^+$, $CD105^+$, $CD34^-$, $CD45^-$ using FACS and immunocytochemistry of $CD90^+$
- Ability of adipogenic, osteogenic and chondrogenic differentiation
- Sterility tested

HWJ-MSC immunostained with CD90-FITC antibody (10X)

Expansion and Differentiation media with
- Consistent performance
- High expansion capacity
- Efficient differentiation capacity
- Ability to retain Stem cell markers

HWJ-MSC immunostained with a-Actin-PE antibody 20X

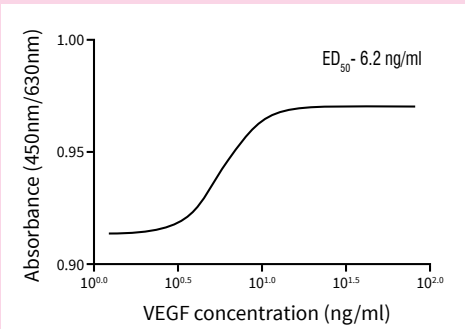
Endothelial Cell Platform

Pre-screened HUVEC for VEGF Signaling & Angiogenesis



Morphogenesis of HiFi™ Human Umbilical Vein Endothelial Cells (HUVEC), prescreened for VEGF Signaling
Cells were plated on wells precoated with Extracellular Matrix Gel and grown for 18 hours
1A, 1B, 1C - Tube formation in Untreated, VEGF treated and Angiogenesis inhibitor treated HUVEC - Phase contrast (4X)
2A, 2B, 2C - Tube formation in Untreated, VEGF treated and Angiogenesis inhibitor treated HUVEC stained with Calcein AM (4X)

- Qualified for stimulus dependent Angiogenesis & key endothelial signaling for VEGFR response
- Ready to use cells for drug response, Cell migration, Tube formation and Invasion assays
- Ideal model for pharmacological investigation, regenerative medicine and pathological stimuli

smarT™

T Cell Expansion Medium

A Complete, Serum free (SF), Xeno-free (XF) system for in vitro culture of human T cells

Manufactured in GMP, ISO13485 and ISO 9001 certified facility

Serum Free, Xeno Free medium

Robust growth and expansion capacity

Define medium- enhances reproducibility

HIMEDIA®

Activation potential

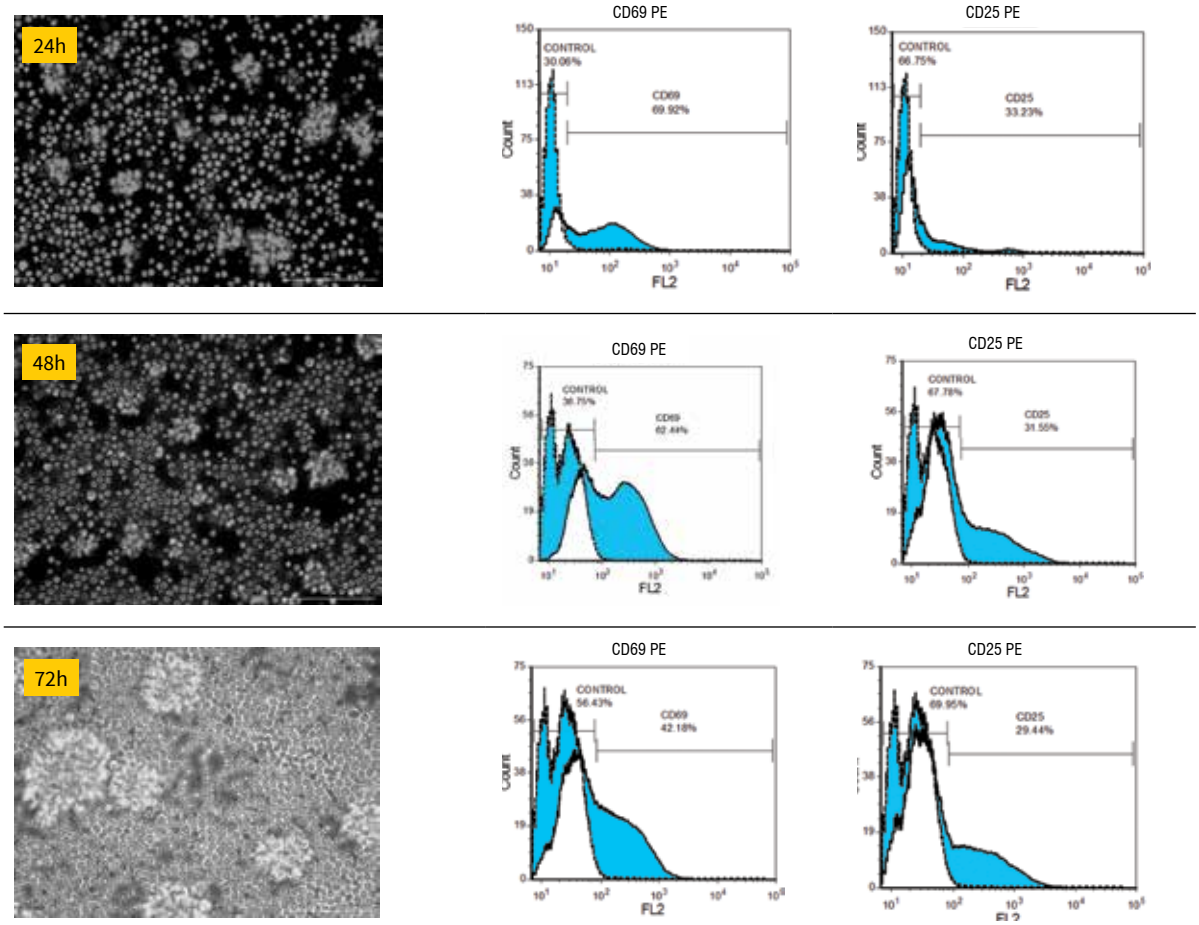

Fig 1 : T cells isolated from Peripheral Blood Mononuclear cells showing activation by adding human anti-CD3/ OKT3 clone and anti-CD28 antibody for 24h, 48h and 72h. T cells were visualized under microscope and activation was checked on flow cytometer by surface expression of CD69 and CD25.

Peripheral Blood Cell Platform

Characterized PBMCs and pure subpopulations for ADCC and reporter assays

Fresh

PBMC's

at your

doorstep for

Bioassays

More than 90% viability

More than 90% Pure population

Tested for Mycoplasma, HIV, HBV, HCV

Normal Human PBMCs

Comprehensive portfolio of normal peripheral blood mononuclear cells (PMBCs)

Isolated from healthy donors

PBMCs, Single donor

Available 2 billion PBMCs

Purified Cell Subsets

Ideal for biopharma researchers to perform functional cell based assays

Manufactured using optimized methods to ensure high purity

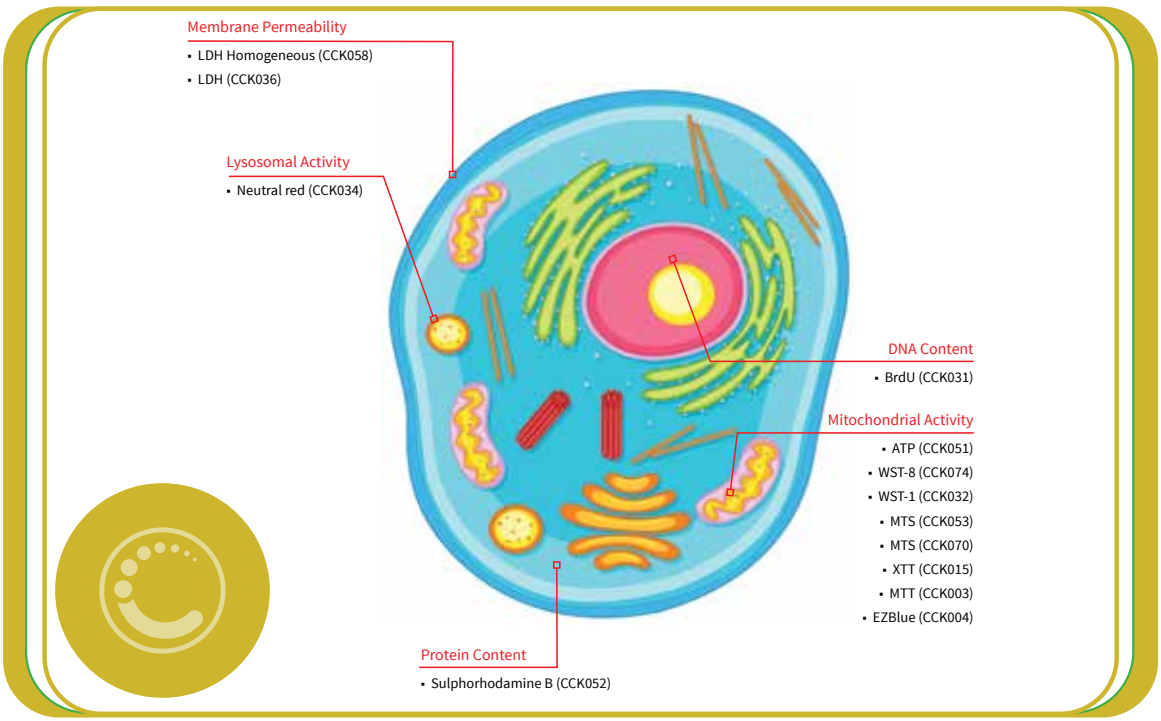
Cell Analysis and Detection Solutions



The broad range of cell based assays offered by HiMedia gives researchers tools to study extensively the aspects of cytotoxicity, cell cycle, enzymology and cell signaling.

We provide accurate, sensitive and reliable detection methods and robust and successful elimination methods for mycoplasma contamination in cell cultures.

Our catalog includes a number of stains and indicators dyes including nuclear and cytoplasmic stains, DNA/ RNA-binding stains, viability stains or stains specific to any cell organelle used in cell culture on routine basis for particular applications.

Manual errors, person-to-person variation, inability to count aggregates, makes cell counting one of the most critical challenge in cell culture. To help cell biologists circumvent this challenge, we have introduced CASY - a robust, reproducible and reliable cell counter based on the principle of electrical current exclusion, CASY tracks all relevant parameters of cell culture including cell count, cell viability, cell size and aggregation at extremely low running costs. With a detection range of 0.7 to 120 µm, this is the only machine in the market that counts mammalian cells and stem cells as well as bacteria, yeast, algae, parasites, sperms etc. We guarantee CASY's legendary reliability as it comes with as certified life time calibration, integrated QA system, GLP/GMP compliance and 21 CFR Part 11 compliance.

Bioprocess involve wide range of cell viability/cytotoxicity kits to check the efficacy of biosimilars. EZcount™ range of cell viability kits offer a wide range of ready to use reagents and standards needed for detection. The family of kits offers tools for flexible assay designs to evaluate compound effects in end-point assays or for long term studies in live cells. Operating instructions provided are simple to follow, accurate and ensure consistent repeatable results.

EZcount™ MTS Homogenous Cell Assay Kit	CCK070		Colorimetric detection: Absorbance at 490nm	125 cells per well	1000
EZcount™ XTT Cell Assay Kit	CCK015		Colorimetric detection: Absorbance at 450 - 490nm	125 cells per well	1000
EZcount™ MTT Cell Assay Kit	CCK003		Colorimetric detection: Absorbance at 570nm	750 cells per well	1000
EZ Blue™ Cell Assay Kit	CCK004	Reduction of Resazurin to Resorufin by NADH equivalents in live cells	Colorimetric detection: Absorbance at 570 – 580nm Fluorometric detection: 560nm EX /590nm EM	2000 cells per well	1000, 2500
Cell viability kits based on nuclear DNA content					
EZcount™ BrdU Cell Assay Kit	CCK031	Detection of BrdU incorporated into DNA by anti-BrdU-HRP	Colorimetric detection: Absorbance at 450 nm	500 cells per well	1000
Cell viability kits based on detection of intracellular components					
EZcount™ Sulphorhodamine B Cell Assay Kit	CCK052	Sulphorhodamine B staining of intracellular proteins	Colorimetric detection: Absorbance at 565nm OR 490 – 530nm	5000 cells per well	1000
EZcount™ Neutral Red Cell Assay Kit	CCK034	Neutral red uptake by cellular lysosomes	Colorimetric detection: Absorbance at 540nm	5000 cells per well	1000
Cell cytotoxicity kits based on enzyme release					
EZcount™ Lactate Dehydrogenase Cell Assay Kit	CCK036	Conversion of lactate to pyruvate catalyzed by LDH released from damaged cells	Absorbance @ 490nm	1000 cells per well	500
EZcount™ LDH Cell Assay Kit, Homogeneous	CCK058		Absorbance @ 570nm	1000 cells per well	500
EZcount™ G6PD Cell Assay Kit	CCK069	Conversion of lactate to pyruvate catalyzed by G6PD released from damaged cells	Absorbance 540nm and Fluorescence590nm Colorimetric/ Fluorometric	1000 cells per well	500

EZAssay™ Alkaline Phosphatase Activity Estimation Kit	CCK035-100	100 tests in 1ml tube format	19120
EZAssay™ Glutamine Glutamate Determination Kit	CCK037-100	Kit for 100 tests in 1ml tube format	47210
EZAssay™ TBARS Estimation Kit for Lipid Peroxidation	CCK023-100	Kit for 100 tests in 1ml tube format	10305
EZAssay™ GST Activity Estimation Kit	CCK028-100	Kit for 100 tests in 1ml tube format	10875
Cell Cycle Analysis Kits			
EZdetect™ Cell Senescence Detection Kit Senescent cells exhibit acidic ß-Galactosidase activity *in vitro*. EZdetect™ Cell Senescence Detection Kit is a easy-to-use kit designed for in vitro detection of senescent cells based on senescence associated b-Gal activity (SA-ß-Gal). ß-galactosidase hydrolyzes X-gal and makes the senescent cells appear blue coloured.	CCK063-100	Kit for 100 tests in a 35mm dish	12595
EZAssay™ Mitochondrial Membrane Potential Assay Kit with JC-1 This kit contains JC-1, a cationic dye that accumulates in mitochondria. In absence of Mitochondrial Membrane Potential (MMP), cells fluoresce green and metabolically active mitochondria fluoresce red. It is used for monitoring, screening apoptosis inhibitors and activators.	CCK079-200	Kit for 200 tests in 96 well	13740
Cell Signalling Kits			
EZAssay™ Nitric Oxide Estimation Kit EZAssay™ Nitric Oxide Estimation Kit is an easy to use kit for estimation of nitric oxide based on Griess reagent system by spectrophotometric method. Nitric oxide rapidly degrades in aqueous solution to form nitrate and nitrite. The kit estimates total nitric oxide by estimating both nitrate and nitrite.	CCK061-200	Kit for 200 tests in 96 well format	9620

Antioxidant Estimation Kits			
EZAssay™ Antioxidant Activity Estimation Kit (CUPRAC) This kit is based on ability of antioxidants in the sample to reduce copper(II)-chromogen oxidant complex. Absorbance of the reduced copper(II)-chromogen complex is indicative of antioxidant capacity of the test sample. The kit can be used for estimation of total antioxidant capacity of biological samples such as serum, plasma, tissue homogenates and cell lysates.	CCK071-200	Kit for 200 tests in 96 well format	11680
EZAssay™ Antioxidant Activity Estimation Kit (FRAP) This kit is based on ability of antioxidants in the sample to reduce Ferric(III)-chromogen oxidant colourless complex to blue colored Ferrous (II)-chromogen complex . Absorbance of the reduced complex is indicative of antioxidant capacity of the test sample. The kit can be used for estimation of total antioxidant capacity of biological samples such as serum, plasma, tissue homogenates and cell lysates.	CCK072-200	Kit for 200 tests in 96 well format	11680
EZAssay™ Reactive Oxygen Species Assay Kit (FRAP) This kit is based on fluorogenic dye that measures hydroxyl, peroxyl and other reactive oxygen species (ROS) activity within the cell.	CCK078-200	Kit for 200 tests in 96 well format	11910

Mycoplasma Detection and Elimination Platform

"MYCOPLASMA A THREAT..."

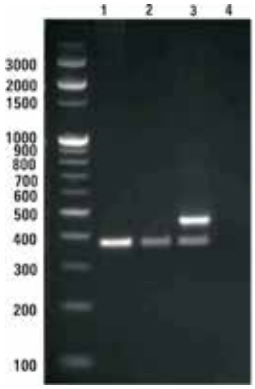
Erroneus result of cell based assays

Reduced reproducibility of experiments

Decreased productivity of your cell lines

"Test your cultures before they test your patience"

WANT TO PUBLISH YOUR RESULTS IN A HIGH IMPACT JOURNAL



15 - 35% continuous cell lines, 5% early passage cell cultures, 1% primary cell cultures are infected with Mycoplasma.

Regular testing is a recommendation and a mandatory requirement of many reputed journals.

EZdetect™ PCR kit for Mycoplasma detection **Based on 16S-23S rRNA spacer region** Kit Contents: a) Lysis Buffer b) Primer Mix c) dNTP Mix d) Magnesium chloride solution e) Taq polymerase f) Water (DNAse, RNAse free) g) Positive Control DNA	**CCK009-25R**	**Kit for 25 reactions**	**11670**

1.. Positive Control
2. Positive sample infected with 1 species
3. Positive sample infected with 2 species
4. Negative Control

Gel run in 1X TAE buffer showing amplification of positive DNA (*M. Hominis* gDNA) and mycoplasma from infected cultures.

EZdetect™ PCR kit for Mycoplasma detection **Based on 16S rRNA sequence** Kit Contents: a) PCR Master Mix b) Taq polymerase c) Positive DNA Control d) Water (DNAse and RNAse free)	**CCK022-25R**	**Kit for 25 reactions**	**11670**

1. Test Sample Infected with mycoplasma

CELL CULTURE TESTED CHEMICAL

HiMedia supplies a comprehensive range of chemicals and specialty chemicals that are tested for cell culture applications. Our product portfolio also includes chemicals meeting United States Pharmacopoeia (USP), European Pharmacopoeia (EP), British Pharmacopoeia (BP) Japanese Pharmacopoeia (JP) and Indian Pharmacopoeia (IP) testing specifications.

Cell Culture Tested Chemicals

HiMedia is one of the leading supplier of comprehensive range of chemicals and specialty chemicals including amino acids, antibiotics, growth factors, biochemicals, cell dissociation and cryopreservation reagents used in cell culture. These chemicals apart from the analytical testing undergo cell culture test to verify their suitability in cell culture application.

In view of the challenges that some companies face in responding to an increasingly complex regulatory compliance, we provide quality grade chemicals meeting United States Pharmacopoeia (USP), European Pharmacopoeia, British Pharmacopoeia (EP), Japanese Pharmacopoeia and Indian Pharmacopoeia testing specifications. Every lot released for supply is provided with a detailed Certificate of Analysis (COA) defining the product specifications.

Multicompendial Biopharmaceutical Grade Chemicals are

- USP, EP, JP, BP & IP compliant
- Reduce regulatory hassles
- Complete documentation available
- Guaranteed quality and consistency

Sterile Tissue Culture Flasks

- Manufactured from optically clear **virgin polystyrene**
- Sterilized by gamma irradiation
- Non-pyrogenic, Non-toxic, DNase-RNase free
- Available as surface-treated and non-treated flasks for adherent and suspension cells respectively
- Optically clear and flat polystyrene surface of flasks ensures distortion free viewing of cells
- Frosted area provided on side of flask for easy labeling
- Two different cap styles can be used in both open and closed systems

  Closed Cap: Standard polyethylene caps for use of flasks in closed systems. Can also be used in open systems by keeping one thread loose

  Vented Cap: Vented polyethylene caps with a 0.22 μm hydrophobic filter to allow gas exchange and minimize risk of cross-contamination

HiFactory™

HiFactory™ systems are compact, multi-layered single use sytems for easy scale up of cell culture. These systems are mostly used in commercial production of vaccines & monoclonal antibodies.

- Made up of **high clarity polystyrene**
- Sterilized by electron beam (E-beam sterilization)
- Thin wall design to reduce edge effect
- Surface treated with vacuum plasma for better cell attachment
- Reduced risk of contamination
- Available in 4 chamber sizes - 1, 2, 5 and 10
- Wide mouth with non-reversible lids to prevent cross-contamination
- Culture area of bottom layer : 647cm²
- Culture area of upper layers : 632cm² per layer
- Height of each layer : 14.5mm
- Non-pyrogenic

Sterile Tissue Culture Roller Bottle

Roller bottles are large culture vessels used in research and manufacturing where large yield of cell growth and multiplication is required.

Packaging information

- Individually packed in easy-to-open bag to assure sterility.
- Every pack is properly labeled with lot number for quality traceability.

General information

- Available as surface-treated for adherent and non-treated for suspension cells with volume capacity 2000ml.
- Available cell growth area for adherent cells is 750cm², 850cm² & 1900cm².
- Specially designed large knurls on the cap for easy grip.
- Two different cap styles available for both open and closed culture systems.
- Smooth and striation free bottle surface to get maximum usable area for growth. Silk-printed graduation on bottle.
- Suitable for all the common instruments and automation.
- Sterilized by gamma irradiation.
- Non-autoclavable & Non-pyrogenic.

Sterile Tissue Culture Multiwell Plates

General information

- Made up of ultra clear 100% **virgin polystyrene**
- Sterilized by gamma irradiation
- Non-pyrogenic, non-toxic, DNase-RNase free
- Available as surface-treated for adherent and non-treated for suspension cells
- Striation free and flat well bottom to get maximum usable growth area and transparency
- Individual alphanumerical codes for well identification
- Non-reversible lids with condensation rings to prevent contamination
- Suitable for all common instruments and automation

For Suspension Cells Non-treated Plates

Cell Culture Scaffold

- 3D scaffold for cell culture enables to simulate the three-dimensional structure of the cells in a laboratory. It provides an ideal environment for the interaction between cells and greatly improves the culture area the cell yield.
- Made of **polystyrene (GPPS)**, a high molecular material, with highly hydrophilic surface for adherent culture
- Pores with high connectivity, facilitating nutrient absorption and metabolism
- Scaffolds available in two culture vessels - Dishes and Multi-well plates
- Sterilized by gamma irradiation
- Non-pyrogenic
- DNase/RNase-free

Sterile Bioreactor Tubes

- A convenient and economical option for small scale suspension cultures and centrifuge in one tube
- Manufactured from high quality **polypropylene**
- Caps with ultrasonically welded 0.22micron hydrophobic membrane to allow gas exchange
- Frosted area for writing along with Graduations on tube
- Leak proof
- Sterilized by gamma irradiation

Sterile Centrifuge Tubes

- Tubes made up of **polypropylene** and caps made up of **HDPE**
- Sterilized by gamma irradiation
- Printed graduations and large white marking spots for writing
- Available in two capacities - 15ml and 50ml
- Non-toxic, DNase - RNase free

Sterile Erlenmeyer Flasks

- Made up of **Polyethylene terephthalate glycol (PETG) & Polycarbonate**.
- Sterilized by gamma irradiation.
- Individually packed.
- Non-pyrogenic, non-toxic, DNase-RNase free.
- Ideal for shaker culture applications, liquid handling and storage.
- Available in 2 bottom options - Plain bottom and Baffled bottom.
- Bottom baffles interrupt the circular flow to create a turbulent flow. This leads to increase in gas exchange surface of liquid thereby increasing the oxygen intake.
- Two cap styles: Vented caps & Non-vented caps
- Unbreakable.
- Molded-in graduations for accuracy.

Sterile IVF Culture Dish

IVF culture dishes are used for *in vitro* fertilization.

- Made of **optical grade polystyrene** for clear microscopic observation
- Sterilized by gamma irradiation
- Easy grip for secure handling
- Non-pyrogenic, Non-toxic, DNase/RNase free
- Embryo-tested

Insect Breeding Dishes

Insect Breeding Dishes are used for breeding and observation of micro insects.

- Made of **polystyrene**
- Available in two forms - square and circular
- Mesh on cap for ventilation and prevention of escape of insects
- Ventilation hole on the cover enables excellent air circulation and easy humidity control

Cryogenic Storage

Cryovial, Sterile | Freezing Tubes

Cryovials, Sterile

Cryovials are designed for storage of cells, specimens and solutions in liquid nitrogen and ultra low freezers.

- Made up of **polypropylene** (PP) USP grade VI
- Sterilized by electron beam (E-beam sterilization)
- Can withstand temperature up to -196°C
- Available in two types of cap designs - Internally threaded (cap has a silicone ring around) and Externally threaded (cap without silicone ring)
- Self-standing type
- Easy to read graduations
- Frosted area for writing
- Non-pyrogenic
- DNase/RNase free

Freezing Tubes

- Made from durable **polypropylene** and **polyethylene**
- Sterilized by gamma irradiation
- Available in 4 different volumes - 0.5ml, 1.5ml, 1.8ml and 5.0ml
- Freezable at -80°C
- Not suitable for storage in liquid nitrogen
- Specially designed interlocking cap which fits exactly to ensure sterility
- Easy to read graduations with ±2% accuracy
- Frosted area for writing
- Leak proof
- Non-pyrogenic, non-toxic
- Autoclavable

Disposable Serological Pipettes (Narrow Tip), Individually Packed

Serological Pipettes are ideal for accurate liquid transfer or mixing.

- Made up of **polystyrene**
- Sterilized by gamma irradiation
- Non-pyrogenic, Non-toxic
- 1ml, 2ml and 5ml are stretched while 10ml, 25ml and 50ml are ultrasonically welded at the tip and mouthpiece
- Colour coded ring for easy identification
- Graduations are calibrated for accurate dispensing within ± 2%
- Bidirectional graduations on the pipette provide added applicability
- Negative graduation allows additional working volume
- All pipettes are supplied with a filter plug
- Leakage tested
- Universal design which makes the pipettes suitable for most brands of pipette aids

Auto HiPette™

AutoHiPette™ provides a convenient aid for dispensing liquid from glass and serological pipettes.

- Has a safety valve and hydrophobic filters that provide protection against fluid penetration
- Three different speed modes- High, Low and Gravity Drain
- Provide better control of speed (convenience of fine-tuning pump speed)
- Cadmium-free environment-friendly NiMH batteries (extended operational life)
- Ease of changing batteries
- Has a low battery indicator

Sterile Polycarbonate Bottles

Features:

- Bottle made up of **Polycarbonate** with **Polypropylene** cap.
- Sterilized by gamma irradiation.
- Gamma indicator sticker available in individual bottle.
- Available in three sizes - 125 ml, 250 ml and 500 ml.
- Graduations on the bottle.
- Autoclavable 1 - 2 times.

Applications:

- Water collection in pharmaceutical, beverages and processed food industry.
- Individually packed and pre-sterilized prevents cross contamination of sample.
- Good choice for short term media storage and containing other aqueous solutions.
- Polycarbonate bottles remain impact resistant down to -135°C and are usable to +135°C, making them suitable for use from the freezer to the autoclave.
- Polycarbonate bottles are chemically compatible with weak acids, alcohols and aliphatic hydrocarbons. They are not suited for exposure to bases, solvents or other aggressive lab chemicals which may cause immediate damage or product failure.

- Available in 5 different volumes 150ml, 250ml, 500ml, 1000ml and 2000ml
- Chemical resistant and light weight
- Edge knurls on the cap for easy grip
- Specially designed wide mouth for efficient and stable pouring
- Engraved graduation

Sterile Polyethylene Terephthalate G Copolyester (PETG) Bottles

Smart choice for storage and sampling of active pharmaceutical ingredients and bulk intermediates

Choose Best. Choose Us.

01

SPECIALLY DESIGNED

- The bottle body is square, easy to hold, easy to store; surface is smooth and shiny
- Durable & tough with good chemical resistance

02

STERILIZATION

- Sterility Assurance Level (SAL) of 10^{-6}
- Non-Pyrogenic, DNase & RNase free
- Endotoxin level of NMT 0.5 EU/mL

03

VOLUME CAPACITY

- Six volume capacities available 30ml, 60ml, 125ml, 250ml, 500ml and 1000ml

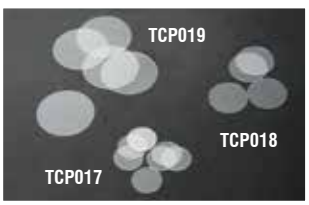
Cell Scraper | Coverslips | Cell Strainer | Cell Culture Insert | Microtube Rack

Sterile Cell Scraper



Cell scrapers are used for mechanical harvesting of cells from flasks.

- Sterilized by gamma irradiation
- Pivoting blades of cell scrapers enable precise scraping of cells from surface of the vessel
- Non-pyrogenic, non-toxic, DNase-RNase free
- Polystyrene handle
- Free rotating blade to twist to the desired direction
- Total access to all corner
- Non-pyrogenic

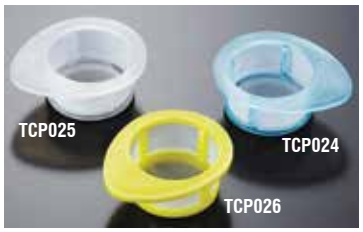
Coverslips



Coverslips are used to culture cells on an optical surface which facilitates staining and fixation of cultured cells for microscopy.

- Available in 3 sizes - 15mm, 20mm and 25 mm
- Resistant to breakage & Chemically inert
- Surface treated
- Sterilized by irradiation with Ethylene-oxide gas & Non-autoclavable

Sterile Cell Strainer

Cell strainers are sterile, easy to use devices for obtaining uniform cell suspension from tissues. It is used as a faster and easier alternative to gauze filtration.

- Strainer made up of nylon mesh with evenly spaced pores and frame made up of polypropylene
- Sterilized by gamma irradiation
- Available in 3 pore sizes - 40μm, 70μm & 100μm
- Designed to fit perfectly into 50ml centrifuge tube
- Extended lip on strainer enables aseptic handling with forceps
- Non-pyrogenic, non-toxic, DNase-RNase free

Applications

- Ideal for preparation of flow cytometry samples such as
  - Single cell suspensions of blood cells from marrow, pancreas, thymus, tonsil and lymph nodes
  - Stem cells and cancer cells
  - Preparation of specimens for primary cell cultures and immunogens
- Filtering agglutinative proteins produced in inactivation of serum

Sterile Cell Culture Insert

- Available in two membrane types - **Polycarbonate** membrane (PC) and **Polyester** membrane (PE)
- Frame material is made of **crystal-grade polystyrene**
- Available in three membrane diameters - 6.5mm, 12mm and 24mm
- Available in five pore sizes- 0.1μm, 0.4μm, 3.0μm, 1.0μm and 8.0μm
- Packaged with multiwell plates : 6 well, 12 well and 24 well
- Distance from membrane to the bottom of the well is 0.8 ~ 1mm
- Nominal membrane thickness of 7 ~ 10μm
- Sterilized by gamma irradiation
- Widely used in experiments of invasion, migration, transportation, drug uptake, epithelial polarization, chemotaxis, co-culture experiment, toxicity study and modeling of *in vivo* barrier

Cell culture inserts closely mimic *in vivo* environment enabling cells to uptake medium from their apical as well as basolateral surface.

Polycarbonate membrane (PC) - Thin and semi transparent membrane for microscopic work

Polyester membrane (PE) - Thin, microporous polyester membrane with high degree of chemical resistance and low protein binding

CryoLITE™

DMSO free formulation for cryopreservation of your most precious cells

- DMSO-free
- Animal protein free
- High post thaw recovery/ viability
- Effective for freezing of MSCs & Primary cells
- Maintain trilineage differentiation
- Ready to use

CryoLITE was found to be as effective as the competitor in terms of post-thaw viability on various primary cells, stem cells, and cell lines

Industrial Applications

- **Analytical Sample Preparation**

  Clean samples help to get quality result and quality results helps your decision.

  Sample Preparation is the first step of analysis (HPLC, GC, etc..)

- **Sterility Testing**

  Sterility testing is an important quality control procedure in pharmaceutical, food and beverage industry. Membrane filtration is the method of choice for testing of pharmaceuticals that contain antimicrobial agents since it permits removal of contaminants from the product for viability testing.

- **Cell Culture Laboratories**

  The nutrient media which supports the growth of cells in culture also provides optimal growth nutrients to contaminants when introduced unknowingly. This can lead to loss of precious cultures of weeks or even months. While following aseptic techniques is the primary solution to contamination, sterilizing liquids can also help in achieving this goal. As autoclaving destroys some of the critical cell culture media components and biomolecules, sterilization by filtration is the preferred choice of method for researchers all over the world.

- **Brewing Industry**

  Membrane filtration is used in brewing industry primarily to increase the keeping qualities of product during storage at room temperature. It eliminates the need for heat pasteurization of the final product.

- **Clarification and stabilization of wine**

  Membrane filtration is used for removal of bacteria, yeasts and potential spoilage organisms from wine. Filtration also increases product clarity.

- **Microscopy**

  Particles from gas or liquids can be trapped on filter surface and used to study and quantify particulates by microscopic techniques.

- **Viability counting**

  If density of organisms in the process fluid is very low, it is not possible to count them by microscopy. In such case, the material to be tested is passed through the filter and the organisms are retained on the surface of the filter. Filter is then placed upon a culture medium and viable microorganisms retained on filter grow into colonies.

- **Cleaning gases by filtration**

  For a wide variety of purposes in the laboratory and industry it is necessary to have air or gases that have been scrubbed clean of particulates. Membrane filters of appropriate pore size are widely used for gas filtration.

Pollution monitoring

- **Microbiological examination of water**

  The membrane filter technique is legally recognized for checking the quality of drinking water and surface waters that might come in contact with humans.

- **Virus detection in water**

  For detection of viruses from large volumes of water, membrane with extremely small pore sizes are used.

- **Air filtration and air pollution analysis**

  Air sampling is a routinely performed practice to analyze microbial load in air. Personnel air sampler is widely used for personnel monitoring, especially where workers are at high risk of exposure to hazardous particulate materials such as asbestos, cotton, coal, cement, sand etc.

Biomedical and analytical uses

- ▶ Chemotaxis and leukocyte migration
- ▶ Cell growth synchronization
- ▶ Cells size fractionation
- ▶ Harvesting and concentrating microorganisms
- ▶ HPLC sample preparation

Fermentation Technology

Fermentation requires continuous addition of considerable quantities of sterile air, gases, acids, bases, antifoam and nutrient feeds. These additions are performed through the inlet ports fitted with sterile membranes. In addition to the inlet ports, the outlet ports meant for venting exhaust gases and sampling ports meant for removal of analytical samples are also equipped with sterile membrane filters.

Cellulose-Acetate Membranes: 47mm, Sterile

- Cellulose acetate membrane exhibit low protein binding capacity.
- They are hydrophilic making them suitable for aqueous and alcoholic media.
- Shows improved solvent resistance and high thermal stability with very low adsorption characteristics.
- Ideally suited for general filtration and biological/clinical analysis requiring maximum protein recovery.

Applications

- Filtration of Aqueous Solutions (e.g. media, buffer)
- Air/Gas Filtration.

Cellulose Nitrate Membranes: 47mm , Sterile

- Cellulose nitrate material assures effective retention with high flow rates
- Fine, uniform pore structure and high, non-specific adsorption

Applications

- Large pore size (≥1.2µm)- Cell retention, diagnostic kits, particle retention, clear filtration
- Small pore size (< 1.2µm) - Sterile filtration of reagents and liquids

Gridded Cellulose Nitrate Membranes: 47mm, Sterile

Ensure optimum retention of microorganisms

- Used for microbial testing of water, beverages and food samples
- Grids make counting easier
- Excellent for retention of yeasts and molds
- Microsopic observation of particle/microorganisms
- Enables easy and reliable counting and identifiation of colonies and particles.
- Defined article retention, consistent recovery rates for microorganisms

Cellulose Nitrate Membranes with hydrophobic edge: 47mm, Sterile

- Used for microbial testing of samples that contain inhibitors such as antibiotics, drugs, disinfectants, etc
- 6mm hydrophobic edge prevents diffusion of inhibitor into hydrophilic portion of membrane
- Complete removal of inhibitor can be achieved during flushing
- Improved sensitivity and reliability due to unaffected microbial growth

Specifications of Cellulose nitrate membranes with hydrophobic edge

MCE Membranes: 47mm, Sterile

Wide solvent compatibility

- MCE membranes are naturally low in metal background.
- They are compatible with dilute bases and acids and aromatic and aliphatic hydrocarbons.
- These hydrophilic filters are availble in various pore sizes and are autoclavable.
- High recovery rates, but its high porosity provides superior flowrates as well.
- High protein binding, uniform pore structure with consistent thickness.
- Comes pre-sterilized in individual packing.

Applications

- Air monitoring
- Clarification
- Particle analysis
- Bacteriological analysis
- Filter Sterilizing

Nylon-66 membranes: 47mm, Sterile

Ensures high reliability & accuracy

- Types:
  1) Standard : Double layered, hydrophilic and biologically inert
  2) HPLC Grade : Hydrophilic, biologically inert, used for HPLC sample preparation
- Available in 6 different diameters each with 3 pore sizes
- Wide chemical compatibility
- Autoclavable

PVDF Membranes: 47mm, Sterile

- Polyvinylidene Fluoride (PVDF) Membranes are their extremely low protein binding capacity.
- They are available in multiple pore sizes.
- PVDF membrane filters are mechanically strong, exhibit superior Chemical resistance & high thermal stability.

Applications:

- Sterilizing filtration
- Filtration of protein-containing solutions
- Mycoplasma reduction
- Filtration of gases
- Venting

PES Membranes: 47mm, Sterile

- PES filter membranes are hydrophilic having low protein binding.
- These filter membranes have the highest filtration capacity.
- Wide range of pore sizes available.
- They are ideal for tissue culture media sterilization, fluid applications and general filtration.

Applications:

- Sterile filtration
- Pharmaceutical filtration
- Bacterial enumeration

PES Membrane Diameter: 47mm, Pore size: 0.22 µm, *Individually Packed	**SF185D-100x1NO**	**100x1no**	**5735**

PES Syringe-driven Filters

- Incorporates hydrophilic PES membrane
- Low protein binding
- High product recovery

Applications:

- Sterilization of tissue culture liquids
- Sterilization and clarification of protein solutions, serum, virus suspensions and other aqueous solutions

Sterile Vacuum-driven Filter

Designed for single use

- Vacuum Filtration Systems come in three volume capacities 150ml, 250ml, 500ml & 1000ml with three membrane pore sizes 0.10μm, 0.22μm, 0.45μm
- Funnel is manufactured from optically clear polystyrene and graduated
- Receiver bottle has ergonomically designed easy grip sidewalls and graduation marks
- Receiver bottle and filter adapter are manufactured from 100% virgin polypropylene
- The filter adaptor is preprinted with filter type and pore size
- Hose connector is designed to accept multiple hose diameter and features easy grip collar to simplify tightening/ loosening and adjustments
- Cap for receiver bottle is sterile and individually wrapped
- Each individual unit is lot-numbered for easy identification and tracking
- Individually wrapped sterile, non-pyrogenic
- For single use only. Cannot be autoclaved

Cellulose Acetate Membranes

Standard Cellulose Acetate Membranes

- Cellulose acetate membrane exhibit low protein binding capacity.
- They are hydrophilic making them suitable for aqueous and alcoholic media.
- Shows improved solvent resistance and high thermal stability with very low adsorption characteristics.
- Ideally suited for general filtration and biological/clinical analysis requiring maximum protein recovery.

Applications

- Filtration of Aqueous Solutions.
- Air/Gas Filtration
- 3 µm, 5 µm - Particle monitoring (Automotive machines)

Cellulose Nitrate Membranes			

Standard Cellulose Nitrate Membranes

- Available in 6 different diameters with 7 different pore sizes
- Cellulose nitrate material assures effective retention with high flow rates
- Fine, uniform pore structure and high, non-specific adsorption
- Can be sterilized by autoclaving as well as dry heat

Applications

- Large pore size (≥1.2µm)- Cell retention, diagnostic kits, particle retention, clear filtration
- Small pore size (< 1.2µm) - Sterile filtration of reagents and liquids
- Sterility testing (bioburden load)
- Water testing

MCE membranes, Non-Sterile

- MCE membranes are naturally low in metal background.
- They are compatible with dilute bases and acids and aromatic and aliphatic hydrocarbons.
- These hydrophilic filters are availble in various pore sizes and are autoclavable.

- Clarification
- Particle analysis
- Bacteriological analysis
- Filter Sterilizing

Nylon-66 membranes

- Types:
  1) Standard : Double layered, hydrophilic and biologically inert
  2) HPLC Grade : Hydrophilic, biologically inert, used for HPLC sample preparation
- Available in 6 different diameters each with 3 pore sizes
- Wide chemical compatibility
- Autoclavable
- Non-shedding in nature and free of leachable wetting agents

Applications

- Filtration
- Sterilization
- Filtration of mobile phase in HPLC processes with aqueous, alkaline & organic samples

PVDF Hydrophilic Membranes, Non-sterile

- Polyvinylidene Fluoride (PVDF) Membranes are their extremely low protein binding capacity.
- They are available in multiple pore sizes.
- PVDF membrane filters are mechanically strong, exhibit superior chemical resistance, and high thermal stability.

Applications:

- HPLC - sample & mobile phase filtration
- Filtration of protein-containing solutions
- Mycoplasma reduction
- Filtration of gases
- Venting (hydrophobic PVDF membranes)

PES Hydrophilic Membranes, Non-sterile

- PES filter membranes are hydrophilic having low protein binding.
- These filter membranes have the highest filtration capacity.
- Wide range of pore sizes available.
- They are ideal for tissue culture media sterilization, fluid applications and general filtration.

Applications:

- Sterile filtration
- Pharmaceutical filtration
- Bacterial enumeration

Glass Fibre Prefilters

- Available in 6 diameters with 2 different pore sizes
- Low hygroscopicity
- Biologically inert with high chemical and thermal resistance
- Unaffected by humidity and can be stored indefinitely
- Effective removal of large volumes of suspended solids from a process and protection of downstream filter membranes from fouling and clogging
- Reduction in cleaning cost

Applications:

- 1.5μm - Clinical specimen filtration
- 2.0μm - Air pollution monitoring
  - Biochemical biological filtration of cells and precipitated proteins
- Scintillation counting
- Radioimmunoassays

Filtration Membranes

Applications as per membrane chemistry

Membrane types	Pore size	Application
Nylon-66	0.22 µm	Sterile filtration, HPLC sample preparation, solvent filtration
	0.22 to 1.2 µm	Particle removal and clarification, solvent filtration, particle analysis, paint monitoring & automotive cleanliness analysis
	0.45 µm	Clarification of aqueous solutions, particle removal & analysis, preparation of aqueous & organic solutions prior to chromatography
PVDF	0.22 µm	Preparation of protein-containing solutions prior to chromatography, particle removal from aqueous & mild organic solutions, sterile filtration of tissue culture media, protein & DNA solutions
	0.1 µm	General filtration, particle separation, protein clarification and sterile filtration, Ultra-low protein binding assays, sterile filtration of tissue culture media, protein solutions or aqueous solutions.
PTFE	0.45 µm	HPLC solvents, solid-phase synthesis, sample recovery & peptide synthesis.
	0.22 µm	Analytical sample preparation, clarifcation of aqueous & organic solutions with high particulate levels.
PES	0.22 µm	Preparation of aqueous solutions prior to chromatography, vacuum filtration of tissue culture media, serum, buffers, or other biological solutions.
	0.45 µm	Receptor binding assays on whole cells and cell fragments, protein kinase/phosphatase precipitation assays & bead/resin based assays
MCE	0.45 µm	Analytical & research applications
CA	0.22 µm	Sterilization, sterility testing, final filtration of protein samples for HPLC, GC & others.
	0.45 µm	Analaysis of bacteria, sterility testing, clarification & pre-filtration.

Filtration Systems

Filter Holders | Manifold System | H-Filtration Funnel | Filtration Assembly

Filter Holders

A simple membrane filtration assembly for small volume filtration using syringe

- Made up of stainless steel 316 and specially designed for leak proof sealing
- Stainless steel support screen to avoid breakage of membrane against high differential pressure
- Complete unit can be autoclaved with membrane in place
- S.S filter holders available in two diameters - 13mm and 25mm
- Polyacetal filter holders available in three diameter - 13mm, 25mm, 47mm

Applications

- Microfiltration of highly aggressive chemicals and microbiological samples
- Sterilization of HPLC samples, eyewash samples, buffers, sera, photoresists, plant extract, etc

Diameter (mm)	Stainless Steel	Polyacetal
13	SF75	SF93
25	SF76	SF94
47	-	SF95

S. S. Inline Pressure Filter Holder

Stainless steel filter holder for pressure filter applications

- Made up of stainless steel 316
- Locknut type filter holder allows changing of filter membrane without removal of the filter holder during in-line pressure filtration
- Available for low and high pressure applications
- The complete unit can be autoclaved with membrane in place
- S.S filter holders available in two diameters - 25mm and 47mm

Applications:

- Microfiltration of strong chemicals and microbiological samples.
- Sterilization of gases and liquids

S. S. Sterility Test Filter Holder

SF82A1

Ultra light weight stainless steel filter holder with funnel for vacuum filter applications

- Stainless steel 316 funnel, lid, base and support screen
- Stainless steel 304 spring clamp and silicone stopper
- Unique stainless steel support screen to avoid rupture of membrane disc during filtration
- Standard silicone rubber stopper for mounting filtration assembly on 1L filtration flask or on SS Sterility Test Manifold System
- Complete unit can be autoclaved with membrane in place
- Available in three diameters -13mm, 25mm and 47mm and four volume capacities - 15ml, 300ml, 500ml and 1000ml

Applications:

- Sterility testing of antibiotics and pharmaceuticals
- Vacuum filtration of biomass, waste water and particulate contamination analysis
- Microbiological analysis of retained particles
- Yeast and mold detection
- Vacuum filtration of solvents and aqueous solutions

S. S Sterility Test Manifold System

SF85A1

An integrated filtration system for filtering multiple samples using single vacuum source

- Made of stainless steel 316
- Rugged side supports keep the system rigid and firm even when fully loaded
- Available with 3 stations and 6 stations

Applications:

- Sterility testing of antibiotics and pharmaceuticals
- Vacuum filtration of biomass, waste water and particulate contamination analysis
- Microbiological analysis of retained particles
- Yeast and mold detection
- Vacuum filtration of solvents and aqueous solutions

S.S Inline Process Filter Holder			

A reliable and convenient device for large volume filtration process
- Made of stainless steel 316
- Provided with stainless steel support screen and integrity tester
- Complete unit can be autoclaved with membrane in place
- Available in three diameters - 90mm, 142mm and 293mm

Applications:
- Large volume process filtration of pharmaceuticals
- Sterilization of tissue culture media and blood plasma fractions
- Sterilizing large volume of fluids, gases and hazardous acids and solvents

TRIVIMA 3D BIOPRINTER

Affordable 3D Bioprinting, Customized for You

Trivima has been tested across wide variety of biomaterials. Whether you are planning to print with a skin tissue specific bionk or a bioceramic for your bone based application, Trivima can print it all.

Filtration Funnel

Ready-to-use sterile disposable funnel

SF190A

SF190M

- The disposable funnel is the ideal combination of reliability and time saving.
- Easy positioning and removal of the membrane filer, ensuring secure lock-down.
- Ready-to-use: Simply change the funnel, rather than spending time autoclaving it.

HiFlo™ Pump

AI0014

Maximise your workspace environment by eliminating the need for separate manifold, vacuum pump and excess tubing and improve operation time

Save 70% bench space

Easy Operation & Versatile

Compatible with HiMedia SS/PP/PSU funnel

Introduction

The Membrane Filter (MF) Technique is a method of analyzing aqueous samples for microbial contamination. A fluid sample is pulled through a membrane filter and the filter is placed on growth media and incubated. After the prescribed incubation period, colonies are counted and reviewed for appropriate morphology. HiFlo™ Pump is ideal for microbiological evaluations of aqueous samples by MF Technique. This simple, compact unit will optimize and maximize your workspace environment by eliminating the need for separate manifold, vacuum pump, and excess tubing. The HiFlo™ is designed to use Diaphragm Based Self priming action to draw the sample through the filter and send filtrate directly to drain or waste collection. Operating parameters are preset and fixed to best satisfy requirements for MF Technique described in EPA, ISO, and ASTM methods; thereby providing conditions comparable to a standard manifold set-up.

AI0014

- **Compatible with HiMedia SS / PP/ PSU funnel**
  HiFlo™ can accept HiMedia SS / PP/ PSU funnel, 125/300/500 ml funnel at option.
- **Applications**
  Microbiological Test Vacuum Filtration

Specification

Model	HiFlo™ (AI0014-1NO)
Input Voltage	DC 14.V 1.5A
Max. Vacuum	313 Mbar/70 kpa/21 inch hg
Max. Liquid Flow	0.5L/Minute
Motor	12W Brushless DC Motor
Hose Barb	¼ Inch (6 mm)
Material Contact with Filtrate	SS316L, Silicon Seal , PP
Weight	3 kg
Dimension (LXWXH)	18 x 12x 10 cm
Optional Accessories	
Adaptor	8 No. Stopper, Disposable (Confirm Before Ordering)
Filter Holder	SF190, SF82A1, SF190A, SF82, SF83, SS, PP / PSU funnel

Key Drivers

- **Save 70% bench space**
  The compact design of HiFlo™ vacuum Filtration system can save much workbench space
  by simplifying procedure and tools needed in membrane Filtration method
- **Improve operation time**
  Direct drainage design saves a lot of time to empty waste liquid and make the Filtration more efficient
- **Easy Operation**
  Simply put membrane on Filter holder and push on/off button to start Filtration easily Indicate On Blue Led
- **Versatile**
  Replaceable funnel adaptor design makes HiFlo™ Pump compatible with various kinds of Filter holder
- **Applications**
  Microbiological Test Vacuum Filtration

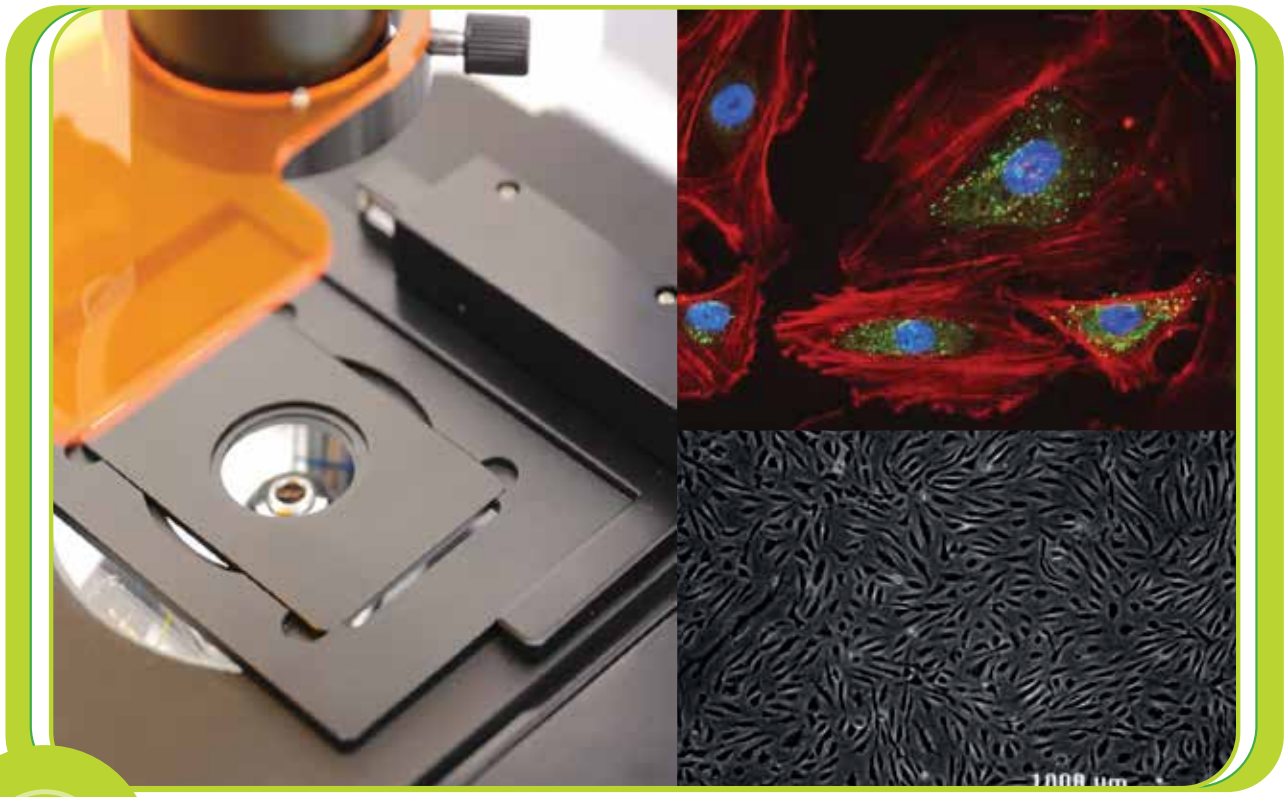
Advanced Instrumentation



Equipment, supplies and analytical instruments are important aspects of cell culture laboratory and are relied on for sensitive detection of cellular events. As the technology has advanced, so has the laboratory environment.

Manual errors, person-to-person variation, inability to count aggregates, makes cell counting one of the most critical challenge in cell culture. To help cell biologists circumvent this challenge, we have introduced CASY - a robust, reproducible and reliable cell counter based on the principle of electrical current exclusion, CASY tracks all relevant parameters of cell culture including cell count, cell viability, cell size and aggregation at extremely low running costs. With a detection range of 0.7 to 120 µm, this is the only machine in the market that counts mammalian cells and stem cells as well as bacteria, yeast, algae, parasites, sperms etc. We guarantee CASY's legendary reliability as it comes with as certified life time calibration, integrated QA system, GLP/GMP compliance and 21 CFR Part 11 compliance.

CO_2 incubator is one of the most important instruments in any cell culture laboratory. They mimic *in vivo* conditions to culture cells under *in vitro* conditions in terms of humidity, carbon dioxide, oxygen and atmospheric pressure. Cell culture CO_2 incubator technology has evolved in many aspects over past few decades. We have introduced CO_2 incubators - a reliable and advanced incubators based on latest air jacketed insulation technology which has many advantages over classical water jacketed incubators. "Air Jacketed" insulation enables quick temperature recovery, uniform temperature and easy maintenance.

We have also introduced another critical instrument required for routine cell culture practices - Inverted Microscopes. These are inverted microscopes with phase contrast objectives and red-green fluorescence filters. You can select an adapter and objective of your choice.

CASY TON
Isotonic measurement buffer

FEATURES

Label-free cell status, instantly.

Within seconds, measurement is performed non-invasively without using distorting dyes.

Statistically relevant data

Analysis of more than 4,000 cells per run enables statistically significant results.

Get the full picture

CASY quantifies all relevant parameters of cells including cell viability, cell size and aggregation – at extremely low running costs.

HOW IT WORKS

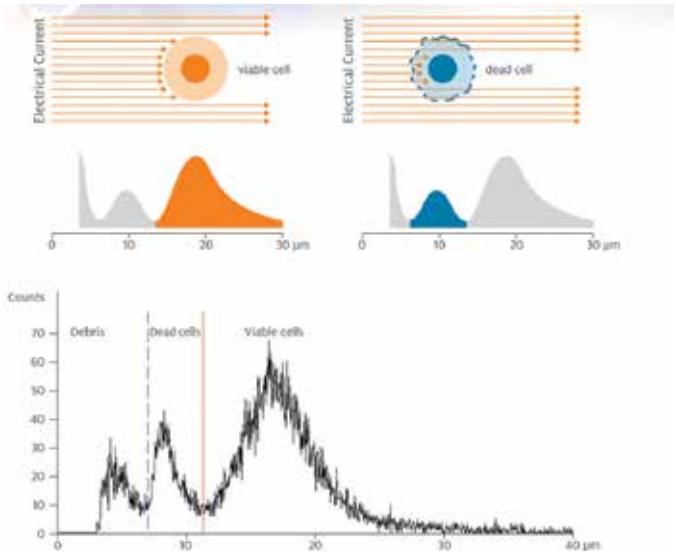
Counting Cells in just Seconds

Cells suspended in CASYton, a conductive isotonic buffer solution, are drawn through a measuring pore. This pore is defined in size and housed inside the capillary which separates two platinum electrodes, the inner and outer electrode. Here, a low voltage field is cycling with 1 MHz. Each cell or particle passing the measuring pore generates an individual electrical pulse by displacing buffer electrolyte in the measuring pore. This pulse is measured as a cell count.

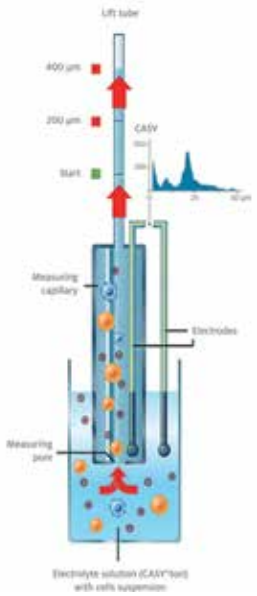
Cell Viability – Keep Tabs on Membrane Degradation

As CASY takes the whole pulse area into account, including amplitude and pulse width, high resolution measurements are enabled, allowing to detect slightest changes of the cell membrane's electrical properties. The permeable membrane of dying and dead cells thus allows to identify dead cells by a change in electrical resistance, finally indicating the size of the nucleus.

Accurate Cell Volume



The combination of amplitude and width of the electrical pulse is proportional to the individual volume of the cell or particle passing the pore. Thus, cell volume can be directly deduced from the change in electrical resistance.



Biomass & Cell Aggregation – The True Cell Count

Biomass concentration and cell aggregation are essential parameters in any cell culture- and fermentation setting. CASY's measuring principle, including accurate cell volume determination, enables CASY to calculate aggregate volumes. This delivers extremely precise and reliable information on biomass content and aggregation status of your cells in culture. Furthermore, by taking account of cells hidden in aggregates, the true cell count is determined. Thereby drastically improving the accuracyof counting results.

Cell Debris and the »Comfort Zone« of Your Cells

Cellular debris may dramatically influence cell-based assays and its absence is an excellent indicator verifying that your cells are in the »comfort zone«. The huge dynamic size range of each CASY measurement provides you with a significant criterion for the usability of the cells in any critical followup experiment – at a single glance. And it does so quickly: typical measurement time of mammalian cells is around 10 seconds.

Biomass-determination or aggregates?

CASY delivers accurate volumes

High-frequency scanning of objects and the high dynamic measuring range, enable CASY to precisely measure volumes of cells or objects. Thus, cell aggregates and the entire biomass content of each sample are immediately available.

Accurate total cell count includes aggregates

Mathematically breaking down aggregates into single cells, CASY optionally counts all cells hidden in aggregates – and thus provides an accurate total cell count.

No limits. CASY measures cell lines, primary cells, bacteria, yeast, algae, parasites… – you name it

With a detection range of 0.7 – 120 μm, CASY measures all types of mammalian cells and stem cells, as well as bacteria, yeast, algae, parasites, pollen, sperm and more. Any particle in the size range might be measurable – and a lot of various samples have been readily measured.

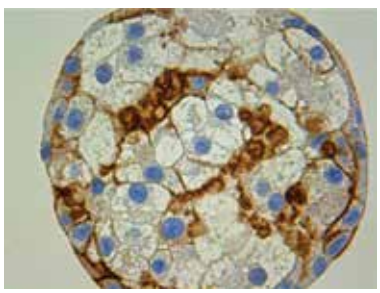
CERO. A Benchtop Incubator & Bioreactor

Convenient, simple Process	high cell yields, long term culture, cost-effective
Relevant Cells	proprietary 3D cell culture technology, better diffusion, accelerated maturation
Consistent Results	scalable to production level, automatable

Prof. Dr. Heikenwälder, Chronic Inflammation and Cancer, Deutsches Krebsforschungszentrum (DKFZ), Heidelberg, Germany



"Cultivating hepatocyte spheroids in CERO considerably improves expansion, differentiation, maturation and hepatic virus infection compared to monolayer culture. Our research takes advantage from healthy cells even from longterm cultures in CERO. Moreover, we are now able to perform 3D long-term culture of human tissue specimen in CERO - a paradigm shift."

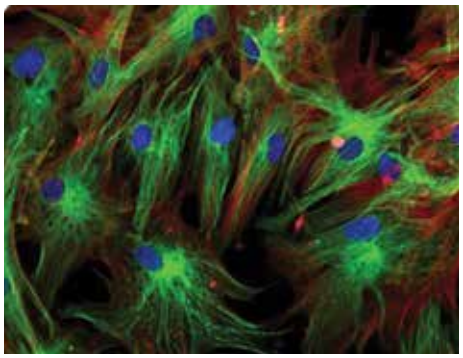
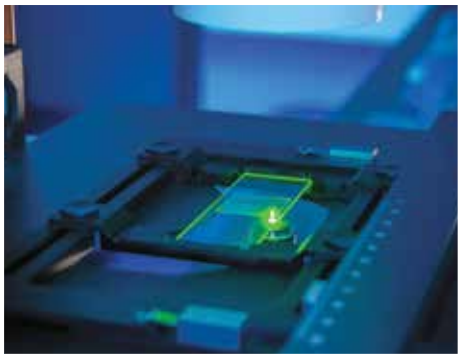
Ease of Use



- Quick installation with pre-aligned phase contrast system and pre-aligned LED light source
- 22mm wide specimen area assures easy view
- Removable condenser to increase the working distance (up to 150 mm)
- Ergonomic controls for fast and efficient investigations

Capture Real-Time Image



- Tinocular head with in-built photo ports
- Pure white LED illumination captures bright, high resolution images
- Annotate your images and measure distances

Improved Optical Performance

- Excellent optics with high numerical aperture for brilliant images
- Comprehensive range of objectives for extended versatility 22mm wide specimen area assures easy view
- Full chromatic correction and field planarity for 22mm field
- Equipped with Infinity-Corrected IOS optics

The Latest LED Fluorescence

- Lamp lifetime More than 65000 hours approx.
- Power consumption reduced to minimum
- No need to worry about lamp maintenance, replacement and adjustment
- Consistent pure white colour.
- Overall cost effective, moneysaving technology

Optional Accessories

Mechanical Stage — **AI03.04I-1NO** — 1 No — On request

Mechanical stage allows you to smoothly and precisely move your slide / other culture vessel while viewing without disturbing the focus. It has two knobs that move the specimen along X-Y axis. It has a clip that hold other holders such as slide holder / petri holder

Slide Holder — **AI03.04A-1NO** — 1 No — On request

Slide holder needs to be fixed in the mechanical stage (AI03.04I). It can hold 4 slides at a time. It is used for holding the slides in place so that it can be moved with ease from side to side back and forth.

38mm Petri dish holder — **AI03.04D-1NO** — 1 No — On request

This holder can hold Petri dish having 38mm diameter. It should be used with AI03.04E and AI03.04I.

Holder for Terasaki and 65mm Petri dish — **AI03.04E-1NO** — 1 No — On request

This holder can hold Petri dish having 65mm diameter and also a Terasaki plate. It needs to be fixed in the mechanical stage (AI03.04I).

Holder for single slide and 54mm Petri dish — **AI03.04F-1NO** — 1 No — On request

This holder can hold 54mm Petri dish and single slide. It needs to be fixed in the mechanical stage (AI03.04I).

Eyepiece Microscope Camera — **AI03.04H-1NO** — 1 No — On request

PC Camera resolution: 5.1MP
USB 2.0
This camera fits into the Trinocular viewing tube of microscope. Image analysis software is provided along with the camera that helps modify and analyze the captured images.

Microscope Cleaning Kit — **AI03.04G-1NO** — 1 No — On request

This kit contains

- Liquid Detergent
- Five Swabs
- Antistatic Cloth 18cms x 15cms
- Lint-free Wipes

TRIVIMA 3D BIOPRINTER

Affordable 3D Bioprinting, Customized for You

The technology in Trivima is fine tuned for the most intricate of scaffold designs and the most sensitive cell types. Our impeccable engineering and scientific advisory team, who have worked with multiple biomaterials and have troubleshot complex engineering hurdles, will guide you through each and every step of your bioprinting process and work closely with you to fine tune complex scaffold architectures, suggest suitable biomaterials and even help you trouble-shoot specific steps in your bioprinting protocols.

Our 3D- Bioprinter " TRIVIMATM" manufactured by NBIL is designed not only for large pharmaceutical companies, but also for research institutes and schools interested in tissue engineering. Customization is essential in the global 3D bioprinting ecosystem, particularly in India. Our 3D-bioprinter is designed to be completely customizable in order to meet the needs of the Indian research community.

Application

Trivima has been tested across wide variety of biomaterials. Whether you are planning to print with a skin tissue specific bionk or a bioceramic for your bone based application, Trivima can print it all.

CHOOSE FROM A WIDE VARIETY OF INTERCHANGEABLE PRINTHEADS

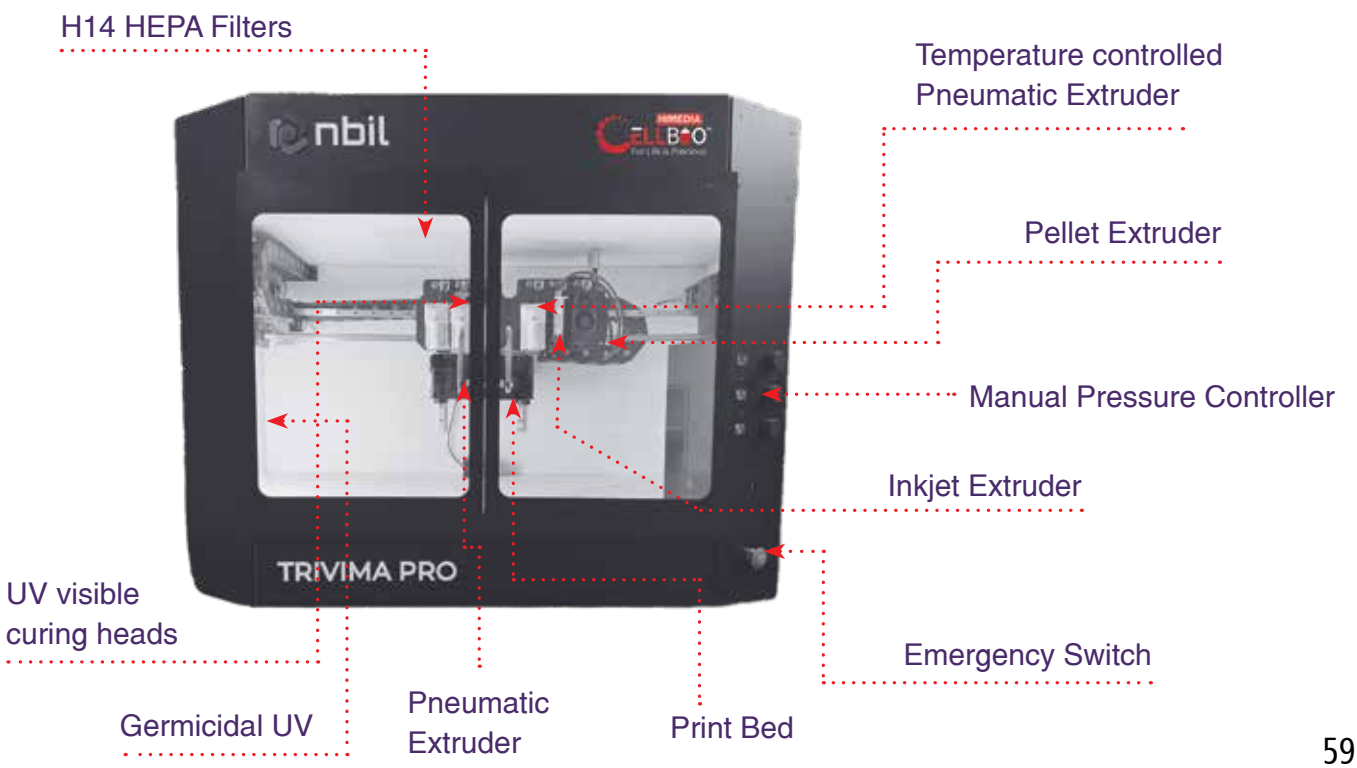
PNEUMATIC PRINT HEAD

Fine tuned over years of applications across a wide and diverse range of polymers and biomaterials, Trivima's pneumatic print heads can take on almost most materials used in bioprinting.

INKJET PRINT HEAD

From Picolitre Dispension to 700 microlitre dispension, Trivima's inkjet printheads are truly made for diverse inkjet bioprinting and printing applications and are also temperature controlled

MELT EXTRUSION HEAD



Trivima's stainless steel melt extrusion heads allow you to work with diverse pellet based printing applications. This head allows you to widen your approach to bioceramics & polymer by reaching temperatures of 250˚C

FILAMENT PRINT HEAD

From Medical Grade PCL to PEEK to PLA to ABS, Trivima's fused deposition modelling head is well suited to print a wide range of filaments with extruder temperatures upto 200˚C

Customize your incubator with these options

Access port
25mm access port is available at left hand side

Copper oxide cavity
Copper has natural bactericidal & fungicidal properties. Copper surface eliminate microbial contaminants quickly & effectively.

UV sterilization
Incubator sterilization can be performed with 4W UV lamp.

O_2 control
Multi gas supply (N_2 & O_2) can be made available for both the models

Hot Air sterilization
Incubator sterilization can be performed using dry heat (125°C)

Split Door
5/6 Split Door options available. Helps in lower gas consumption, lower heat loss & faster recovery.

Cellax-Ultra™ Laboratory & Biomedical Freezers

Cellax-Ultra™ -86°C Temperature Laboratory & Biomedical Freezer Features

- High-precision microcomputer temperature control system for easily and precise temperature setting
- The platinum resistor temperature sensors enable more precise temperature control
- High-definition and easy-handling control panel to set the temperature range from -40°C to -86°C with digital temperature display precision in 1°C
- Lockable door, keyboard lock and password access prevent any unauthorized access and operation
- Upright deep freezer with stainless steel materials and painted steel panel outer materials, and 4 units casters for easy handing
- Adjustable 2-3 stainless steel shelves with inner door and double silicon gasket seal
- Power supply: 220V /50Hz 1 phase, can be changed as 220V 60HZ or 110V 50/60HZ
- Optional: Chart recorder, CO2 back up system, freezer racks/boxes, Remote alarm system
- ***Available in Touch screen formats in capacities of 398 L, 528L, 678L, 778L, 1008L***

IceFax™ Laboratory Ice Flaking Machine (Ice Maker)

Applications

The HiMedia IceFax™ machine helps in creating flaked ice essential for cooling in laboratories. The key for maintaining the low temperatures necessary for the preservation of biological samples, ensuring the best quality of sensitive materials during transport, and providing necessary cooling in laboratory processes. The straightforward design is easy to use, making it a vital tool for daily operations in any laboratory.

Construction

- Inner and Outer Structure made of SS 304
- Outer Structure coated with CRCA non-contaminant epoxy powder coated
- Compact Design

Ice Type

- Flake Ice for Fish Industry
- Nugget Ice for Display Purpose
- Cube Ice for serving drinks

Refrigeration System

- Efficient Cooling System
- CFC Free refrigerant
- Air cooled condenser & fan motor

Documentation

- Provide IQ, OQ & PQ protocols
- Calibration certificate of all controlling modules
- Certificate of MOC

Clean Room Garments & Accessories

Lint Free Garments

Crafted for laboratory attire, lint-free garments minimize lint and fiber release, ensuring a contamination-free environment vital for precision and accuracy in sensitive lab settings.

Applications

Biological Contamination, Dust or chemical residues all can be avoided to maintain complete sterility to get precise and accurate results in a Cleanroom Environment.

Highlights

- Suitable for working with ISO class 4 and higher
- Compliance with GMP Standards
- Made up of **100% Polyester**
- Zero-Lint Guarantee
- Enhanced Employee Safety
- Offered Sizes - **S, M, L, XL, XXL**
- Color Available-:

AntiStatic Garments

Designed specifically for laboraties, our AntiStatic garments effectively eliminate static, ensuring a secure and contamination-free environment critical for precision and reliability in sensitive settings.

Applications

In laboratories, our antistatic garments play a pivotal role by neutralizing static electricity, safeguarding sensitive equipment and processes.

Can be used in where we need to prevent prevent electrostatic discharge (ESD) and protect sensitive equipment, instruments, and processes like Production area, Maintaining Clean Room Environment, Bioprocessing Facilities and Many More.

Highlights

- Suitable for working with ISO class 4 and higher
- Compliance with GMP Standards
- Made up of **98% Polyester and 2% Carbon**
- Enhanced Employee Safety
- Offered Sizes - **S, M, L, XL, XXL**
- Color Available-:

Disposable Garments

Tailored for biopharma environments, our Disposable Garments offer a seamless solution to maintain utmost cleanliness and sterility. Designed to be single-use, these garments eliminate the risk of contamination, providing a secure and reliable environment crucial for precision in sensitive settings.

Applications

Our Disposable Garments prove indispensable for maintaining strict hygiene and preventing contamination. Designed for single-use, they find crucial applications in laboratories, research facilities, cleanroom environments, and bioprocessing units. These garments ensure a secure and sterile environment, safeguarding precision and reliability across diverse biotech applications.

Highlights

- Suitable for working with ISO class 4 and higher
- Compliance with GMP Standards
- Made up of **90% Rubber and 10% Nylon**
- Enhanced Employee Safety

Skill Development Modules

Skills strengthen you

… You strengthen India ~ Narendra Modi

Innovation begins with the right choices and innovators need to be equipped with the right skills. It has been HiMedia's endeavor to promote science and technology in the field of life science. While working in pursuit of this endeavor, we have identified that there are extra skills required by the industry. Graduates and post graduates need to be equipped with these skills when they step out of their educational institutions. We, at HiMedia understand this and hence are launching a Skill Development Program to groom our budding scientist for the industry.

We have divided the program in to two modules, one on basic skills required in animal cell culture and second an advanced program for higher applications used in Biopharma, Cell therapy and Regenerative medicine, Drug discovery, Vaccine industry etc.

What do you gain ?

Basic Course for Mammalian Cell Culture

Specially designed for beginners with focus on practical aspects of mammalian cell culture

Module code: **SD101**

Course Description :

Mammalian cell culture has become a major field in biotechnology. It is an integral tool in the research and advances in human health. The course is aimed to bridge the gap between the academics and industries. Cell Culture Basics module is specially designed for the beginners and will focus on the practical aspects of mammalian cell culture.

Students often get a very limited exposure to mammalian cell culture through the syllabus. This course will be a perfect add-on of the practical experience to the existing syllabus. It will help the students understand the principles of cell culture and make them competent enough for the further research.

Course Contents :

- Aseptic techniques
- Complete media preparation
- Cell thawing
- Viability assessment
- Cell counting
- Sub-culturing of cells
- Lecture on techniques involved in mammalian cell culture

Course Details :

Course Duration: 2 Days

Course Cost: Enquire for pricing. Group discounts available.

Eligibility: Students, academia and industry professionals with educational background in life sciences and bioengineering

Certification: Certificate of participation will be provided

Basic Course for Stem Cell Culture

Introduction to stem cell therapy and regenerative medicine

Module code: **SD201**

Course Description :

Stem cells have a great potential in tissue regeneration and repair and successful culturing of the stem cells is the basis of stem cell therapy. Culturing stem cells module is designed for the beginners to understand the intricate details involved in handling of stem cells.

This course will be a perfect platform for the students to take a closer look at the mesenchymal stem cells. It will help the students understand the principles of stem cell culture and make them competent enough for the further research.

Course Details :

Course Duration: 2 Days

Course Cost: Enquire for pricing. Group discounts available.

Eligibility: Students, academia and industry professionals with educational background in life sciences and bioengineering

Certification: Certificate of participation will be provided

Course Contents :

- Aseptic techniques
- Stem Cell media preparation
- Stem Cell thawing
- Viability assessment
- Cell counting
- Sub-culturing of Stem Cells
- Lecture on challenges involved in stem cell culture and regenerative medicine

For customized course details, please email to atc@himedialabs.com

Basic Course for Fundamentals of Cytogenetics

Introduction to methods in genetic dignostics

Module code: **SD301**

Course Description :

Genetic testing is an important tool in early diagnosis of many genetic disorders. Karyotype analysis is the primary method used for genetic testing. Analysis using peripheral blood includes growing the non-multiplying lymphocytes and then slide preparations to visualize the chromosomes. The module -Fundamentals of Karyotyping, offers an easy approach for teaching short term in vitro culture of peripheral blood lymphocytes for cytogenetic studies. The objective of this module is to provide the beginners training and basic understanding of karyotyping.

Course Contents :

- Inoculation of human blood with media
- Metaphase arrest treatment
- Hypotonic treatment
- Fixation
- G-Banding
- Staining with Giemsa
- Observation of chromosomes
- Lecture on clinical significance of genetic testing

Course Details :

Course Duration: 2 Days

Course Cost: Enquire for pricing. Group discounts available.

Eligibility: Students, academia and industry professionals with educational background in life sciences and bioengineering

Certification: Certificate of participation will be provided

Basic Course for 3D Cell Culture

Introduction to 3D Cell Culture techniques

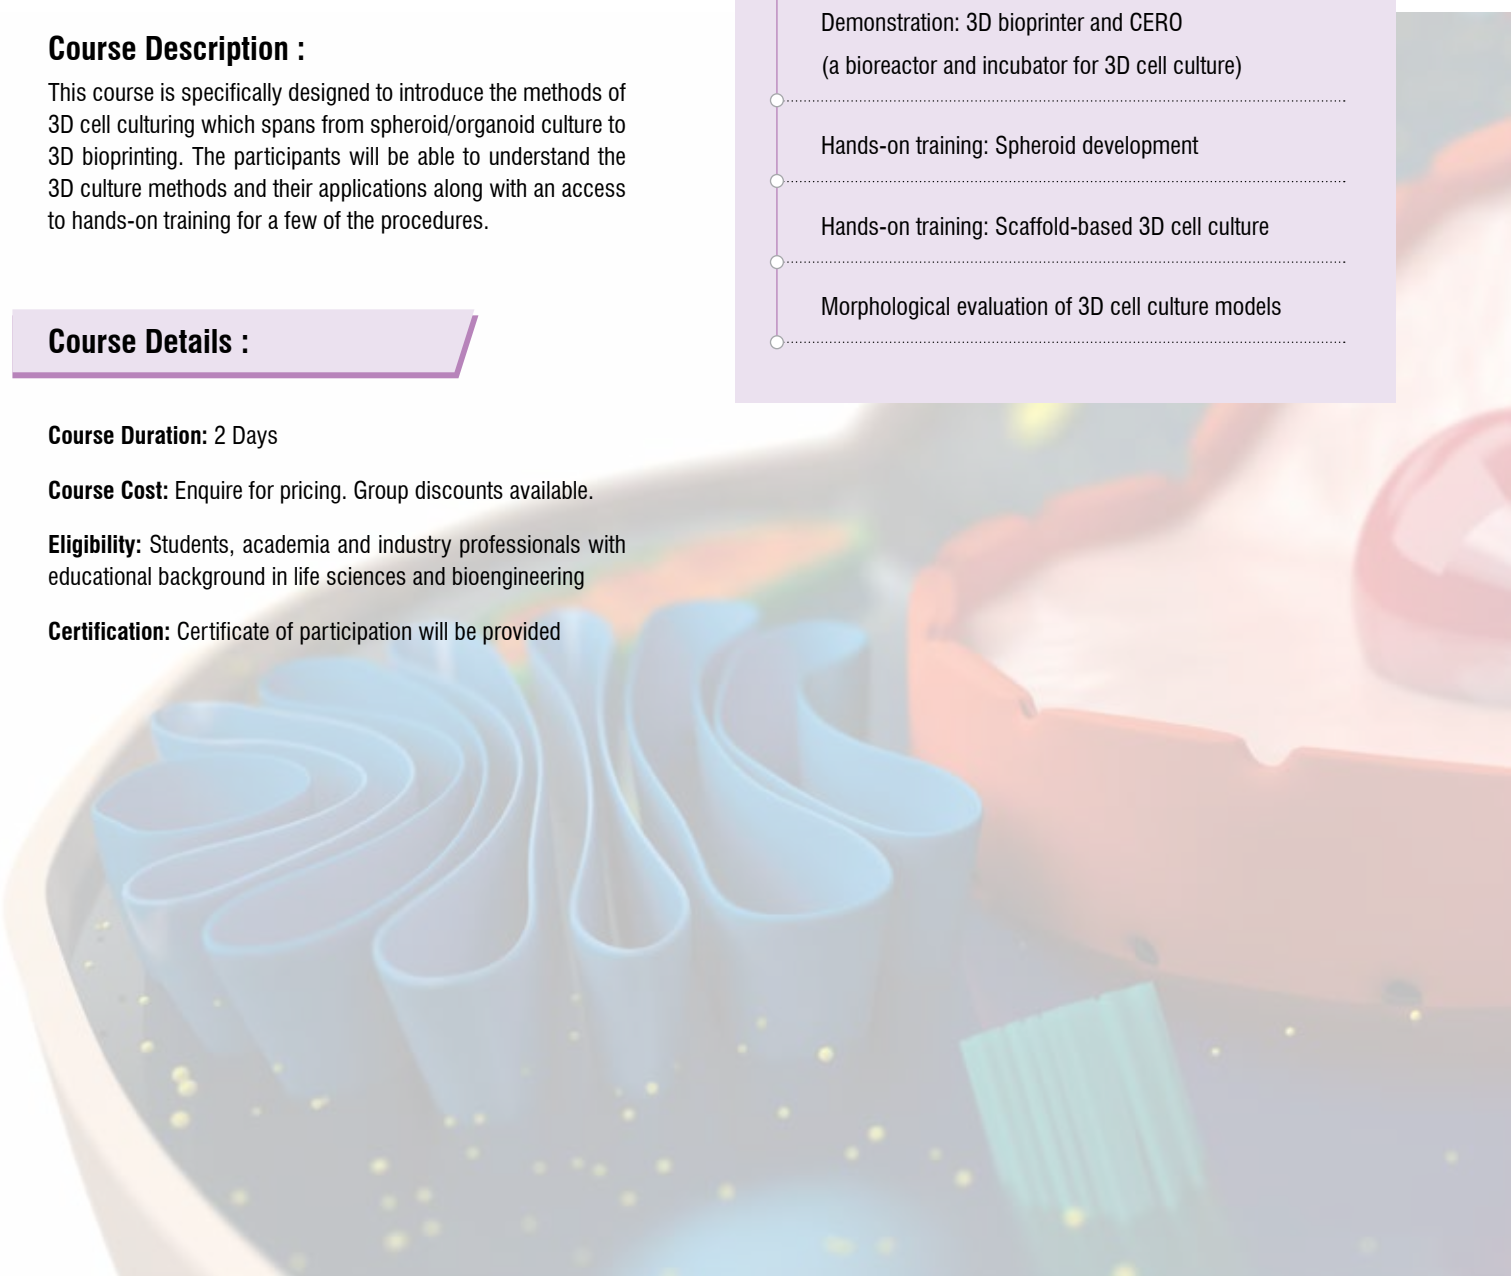
Module code: **SD401A**

Course Description :

This course is specifically designed to introduce the methods of 3D cell culturing which spans from spheroid/organoid culture to 3D bioprinting. The participants will be able to understand the 3D culture methods and their applications along with an access to hands-on training for a few of the procedures.

Course Details :

Course Duration: 2 Days



Course Cost: Enquire for pricing. Group discounts available.

Eligibility: Students, academia and industry professionals with educational background in life sciences and bioengineering

Certification: Certificate of participation will be provided

Course Contents :

- Theoretical session: Overview, methods and applications of 3D cell culture
- Demonstration: 3D bioprinter and CERO (a bioreactor and incubator for 3D cell culture)
- Hands-on training: Spheroid development
- Hands-on training: Scaffold-based 3D cell culture
- Morphological evaluation of 3D cell culture models

CELL BIOLOGY

Intermediate Course for 3D Cell Culture

Learn 3D Cell Culture techniques

Module code: **SD401B**

Course Description :

A detailed understanding of all the techniques will be provided to the candidates through theory lectures followed by a live demo. The candidate will then select any one technique of 3D cell culture. He/ she will be then trained further on the selected technique further. The candidate is expected to make a report based on his/ her understanding of the training, which will be graded by our highly skilled technical team.

Course Details :

Course Duration: 2 Days

Course Cost: Enquire for pricing. Group discounts available.

Eligibility: Students, academia and industry professionals with educational background in life sciences and bioengineering

Certification: Certificate of participation will be provided along with a grading based upon the technical performance and the final report.

Course Contents :

- Theoretical session: Overview, methods and applications of 3D cell culture
- Demonstration: CERO - a bioreactor and incubator for 3D cell culture
- Demonstration and hands-on training for 3D bioprinting: 3D bioprinting with cells, morphology and cell viability assay
- Spheroid culture: Hands-on training for spheroid development, spheroid fixation and cell viability assay
- Demonstration on imaging of 3D cell culture models
- Technical evaluation of participants

Advanced Course for 3D Cell Culture

Refine your skills in 3D Cell Culture

Module code: **SD401C**

Course Description :

A detailed study in any one of the techniques of interest for 3D cell culture. The candidate will work closely with our highly trained technical team with an extensive hands-on-training. The candidate is expected to make a report, which will be graded by our highly skilled technical team.

Eligibility: Students, academia and industry professionals with educational background in life sciences and bioengineering

Certification: Certificate of participation will be provided along with a grading based upon the technical performance and the final report

Course Contents :

- Theoretical session: Development, Characterization and Applications of 3D cell culture models
- Hands-on training: 3D bioprinter and CERO
- Hands-on training for 3D bioprinting: Preparation of bioink, 3D bioprinting with cells and crosslinking, cell viability assay
- Hands-on training for spheroids and organoids: spheroid/ organoid development, cell viability assay
- Demonstration: Imaging of 3D cell culture models by confocal microscopy
- Technical evaluation of participants

Course for Rheology and Texture Analysis

Basic Course

Introduction to Rheology and Texture Analysis techniques

Module code: **SD501A**

Course Description :

Day 1 will consist of a detailed understanding of the theory of rheological characterization.

On day 2, the participants will be trained for the use of a rheometer followed by a quick test.

Course Details :

Course Duration: 2 Days

Course Cost: Enquire for pricing. Group discounts available.

Eligibility: Students, academia and industry professionals with educational background in life sciences and bioengineering

Certification: Certificate of participation will be provided

Course Contents :

- Theoretical session: Basics of rheology and its applications
- Theoretical session: Basics of texture analysis and its applications
- Demonstration: Rheometer
- Demonstration: Texture Analyzer

Advanced Course

Develop skills in Rheology and Texture Analysis techniques

Module code: **SD501B**

Course Description :

Rigorous theory lessons with simultaneous live demonstration will be conducted followed by extensive hands-on-training. Technical evaluation of the candidates will be conducted.

Course Details :

Course Duration: 2 Days

Course Cost: Enquire for pricing. Group discounts available

Minimum Qualification: Students, academia and industry professionals with educational background in life sciences and technology

Certification: Certificate of participation will be provided

Course Contents :

- Theoretical session: Basics and applications of rheology and texture analysis
- Theoretical session: Basics of texture analysis and its applications
- Hands-on training: Sample preparation, Operation and analysis using Rheometer
- Hands-on training: Sample preparation, Operation and analysis using Texture analyser
- Technical evaluation of participants

2D & 3D Cell Culture Staining and Confocal Microscopy

Introduction to Staining techniques and confocal microscopy

Module code: **SD601**

Course Description :

This involves theoretical and practical training on the sample preparation, cryosectioning, staining and confocal imaging for 2D and 3D cell cultures.

Course Details :

Course Duration: 2 Days

Course Cost: Enquire for pricing. Group discounts available.

Eligibility: Students, academia and industry professionals with educational background in life sciences and bioengineering

Course Contents :

- Theoretical session: Principles and practical tips on staining 2D and 3D cell cultures
- Theoretical session: Overview, methods and applications of 3D cell culture
- Demonstration: Cryotome and Confocal Microscopy
- Hands-on training for staining 2D cell cultures: Fixation, staining, and demonstration for analysis by confocal imaging
- Hands-on training for staining 3D cell cultures: Fixation, embedding in tissue freezing medium, cryosectioning, staining, and demonstration for analysis by confocal imaging

For customized course details, please email to atc@himedialabs.com

Basic Course for Confocal Microscopy

Introduction to basics of Confocal microscopy

Module code: **SD701**

Course Description :

This involves theoretical and practical training on confocal microscopy with focus on the applications in 3D cell culture.

Course Details :

Course Duration: 2 Days

Course Cost: Enquire for pricing. Group discounts available

Minimum Qualification: Students, academia and industry professionals with educational background in life sciences and technology

Certification: Certificate of participation will be provided

Course Contents :

- Theoretical sessions: Confocal microscopy and its applications in 2D and 3D cell cultures
- Detailed demonstration on confocal microscopy by microscopy experts
- Hands-on training:
  a) Sample preparation and practical tips for staining cell cultures
  b) Analysis of samples

Teaching Kits

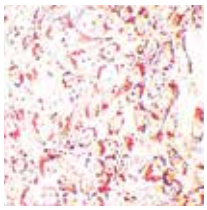
Cell Culture Teaching Kit

Product	Code	Packing	Price in ₹
HiPer® Animal Tissue Culture Teaching Kit Animal Tissue Culture Teaching Kit exclusively offers a convenient approach for teaching basic animal cell culture techniques like cell revival, subculturing, viability testing and cell maintenance. Ready-to-use components as well as detailed information manual supplied in the kit makes the learning trouble-free and suitable for educational purposes. The kit is designed in a way that facilitates growth of cells in a non-CO_2 environment.	CCK005-1KT	1 kit for 10 subcultures	11155

Microscopy Slide Sets

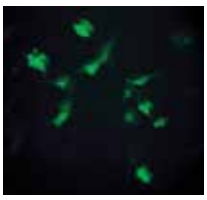
Product	Code	Packing	Price in ₹
Microscopy Slide Set for Mammalian Cell lines Contains a set of slides of five cell lines: a) BHK-21 b) CHO c) Vero d) HEK-293 e) Sp2/O	CCK044-1NO		2520



Chinese Hamster Ovary (CHO) cells (20X)

Cell Proliferation and Cytotoxicity Assay Teaching Kits

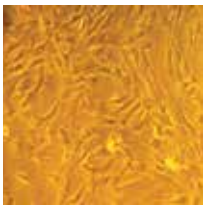
Product	Code	Packing	Price in ₹
HiPer® MTT Cell Assay Teaching Kit *In vitro* Cell Viability Assay Kit MTT Cell Assay Teaching kit exclusively offers a convenient tool for teaching *in vitro* cell proliferation and cytotoxicity using standard microplate absorbance reading. The protocol is based on quantitative measurement of reduction in tetrazolium salt MTT to purple formazan crystals by metabotically active cells in culture.	CCK020-100	Kit for 100 tests in 96 well format	2350
HiPer® Neutral Red Cell Assay Teaching Kit	CCK033-100	Kit for 100 tests in 96 well format	2350



Intracellular lysosomes in CHO cells stained with Neutral Red (40X)

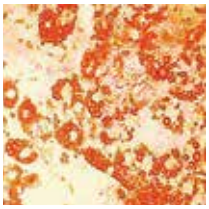
Transfection Teaching Kits

Product	Code	Packing	Price in ₹
HiPer® Transfection Teaching Kit Transfection Teaching Kit provides effective and reproducible DNA transfection into mammalian cells. This kit also provides reagent for observation of transfected DNA by using ß-galactosidase system.	CCK042-1KT	1 Kit for 24 tests in 24 well format	13740



Culture of Vero cells transfected with GFP plasmid (100X)

Stem Cell Teaching Kits



Product	Code	Packing	Price in ₹
HiPer® Stem Cell Expansion Teaching Kit Stem Cell Expansion teaching kit is a convenient tool for learning expansion and proliferation of stem cells. This kit comprises of a proliferating T12.5cm² flask of stem cells and its expansion medium along with other reagents required for its subculture. A detailed information manual is supplied with the kit for trouble-free learning.	CCK038-1KT	1 Kit	11510

Phase contrast microscopy of HAD-MSC (40X)

Product	Code	Packing	Price in ₹
HiPer® Adipogenesis Assay Teaching Kit Adipogenesis Assay teaching kit offers an excellent teaching approach for understanding of differentiation of 3T3-L1 pre-adipocytes to adipocytes. All the components in the kit are ready to use which facilitates trouble free learning.	CCK021-25NO	Kit for 25 tests in 96 well format	11105

Lipid droplets in 3T3-L1 cells differentiated into adipocytes stained red in colour by Oil Red O (40X)

Product	Code	Packing	Price in ₹
HiPer® Osteogenesis Assay Teaching Kit Osteogenesis Assay teaching kit offers an excellent teaching approach to study differentiation of MC3T3E1 Preosteocyte cells to mature osteoblasts	CCK050-25NO	Kit for 25 tests in 96 well format	11105

Calcium deposits in MC3T3-E1 cells differentiated into osteoblasts stained red in colour by Alizarin Red S (40X)

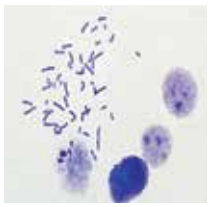
HiPer® Teaching Kit for Chondrogenic Differentiation and Staining Stem Cell Differentiation and Staining teaching kits are specially designed to promote the learning of stem cell differentiation and staining. These kits offer a convenient means of studying differentiation of mesenchymal stem cells into chondrogenic lineage. The kit comprises of a proliferating T12.5cm² flask of mesenchymal stem cells alongwith medium, reagents and consumables required for differentiation and staining of cells.	CCK041-1KT	1 Kit for 5 tests	13995
HiPer® Teaching Kit for Adipogenic Differentiation and Staining Stem Cell Differentiation and Staining teaching kits are specially designed to promote the learning of stem cell differentiation and staining. These kits offer a convenient means of studying differentiation of mesenchymal stem cells into adipogenic lineage. The kit comprises of a proliferating T12.5cm² flask of mesenchymal stem cells alongwith medium, reagents and consumables required for differentiation and staining of cells.	CCK039-1KT	1 Kit for 5 tests in 48 well format	13680
HiPer® Teaching Kit for Osteogenic Differentiation and Staining Stem Cell Differentiation and Staining teaching kits are specially designed to promote the learning of stem cell differentiation and staining. These kits offer a convenient means of studying differentiation of mesenchymal stem cells into osteogenic lineage. The kit comprises of a proliferating T12.5cm² flask of mesenchymal stem cells alongwith medium, reagents and consumables required for differentiation and staining of cells.	CCK040-1KT	1 Kit for 5 tests in 48 well format	13680

Alcian Blue staining of Chondrocytic Differentiation of HWJ-MSC in HiChondroXL™ Chondrocyte Differentiation Medium (20X)



Oil Red O staining of Adipogenic Differentiation of HAD-MSC (40X)

Alizarin Red S staining of Osteogenic Differentiation of HWJ-MSC in HiOsteoXL™ Osteogenic Differentiation Medium (40X)

Primary Cell Teaching Kits			
HiPer® Chick Embryo Fibroblast Culture Teaching Kit Chick Embryo Fibroblast Culture Teaching Kit has been developed for isolation of Chick embryo fibroblast cells from embryonated eggs and culturing of primary fibroblasts *in vitro*	CCK059-5PR	1 kit for processing of 5 eggs	11165
HiPer® Teaching Kit for Lymphocyte Isolation and Staining Lymphocyte Isolation and Staining Teaching Kit has been developed for teaching isolation of Lymphocytes from whole blood and visualization of the separated lymphocytes by Giemsa staining	CCK060-5PR	1 kit for 5 isolations	6870
Karyotyping Teaching Kits			
HiPer® Karyotyping Teaching kit Cytogenetics includes metaphase and pro-metaphase studies carried out on lymphocytes to detect chromosomal aberrations associated with structural and numerical abnormalities. Karyotyping Teaching Kit offers an easy approach for teaching short term *in vitro* culture of peripheral blood lymphocytes for cytogenetic studies. Karyotyping protocol includes growing the non-multiplying lymphocytes and then slide preparations to visualize the chromosomes. A detailed information manual supplied in the kit makes learning trouble-free for educational purposes.	CCK012-1KT	1 kit for 10 mitotic spreads	14655
HiPer® G-Banding Teaching Kit *In vitro* Cell Viability Assay Kit Cytogenetic testing is an important screening tool in clinical genetics. G-banding is one of the most widely used technique in diagnosis of genetic alterations as it facilitates recognition of individual chromosomes. G-banding Teaching kit offers a convenient approach for teaching the G-banding technique and visualization of chromosome bands under a light microscope.	CCK043-1KT	1 Kit	6295

Lymphocytes and chromosomes stained with Giemsa (40X)

Distinctive Pattern of light and dark bands on chromosomes obtained by Giemsa Staining (100X)

Sample Collection

MBLA004 - HiPurA® cfDNA Collection tube

- Blood collection tube containing liquid preservative which stabilizes cell free DNA.
- Maximum amount of blood sample to be added in a tube: upto 10ml

Application: Transport and storage of blood samples

Automated Extraction

MBLA020 - Insta NX® Mag24

- Automated Nucleic Acid Extractor

MB586PCCT-24 - HiPurA® Cell- free Nucleic Acid Purification Kit

- Pre-filled cartridges for processing higher sample volume

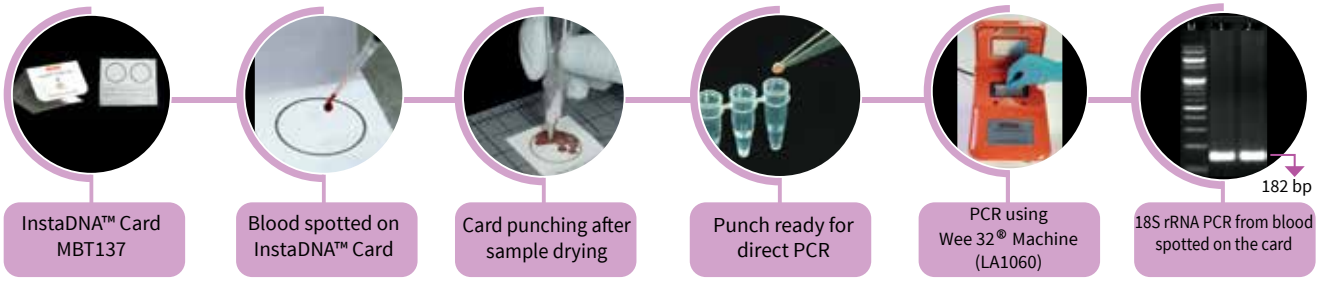
InstaDNA™ Kits



InstaDNA™ Kit InstaDNA™ Kit provides a rapid and cost-effective solution for extraction of nucleic acid for : Molecular biology, Research, Clinical, Criminal and Forensic applications. Kit Contents : InstaDNA™ card, Reagents for processing card spot, Reagents for DNA elution from card spot	MBT109-25NO MBT109-100NO	25no 100no	4185 15895

Product	Code	Packing	Price in ₹
InstaDNA™ Kit for collection of Avian samples for DNA Kit includes components required for Avian sample collection and transportation in the field Kit contents : InstaDNA™ card, Tissue storage buffers, Sterilizing reagent, Swabs, Forceps, Scissors, Droppers and Gloves.	MBT125-25NO	25no	5665
InstaDNA™ Quadricard Kit InstaDNA™ Kit provides a rapid and cost-effective solution for extraction of nucleic acid for : Molecular biology, Research, Clinical, Criminal and Forensic applications. Kit contents : InstaDNA™ Quadricard, Reagents for processing card spot, Reagents for DNA elution from card spot.	MBT158-25NO	25no	12575
InstaDNA™ Twin Card Kit InstaDNA™ Kit provides a rapid and cost-effective solution for extraction of nucleic acid for : Molecular biology, Research, Clinical, Criminal and Forensic applications. Kit contents : InstaDNA™ Twin Card, Reagents for processing card spot, Reagents for DNA elution from card spot.	MBT145-25NO	25no	6630

InstaDNA™ Cards

InstaDNA™ card • Simplifies isolation, purification and storage of nucleic acid for variety of research and diagnostic applications.	MBT126-25NO MBT126-100NO	25no 100no	2255 7755
InstaDNA™ Penta Card New • Simplifies isolation, purification and storage of nucleic acid for variety of research and diagnostic applications. • Allows multiple sample collection	MBT201-25NO MBT201-100NO	25no 100no	2950 10500
InstaDNA™ Quadricard • Simplifies isolation, purification and storage of nucleic acid for variety of research and diagnostic applications. • Allows multiple sample collection	MBT121-25NO MBT121-100NO	25no 100no	2860 10225
InstaDNA™ Twin Card • Simplifies isolation, purification and storage of nucleic acid for variety of research and diagnostic applications. •Allows multiple sample collection	MBT137-25NO MBT137-100NO	25no 100no	2455 8735

Extraction - Free PCR using InstaDNA™ Kit

InstaDNA™ Card MBT137 | Blood spotted on InstaDNA™ Card | Card punching after sample drying | Punch ready for direct PCR | PCR using Wee 32® Machine (LA1060) | 18S rRNA PCR from blood spotted on the card

Magnetic Manual Extraction Kits (Non pre-filled format)			
HiPurA® Clinical Multi-purpose Magnetic Nucleic Acid Purification Kit Principle: Magnetic Bead Based For isolation of total nucleic acids from clinical samples. Non Pre-filled extraction kit. Sample material: Blood, plasma, serum, saliva, buccal swabs, buffy coat, cells and tissue. Compatible with : Mag32, Mag96 and Mag16 series	MB583M-320PR MB583M-480PR	320pr* 480pr*	72090 98880
HiPurA® Multi-purpose Magnetic Nucleic Acid Purification Kit Principle: Magnetic Bead Based For isolation of total nucleic acids. Non Pre-filled extraction kit. Sample material: Blood, plasma, serum, buffy coat, tissue, saliva, Paraffin embedded tissue, urine and other body fluids Compatible with : Mag32, Mag96 and Mag16 series	MB583MDL-320PR MB583MDL-480PR	320pr* 480pr*	90640 On Request
HiPurA® Viral Nucleic Acid Purification Kit (Magnetic Bead Based) ◆ Principle: Magnetic Bead Based For isolation of Viral nucleic acids. Non Pre-filled extraction kit. Sample material: Blood, plasma, serum, nasopharyngeal swabs, oropharyngeal swabs and other body fluids Compatible with : Mag32, Mag96 and Mag16 series	MB582M-50PR MB582M-100PR	50pr* 100pr*	6180 11740
HiPurA® Viral RNA Purification Kit (Magnetic Bead Based) + ◆ Principle : Magnetic Bead Based For isolation of Viral RNA (only Reagents) Sample material : Plasma, serum, nasopharyngeal swabs, oropharyngeal swabs and other body fluids Compatible with : Mag32, Mag96 and Mag16 series	MB615M-100PR MB615M-250PR MB615M-480PR	100pr* 250pr* 480pr*	22625 53095 98880

RNA Extraction kits for Insta NX® Mag16 Series			
HiPurA® Pre-filled Cartridges for Plant RNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Plant Tissue Compatible with Mag16 and Mag32 series	MB603PC16-48PR	48pr*	11125

Product	Code	Packing	Price in ₹
HiPurA® Pre-filled Plates for Plant RNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Plant Tissue Compatible with Mag16 and Mag32 series	MB603MPF16-96PR	96pr*	22250
HiPurA® Pre-filled Cartridges for Tissue RNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Tissue Compatible with Mag16 and Mag32 series	MB618PC16200-48PR	48pr*	11125
HiPurA® Pre-filled Plates for Tissue RNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Tissue Compatible with Mag16 and Mag32 series	MB618MPF16200-96PR	96pr*	22250
HiPurA® Pre-filled Cartridges for Viral RNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit along with accessories for processing 48 samples Samples processed: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag16 and Mag32 series	MB615PC1611-1X48PR	1X48pr*	8035
HiPurA® Pre-filled Plates for Viral RNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit along with accessories for processing 96 samples Samples processed: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag16 and Mag32 series	MB615MPF1611-96PR	96pr*	15820
HiPurA® Pre-filled Plates for Viral RNA Extraction- 16 Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag16 series	MB615MPF-16D-96PR	96pr*	19200

DNA Extraction kits for Insta NX® Mag16 Series

Product	Code	Packing	Price in ₹
HiPurA® Multi-sample Pre-filled Cartridges for DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material: Blood-stained fabric, cigarette Butts, hair, nail clippings, chewing gum, stamps, envelopes, sexual assault samples, saliva, buccal swab, bone, teeth, tissue samples Compatible with Mag16 and Mag32 series	MB554PC16200-48PR	48pr*	11125
HiPurA® Multi-sample Pre-filled Plates for DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material: Blood-stained fabric, cigarette Butts, hair, nail clippings, chewing gum, stamps, envelopes, sexual assault samples, saliva, buccal swab, bone, teeth, tissue samples Compatible with Mag16 and Mag32 series	MB554MPF16200-96PR	96pr*	22250
HiPurA® Pre-filled Cartridges for Bacterial DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Bacterial culture Compatible with Mag16 and Mag32 series	MB505PC16-48PR MZ	48pr*	11125
HiPurA® Pre-filled Plates for Bacterial DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Bacterial culture Compatible with Mag16 and Mag32 series	MB505MPF16-96PR MZ	96pr*	22250
HiPurA® Pre-filled Cartridges for Blood DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Blood, serum and plasma Compatible with Mag16 and Mag32 series	MB504PC16-48PR	48pr*	11125
HiPurA® Pre-filled Plates for Blood DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Blood, serum and plasma Compatible with Mag16 and Mag32 series	MB504MPF16-96PR	96pr*	22250
HiPurA® Pre-filled Cartridges for Food DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Food Compatible with Mag16 and Mag32 series	MB562PC16-48PR	48pr*	11125
HiPurA® Pre-filled Plates for Food DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Food Compatible with Mag16 and Mag32 series	MB562MPF16-96PR	96pr*	22250
HiPurA® Pre-filled Cartridges for Food Pathogen Purification New Principle: Magnetic Bead Based Pre-filled Extraction Kit for processing 48 samples. (Reagents and Plasticware) Sample Material: Food Compatible with Mag16 and Mag32 series	MB568PC16-48PR	48pr*	13000
HiPurA® Pre-filled Plates for Food Pathogen Purification New Principle: Magnetic Bead Based Pre-filled Extraction Kit for processing 96 samples. (Reagents and Plasticware) Sample Material: Food Compatible with Mag16 and Mag32 series	MB568MPF16-96PR	96pr*	24000
HiPurA® Pre-filled Cartridges for Fungal DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction Kit for processing 48 samples. (Reagents and Plasticware) Sample material : Fungus Compatible with Mag16 and Mag32 series	MB576PC16-48PR	48pr*	15600
HiPurA® Pre-filled Plates for Fungal DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction Kit for processing 96 samples. (Reagents and Plasticware) Sample material : Fungus Compatible with Mag16 and Mag32 series	MB576MPF16-96PR	96pr*	26880
HiPurA® Pre-filled Cartridges for MTB DNA Purification New Principle: Magnetic Bead Based Pre-filled extraction Kit for processing 48 samples. (Reagents and Plasticware) Sample material : Sputum, Body fluids, CSF, Tissue, Pus, Biopsy sample Compatible with Mag16 and Mag32 series	MB579PC16-48PR	48pr*	12480
HiPurA® Pre-filled Plates for MTB DNA Purification New Principle: Magnetic Bead Based Pre-filled extraction Kit for processing 96 samples. (Reagents and Plasticware) Sample material : Sputum, Body fluids, CSF, Tissue, Pus, Biopsy sample Compatible with Mag16 and Mag32 series	MB579MPF16-96PR	96pr*	22880
HiPurA® Pre-filled Cartridges for Plant DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Plant Tissue Compatible with Mag16 and Mag32 series	MB507PC16-48PR	48pr*	11125
HiPurA® Pre-filled Plates for Plant DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Plant Tissue Compatible with Mag16 and Mag32 series	MB507MPF16-96PR	96pr*	22250

HiPurA® SuperPlant Pre-filled Cartridge for Plant DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Plant Tissue Compatible with Mag16 and Mag32 series	MB571PC16-48PR	48pr*	14000
HiPurA® SuperPlant Pre-filled Plates for Plant DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Plant Tissue Compatible with Mag16 and Mag32 series	MB571MPF16-96PR	96pr*	26840
HiPurA® Pre-filled Cartridges for Plasmid DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Bacterial culture Compatible with Mag16 and Mag32 series	MB508PC16-48PR	48pr*	11125
HiPurA® Pre-filled Plates for Plasmid DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Bacterial culture Compatible with Mag16 and Mag32 series	MB508MPF16-96PR	96pr*	22250
HiPurA® Pre-filled Cartridges for Shrimp DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Shrimp Compatible with Mag16 and Mag32 series	MB581PC16200-48PR	48pr*	11125
HiPurA® Pre-filled Plates for Shrimp DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Shrimp Compatible with Mag16 and Mag32 series	MB581MPF16200-96PR	96pr*	22250
HiPurA® Pre-filled Cartridges for Insect DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Insect Compatible with Mag16 and Mag32 series	MB529PC16-48PR	48pr*	10000
HiPurA® Pre-filled Plates for Insect DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Insect Compatible with Mag16 and Mag32 series	MB529MPF16-96PR	96pr*	19200
HiPurA® Pre-filled Cartridges for Yeast DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Yeast culture Compatible with Mag16 and Mag32 series	MB552PC16-48PR	48pr*	15840
HiPurA® Pre-filled Plates for Yeast DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Yeast culture Compatible with Mag16 and Mag32 series	MB552MPF16-96PR	96pr*	21120

Nucleic Acid Extraction kits for Insta NX® Mag16 series

Product	Code	Packing	Price in ₹
HiPurA® Pre-filled Clinical Multi-purpose Nucleic Acid Purification Kit (Cartridges) Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine and tissue Compatible with Mag16 and Mag32 series	MB583PC16200-48PR	48pr*	11125
HiPurA® Pre-filled Clinical Multi-purpose Nucleic Acid Purification Kit (Plates) Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine and tissue Compatible with Mag16 and Mag32 series	MB583MPF16200-96PR	96pr*	22250
HiPurA® Pre-filled Multi-purpose Magnetic Nucleic Acid Purification Kit (Cartridges) Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine, paraffin embedded tissue and tissue Compatible with Mag16 and Mag32 series	MB583PCDL16-48PR	48pr*	11125
HiPurA® Pre-filled Multi-purpose Magnetic Nucleic Acid Purification Kit (Plates) Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine, paraffin embedded tissue and tissue Compatible with Mag16 and Mag32 series	MB583MPFDL16-96PR	96pr*	22250
HiPurA® Pre-filled Cartridges for Stool Nucleic Acid Purification New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Stool Compatible with Mag16 and Mag32 series	MB544PC16-48PR	48pr*	12500

Product	Code	Packing	Price in ₹
HiPurA® Pre-filled Plates for Stool Nucleic Acid Purification New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Stool Compatible with Mag16 and Mag32 series	MB544MPF16-96PR	96pr*	24000
HiPurA® Pre-filled Cartridges for Viral Nucleic Acid Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, nasopharyngeal swab, oropharyngeal swab in VTM Compatible with Mag16 and Mag32 series	MB582PC16-48PR	48pr*	11125
HiPurA® Pre-filled Plates for Viral Nucleic Acid Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, nasopharyngeal swab, oropharyngeal swab in VTM Compatible with Mag16 and Mag32 series	MB582MPF16-96PR	96pr*	22250
HiPurA® Pre-filled Cartridges for Water Nucleic Acid Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Water Compatible with Mag16 and Mag32 series	MB622PC16-48PR MZ	48pr*	14585
HiPurA® Pre-filled Plates for Water Nucleic Acid Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Water Compatible with Mag16 and Mag32 series	MB622MPF16-96PR MZ	96pr*	29170
RNA Extraction kits for Insta NX® Mag24 Series			
HiPurA® Pre-filled Cartridges for Plant RNA Purification New Principle: Magnetic Bead Based Pre-filled Extraction Kit for processing 24 samples. (Reagents and Plasticware) Sample Material: Plants Compatible with Mag24 series	MB603PC-24-24NO	24no	15400
DNA Extraction kits for Insta NX® Mag24 Series			
HiPurA® Cell-free DNA Purification Kit New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 24 samples. (Reagents and Plasticware) Sample material : Plasma Compatible with Mag24 series	MB586MPF-24-24NO	24no	19775
HiPurA® Cell-free DNA Purification Kit New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 24 samples. (Reagents and Plasticware) Sample material : Plasma Compatible with Mag24 series	MB586PCCT-24-24NO	24no	19775

Product	Code	Packing	Price in ₹
HiPurA® Pre-filled Cartridges for Food Pathogen Purification New Principle: Magnetic Bead Based Pre-filled Extraction Kit for processing 24 samples. (Reagents and Plasticware) Sample Material: Food sample Compatible with Mag24 series	MB568PC-24-24NO	24no	15400
HiPurA® Pre-filled Cartridges for Plasmid Midiprep DNA Purification New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 24 samples. (Reagents and Plasticware) Sample material : Bacterial culture Sample Volume : 150ml culture Compatible with Mag24 series	MB509PC-24-24NO	24no	16850
HiPurA® Pre-filled Cartridge for Endotoxin free Plasmid DNA Purification New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 24 samples. (Reagents and Plasticware) Sample material : Bacterial culture Sample volume : 150 ml culture Compatible with Mag24 series	MB514PC-24-24NO	24no	18000
HiPurA® SuperPlant Pre-filled Cartridges for Plant Nucleic Acid Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 24 samples. (Reagents and Plasticware) Sample material : Plant Tissue Compatible with Mag24 series	MB571PC-24-24NO	24no	15400
HiPurA® Pre-filled Cartridges for Plasmid Maxiprep DNA Purification New Principle: Magnetic Bead Based Pre-filled Extraction Kit for processing 24 samples. (Reagents and Plasticware) Sample Material: Bacteerial culture Compatible with Mag24 series	MB510PC-24-24NO	24no	45000
Nucleic Acid Extraction kits for Insta NX® Mag24 series			
HiPurA® Cell- free Nucleic Acid Purification Kit New Principle: Magnetic Bead Based Pre-filled Extraction Kit for processing 24 samples. (Reagents and Plasticware) Sample Material: Plasma Compatible with Mag24 series	MB586PCCT-24-24NO	24no	19775
RNA Extraction kits for Insta NX® Mag32 Series			
HiPurA® Pre-filled Plates for Insta NX® Mag32 ◆ Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag32 series	MB615MPF-32-10NO	10no	131840

HiPurA® Pre-filled Plates for Insta NX® Mag32 + ◆ Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag32 series	MB615MPF32200-10NO	10no	131840
HiPurA® Pre-filled Plates for Insta NX® Mag32 ◆ Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) (Note: Magnetic Beads need to be added before processing samples) Sample material: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag32 series	MB615NB32200-10NO	10no	131840
HiPurA® Super 11 Pre-filled Plates for Insta NX® Mag32 ◆ Principle: Magnetic Bead Based Pre-filled extraction kit for rapid processing of 320 samples. (Reagents and Plasticware) Sample material: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag32 series	MB615MPF3211-10NO	10no	131840
HiPurA® Viral RNA Automated Extraction Combi Kit + ◆ Principle: Magnetic Bead Based Non Pre-filled extraction kit for processing 320 samples. (Provided with Reagents and Plasticware) Sample material: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag32 series	MB615MAC-32-10NO	10no	118920
HiPurA® Pre-filled Plates for Plant RNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 160 samples. (Reagents and Plasticware) Sample material : Plant Tissue Compatible with Mag32 series	MB603MPF-32-5NO	5no	45320
HiPurA® Pre-filled Plates for Tissue RNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material : Tissue Compatible with Mag32 series	MB618MPF32200-10NO	10no	90640

Product	Code	Packing	Price in ₹
DNA Extraction kits for Insta NX® Mag32 Series			
HiPurA® Multi sample Pre-filled Plates for Insta NX® Mag32 ◆ Principle: Magnetic Bead Based Pre-filled extraction kit for processing 160 samples. (Reagents and Plasticware) Sample material: Blood-stained fabric, cigarette Butts, hair, nail clippings, chewing gum, stamps, envelopes, sexual assault samples, saliva/ buccal swab, bone, teeth, tissue samples Compatible with Mag32 series	MB554MPF32200-5NO	5no	45320
HiPurA® Pre-filled Plates for Bacterial DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material : Bacterial culture Compatible with Mag32 series	MB505MPF-32-10NO MZ	10no	90640
HiPurA® Pre-filled Plates for Blood DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material : Blood, serum and plasma Compatible with Mag32 series	MB504MPF-32-10NO	10no	90640
HiPurA® Pre-filled Plates for Food DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material : Food Compatible with Mag32 series	MB562MPF-32-10NO	10no	90640
HiPurA® Pre-filled Plates for Food Pathogen Purification New Principle: Magnetic Bead Based Pre-filled Extraction Kit for processing 320 samples. (Reagents and Plasticware) Sample Material: Food Compatible with Mag32 series	MB568MPF-32-10NO	10no	80000
HiPurA® Pre-filled Plates for Fungal DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Fungus Compatible with Mag32 series	MB576MPF-32-10NO	10no	89600
HiPurA® Pre-filled Plates for Insect DNA Purification New Principle: Magnetic Bead Based Pre-filled Extraction Kit for processing 320 samples. (Reagents and Plasticware) Sample Material: Insects Compatible with Mag32 series	MB529MPF-32-10NO	10no	67200
HiPurA® Pre-filled Plates for Plant DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Plant Tissue Compatible with Mag32 series	MB507MPF-32-3NO	3no	27190

Product	Code	Packing	Price in ₹
HiPurA® Pre-filled Plates for Plasmid DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material : Bacterial culture Compatible with Mag32 series	MB508MPF-32-10NO	10no	90640
HiPurA® Pre-filled Plates for Shrimp DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material : Shrimp Compatible with Mag32 series	MB581MPF32200-10NO	10no	90640
HiPurA® Pre-filled Plates for Stool DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material : Stool Compatible with Mag32 series	MB544MPF32200-10NO MZ	10no	90640
HiPurA® Pre-filled Plates for Yeast DNA Purification New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material: Yeast culture Compatible with Mag32 series	MB552MPF-32-10NO	10no	64800
HiPurA® SuperPlant Pre-filled Plates for Plant DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material : Plant Compatible with Mag32 series	MB571MPF-32-10NO	10no	89000
Nucleic Acid Extraction kits for Insta NX® Mag32 Series			
HiPurA® Pre-filled Clinical Multi-purpose Nucleic Acid Purification Kit Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine, paraffin embedded tissue and tissue Compatible with Mag32 series	MB583MPF32200-10NO	10no	90640
HiPurA® Pre-filled Multi-purpose Magnetic Nucleic Acid Purification Kit Principle: Magnetic Bead Based Pre-filled extraction kit for processing 320 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine, paraffin embedded tissue and tissue Compatible with Mag32 series	MB583MPFDL32-10NO	10no	90640

HiPurA® Pre-filled Plates for Water Nucleic Acid Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 160 samples. (Reagents and Plasticware) Sample material : Water Compatible with Mag32 series	MB622MPF-32-5NO MZ	5no	48615
RNA Extraction kits for Insta NX® Mag96 Series			
HiPurA® Pre-filled Plates for Insta NX® Mag96 ◆ Principle: Magnetic Bead Based Pre-filled extraction kit for processing 480 samples. (Reagents and Plasticware) Sample material: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag96 series	MB615MPF-96-5NO	5no	197760
HiPurA® Pre-filled Plates for Insta NX® Mag96 ◆ Principle: Magnetic Bead Based Pre-filled extraction kit for processing 480 samples. (Reagents and Plasticware) Sample material: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag96 series	MB615MPF96-200-5NO	5no	197760
HiPurA® Super 11 Pre-filled Plates for Insta NX® Mag96 + ◆ Principle: Magnetic Bead Based Pre-filled extraction kit for rapid processing of 480 samples. (Reagents and Plasticware) Sample material: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag96 series	MB615MPF9611-5NO	5no	197760
HiPurA® Viral RNA Automated Extraction Combi Kit + ◆ Principle: Magnetic Bead Based Non Pre-filled extraction kit for processing 480 samples. (Provided with Reagents and Plasticware) Sample material: Nasopharyngeal swabs, oropharyngeal swabs in viral transport medium and other body fluids Compatible with Mag96 series	MB615MAC-96-5NO	5no	167610
HiPurA® Pre-filled Plates for Tissue RNA Purification New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 480 samples. (Reagents and Plasticware) Sample material : Tissue Compatible with Mag96 series	MB618MPF96200-5NO	5no	120000

HiPurA® Pre-filled Plates for Bacterial DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 384 samples. (Reagents and Plasticware) Sample material : Bacterial culture Compatible with Mag96 series	**MB505MPF-96-4NO** MZ	**4no**	**116680**
HiPurA® Pre-filled Plates for Blood DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 384 samples. (Reagents and Plasticware) Sample material : Blood, serum, plasma Compatible with Mag96 series	**MB504MPF-96-4NO**	**4no**	**116700**
HiPurA® Pre-filled Plates for Plant DNA Purification New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 192 samples. (Reagents and Plasticware) Sample material : Plant tissue Compatible with Mag96 series	**MB507MPF-96-2NO**	**2no**	**50000**

Nucleic Acid Extraction kits for Insta NX® Mag96 Series

Product	Code	Packing	Price in ₹
HiPurA® Pre-filled Clinical Multi-purpose Nucleic Acid Purification Kit Principle: Magnetic Bead Based Pre-filled extraction kit for processing 480 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine, paraffin embedded tissue and tissue Compatible with Mag96 series	**MB583MPF96200-5NO**	**5no**	**135960**
HiPurA® Pre-filled Multi-purpose Magnetic Nucleic Acid Purification Kit Principle: Magnetic Bead Based Pre-filled extraction kit for processing 480 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine, paraffin embedded tissue and tissue Compatible with Mag96 series	**MB583MPFDL96-5NO**	**5no**	**145850**
HiPurA® Pre-filled Plates for Viral Nucleic Acid Purification [For Insta NX® Mag96] ◆ Principle: Magnetic Bead Based Pre-filled extraction kit for processing 480 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, nasopharyngeal swabs, oropharyngeal swabs in Viral Transport Medium Compatible with Mag96 series	**MB582MPF-96-5NO**	**5no**	**125400**

Insta NX® DNA / RNA Purification Kits

Insta NX® DNA / RNA Purification Kits are to be used only with HiMedia's Insta NX® (LA1056) machine

Insta NX® DNA Kits

Product	Code	Packing	Price in ₹
Insta NX® Bacterial Genomic DNA Purification Kit Principle : Column Based Sample material : Bacterial cultures	MBIN006-12PR MZ	12pr*	6360
Insta NX® Blood DNA Plus Purification Kit ◆ Principle : Column Based Sample Processing : Volume-400µl whole blood	MBIN025-12PR	12pr*	7420
Insta NX® Blood Genomic DNA Purification Kit ◆ Principle : Column Based Sample material : Whole Blood, serum, plasma, buffy coat	MBIN001-12PR MBIN001-48PR	12pr* 48pr*	6360 23850
Insta NX® Bone DNA Purification Kit ◆ Principle : Column Based Sample processed : Human bone, Teeth pulp	MBIN012-12PR	12pr*	6360
Insta NX® Cell Genomic DNA Purification Kit ◆ Principle : Column Based Sample processed : Animal cell	MBIN011-12PR	12pr*	6360
Insta NX® Food DNA Purification Kit Principle : Column Based Sample processed : Milk, Chips, Butter etc.	MBIN014-12PR	12pr*	6360
Insta NX® Food Pathogen DNA Purification Kit (Salmonella) [Provided with Culture Media] Principle : Column Based Sample processed : Chocolate, Milk, Juice, Spices, Coffee, Baby food etc.	MBIN002-12PR	12pr*	6360
Insta NX® Food Pathogen DNA Purification Kit (Without Culture Media) Principle : Column Based Sample processed : Honey, Milk etc.	MBIN018-12PR	12pr*	6360
Insta NX® Forensic Multi-Sample DNA Purification Kit Principle : Column Based Sample processed : Chewing gum, Semen samples, Hair shaft, Blood clots, Buccal swab, Envelopes, Stained Cloth	MBIN020-12PR MBIN020-48PR	12pr* 48pr*	9545 35785
Insta NX® Frozen Blood DNA Purification Kit ◆ Principle : Column Based	MBIN017-12PR	12pr*	6360
Insta NX® Fungal DNA Purification Kit Principle : Column Based Sample processed : Aspergillus, Verticillium lecani, Trichoderma etc.	MBIN008-12PR MZ	12pr*	6360
Insta NX® Insect DNA Purification Kit Principle : Column Based Sample processed : Honey bee, Tick, Snail	MBIN024-12PR	12pr*	10765
Insta NX® Mycobacterium Tuberculosis DNA Purification Kit ◆ Principle : Column Based Sample processed : Sputum, Tissue, Cells	MBIN019-12PR	12pr*	6360
Insta NX® Plant Genomic DNA Purification Kit Principle : Column Based Sample processed : Rice roots, wheat seedling Soyabean seeds, Groundnut	MBIN005-12PR	12pr*	6360
Insta NX® Soil DNA Purification Kit Principle : Column Based Sample processed : Soil	MBIN009-12PR MZ	12pr*	6360
Insta NX® Stool DNA Purification Kit ◆ Principle : Column Based Sample processed : Stool	MBIN007-12PR MZ	12pr*	6360
Insta NX® SuperPlant DNA Purification Kit Principle : Column Based Sample processed : Banana, Sugarcane, Mango, Mangroves, Ayurvedic herbs, Palm oil, Cotton balls, Cotton lint, Okra leaves	MBIN016-12PR	12pr*	6360
Insta NX® Tissue Genomic DNA Purification Kit ◆ Principle : Column Based Sample material : Tissue	MBIN003-12PR MBIN003-48PR	12pr* 48pr*	6360 23850
Insta NX® Urine DNA Purification Kit ◆ Principle : Column Based Sample processed : Urine	MBIN004-12PR MZ	12pr*	6360
Insta NX® Viral DNA Plus Purification Kit ◆ Principle : Column Based Sample processing volume-400µl	MBIN026-12PR	12pr*	7420
Insta NX® Viral DNA Purification Kit ◆ Principle : Column Based Sample processed : HPV, HBV Sample etc.	MBIN015-12PR	12pr*	6940
Insta NX® Water DNA Purification Kit (without Enrichment) Principle : Column Based	MBIN010-12PR MZ	12pr*	6360
Insta NX® Yeast Genomic DNA Purification Kit Principle : Column Based Sample processed : Saccharomyces cerevisae	MBIN022-12PR MZ	12pr*	6360

DNA Ladders			
50bp DNA Ladder Consists of 17 DNA fragments ranging in size from 50bp to 1500bp. Ready to use premixed with loading buffer. Recommended load: 3 µl/lane Concentration : 148 µg/ml	MBT084-50LN MBT084-200LN	50In* (150µl) 200In* (4x150µl)	3360 10410
100bp DNA Ladder Consists of 13 fragments ranging from 100bp to 3000bp in increments.. Ready to use premixed with loading buffer. Recommended load: 4 µl/lane Concentration : 0.1 µg/µl	MBT049-50LN MBT049-200LN	50In* (200µl) 200In* (4x200µl)	3170 12620
100bp DNA Ladder M Consists of 12 fragments ranging from 100bp to 3000bp in increments. The 500 & 1500bp bands have increased intensity. Ready to use premixed with loading buffer. Recommended load: 3 µl/lane Concentration : 108 µg/ml	MBT130-50LN MBT130-200LN	50In* (150µl) 200In* (4x150µl)	2025 7055
1kb DNA Ladder Consists of 14 blunt-ended DNA fragments Ranging from 200bp to 10,037bp in increments. Ready to use premixed with loading buffer. Recommended load: 3 µl/lane Concentration : 0.1 µg/µl	MBT051-50LN MBT051-200LN	50In* (150µl) 200In* (4x150µl)	3490 13170
High Range DNA Ladder The High Range DNA Ladder includes 14 fragments ranging from 250bp-25kb. The 1kb and 3kb bands have increased intensity to serve as reference points. Ready to use premixed with loading buffer. Recommended load: 3 µl/lane Concentration : 104 µg/ml	MBT090-50LN MBT090-200LN	50In* (150µl) 200In* (4x150µl)	3770 12675

Magnetic Bead Based Extraction Kits

HiPurA® Multi-sample Pre-filled Cartridges for DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material: Blood-stained fabric, cigarette Butts, hair, nail clippings, chewing gum, stamps, envelopes, sexual assault samples, saliva, buccal swab, bone, teeth, tissue samples Compatible with Mag16 and Mag32 series		MB554PC16200-48PR	48pr*	11125
HiPurA® Multi-sample Pre-filled Plates for DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material: Blood-stained fabric, cigarette Butts, hair, nail clippings, chewing gum, stamps, envelopes, sexual assault samples, saliva, buccal swab, bone, teeth, tissue samples Compatible with Mag16 and Mag32 series		MB554MPF16200-96PR	96pr*	22250
HiPurA® Multi sample Pre-filled Plates for Insta NX® Mag32 Principle: Magnetic Bead Based Pre-filled extraction kit for processing 160 samples. (Reagents and Plasticware) Sample material: Blood-stained fabric, cigarette Butts, hair, nail clippings, chewing gum, stamps, envelopes, sexual assault samples, saliva/ buccal swab, bone, teeth, tissue samples Compatible with Mag32 series	◆	MB554MPF32200-5NO	5no	45320

Insta NX® Extraction Kits for Forensic Application

Insta NX® Blood Genomic DNA Purification Kit Principle : Column Based Sample material : Whole Blood, serum, plasma, buffy coat	◆	MBIN001-12PR MBIN001-48PR	12pr* 48pr*	6360 23850
Insta NX® Bone DNA Purification Kit Principle : Column Based Sample processed : Human bone, Teeth pulp	◆	MBIN012-12PR	12pr*	6360

Hi-PCR® Coronavirus (COVID-19) Multiplex Probe PCR Kit + ◆

This kit is designed *for sensitive and* specific detection of SARS-CoV-2 by 4 genes i.e. RdRp gene, N gene, E gene, IC genes
Compatible with the following Real-time PCR systems
- HiMedia
- Bio-Rad
- Applied Biosystems
- Qiagen
- Roche

ICMR & CDSCO APPROVED

Hi-PCR® Covid-19 Detection Kit (Dry Swab Method)

Highly sensitive multiplex diagnostic solution for detection of SARS-CoV-2 (N, RdRp, IC) by RNA Extraction - free RT-PCR method
Compatible with the following Real-time PCR systems
- HiMedia
- Bio-Rad
- Applied Biosystems
- Qiagen
- Roche

ICMR & CDSCO APPROVED

MBT189-100R | 100r# | 98500

Accessories for Dry Swab Kit

Contains sterile 15 ml tube and nylon flock swabs
Store between 15-25°C

Magnetic Automated Extraction Kits (Pre-filled)			
Extraction kits for Insta NX® Mag16 Series			
HiPurA® Pre-filled Cartridges for Bacterial DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Bacterial culture Compatible with Mag16 and Mag32 series	MB505PC16-48PR MZ	48pr*	11125
HiPurA® Pre-filled Plates for Bacterial DNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Bacterial culture Compatible with Mag16 and Mag32 series	MB505MPF16-96PR MZ	96pr*	22250
HiPurA® Pre-filled Cartridges for Blood DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Blood, serum and plasma Compatible with Mag16 and Mag32 series	MB504PC16-48PR	48pr*	11125
HiPurA® Pre-filled Plates for Blood DNA Extraction Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Blood, serum and plasma Compatible with Mag16 and Mag32 series	MB504MPF16-96PR	96pr*	22250
HiPurA® Pre-filled Clinical Multi-purpose Nucleic Acid Purification Kit (Cartridges) Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine and tissue Compatible with Mag16 and Mag32 series	MB583PC16200-48PR	48pr*	11125
HiPurA® Pre-filled Multi-purpose Magnetic Nucleic Acid Purification Kit (Cartridges) Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine, paraffin embedded tissue and tissue Compatible with Mag16 and Mag32 series	MB583PCDL16-48PR	48pr*	11125

Product	Code	Packing	Price in ₹
HiPurA® Pre-filled Clinical Multi-purpose Nucleic Acid Purification Kit (Plates) Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine, paraffin embedded tissue and tissue Compatible with Mag16 and Mag32 series	MB583MPF16200-96PR	96pr*	22250
HiPurA® Pre-filled Multi-purpose Magnetic Nucleic Acid Purification Kit (Plates) Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material: Whole blood, plasma, serum, saliva, buccal swabs, buffy coat, cells, urine, paraffin embedded tissue and tissue Compatible with Mag16 and Mag32 series	MB583MPFDL16-96PR	96pr*	22250
HiPurA® Pre-filled Cartridges for Insect DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Insect Compatible with Mag16 and Mag32 series	MB529PC16-48PR	48pr*	10000
HiPurA® Pre-filled Plates for Insect DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Insect Compatible with Mag16 Mag32 series	MB529MPF16-96PR	96pr*	19200
HiPurA® Pre-filled Cartridges for Nematode DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Water and Plant roots culture Compatible with Mag16 and Mag32 series	MB587PC16-48PR	48pr*	10000
HiPurA® Pre-filled plates for Nematode DNA Extraction New Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Water and Plant roots culture Compatible with Mag16 and Mag32 series	MB587MPF16-96PR	96pr*	19200
HiPurA® Pre-filled Cartridges for Tissue RNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 48 samples. (Reagents and Plasticware) Sample material : Tissue Compatible with Mag16 and Mag32 series	MB618PC16200-48PR	48pr*	11125
HiPurA® Pre-filled Plates for Tissue RNA Purification Principle: Magnetic Bead Based Pre-filled extraction kit for processing 96 samples. (Reagents and Plasticware) Sample material : Tissue Compatible with Mag16 and Mag32 series	MB618MPF16200-96PR	96pr*	22250

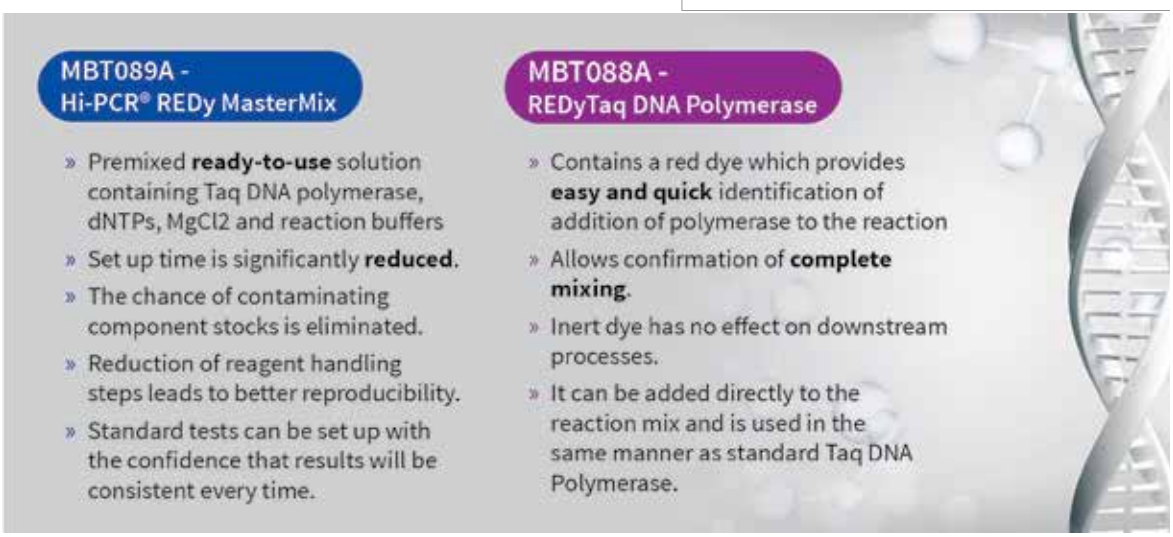
HiScript Two Step RT-PCR Kit Convenient formulation for performing cDNA synthesis and PCR amplification.	MBT138-10R MBT138-25R MBT138-50R	10r# 25r# 50r#	6770 15560 28010
New **Hi-Quanti 5X One-Step RT-PCR Mastermix** Convenient and improved formulation with 5X concentration for Realtime and conventional RT-PCR	MBT199-10R MBT199-25R MBT199-50R	10r# 25r# 50r#	3145 7770 11655

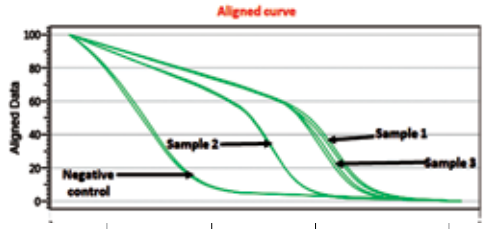
Reverse Transcription Enzymes

M-MuLV Reverse Transcriptase (RNase-H) (Concentration: 200 units/µl) Application : For synthesis of cDNA from RNA	MBT072-1000U MBT072-5000U	1000u 5000u	1660 7395



DNA Polymerases

Supplied with 10X Buffers (with / without $MgCl_2$)



New **REDyTaq DNA Polymerase (5 units/µl)** (10X Buffer A with $MgCl_2$) For enhanced amplification. The red dye allows easy visualization of polymerase addition to the reaction.	MBT088A-100U MBT088A-200U MBT088A-500U	100u 200u 500u	4120 8120 20160
Hi-Long Amp DNA Polymerase (5 units/µl) (10X Buffer A without $MgCl_2$) Source: E. coli with cloned pol gene from Thermus aquaticus and thermostable DNA polymerase. Application: For high-fidelity amplification and cloning of blunt-ended amplification products	MBT069-100U MBT069-200U MBT069-500U MBT069-1000U	100u 200u 500u 1000u	1895 3485 7660 12960
Hi-Proof DNA Polymerase (2.5 units/µl) (Proof reading Enzyme) (10X Buffer A without $MgCl_2$) Source : Pyrococcus furiosus Application : Has 3' - 5' Proof reading activity.	MBT149-100U MBT149-200U MBT149-500U	100u 200u 500u	3300 6435 14400
Hi-Proof DNA Polymerase (5 units/µl) (Proof reading Enzyme) (10X Buffer A without $MgCl_2$) Source : Pyrococcus furiosus Application : Has 3' - 5' Proof reading activity.	MBT068-100U MBT068-200U MBT068-500U	100u 200u 500u	3680 6380 15000
Hi-Temp DNA Polymerase (2.5 units/µl) (10X Buffer A without $MgCl_2$) Source : E. coli with cloned antibody of Thermus aquaticus Application : Hot-start activation results in specific and sensitive amplification of PCR template.	MBT070-100U MBT070-200U MBT070-500U MBT070-1000U	100u 200u 500u 1000u	9080 17250 41860 73280

Modifying Enzymes			
T4 DNA Ligase Concentration: 200units/µl T4 DNA Ligase catalyses the formation of phosphodiester bond between juxtaposed 5'-phosphate and 3'-hydroxyl terminals in duplex DNA and RNA. This enzyme will join blunt-end and cohesive-end terminals as well as repair single stranded nicks in duplex DNA, RNA and DNA-RNA hybrids. Protein Purification Kits

IgG Purification Kit (Protein A Based)
The IgG Purification Kit (Protein A Based) is based on the affinity of IgG to immobilized Protein A agarose and is used for purification of polyclonal antibodies.
When a suspension (e.g. serum, ascites fluid, tissue culture supernatant) containing mixture of substances along with IgG are loaded on the column, the IgG binds to Protein A and is recovered by elution.

IgG Purification Kit (Protein G Based)
The IgG Purification Kit (Protein G Based) is based on the affinity of IgG to immobilized Protein G agarose and is used for purification of polyclonal antibodies.
When a suspension (e.g. serum, ascites fluid, tissue culture supernatant) containing mixture of substances along with IgG are loaded on the column, the IgG binds to Protein G and is recovered by elution.

Sickle Cell Anemia Detection Kits

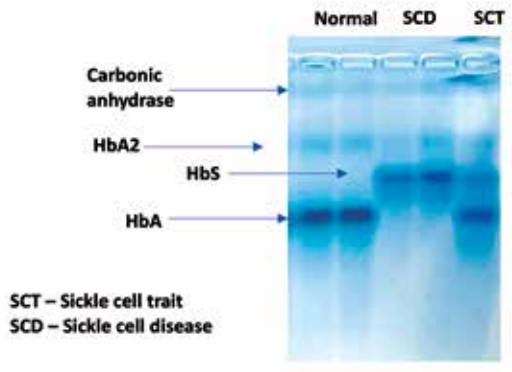
These kits are developed for diagnosis of Sickle Cell Anemia Disease.

Primary Screening (Turbidity based)

This kit is developed for screening of Sickle Cell Anemia, based on solubility difference between HbS and HbA

Product	Code	Packing	Price in ₹
Hi-Sickle Kit (Solubility Test for detection of Hemoglobin 'S') ◆ Pre-weighed chemicals for 50 test	MBP007-50TST	50 tests	On Request
Hi-Super Speed Sickle Kit (Solubility Test for detection of Hemoglobin 'S') ◆ [Pre-weighed reagent mix for five tests in one tube]	MBP006-50TST	50 tests	1320

Secondary Screening (Centrifugation based)



This kit is based on the solubility difference between HbS and HbA. This kit has an added advantage for partial distinction between Homozygous and Heterozygous in sickle cell anemia patients.

Product	Code	Packing	Price in ₹
Hi-Speed Sickle Kit (Centrifugation based detection of Hemoglobin 'S') ◆ On receipt store at 2-8°C	MBP003-50TST	50 tests	1195

Confirmatory Kits

Gel Electrophoresis Kits

MOLECULAR BIOLOGY PRODUCTS

For Molecular Biology research experiments highest quality chemicals are a prerequisite to ensure exact and reproducible results as traces of chemical impurities can interfere in the results or during the analysis.

Agarose Selection Guide

Code No.	Product Name	Application
MB002	Agarose, Special Low EEO (Nuclease and Protease Free)	Routine separation of DNA or RNA fragments. separation of 100bp -50kb Southern and Northern blotting PCR analysis
MB229	Agarose, Ultrapure, Low EEO (Nuclease and Protease Free)	Routine separation of DNA or RNA fragments. separation of 100bp -50kb Southern and Northern blotting PCR analysis
MB080	Agarose DNA grade, (Low melting) (Nuclease and Protease free)	Convenient recovery and publication of DNA and RNA Separation of DNA and RNA > 1kb
MB073	Ultra Resolution agarose (Nuclease and Protease free)	High resolution separation of 20bp - 800bp DNA fragments, For analysis of AMPFLP and STR assays
MB094	Agarose for Pulse Field Gel Electrophoresis (PFGE) (Nuclease and Protease free)	Pulse Field Gel Electrophoresis, Large Fragment separation, DNA & RNA Mega base pair separation
MB175	Agarose, Medium EEO for Electrophoresis	Serum Protein Electrophoresis, Immunoelectrophoresis
MB176	Agarose, High EEO for Gel and Immunoelectrophoresis	Immunoelectrophoresis techniques, Protein Electrophoresis

Acids and Solvents			
Acetamide (Amide C_2) For Molecular Biology C_2H_5NO MW : 59.07 CAS : 60-35-5 Assay : ≥99% Store between 10-30°C	MB051-100G	100gm	890
Acetic acid For Molecular Biology $C_2H_4O_2$ MW : 60.05 CAS : 64-19-7 Assay : ≥ 99.7% Store between 10-30°C	MB052-500ML	500ml	5760
Acetone For Molecular Biology CH_3COCH_3 MW : 58.08 CAS : 67-64-1 Assay : ≥ 99.5% Store between 10-30°C	MB179-500ML MB179-2.5L	500ml 2.5lt	740 2535
Acetonitrile For Molecular Biology CH_3CN MW : 41.05 CAS : 75-05-8 Assay : ≥99.9% Store between 10-30°C	MB159-500ML	500ml	4200
1-Butanol (n-Butyl alcohol) For Molecular Biology $C_4H_{10}O$ MW : 74.12 CAS : 71-36-3 Assay : ≥99.5% Store between 10-30°C	MB055-500ML	500ml	3705
2-Butanol For Molecular Biology $C_4H_{10}O$ MW : 74.12 CAS : 78-92-2 Assay : ≥99% Store between 10-30°C	MB056-500ML	500ml	4575
Carbinol For Molecular Biology CH_3OH MW : 32.04 CAS : 67-56-1 Assay : ≥99.9% Store between 10-30°C	MB154-100ML MB154-500ML	100ml 500ml	425 1460
Chloroform For Molecular Biology $CHCl_3$ MW : 119.38 CAS : 67-66-3 Assay : ≥99.8% Store between 10-30°C	MB109-100ML MB109-500ML	100ml 500ml	410 1795
Chloroform : Isoamyl alcohol (24:1) For Molecular Biology Store between 10-30°C	MB115-100ML MB115-500ML	100ml 500ml	1240 5560
DEPC (Diethyl pyrocarbonate) For Molecular Biology $C_6H_{10}O_5$ MW : 162.14 CAS : 1609-47-8 Assay : ≥99% Store at 2 - 8°C	MB076-25ML MB076-100ML	25ml 100ml	3495 12225

Diluent for DNA Extraction (For Molecular Biology) (Denatured Ethanol) CAS : 64-17-5 Assay : ≥94% Store between 10-30°C	MB228-100ML MB228-500ML	100ml 500ml 10x500ml	585 2180 19405
N,N-Dimethylformamide (DMF) For Molecular Biology C_3H_7NO MW : 73.09 CAS : 68-12-2 Assay : ≥99% Store between 10-30°C	MB036-250ML MB036-500ML	250ml 500ml	1165 1950
Formaldehyde sol., 37% (Formalin; Methanal) For Molecular Biology CH_2O MW : 30.03 CAS : 50-00-0 Assay : 37-41% Store between 10-30°C	MB059-500ML	500ml	6550
Formamide (Liquid) Forms a clear colourless solution in water (10%) For Molecular Biology $CONH_3$ MW : 45.04 CAS : 75-12-7 Assay : ≥99.5% Store between 10-30°C	MB012-500ML MB012-1L	500ml 1lt	2470 4570
Hydrochloric acid abt.35% pure For Molecular Biology HCl MW : 36.46 CAS : 7647-01-0 Store between 10-30°C	MB306-500ML MB306-2.5L MB306-5L	500ml 2.5lt 5lt	425 1245 1685
Isoamyl alcohol For Molecular Biology $C_5H_{12}O$ MW : 88.15 CAS : 123-51-3 Assay : ≥98.5% Store between 10-30°C	MB091-100ML MB091-500ML	100ml 500ml	835 2005
Methanol For Molecular Biology CH_3OH MW : 32.04 CAS : 67-56-1 Assay : ≥99.9% Store between 10-30°C	MB113-100ML MB113-500ML	100ml 500ml	240 790
Orthophosphoric acid For Molecular Biology H_3PO_4 MW : 98.00 CAS:7664-38-2 Assay : ≥85% Store between 10-30°C	MB157-250ML	250ml	4915
Perchloric acid about 60% For Molecular Biology $HClO_4$ MW: 100.46 CAS: 7601-90-3 Assay : 60-62% Store between 10-30°C	MB170-500ML	500ml	4850
2-Propanol (Isopropyl alcohol) For Molecular Biology C_3H_8O MW : 60.1 CAS : 67-63-0 Assay : ≥99.8% Store between 10-30°C	MB063-1L	1lt	2085

2-Propanol (70% in H_2O) **HiPer® Clean-Up Reagent** (Isopropyl alcohol) For Molecular Biology C_3H_8O MW : 60.1 CAS : 67-63-0 Assay : 69-71% Store between 10-30°C	MB283-100ML MB283-250ML MB283-500ML	100ml 250ml 500ml	430 790 1395
Sulfuric acid For Molecular Biology H_2SO_4 MW : 98.08 CAS : 7664-93-9 Assay : ≥95% Store between 10-30°C	MB344-250ML	250ml	13480
Xylene mixture of isomers For Molecular Biology C_8H_{10} MW : 106.17 CAS : 1330-20-7 Store between 10-30°C	MB180-500ML MB180-2.5L	500ml 2.5lt	880 1945
Silicone (Anti-foaming agent) For Molecular Biology Store between 10-30°C	MB158-100G MB158-500G	100gm 500gm	1545 3885
Amphotericin B For Molecular Biology $C_{47}H_{73}NO_{17}$ MW : 924.08 CAS : 1397-89-3 Potency : ≥ 750 µg/mg Store at 2-8°C	MB309-1G	1gm	3075
ASN Salt For Molecular Biology $C_{16}H_{18}N_3NaO_4S$ MW : 371.39 CAS : 69-52-3 Assay : ≥91% Store at 2 - 8°C	MB104-1G MB104-5G	1gm 5gm	420 1620
Carbenicillin disodium salt New α-Carboxybenzylpenicillin disodium salt) For Molecular Biology $C_{17}H_{16}N_2Na_2O_6S$ MW : 422.36 CAS : 4800-94-6 Potency : ≥ 770 µg/mg Store at 2 - 8°C	MB362-500MG MB362-1G	500mg 1gm	350 685
Cefotaxime sodium salt For Molecular Biology $C_{16}H_{16}N_5NaO_7S_2$ MW : 477.45 CAS : 64485-93-4 Assay : ≥98% Store at 2 - 8° C	MB134-1G MB134-5G MB134-10G MB134-25G	1gm 5gm 10gm 25gm	1175 4850 9215 21195
Chloramphenicol For Molecular Biology $C_{11}H_{12}Cl_2N_2O_5$ MW : 323.13 CAS : 56-75-7 Assay : ≥97% Store between 10-30°C	MB286-5G	5gm	1040
Gentamicin sulphate For Molecular Biology CAS : 1405-41-0 Potency : ≥ 590 µg/mg Store at 2 - 8°C	MB288-1G MB288-5G	1gm 5gm	855 3830

Calcium chloride dihydrate For Molecular Biology $CaCl_2.2H_2O$ MW : 147.01 CAS : 10035-04-8 Assay : ≥99% Store between 10-30°C	MB034-100G MB034-500G	100gm 500gm	365 1665
1-Chloro-2,4-dinitrobenzene For Molecular Biology $C_6H_3ClN_2O_4$ MW : 202.55 CAS : 97-00-7 Assay : ≥ 99% Store between 10-30°C	MB216-500G	500gm	3785
2,2-Diphenyl-1-picrylhydrazyl For Molecular Biology $C_{18}H_{12}N_5O_6$ MW : 394.32 CAS : 1898-66-4 Assay : ≥85% Store at 2 - 8°C	MB263-1G	1gm	11275
Isopropyl-ß-D-thiogalactopyranoside (Isopropyl-ß-D-thiogalactoside; IPTG) For Molecular Biology $C_9H_{18}O_5S$ MW : 238.3 CAS : 367-93-1 Assay : ≥99% Store at 2 - 8°C	MB072-1G MB072-5G MB072-10G MB072-25G	1gm 5gm 10gm 25gm	400 1805 3325 7715
Magnesium chloride anhydrous For Molecular Biology $MgCl_2$ MW : 95.21 CAS : 7786-30-3 Assay : ≥98% Store between 10-30°C	MB237-100G MB237-500G	100gm 500gm	360 1800
Magnesium chloride hexahydrate For Molecular Biology $MgCl_2.6H_2O$ MW : 203.30 CAS : 7791-18-6 Assay : ≥99.5% Store between 10-30°C	MB040-100G MB040-500G	100gm 500gm	865 3995
Rubidium chloride RbCl For Molecular Biology MW : 120.92 CAS : 7791-11-9 Assay : ≥99.5% Store between 10-30°C	MB243-5G MB243-25G	5gm 25gm	4470 21750
Spermidine For Molecular Biology $C_7H_{19}N_3$ MW : 145.25 CAS :124-20-9 Assay : ≥98% Store at 2 - 8°C	MB304-1G MB304-5G	1gm 5gm	7800 35035
X-Gal (5-Bromo-4-chloro-3-indolyl-ß-D-galactopyranoside) For Molecular Biology $C_{14}H_{15}BrClNO_6$ MW : 408.63 CAS : 7240-90-6 Assay : ≥98% Store at 2 - 8°C	MB069-100MG MB069-500MG MB069-1G	100mg 500mg 1gm	1660 7465 14915
X-Glucoside (5-Bromo-4-chloro-3-indolyl-ß-D-glucopyranoside) For Molecular Biology $C_{14}H_{15}BrClNO_6$ MW : 408.63 CAS : 15548-60-4 Assay : ≥97% Store at 2 - 8°C	MB246-1MG MB246-5MG MB246-10MG	1mg 5mg 10mg	1945 9095 16980
X-Glucuronide CHA salt (5-Bromo-4-chloro-3-indolyl-ß-D-glucuronide cyclohexylammonium salt) For Molecular Biology $C_{20}H_{26}BrClN_2O_7$ MW : 521.79 CAS : 114162-64-0 Assay : ≥98% Store at 2 - 8°C	MB088-100MG MB088-500MG MB088-1G	100mg 500mg 1gm	6120 27540 52000
X-Glucuronide (5-Bromo-4-chloro-3-indolyl-ß-D-glucuronide sodium salt) For Molecular Biology $C_{14}H_{12}BrClNNaO_7$ MW : 444.59 CAS : 129541-41-9 Assay : ≥98% Store at -20°C	MB089-100MG MB089-500MG MB089-1G	100mg 500mg 1gm	9015 21700 39515

Chemicals for Density Gradient Separation

Product	Code	Packing	Price in ₹
Cesium chloride For Molecular Biology CsCl MW : 168.36 CAS : 7647-17-8 Assay : ≥99.5% Store between 10-30°C	MB049-100G MB049-500G	100gm 500gm	5415 26415
Cesium sulphate For Molecular Biology Cs_2SO_4 MW : 361.87 CAS :10294-54-9 Assay : ≥99.8% Store between 10-30°C	MB299-25G MB299-100G	25gm 100gm	3825 16115
Dextran sulfate sodium salt From *Leuconostoc* spp. For Molecular Biology MW : ~ 5,00,000 CAS : 9011-18-1 Store at 2 - 8°C	MB146-5G MB146-25G MB146-100G	5gm 25gm 100gm	2810 10180 37375
Ficoll ▶ 400 For Molecular Biology Av. MW : 400000 CAS: 26873-85-8 Store between 10-30°C	MB167-5G MB167-25G	5gm 25gm	3550 15960
Lithium chloride For Molecular Biology LiCl MW : 42.39 CAS : 7447-41-8 Assay : ≥99% Store between 10-30°C	MB038-100G MB038-500G	100gm 500gm	1490 7290
Poly(ethylene glycol) MW 4000 For Molecular Biology $H(OCH_2CH_2)nOH$ Av MW : 3600-4400 CAS : 25322-68-3 Store between 10-30°C	MB148-500G	500gm	430
Poly(ethylene glycol) MW 6000 For Molecular Biology $H(OCH_2CH_2)nOH$ Av MW : 5000-7000 CAS : 25322-68-3 Store between 10-30°C	MB149-500G	500gm	560
Poly(ethylene glycol) MW 8000 For Molecular Biology $H(OCH_2CH_2)nOH$ Av MW : 7000-9000 CAS : 25322-68-3 Store between 10-30°C	MB150-500G	500gm	915

HiGenoMB Unzipping Genes

Product	Code	Packing	Price in ₹
Poly(ethylene glycol) MW 20000 For Molecular Biology $H(OCH_2CH_2)nOH$ Av MW : 16000-25000 CAS : 25322-68-3 Store between 10-30°C	MB151-500G	500gm	8890

Chemicals for Detection of Auxotrophs

L-Histidine monohydrochloride monohydrate For Molecular Biology $C_6H_9N_3O_2.HCl.H_2O$ MW : 209.63 CAS : 5934-29-2 Assay : ≥99% Store between 10-30°C	MB292-25G MB292-100G MB292-500G	25gm 100gm 500gm	1305 4560 20455
L-Lysine monohydrate For Molecular Biology $C_6H_{14}N_2O_2.H_2O$ MW : 164.2 CAS : 39665-12-8 Assay : ≥95% Store between 10-30°C	MB295-100G	100gm	22485

Chemicals for ELISA

Alkaline phosphatase From Bovine Intestine For Molecular Biology MW : ~160 kDa CAS : 9001-78-9 Activity : 2000-4000 DEA unit/mg Store at 2 - 8°C	MB277-1000U	1000units	4595
Bovine serum albumin For Molecular Biology (Nuclease and Protease free) CAS : 9048-46-8 Assay : ≥98% protein Store at 2 - 8°C	MB083-5G MB083-25G MB083-100G MB083-500G	5gm 25gm 100gm 500gm	650 2910 9420 45765
Peroxidase, Horseradish For Molecular Biology (Rz ≥3.0, salt free) CAS : 9003-99-0 Activity : ≥ 250 units/mg Store at 2 - 8°C	MB225-25000U	25000u	29285
Sodium carbonate anhydrous (Soda ash) For Molecular Biology Na_2CO_3 MW : 105.99 CAS : 497-19-8 Assay : ≥99.9% Store between 10-30°C	MB253-100G MB253-500G MB253-1KG	100gm 500gm 1kg	2490 4730 9095
3,3',5,5'-Tetramethylbenzidine (TMB) For Molecular Biology $C_{16}H_{20}N_2$ MW : 240.34 CAS : 54827-17-7 Assay : ≥ 99% Store between 10-30°C	MB122-1G MB122-5G	1gm 5gm	2780 8235
Tween® 20 Polyoxyethylenesorbitan monolaurate (Polysorbate-20) For Molecular Biology CAS : 9005-64-5 Density at 25°C : ~1.095 g/ml Store between 10-30°C	MB067-100ML MB067-1L	100ml 1lt	4325 38925

Product	Code	Packing	Price in ₹
Chemicals for IVD Use			
Imidazole For Molecular Biology $C_3H_4N_2$ MW : 68.08 CAS : 288-32-4 Assay : ≥99% Store between 10-30°C	MB019-100G MB019-500G	100gm 500gm	2075 8070
Potassium chloride For Molecular Biology KCl MW : 74.55 CAS : 7447-40-7 Assay : ≥99% Store between 10-30°C	MB043-500G	500gm	2955
Sodium azide For Molecular Biology NaN_3 MW : 65.01 CAS : 26628-22-8 Assay : ≥ 98% Store between 10-30°C	MB075-100G MB075-500G	100gm 500gm	930 4505
Sodium chloride For Molecular Biology NaCl MW : 58.44 CAS : 7647-14-5 Assay : ≥99.5% Store between 10-30°C	MB023-500G MB023-1KG MB023-5KG	500gm 1kg 5kg	870 1560 7490
Sucrose For Molecular Biology $C_{12}H_{22}O_{11}$ MW : 342.3 CAS : 57-50-1 Assay : ≥99.5% Store between 10-30°C	MB025-500G MB025-5KG	500gm 5kg	585 4255
Thiol PEG, mPEG-SH, 5K New PEG thiol, Methoxy PEG Thiol For Molecular Biology Used to modify gold or silver nanoparticles. $CH_3O(CH_2CH_2O)nCH_2CH_2SH$ MW : 5000 Da CAS : 401916-61-8 Assay : ≥95% Store at -20°C	MB367-1G MB367-5G	1gm 5gm	13500 66150
Tris, Free base (Tris[hydroxymethyl] aminomethane) For Molecular Biology (Nuclease and Protease free) $C_4H_{11}NO_3$ MW : 121.14 CAS : 77-86-1 Assay : ≥99% Store between 10-30°C	MB029-100G MB029-500G MB029-1KG MB029-5KG	100gm 500gm 1kg 5kg	915 3630 6860 30845
Triton® X-100 For Molecular Biology $C_{34}H_{62}O_{11}$ MW : 646.87 CAS : 9002-93-1 Store between 10-30°C	MB031-50ML MB031-100ML MB031-500ML	50ml 100ml 500ml	590 940 4625
Chemicals for Mutagenesis			
Ethidium bromide For Molecular Biology $C_{21}H_{20}BrN_3$ MW : 394.31 CAS : 1239-45-8 Assay : ≥95% Store between 10-30°C	MB071-1G MB071-5G	1gm 5gm	550 2425
Ethidium bromide solution (10mg/ml) For Molecular Biology $C_{21}H_{20}BrN_3$ MW : 394.31 CAS : 1239-45-8 Assay : ≥95% Store at 2-8°C	MB074-10ML	10ml	3090

® Registered Trade Mark of Dow Chemical Company
® Registered Trade Mark of Croda International LLC

All Molecular Biology Grade Chemicals are "Nuclease free"

Product	Code	Packing	Price in ₹
Sodium bisulphite (see : Sodium hydrogen sulphite) For Molecular Biology $NaHSO_3$ MW: 104.06 CAS : 7631-90-5 Assay : ≥ 58.5% SO_2 Store between 10-30°C	MB358-500G	500gm	715

Chemicals for Nanotechnology

Product	Code	Packing	Price in ₹
Ammonium persulphate For Molecular Biology (Nuclease and Protease free) $(NH_4)_2S_2O_8$ MW : 228.2 CAS : 7727-54-0 Assay : ≥98% Store between 10-30°C	MB003-25G MB003-100G MB003-500G	25gm 100gm 500gm	485 915 4125
CTAB (N-Cetyl-N,N,N-trimethylammonium bromide) For Molecular Biology $C_{19}H_{42}BrN$ MW : 364.45 CAS : 57-09-0 Assay : ≥99% Store between 10-30°C	MB101-100G MB101-500G	100gm 500gm	475 2240
Calcium chloride dihydrate For Molecular Biology $CaCl_2.2H_2O$ MW : 147.01 CAS : 10035-04-8 Assay : ≥99% Store between 10-30°C	MB034-100G MB034-500G	100gm 500gm	365 1665
Cetyldimethylethylammonium bromide For Molecular Biology $C_{20}H_{44}BrN$ MW : 378.47 CAS : 124-03-8 Assay : ≥ 98% Store at 2 - 8°C	MB227-100G	100gm	7505
Chitosan For Molecular Biology $(C_6H_{11}NO_4)n$ MW : 3800 - 20000 Daltons CAS : 9012-76-4 Degree of deacetylation : ≥75% Store between 10-30°C	MB285-50G MB285-100G MB285-500G	50gm 100gm 500gm	190 335 1650
Copper (II) sulphate pentahydrate (Cupric sulphate pentahydrate) For Molecular Biology $CuSO_4.5H_2O$ MW : 249.69 CAS : 7758-99-8 Assay : ≥98% Store between 10-30°C	MB238-100G MB238-500G	100gm 500gm	200 755
Ferric chloride anhydrous For Molecular Biology $FeCl_3$ MW : 162.2 CAS : 7705-08-0 Assay : ≥98% Store between 10-30°C	MB254-50MG MB254-1G MB254-5G	50mg 1gm 5gm	250 590 1105
Gold (III) chloride trihydrate For Molecular Biology $HAuCl_4.3H_2O$ MW : 393.83 CAS : 16961-25-4 Assay : ≥99% Store between 10-30°C	MB291-1G MB291-5G	1gm 5gm	14665 57835
HEPES [N-(2-Hydroxyethyl)piperazine-N'-(2-ethanesulphonic acid] For Molecular Biology $C_8H_{18}N_2O_4S$ MW : 238.3 CAS : 7365-45-9 Assay : ≥99.5% Store between 10-30°C	MB016-25G MB016-100G MB016-500G	25gm 100gm 500gm	735 2170 8650

Product	Code	Packing	Price in ₹
Lead (II) acetate trihydrate For Molecular Biology $C_4H_6O_4Pb.3H_2O$ MW : 379.33 CAS : 6080-56-4 Assay : ≥99% Store between 10-30°C	MB239-100G MB239-500G	100gm 500gm	405 1835
Magnesium acetate tetrahydrate For Molecular Biology $C_4H_6MgO_4.4H_2O$ MW : 214.45 CAS : 16674-78-5 Assay : ≥98% Store between 10-30°C	MB039-100G	100gm	2405
Magnesium chloride hexahydrate For Molecular Biology $MgCl_2.6H_2O$ MW : 203.30 CAS : 7791-18-6 Assay : ≥99.5% Store between 10-30°C	MB040-100G MB040-500G	100gm 500gm	865 3995
Magnesium oxide, light For Molecular Biology MgO MW : 40.3 CAS : 1309-48-4 Assay : ≥98% Store between 10-30°C	MB275-500G	500gm	2475
Magnesium sulphate heptahydrate For Molecular Biology $MgSO_4.7H_2O$ MW : 246.47 CAS: 10034-99-8 Assay : ≥99.5% Store between 10-30°C	MB171-500G	500gm	665
Manganese (II) chloride tetrahydrate For Molecular Biology $MnCl_2.4H_2O$ MW : 197.91 CAS : 13446-34-9 Assay : ≥98% Store between 10-30°C	MB236-100G MB236-500G	100gm 500gm	215 790
Manganese (II) sulphate monohydrate For Molecular Biology $MnSO_4.H_2O$ MW : 169.02 CAS : 10034-96-5 Assay : ≥ 99% Store between 10-30°C	MB202-500G MB202-1KG	500gm 1kg	1030 1905
Poly(ethylene glycol) MW 8000 For Molecular Biology $H(OCH_2CH_2)nOH$ Av MW : 7000-9000 CAS : 25322-68-3 Store between 10-30°C	MB150-500G	500gm	915
Polyvinylpyrrolidone (PVP) K-30 (Povidone) For Molecular Biology Water soluble polymer made from N-Vinylpyrrolidone $(C_6H_9NO)n$ Av. MW : 40000 CAS : 9003-39-8 Store between 10-30°C	MB102-100G MB102-500G	100gm 500gm	585 2775
Potassium carbonate anhydrous For Molecular Biology K_2CO_3 MW: 138.21 CAS : 584-08-7 Assay :≥99.5% Store between 10-30°C	MB360-500G	500gm	1010
Silver nitrate For Molecular Biology $AgNO_3$ MW:169.87 CAS : 7761-88-8 Assay : ≥99% Store between 10-30°C	MB156-10G MB156-25G MB156-100G	10gm 25gm 100gm	4035 8870 31040

HiGenoMB Unzipping Genes

Sodium azide For Molecular Biology NaN_3 MW : 65.01 CAS : 26628-22-8 Assay : ≥ 98% Store between 10-30°C	MB075-100G MB075-500G	100gm 500gm	930 4505
Sodium chloride For Molecular Biology NaCl MW : 58.44 CAS : 7647-14-5 Assay : ≥99.5% Store between 10-30°C	MB023-500G MB023-1KG MB023-5KG	500gm 1kg 5kg	870 1560 7490
Sodium dihydrogen orthophosphate dihydrate For Molecular Biology $NaH_2PO_4.2H_2O$ MW : 156.01 CAS : 13472-35-0 Store between 10-30°C	MB296-500G MB296-5KG	500gm 5kg	950 8530
Sodium hydroxide pellets For Molecular Biology NaOH MW : 40 CAS : 1310-73-2 Assay : ≥98% Store between 10-30°C	MB095-100G MB095-500G MB095-5KG	100gm 500gm 5kg	240 605 5400
Sodium phosphate dibasic anhydrous For Molecular Biology Na_2HPO_4 MW : 141.96 CAS : 7558-79-4 Assay : ≥99% Store between 10-30°C	MB024-250G	250gm	925
Sodium sulphate anhydrous For Molecular Biology Na_2SO_4 MW : 142.04 CAS : 7757-82-6 Assay : ≥ 99% Store between 10-30°C	MB209-1KG	1kg	670
Streptavidin For Molecular Biology CAS : 9013-20-1 Activity (Fibrinogen) : ~14 units/mg protein Store at 2 - 8°C	MB129-5MG	5mg	12420
TRIS hydrochloride For Molecular Biology $C_4H_{11}NO_3.HCl$ MW : 157.6 CAS : 1185-53-1 Assay : ≥99% Store between 10-30°C	MB030-100G MB030-500G MB030-1KG	100gm 500gm 1kg	865 4225 7775
Triton® X-100 For Molecular Biology $C_{34}H_{62}O_{11}$ MW : 646.87 CAS : 9002-93-1 Store between 10-30°C	MB031-50ML MB031-100ML MB031-500ML	50ml 100ml 500ml	590 940 4625
Tween® 20 Polyoxyethylenesorbitan monolaurate (Polysorbate-20) For Molecular Biology CAS : 9005-64-5 Density at 25°C : ~1.095 g/ml Store between 10-30°C	MB067-100ML MB067-1L	100ml 1lt	4325 38925
Zinc chloride For Molecular Biology $ZnCl_2$ MW : 136.3 CAS : 7646-85-7 Assay : ≥98% Store between 10-30°C	MB046-100G MB046-500G	100gm 500gm	270 1190

Product	Code	Packing	Price in ₹
Zinc sulphate heptahydrate For Molecular Biology $ZnSO_4.7H_2O$ MW : 287.56 CAS : 7446-20-0 Assay : ≥99.5% Store between 10-30°C	MB233-500G	500gm	625

Chemicals for Protein Estimation

Product	Code	Packing	Price in ₹
Biuret For Molecular Biology $C_2H_5N_3O_2$ MW : 103.08 CAS : 108-19-0 Assay : ≥97% Store between 10-30°C	MB136-25G MB136-100G	25gm 100gm	975 3150
1-Chloro-2,4-dinitrobenzene For Molecular Biology $C_6H_3ClN_2O_4$ MW : 202.55 CAS : 97-00-7 Assay : ≥ 99% Store between 10-30°C	MB216-500G	500gm	3785
Copper (II) sulphate pentahydrate For Molecular Biology $CuSO_4.5H_2O$ MW : 249.69 CAS : 7758-99-8 Assay : ≥98% Store between 10-30°C	MB238-100G MB238-500G	100gm 500gm	200 755
2,2-Diphenyl-1-picrylhydrazyl For Molecular Biology $C_{18}H_{12}N_5O_6$ MW : 394.32 CAS : 1898-66-4 Assay : ≥85% Store at 2 - 8°C	MB263-1G	1gm	11275
Ninhydrin (2,2 Dihydroxy-1,3-indanedione) For Molecular Biology $C_9H_6O_4$ MW : 178.14 CAS : 485-47-2 Assay : ≥99% Store between 10-30°C	MB234-10G MB234-25G	10gm 25gm	1030 2265
Orthophosphoric acid For Molecular Biology H_3PO_4 MW : 98.00 CAS:7664-38-2 Assay : ≥85% Store between 10-30°C	MB157-250ML	250ml	4915
Potassium sodium tartrate tetrahydrate For Molecular Biology $C_4H_4KNaO_6.4H_2O$ MW : 282.22 CAS : 6381-59-5 Assay : ≥99% Store between 10-30°C	MB258-500G	500gm	1815
X-Gal (5-Bromo-4-chloro-3-indolyl-ß-D-galactopyranoside) For Molecular Biology $C_{14}H_{15}BrClNO_6$ MW : 408.63 CAS : 7240-90-6 Assay : ≥98% Store at 2 - 8°C	MB069-100MG MB069-500MG MB069-1G	100mg 500mg 1gm	1660 7465 14915

DOB Growth Medium with 2% Galactose and 1% Raffinose for the growth of Saccharomyces cerevisiae. Grams/Lit : **36.70** **13.62 Lit/500G**	**G088-250G** **G088-500G**	**250gm** **500gm**	**4265** **7095**
DOB Growth Medium with Succinate for the growth of Saccharomyces cerevisiae. Grams/Lit : **40.00** **12.5 Lit/500G**	**G086-250G** **G086-500G**	**250gm** **500gm**	**4170** **7075**
DOBA Growth Medium with 2% Galactose (Glucose free) for the growth of Saccharomyces cerevisiae. Grams/Lit : **41.70** **11.99 Lit/500G**	**G085-500G**	**500gm**	**7075**
DOBA Growth Medium with 2% Galactose and 1% Raffinose for the growth of Saccharomyces cerevisiae. Grams/Lit : **51.70** **9.67 Lit/500G**	**G089-250G** **G089-500G**	**250gm** **500gm**	**4620** **7230**
YNB (Yeast Nitrogen Base) Formulation			
Yeast Nitrogen Base (YNB) w/ Ammonium sulphate for the growth of all strains of Saccharomyces cerevisiae. Grams/Lit : **6.70** **14.93 Lit/100G**	**G091-100G**	**100gm**	**3685**
Yeast Nitrogen Base (YNB) w/o Ammonium sulphate for the growth of all strains of Saccharomyces cerevisiae. Grams/Lit : **1.70** **58.82 Lit/100G**	**G090-100G**	**100gm**	**3685**
YNB (Yeast Nitrogen Base) Variations			
[for the preparation of SD/SDA- add a carbon source, appropriate amino acids and agar (in case of SDA)]			
Brent Supplement Mixture (BSM) use with the addition in DOB or DOBA and carbon source for the growth of Saccharomyces cerevisiae. Grams/Lit : **1.55** **16.13 Lit/25G**	**G101-25G**	**25gm**	**2625**
Complete Supplement Mixture (CSM) as a dropout supplement for all strains of Saccharomyces cerevisiae. Grams/Lit : **790 mg** **126.58 Lit/100G**	**G100-10G** **G100-100G**	**10gm** **100gm**	**645** **3140**
Synthetic Complete Supplement Mixture (SC) as an amino acid supplement for all strains of Saccharomyces cerevisiae. Grams/Lit : **2.00** **15.00 Lit/30G**	**G102-30G**	**30gm**	**2625**
Yeast Nitrogen Base (YNB) w/ Ammonium sulphate, w/o Inositol for usage refer G091. Grams/Lit : **6.70** **14.93 Lit/100G**	**G093-100G**	**100gm**	**3685**

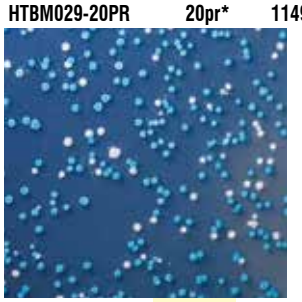
HiPer® Teaching Kit Manual & Lab Hamper			
HiPer® Lab Hamper **Contents :** Three micropipettes, Tube rack, Nuclease free sterile tips, Latex gloves (Medium size), Nuclease free sterile centrifuge tubes, HiPer® Teaching kit handbook	HTLA001-1NO	1no	12435
HiPer® Teaching Kit Handbook	MBTL001-1NO	1no	1080
HiPer® Molecular Biology Teaching Kits			
HiPer® Absolute Quantification Teaching Kit **Contents:** Hi-SYBr Master Mix, Target gene Primer Mix, Standard DNA 1, 2, 3 and 4, Unknown DNA, Molecular Biology Grade Water for PCR, Polypropylene Tubes, 0.2 ml (PCR Tubes) and Polypropylene Tubes, 0.5 ml (PCR Tubes)	HTBM040-10PR	10pr*	4320
HiPer® Agarose Gel Electrophoresis Teaching Kit **Contents:** Genomic DNA, Plasmid DNA, Agarose, 50X TAE, 1kb DNA Ladder, Gel Loading Buffer.	HTBM001-10PR	10pr*	2670

Product	Code	Packing	Price in ₹
HiPer® Bacterial Gene Expression Teaching Kit **Contents:** *E. coli* strain, Ampicillin, IPTG, Cell lysis buffer, Acrylamide, Tris Solutions, APS, TEMED, Sample Loading Buffer, Gel Running Buffer, Staining and Destaining solutions, Protein Marker, LB Broth, Agar powder, Tubes.	HTBM018-5PR	5pr*	7520
HiPer® Bacterial Genomic DNA Extraction Teaching Kit (Column Based) **Contents:** Control DNA, Bacterial Cell Pellets, Solutions (Lysis, Wash, Elution), Proteinase K Solution, RNase A Solution, Columns, Tubes, Agarose, 50X TAE, Gel Loading Buffer	HTBM008-10PR	10pr*	2950
HiPer® Bacterial Genomic DNA Extraction Teaching Kit (SYBr) (Column Based) New **Contents:** Control DNA, Bacterial Cell Pellets, Solutions (Lysis, Wash, Elution), Proteinase K Solution, Hi-SYBr Safe Gel Stain, RNase A Solution, Columns, Tubes, Agarose, 50X TAE, Gel Loading Buffer	HTBM008S-10PR	10pr*	3335

*Preparation

All Teaching Kits to be Stored at 15-25ºC except certain components specified in each kit (as specified on label)

Teaching Kits



Product	Code	Packing	Price in ₹
HiPer® Bacterial Genomic DNA Extraction Teaching Kit (Solution Based) **Contents:** Control DNA, Bacterial Cell Pellets, Solutions (Lysis, Wash, Elution), Proteinase K Solution, RNase A Solution, Tubes, Agarose, 50X TAE, Gel Loading Buffer	HTBM009-10PR	10pr*	3380
HiPer® Bacterial RNA Extraction Teaching Kit (Column Based) Lysozyme, RNA Lysis Solution (HRL), Prewash Solution (RW1), Wash Solution Concentrate (WS), Elution Solution (RNase- Free Water), HiElute Miniprep Spin Column (Capped) [in DBCA016 Collection Tube] , HiShredder (in DBCA016 Collection Tube), Collection Tube (Uncapped) Polypropylene (2.0 ml) , Collection Tube Polypropylene (2.0 ml) , 5X RNA Loading Buffer, 10X MOPS Electrophoresis Buffer and Agarose	HTBM042-10PR	10pr*	2950
HiPer® Blood Genomic DNA Extraction Teaching Kit (Column Based) **Contents:** Control DNA, Solutions (Lysis, Wash, Elution etc.), Proteinase K solution, RNase A Solution, Agarose, 50X TAE, Gel Loading Buffer, Columns, Tubes	HTBM006-10PR HTBM006-20PR	10pr* 20pr*	3480 6440
HiPer® Blood Genomic DNA Extraction Teaching Kit (SYBr) (Column Based) New **Contents:** Control DNA, Solutions (Lysis, Wash, Elution etc.), Proteinase K solution, RNase A Solution, Hi-SYBr Safe Gel Stain, Agarose, 50X TAE, Gel Loading Buffer, Columns, Tubes	HTBM006S-10PR	10pr*	3850
HiPer® Blood Genomic DNA Extraction Teaching Kit (Magnetic Bead Based) (includes Magnetic stand) **Contents:** Lysis Solutions (C1), Resuspension solution (1XPBS), Lysis Solutions (AL), Wash solution concentrate (WS), Elution buffer (ET), Proteinase K, Magnetic bead, Rnase A solution, Magnetic stand, Agarose, 50X TAE, 6X Gel Loading Buffer	HTBM044-15PR	15pr*	7250
HiPer® Blood Genomic DNA Extraction Teaching Kit (Solution Based) **Contents:** Control DNA, RBC and WBC Lysis Buffer, Precipitation and Elution Buffer, RNase A Solution, Isopropanol, Agarose, Gel Loading Buffer, 50X TAE, Tubes	HTBM007-10PR HTBM007-20PR	10pr* 20pr*	3315 6135
HiPer® Cloning Teaching Kit (Blue-White selection) **Contents:** Ampicillin, LB broth, LB agar, *E.coli* host, vector, insert, control plasmids, 10X ligase assay buffer, T4 DNA ligase, 1M Calcium chloride, collection tubes, polypropylene (2.0ml), polypropylene tube (0.2 ml), X-Gal, IPTG.	HTBM036-5PR	5pr*	7570
HiPer® DNA Molecular Size Determination Teaching Kit **Contents:** Agarose, 50X TAE, Test Samples, 1 kb DNA Ladder	HTBM014-10PR	10pr*	3760
HiPer® Gel Extraction Teaching Kit (Column Based) **Contents:** Control DNA, Sample DNA, Gel Bind Buffer, Gel Wash Buffer, Elution Buffer, Columns, Tubes, Agarose, 50X TAE, Gel Loading Buffer	HTBM010-10PR	10pr*	4375

Product	Code	Packing	Price in ₹
HiPer® Gel Extraction Teaching Kit (Solution Based) **Contents:** Control DNA, Sample DNA, Glass Powder Suspension, Chaotropic Salt solution, Elution Buffer, Tubes, Agarose, 50X TAE, Gel Loading Buffer	HTBM011-10PR	10pr*	5270
HiPer® Gene Editing Teaching Kit (CRISPR Based) New **Contents:** E.coli host, Plasmids, LB broth, Agar, Ampicillin, Kanamycin, 1M Calcium chloride, L-Arabinose, Collection Tubes	HTBM047-5PR	5pr*	4840
HiPer® GMO Detection Teaching Kit **Contents:** 2X PCR Master Mix, Template DNA 1 & 2, Primer Mix 1 & 2, 50bp DNA Ladder, MB Grade Water, Agarose, 50X TAE, Gel Loading Buffer, PCR Tubes.	HTBM035-5PR	5pr*	2960
HiPer® InstaDNA™ Teaching Kit **Contents:** InstaDNA™ Card, Blood lancet, 10X Assay Buffer, Control PCR Product, 2.5 mM dNTP mix, 100 bp DNA ladder, primers, Taq polymerase, MB Grade Water, $MgCl_2$, Agarose, 50X TAE, Gel Loading Buffer, Mineral Oil, PCR Tubes.	HTBM033-5PR	5pr*	4045
HiPer® Ligation Teaching Kit **Contents:** Digested Lambda DNA, Ligase Assay Buffer, T4 DNA Ligase, Gel Loading Buffer, Agarose, 50X TAE, Tubes	HTBM019-5PR HTBM019-20PR	5pr* 20pr*	2960 7815
HiPer® Multi-Sample DNA Purification Teaching Kit (Column Based) **Contents:** Control DNA, *E.coli* culture, *Staphylococcus aureus*, Gram Positive Lysis Solution (GPLA), Lysis Solution (C1), Resuspension Buffer (MS), Lysozyme, Prewash Solution Concentrate (PW), Wash Solution Concentrate (WS), Elution Buffer (ET) [10mM Tris-Cl, pH 8.5], Proteinase K Solution, RNase A Solution, HiElute Miniprep Spin Column (Capped) [in DBCA016 Collection Tube], Collection Tubes (Uncapped) Polypropylene (2.0 ml) , Collection Tube Polypropylene (2.0 ml), Agarose, 50X TAE, LB broth and Agar, Gel Loading Buffer	HTBM038-10PR	10pr*	6480
HiPer® Multiplex PCR Teaching Kit **Contents:** 10X Assay Buffer, 2.5 mM dNTP mix, 100bp DNA ladder, primers, Taq polymerase, Template DNA, MB Grade Water, $MgCl_2$, Agarose, 50X TAE, Gel Loading Buffer, Mineral Oil, PCR Tubes	HTBM023-5PR	5pr*	5910
HiPer® Nested PCR Teaching Kit 2X PCR TaqMixture, Primer Mix for Plasmodium spp, Primer Mix for Plasmodium falciparum, Primer Mix for Plasmodium vivax, Molecular Biology Grade Water for PCR, 6X Gel Loading Buffer, 50 bp DNA Ladder, Template DNA, Agarose, 50X TAE, Polypropylene Tubes, 0.2 ml (PCR Tubes)	HTBM043-10PR	10pr*	4390
HiPer® Northern Blotting Teaching Kit **Contents:** RNA sample, Prehybridization and Hybridization Buffer, Biotinylated Probe, Wash Buffers, Blocking Buffer and Powder, Transfer Buffer, Streptavidin-HRP Conjugate, Tween® 20, Agarose, Electrophoresis Buffer, Nylon Membrane with Filter Paper, Wicks, Disposable Petriplate, Blotting sheets	HTBM028-5PR	5pr*	11800

*Preparation

All Teaching Kits to be Stored at 15-25°C except certain components specified in each kit (as specified on label)

® Registered Trade Mark of Croda International PLC

Product	Code	Packing	Price in ₹
HiPer® One step RT-PCR teaching Kit New **Contents:** Total RNA, RT Buffer, 10X Solution, M-MuLV, MB Grade Water, Forward and Reverse primers, 100bp DNA Ladder, 0.2ml PCR Tubes, Agarose, 50X TAE, Gel Loading Buffer	HTBM046-10PR	10pr*	4080
HiPer® PCR Application Teaching Kit **Contents:** Taq DNA polymerase, Primer mix, Test samples, Control PCR product, 100 bp DNA Ladder, Assay Buffer with 25mM $MgCl_2$ and 2.5mM dNTP mix, Agarose, 50X TAE, Gel Loading Buffer, Tubes.	HTBM030-5PR HTBM030-20PR	5pr* 20pr*	7210 24895
HiPer® PCR Mediated Site Directed Mutagenesis Teaching Kit Template DNA, DpnI Enzyme, XL1-Blue Strain, 10X Hi-Buffer, Hi-Proof DNA polymerase, dNTP mix, Forward Primer, Reverse Primer, Molecular biology grade water, X-Gal, IPTG, Luria Bertani (LB) Broth, SOB, TFB I, TFB II, SOC, Agar Powder, Bacteriological, Agarose, 6X Gel loading dye, Collection Tubes, Polypropylene (2.0 ml), Ampicillin, Polypropylene tubes, 0.2 ml (PCR Tubes), 50X TAE, 1 kb DNA Ladder	HTBM029-5PR HTBM029-20PR	5pr* 20pr*	3285 11490
 The XL1-Blue competent cells transformed with control plasmid appears in white colonies when there is no mutation and blue colonies are the nicked vector DNA containing desired mutation.			
HiPer® PCR Product Purification Teaching Kit PCR Binding Solution (SPB), Wash Solution Concentrate (HPE), Elution Buffer (ET) [10 mM Tris-Cl, pH 8.5], HiElute Miniprep Spin Column (Capped) [in DBCA016 Collection Tube], Collection Tube (Uncapped) Polypropylene (2.0 ml), Collection Tube Polypropylene (2.0 ml), Agarose, 50X TAE, 6X Gel Loading Buffer, PCR product and 1kb DNA Ladder	HTBM041-10PR	10pr*	1715
HiPer® PCR Teaching Kit **Contents:** 10X Assay Buffer, Control PCR Product, 2.5 mM dNTP mix, 1 kb DNA ladder, primers, Taq polymerase, Template DNA, MB Grade Water, $MgCl_2$, Agarose, 50X TAE, Gel Loading Buffer, Mineral Oil, PCR Tubes.	HTBM016-10PR	10pr*	5880
HiPer® Plasmid Curing Teaching Kit **Contents:** Ampicillin, *E. coli* Host, Luria Bertani (LB) Broth, Luria Bertani Agar, Ethidium bromide solution (10 mg/ml), Sodium chloride, Screw cap tubes with 'O' Ring	HTBM037-10PR	10pr*	6500
HiPer® Plasmid DNA Cloning Teaching Kit **Contents:** Control Plasmid DNA, *E. coli* (Host), Vector, Insert, T4 DNA ligase, Assay Buffer, 1M $CaCl_2$, LB Broth, Agar powder, Ampicillin, Tubes	HTBM022-5PR	5pr*	7570
HiPer® Plasmid DNA Extraction Teaching Kit (Column Based) **Contents:** Control DNA, *E. coli* cells (with plasmid), Solutions (Lysis, Wash, Elution etc.), Agarose, Columns, LB Broth, Agar powder, Tubes, 50X TAE, Ampicillin, Gel Loading Buffer	HTBM002-10PR HTBM002-20PR	10pr* 20pr*	3480 6440

Product	Code	Packing	Price in ₹
HiPer® Plasmid DNA Extraction Teaching Kit (SYBr) (Column based) New **Contents:** Control DNA, E. coli cells (with plasmid), Solutions (Lysis, Wash, Elution etc.), Hi-SYBr Safe Gel Stain, Agarose, Columns, LB Broth, Agar powder, Tubes, 50X TAE, Ampicillin, Gel Loading Buffer	HTBM002S-10PR	10pr*	3850
HiPer® Plasmid DNA Extraction Teaching Kit (Solution Based) **Contents:** Control DNA, *E. coli* cells (with plasmid), Agarose, Solutions (Lysis, Wash, Elution etc.), LB Broth, Agar powder, Tubes, 50X TAE, Ampicillin, Gel Loading Buffer	HTBM003-20PR	20pr*	5880
HiPer® Plant Genomic DNA Extraction Teaching Kit (Column Based) **Contents:** Control DNA, Solutions (Lysis, Wash, Binding, Elution etc.), Agarose, Columns, Shredder, Tubes, 50X TAE, RNase A Solution, Loading Buffer	HTBM004-10PR	10pr*	4375
HiPer® Plant Genomic DNA Extraction Teaching Kit (Solution Based) **Contents:** Control DNA, CTAB Powder, Extraction and Wash Buffer, Agarose, 50X TAE, Tubes, RNase A Solution, Gel Loading Buffer	HTBM005-10PR	10pr*	4065
HiPer® Random Amplification of Polymorphic DNA (RAPD) Teaching Kit **Contents:** Reference and Test Samples, DNA Ladder, Random primer, Assay Buffer, MB Grade Water, 50X TAE, Agarose, Loading Dye, PCR Tubes, dNTP mix, Taq polymerase.	HTBM031-5PR	5pr*	7440
HiPer® Real-time PCR Teaching Kit **Contents:** SYBr Master Mix, Primer Mix, Molecular Biology Grade Water for RT-PCR, Template DNA, PCR Tubes.	HTBM032-10PR	10pr*	9160
HiPer® Relative Quantification Teaching Kit **Contents:** Hi-SYBr Master Mix, Target gene Primer Mix, Reference gene (Housekeeping) Primer Mix, Treated DNA 1, 2, 3 and 4, Untreated DNA , Molecular Biology Grade Water for PCR, Polypropylene Tubes, 0.2 ml (PCR Tubes) and Polypropylene Tubes, 0.5 ml (PCR Tubes)	HTBM039-10PR	10pr*	7315
HiPer® Restriction Digestion Teaching Kit **Contents:** Lambda DNA, DNA Marker, Agarose, Enzyme EcoR I, Enzyme Hind III, 10X Assay Buffers, MB Grade Water, 50X TAE, Tubes, Gel Loading Buffer	HTBM015-10PR	10pr*	3760
HiPer® Restriction Fragment Length Polymorphism (RFLP) Teaching Kit **Contents:** Reference and Test Samples, 1 kb DNA Ladder, Enzyme EcoR I, Enzyme Pst I, Assay Buffer, MB Grade Water, 50X TAE, Agarose, Gel Loading Buffer, Tubes	HTBM026-5PR HTBM026-25PR	5pr* 25pr*	6850 23755
HiPer® Restriction Mapping Teaching Kit **Contents:** Plasmid DNA, Enzyme EcoR I, Enzyme Hind III, 10X Assay Buffer, 1 kb DNA ladder, Gel Loading Buffer, MB Grade water, 50X TAE, Agarose, Tubes.	HTBM021-5PR HTBM021-20PR	5pr* 20pr*	4170 8725

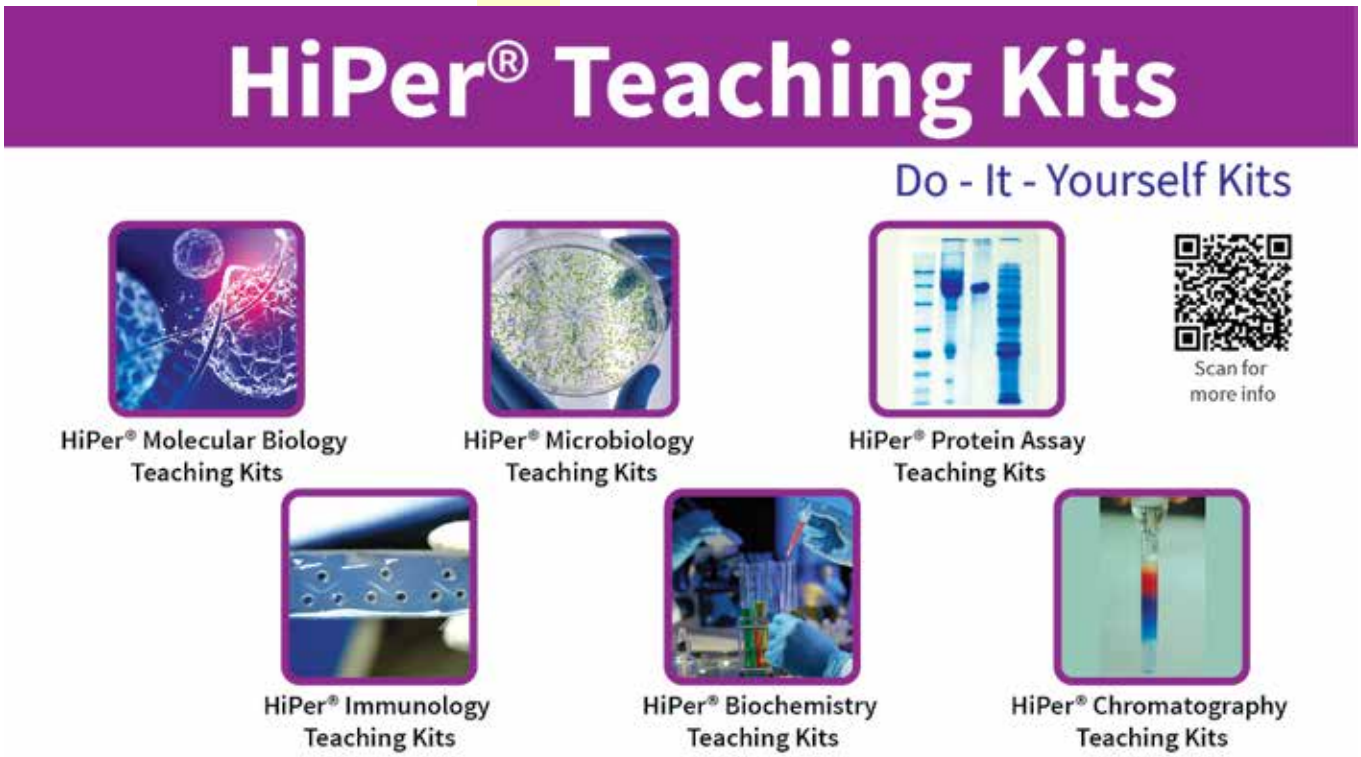
HiGenoMB Unzipping Genes

Product	Code	Packing	Price in ₹
HiPer® RT-PCR Teaching Kit **Contents:** Total RNA, 10X solution, 10X Assay Buffer, RT Buffer, MB Grade Water, $MgCl_2$, dNTP Mix, MMuLV Reverse Transcriptase, Agarose, 50X TAE, Gel Loading Buffer, Primers, DNA Ladder, Taq Polymerase, Tubes.	HTBM024-5PR	5pr*	9295
HiPer® Single Nucleotide Polymorphism (SNP) Teaching Kit **Contents:** 2X PCR Master Mix, SNP DNA, Normal DNA, Primer Mix for SNP, 50bp DNA Ladder, MB Grade water, Agarose, 50X TAE, Gel Loading Buffer, PCR Tubes.	HTBM034-10PR	10pr*	5880
HiPer® Single Nucleotide Polymorphism (SNP)Teaching Kit (Probe based) **Contents:** Hi-Quanti 2X Realtime PCR Master Mix, SNP Primer-Probe Mix, Homogenous Positive Controls, Heterozygous Positive Controls, Molecular Biology Grade Water for PCR, PCR Tubes, Flat lid, 0.2ml	HTBM045-10PR	10pr*	3940
HiPer® Southern Blotting Teaching Kit **Contents:** DNA sample, Prehybridization and Hybridization Buffer, Biotinylated Probe, Wash Buffers, Blocking Buffer and Powder, Streptavidin-HRP Conjugate, Tween® 20, Agarose, 10X TBE, Transfer Buffer, Nylon Membrane with Filter Paper, Disposable Petriplate	HTBM027-5PR	5pr*	9050
HiPer® Total RNA Extraction Teaching Kit **Contents:** RNA X-Press™ Reagent, Isopropyl alcohol, RNase free water, RNA Gel Loading Buffer, 10X MOPS Electrophoresis Buffer, Formaldehyde, Agarose, Tubes	HTBM012-10PR	10pr*	5270
HiPer® Transformation Teaching Kit **Contents:** Ampicillin, LB Broth, Agar powder, *E. coli* strain, Plasmid DNA, 1M $CaCl_2$ solution, Tubes, X-Gal, IPTG.	HTBM017-10PR	10pr*	5880
HiPer® Yeast Genomic DNA Extraction Teaching Kit **Contents:** Control DNA, Yeast cells, Sorbitol Buffer, Solutions (Lysis, Wash, Elution), Enzyme Solution, RNase A Solution, Proteinase K solution, YPD, Columns, Tubes, Agarose, 50X TAE Gel Loading Buffer	HTBM013-10PR	10pr*	4155
HiPer® Yeast Transformation Teaching Kit **Contents:** Yeast cells, YT Buffer, PEG solution, MB Grade Water, YPD Broth, SD Growth Medium w/o LEU, Agar, Carrier DNA, Plasmid DNA, Tubes.	HTBM025-10PR	10pr*	5610
HiPer® Microbiology Teaching Kits			
HiPer® Antibiotic Sensitivity Teaching Kit **Contents:** Cultures (*E. coli*, S. aureus, P aeruginosa), Antibiotic discs (Chloramphenicol, Tetracycline, Kanamycin, Gentamycin, Vancomycin), Cotton swabs, Mueller Hinton Agar, Saline, Applicator	HTM002-15PR	15pr*	8270
HiPer® Bacterial Conjugation Teaching Kit **Contents:** *E. coli* donor and recipient strain, Streptomycin, Tetracyclin, LB Broth, Agar powder.	HTM004-5PR HTM004-20PR	5pr* 20pr*	5460 11065

Product	Code	Packing	Price in ₹
HiPer® Bacterial Growth Curve Teaching Kit **Contents:** *E. coli* culture, LB Broth, Agar Powder	HTM001-10PR	10pr*	5650
HiPer® Ezy MIC™ Teaching Kit **Contents:** S. aureus culture, MIC Strips (Ciprofloxacin, Vancomycin, Azithromycin, Linezolid, Amikacin), Mueller Hinton Agar, Sterile cotton swabs, Applicator, Saline.	HTM006-10PR	10pr*	6550
HiPer® Phage Titration Teaching Kit **Contents:** *E. coli* (Host), Phage lysate, LB Broth, Agar powder, Tryptone, NaCl, SM Buffer, Maltose and $MgCl_2$ Solution, Tubes	HTM003-10PR	10pr*	7620
HiPer® Transduction Teaching Kit **Contents:** Donor, Recipient and Susceptible host strains, Phage lysate, 1M $CaCl_2$, LB Broth, Agar powder, Tubes, Dextrose, $MgCl_2$, Ampicillin, Chloramphenicol	HTM005-5PR HTM005-20PR	5pr* 20pr*	3980 14355
HiPer® Protein Assay Teaching Kits			
HiPer® GST Purification Teaching Kit **Contents:** Glutathione Agarose Column, Binding Buffer, Buffer for Elution, Glutathione Reduced, Purified Protein, Crude Extract, Reagents for SDS page.	HTP004-5PR	5pr*	14110
HiPer® Native PAGE Teaching Kit **Contents:** Acrylamide Solution, Tris Solutions (pH 6.8 and 8.8), Protein Marker, Electrophoresis Buffer, Sample Loading Buffer, Protein Samples, APS, TEMED, PBS, Agarose, Staining and Destaining Solution.	HTP003-5PR	5pr*	10800
HiPer® Protein Silver Staining Teaching Kit **Contents:** Fixative Solution, Reducer Solution, Developing Solution, Stopping Solution, Protein Samples, Protein Marker, Sample Loading Buffer, Silver nitrate, Acrylamide solution, Tris solutions (pH 6.8 and 8.8), Agarose, APS, TEMED.	HTP002-5PR	5pr*	5940
HiPer® SDS-PAGE Teaching Kit **Contents:** Acrylamide Solution, Tris Solutions (pH 6.8 and 8.8), Protein Marker, Electrophoresis Buffer, Sample Loading Buffer, Protein Samples, APS, TEMED, Agarose, Staining and Destaining Solution.	HTP001-10PR HTP001-20PR	10pr* 20pr*	4375 8095
HiPer® X-Press Blue™ Staining Teaching Kit **Contents:** Acrylamide/Bis-acrylamide Solution 30% (29: 1), 2.5X Tris-SDS Buffer (pH 8.8), 5X Tris-SDS Buffer (pH 6.8), Prestained Protein Ladder, 5X Tris-Glycine-SDS Gel Running Buffer, 5X Sample Loading Buffer, Protein Samples, APS, TEMED, Agarose and X-Press Blue™ Protein Stain	HTP005-5PR	5pr*	2705
HiPer® Immunology Teaching Kits			
HiPer® Antibody Capture ELISA Teaching Kit **Contents:** Coating Antigen, Standard Primary Antibody, Test Samples, HRP-Conjugated Secondary Antibody, Blocking Buffer, TMB/ H_2O_2, Coating Buffer, Wash Buffer, Stop Solution, Microtitre Plate	HTI013-4PR	4pr*	4380

*Preparation
All Teaching Kits to be Stored at 15-25°C except certain components specified in each kit (as specified on label)

Product	Code	Packing	Price in ₹
HiPer® Antigen Capture ELISA Teaching Kit **Contents:** Standard antigen, Antibody, Test Samples, HRP labeled Antigen, Blocking Buffer, TMB/H_2O_2, Coating Buffer, Wash Buffer, Stop Solution, Microtitre Plate	HTI012-4PR	4pr*	5620
HiPer® Blood Grouping Teaching Kit **Contents:** Anti A Sera, Anti B Sera, Anti RhD Sera, Cavity Slide, Mixing Stick, Blood Lancet	HTI008-100PR	100pr*	1240
HiPer® Counter Current Immunoelectrophoresis Teaching Kit **Contents:** Agarose, Electrophoresis Buffer, Positive Control, Test Antiserums, Antigen, Glass Plate, Template, Gel Puncher	HTI007-10PR HTI007-20PR	10pr* 20pr*	3150 5775
HiPer® Dot ELISA Teaching Kit **Contents:** Dot ELISA Strip, Assay Buffer, HRP-Conjugated Antibody, TMB/H_2O_2, Test Serum Samples, Tubes.	HTI015-15PR	15pr*	2925
HiPer® IgG Purification Teaching Kit **Contents:** Protein A agarose column, Test sample, Binding buffer, Elution buffer, Neutralization Buffer, Reagents for SDS-PAGE	HTI022-5PR	5pr*	19805
HiPer® Immunoelectrophoresis Teaching Kit **Contents:** Agarose, Electrophoresis Buffer, Antigen, Test Antiserums, Template, Glass Plate, Gel puncher	HTI005-5PR HTI005-20PR	5pr* 20pr*	7000 27300
HiPer® Immunohistochemistry (IHC) Teaching Kit **Contents:** Blocking Solution, Primary Antibody, Negative Control Antibody, Secondary Antibody, Antibody Diluent Buffer, 10XAntigen Retrieval Buffer, (DAB), 30% H_2O_2, 10X PBS, Hematoxylin, mounting Solution, Slides with paraffin sections	HTI023-5PR	5pr*	25230
HiPer® Immunoprecipitation Teaching Kit **Contents:** Electrophoresis Buffer, Sample Loading Buffer, Acrylamide solution, APS, TEMED, Agarose, Staining and Destaining Solution, Protein A Slurry, Antigen, Antibody, Wash Buffer, Tubes, Tris Buffers (pH 6.8 & 8.8), Protein Marker, Assay Buffer.	HTI016-5PR	5pr*	6850
HiPer® Latex Agglutination Teaching Kit **Contents:** Antigen Solution, Negative Control, Positive Control, Agglutination Cards, Mixing Sticks	HTI001-20PR	20pr*	5420
HiPer® Quantitative Precipitin Assay Teaching Kit **Contents:** Antigen, Test Anti-Sera, Assay Buffer, NaOH Solution, Tubes	HTI011-10PR	10pr*	2805
HiPer® Ouchterlony Double Diffusion Teaching Kit (For Antibody Titration) **Contents:** Agarose, 10X Assay Buffer, Test Antiserum, Antigen, Glass plate, Gel puncher, Template	HTI003-15PR	15pr*	2890
HiPer® Ouchterlony Double Diffusion Teaching Kit (For Antigen-Antibody Pattern) **Contents:** Agarose, 10X Assay Buffer, Antiserums, Antigens, Glass Plate, Gel Puncher, Template	HTI002-10PR	10pr*	3360



Product	Code	Packing	Price in ₹
HiPer® RA Test Teaching Kit **Contents:** Latex reagent for RA, Positive and Negative Control, Mixing Sticks, Disposable Agglutination Cards.	HTI019-20PR	20pr*	1445
HiPer® RPR Test Teaching Kit **Contents:** RPR antigen, Positive and Negative Control, Slide, Mixing Stick.	HTI020-20PR	20pr*	1295
HiPer® Radial Immunodiffusion Teaching Kit **Contents:** Agarose, Assay Buffer, Antiserum, Standard and Test Antigens, Glass Plate, Gel Puncher, Template	HTI004-20PR	20pr*	3840
HiPer® Rocket Immunoelectrophoresis Teaching Kit **Contents:** Agarose, Electrophoresis Buffer, Antiserum, Standard Antigens, Test Antigens, Glass Plate, Gel Puncher, Template.	HTI006-5PR HTI006-20PR	5pr* 20pr*	5030 16555
HiPer® Sandwich ELISA Teaching Kit **Contents:** Standard Antigen, Capture Antibody, Test Samples, HRP-Conjugated Antibody, Blocking Buffer, Coating Buffer, TMB/H_2O_2, Wash Buffer, Stop Solution, Microtitre Plate	HTI014-4PR	4pr*	4380
HiPer® VDRL Test Teaching Kit **Contents:** VDRL Slide, VDRL antigen, Positive and Negative Control, Mixing Sticks	HTI021-10PR	10pr*	1050
HiPer® Western Blotting Teaching Kit **Contents:** Acrylamide Solution, Tris Solutions (pH 6.8 and 8.8), Protein Marker, Electrophoresis Buffer, Sample Loading Buffer, Protein Samples, Transfer Buffer, Blocking Reagent, Diluent Buffer, Wash Buffer, Assay Buffer, Primary antibody, HRP Conjugate Antibody, TMB/H_2O_2, Staining and Destaining Solution, Nitrocellulose Membrane with Filter Paper	HTI009-5PR HTI009-20PR	5pr* 20pr*	12500 48000
HiPer® Widal Test Teaching Kit (Slide Test) **Contents:** Widal Slide, Salmonella typhi antigen (H, O), Salmonella paratyphi antigen (AH, BH), Positive and Negative Controls, Mixing Sticks, Test Sample.	HTI017-20PR	20pr*	1685
HiPer® Widal Test Teaching Kit (Tube Test) **Contents:** Salmonella typhi antigen (H, O), Salmonella paratyphi antigen (AH, BH), Test sample	HTI018-10PR	10pr*	5210
HiPer® Biochemistry Teaching Kits			
HiPer® Carbohydrates Estimation Teaching Kit (Qualitative) **Contents:** Standard Sugars (Glucose, Starch, Ribose, Fructose), Test Sugars, 1-Naphthol, Benedict's Reagent, Barfoed's Reagent, Resorcinol, Orcinol, Ferric chloride Solution, Iodine Reagent	HTBC002-25PR	25pr*	8875
HiPer® Carbohydrates Estimation Teaching Kit (Quantitative) **Contents:** Glucose Standard, DNSA Reagent, Potassium sodium tartrate, Test Samples.	HTBC003-10PR	10pr*	4790
HiPer® DNA Estimation Teaching Kit **Contents:** Standard DNA Sample. Diphenylamine, Diluent Buffer, Test Samples	HTBC006-5PR HTBC006-20PR	5pr* 20pr*	3170 9755

*Preparation

All Teaching Kits to be Stored at 15-25°C except certain components specified in each kit (as specified on label)

HiPer® Protein Estimation Teaching Kit (Qualitative) **Contents:** Standard Protein Samples, Test Samples, Biuret Reagent, Ninhydrin Reagent, NaOH solution, Lead acetate Solution, Ammonium molybdate Solution	HTBC004-25PR	25pr*	8550
HiPer® Protein Estimation Teaching Kit (Quantitative) **Contents:** Standard Protein Samples, Test Samples, Biuret Reagent, Folin's Reagent, Bradford's Reagent	HTBC005-5PR	5pr*	2520
HiPer® RNA Estimation Teaching Kit **Contents:** Standard RNA Sample, Orcinol monohydrate, Ferric chloride (anhydrous), 20X SSC, Test Samples	HTBC007-5PR HTBC007-20PR	5pr* 20pr*	3395 10470
HiPer® SGOT(ASAT) Estimation Teaching Kit **Contents:** Substrate reagent (SGOT), Pyruvate standard (2mM), DNPH Reagent, NaOH Reagent (4N), Molecular Biology Grade Water.	HTBC008-20PR	20pr*	1535
HiPer® SGPT(ALAT) EstimationTeaching Kit **Contents:** Substrate reagent (SGPT), Pyruvate standard (2mM), DNPH Reagent, NaOH Reagent (4N), Molecular Biology Grade Water.	HTBC009-20PR	20pr*	1560
HiPer® Yeast Cell Immobilization Teaching Kit **Contents:** Yeast Cells, Sodium alginate, 1.5% Calcium chloride Solution, YPD, Agar powder, Glucose Solution, Diluent Buffer, Sucrose, DNSA Reagent, Potassium sodium tartrate, Centrifuge Tubes	HTBC001-10PR	10pr*	5610

HiPer® Chromatography Teaching Kits			
HiPer® Affinity Chromatography Teaching Kit **Contents:** Concanavalin A- Agarose Suspension, Standard Protein, Crude Protein Sample, Elution Buffer, Sodium acetate Buffer, H_2O_2, ABTS, Folin's Reagent, Column, Solutions (A, B, and C).	HTC002-5PR	5pr*	9470
HiPer® Gel Filtration Chromatography Teaching Kit **Contents:** Gel Filtration Column (2 ml), Gel Filtration Buffer, Sample	HTC004-5PR	5pr*	3830
HiPer® Ion Exchange Chromatography Teaching Kit **Contents:** CM-Cellulose, Phosphate Buffer, Micrococcus luteus culture, NaCl Solution, Standard Lysozyme, Column, Tubes, Buffer A and B.	HTC001-5PR	5pr*	5065
HiPer® Thin Layer Chromatography Teaching Kit **Contents:** Amino acid Samples (Arginine, Glutamine, Valine etc.), Test Sample, TLC Plates, Developing Reagent, TLC Solvent	HTC003-10PR	10pr*	4935

*Preparation
All Teaching Kits to be Stored at 15-25ºC except certain components specified in each kit (as specified on label)

We have upgraded to **Illumina™ NextSeq 2000 System, ABI™ SeqStudio Flex Genetic Analyzer**

Now get faster TAT, higher throughput & greater scalability

NABL ACCREDITED*

Services Offered :

Microbial Identification Services*
RNA Sequencing Services
Targeted Metagenomic Sequencing Services and more...

WE PROVIDE :

- End-to-End Service, from DNA / RNA Extraction to Data Analysis
- Technical Consultation from Scientists & Experts
- Fully Customized Solutions that Fit Your Project Objectives

*We are now NABL Accredited as per ISO/IEC 17025:2017 for Microbial Identification Services (MBS409, MBS410, MBS411,MBS412,MBS413 & MBS414)

Hi-Gx360® Sequencing and Bioinformatics Services

Sanger Sequencing

Conventional Sanger Sequencing Services

- Cycle sequencing using BDT v3.1 chemistry .
- For unpurified samples, purification will be carried out by magnetic bead method.
- Fasta and .ab1 file data will be provided.

BioIT Services for WGS			
Whole Genome analysis for Bacteria/ Archaea (Basic) • Adapter trimming and reads quality control • High Quality Denovo assembly of isolates • Reference guided annotation (assign functions)	**MBS001**		**On Request**
Whole Genome analysis for Bacteria/ Archaea (Advanced) • Adapter trimming and reads quality control • High Quality Denovo assembly of isolates • Reference guided annotation (assign functions) • Phylogenomic analysis (if assembly is from species of interest) • Characterization of isolates with typing schemes (Multi locus sequence typing) • Variant Calling for mutation prediction Identification of core and accessory genes using pangenome analysis	**MBS002**		**On Request**
Whole Genome analysis for Fungi (Basic) • Adapter trimming and reads quality control • High Quality Denovo assembly of isolates • Target based prediction of proteins using assembly • Function assignment of predicted proteins (Annotation)	**MBS003**		**On Request**
Whole Genome analysis for Fungi (Advanced) • MBS003 • Phylogenomics • Natural Product Discovery	**MBS004**		**On Request**
Whole Genome analysis for Virus • Adapter trimming and reads quality control (Generation of HQ reads) • Removal of host reads • Mapping of reads with reference genome • Quality control at mapping level • Variant calling analysis and annotation of variants	**MBS005**		**On Request**
Whole Genome analysis for Yeast (Basic) • Adapter trimming and reads quality control • High Quality Denovo assembly • Target based prediction of proteins using assembly • Function assignment of predicted proteins (Annotation)	**MBS022**		**On Request**
Whole Genome analysis for Yeast (Advanced) • MBS022 • Phylogenomics • Natural Product Discovery	**MBS023**		**On Request**
Whole Genome analysis using Short & Long Reads for Bacteria/Archaea (Basic) • Adapter trimming and reads quality control • High Quality Denovo assembly of isolates • Reference guided annotation (assign functions)	**MBS006**		**On Request**

Product	Code	Packing	Price in ₹
Whole Genome analysis using Short & Long Reads for Bacteria/Archaea (Advanced) • Adapter trimming and reads quality control • High Quality Denovo assembly of isolates • Reference guided annotation (assign functions) • Phylogenomic analysis (if assembly is from species of interest) • Characterization of isolates with typing schemes (Multi locus sequence typing) • Variant Calling for mutation prediction • Identification of core and accessory genes using pangenome analysis	**MBS007**		**On Request**
Whole Genome analysis using Short & Long Reads for Fungi (Basic) • Adapter trimming and reads quality control • High Quality Denovo assembly • Target based prediction of proteins using assembly • Function assignment of predicted proteins (Annotation)	**MBS008**		**On Request**
Whole Genome analysis using Short & Long Reads for Fungi (Advanced) • MBS008 • Phylogenomics • Natural Product Discovery	**MBS009**		**On Request**
Whole Exome Analysis (Human) • Run information • Maping statistics • SNPs and InDels calling • Variant annotation, SNVs concordance • Tumor-Normal pair analysis	**MBS027**		**On Request**
Mitochondrial Whole Genome Analysis	**MBS028**		**On Request**
Genome Mining for Natural Products from Bacteria/Archaea (requires MBS001) • Adapter trimming and reads quality control • High Quality Denovo assembly of isolates • Reference guided annotation (assign functions) • Detection of secondary metabolite gene cluster	**MBS010**		**On Request**
Genome Mining for AMR and other features from Bacteria/Archaea (Requires MBS001) • Adapter trimming and reads quality control • High Quality Denovo assembly of isolates • Prediction of ORF and analysis of predicted protein sequences • Detection of Functional Anti-microbial resistance genes using reference database • Annotations of detected Anti-microbial resistance genes	**MBS011**		**On Request**
Genome Based Microbial identification (requires MBS001) • Adapter trimming and reads quality control • High Quality Denovo assembly of isolates • reference guided annotation (assign functions) • Phylogenomic analysis (if assembly is from species of interest) • Calculation of genome relatedness indices, such as ANI	**MBS012**		**On Request**

Product	Code	Packing	Price in ₹
In-silico genome isolation for mixed cultures • Adapter Trimming and read quality control • Denovo Assembly of composite genome • Binning obtained contigs into separate genomes • Annotation of each bin/culture	**MBS019**		**On Request**
BioIT Services for Microbiome Data / Metagenome			
Microbiome profiling (Basic Analysis 16S/18S/ITS/any other gene based) For 16S/18S Data: • Adapter trimming and reads quality control in order to generate HQ reads • Generation of error profile plots using machine learning approach • Filteration of error-model non-conforming reads from HQ reads • Amplicon sequence variant (ASV) table generation followed by removing chimerias • Taxonomic distribution plots using reference database • Alpha Diversity analysis • Beta diversity analysis For ITS Data: • Adapter trimming and reads quality control in order to generate HQ reads • Extraction of desired ITS region using HMM models • Sequence clustering at standard percent identity threshold • Chimera removal of representative sequences • Assign taxonomy against reference database • Generation of OTU abundance table and phylotype abundance table	**MBS013**		**On Request**
Microbiome profiling (Advanced Analysis 16S/18S/ITS/any other gene based) • Adapter trimming and reads quality control in order to generate HQ reads • Generation of error profile plots using machine learning approach • Filteration of error-model non-conforming reads from HQ reads • Amplicon sequence variant(ASV) table generation followed by removing chimerias • Alpha Diversity analysis • Beta diversity analysis • Graphical representation of Taxonomic abundance distribution • Differential abundance analysis • Differential abundance analysis at taxonomic levels • Prediction of functional composition of Microbial Communities • Detection of common set species shared by community	**MBS014**		**On Request**
Shotgun Metagenomics (Bacterial/ Archaeal/Viral communities) • Adapter trimming and reads quality control in order to generate HQ reads • Removal of Host contamination • Taxonomic profiling of reads • Functional profiling of reads • Graphical representation of functional categories	**MBS015**		**On Request**

Genome resolved Metagenomics (Bacterial/Archaeal/Viral communities) • Adapter trimming and reads quality control in order to generate HQ reads • Removal of Host contamination • Preparation Co-assembly by pooling samples • Mapping High quality reads on Co-assembly • Preparation of contig database containing taxonomic and functional information • Storing sample specific information in profiles • Grouping sequences into individual genome by binning approach • Functional annotation of High Quality bins • Graphical representation bins	**MBS016**		**On Request**
BioIT Services for Transcriptome			
Transcriptome analysis (Kallisto/ Salmon or prokaryote) • Adapter trimming and reads quality control in order to generate HQ reads • Transcript quantitation and abundance estimation using pseudo alignment approach. • Differential expression analysis based on experimental design • Identification of Up and Down regulated transcripts • Graphical representation of differentially expressed transcripts	**MBS017**		**On Request**
Transcriptome analysis (HiSat/Star or eukaryote) • Adapter trimming and reads quality control in order to generate HQ reads • Mapping of High quality reads on reference genome • Transcript quantitation and abundance estimation from bulk RNA-Seq reads aligned to a reference genome. • Differential expression analysis based on experimental design • Identification of Up and Down regulated transcripts • Graphical representation of differentially expressed transcripts	**MBS018**		**On Request**
small RNA/miRNA Data Analysis	**MBS030**		**On Request**

Deep-Multiple Well Plates (w/o lid)

- Centrifugation 3000 x g.
- Alphanumeric grid demarkation.
- Cylindrical wells.
- Total volume : 1.6 ml / 2.2 ml per well.
- Used in nucleic acid isolation protocols.
- Used for collection and storage for non-binding protein assays, enzymes or receptor assays or with cell harvesters.
- Compatible with multi-channel or automated pipetting systems.

HiGenoMB® Software			
HiGenoMB® Forensic ID DNA Quantification Software Software is a user friendly Web based application developed specifically to assist forensic experts who work on Human DNA Identification (HID). Features : • First, Novel & Open software developed to assist Forensic laboratories • Designed for use with commercially available Real Time PCR system & HID kits • Quantification of Human DNA • Degradation Index (Quality of the DNA) • Male: Female Mixture or Ratio • Sample Inhibition with IPC shift • Dilution series calculation for Autosomal & Y STR	MBES01-1LC	1lc	On Request
HiGenoMB® Primer and Probe Design Software Software is a user-friendly offline application developed to assist researchers to design primers and probes for specific and sensitive PCR amplification. • Windows based standalone software for Primer designing • Conventional/Probe based PCR • Direct BLAST analysis for specificity testing	MBES02-1LC	1lc	On Request
HiGenoMB® Forensic Bone DNA Prediction Software The Software represents a cutting-edge solution designed to revolutionize the evaluation and analysis of DNA extracted from skeletal remains. Tailored to meet the unique challenges posed by bone samples, this sophisticated software employs advanced algorithms and state-of-the-art technologies to ensure accurate and reliable assessments of DNA. • Specialized Bone Analysis Algorithms • User-Friendly Interface • Quality Metrics and Reporting • Compatibility with Various Instruments	MBES03-1LC	1lc	On Request

Transilluminator Series

UV Transilluminator

Unique features:

Auto shut down with timer for longer life of UV tubes.

Features:

- Light weight with superior sensitivity.
- Long-life, pure-UV quartz filter.
- Resistant to most chemicals, minor scratches, polarization.
- High intensity UV tubes are used to view DNA and RNA gels.
- Highly polished reflectors for uniform illumination.
- Electronic high frequency ballast to allow instant start.
- Ultra safe UV blocking lid to protect from direct exposure to UV light.

Recommended for use with disinfectants, biocides, fungicides, sanitizers in order to prevent or control aerial infections or contamination

- 4 times space coverage capacity than regular Fogger
- Evenly disinfects entire space/air by generating ultra-fine, non-wetting aerosols
- Prevents condensation of fog due to its rotational movement

Plant Tissue Culture Media

Plant Tissue Culture performs role of a catalyst for agricultural research and industrial development in an emerging economy. At HiMedia, we continuously keep exploring our Research and Development activities for building new quality products to meet the rapidly changing needs of researchers and growers. Right choice of medium based on nutritional requirement of different plant tissues is a fundamental step towards successful in vitro cultivation of plant species. Investment in a right product is a key for economic growth of Plant growers.

Himedia is available to serve plant researchers at every stage of research process and provide complete end to end solution for their problems. We provide extensive range of classical as well as crop specific media in powder form along with their supplements, in both powder and liquid forms. HiMedia delivers media which undergo stringent quality control testing and analysis along with plant tissue culture tests and maintaining adherence to quality and consistency.

As customization is heart of our service (activity), we also provide customized media as per the needs and requirements of a researcher with committed confidentiality, at affordable prices. Our distribution capabilities and real time inventory tracking ensures that your plant tissue culture products are available on time, whenever and wherever you need them.

TP007-1KT HiPer Marigold Plant Tissue Culture Teaching Kit

Teaching Kits

HiMedia offers Plant Tissue Culture Teaching kits to assist Plant Tissue Culture beginners for the preparation and implementation of their educational lessons by providing demonstration in a comprehensive and effective manner.

- Provide excellent teaching approach for understanding and practical handling of the Plant Tissue Culture techniques
- Includes everything required for your demonstration right from growth media to result sheets.
- Designed in a simple user friendly manner
- Step by step guide is provided
- Trouble free learning

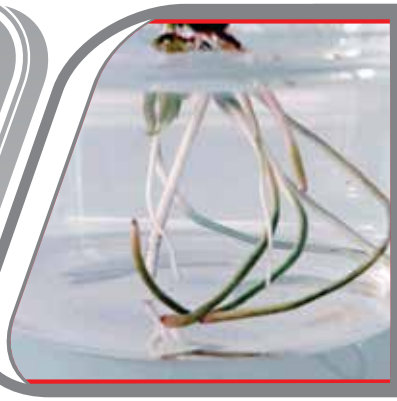
HiGel Agar x™

HiGel Agar X™ is a mixture blend having the positive attributes of both agar and clerigel. Remarkably suitable gelling agent for micro propagation with commercial value which produces high gel strength at low concentration.

- Forms a transgel with high gel strength at low concentration.
- Gels at 4 gms/L concentration and facilitates analyses of the cells and tissues
- Ideal medium for *in vitro* plant tissue cultivation which helps to control hyperhydricity.
- Gels uniformly and faster as compared to Agar.
- Forms a firm gel at 3-4 g/L



Product Name	HiGel Agar™ , Plant Culture Tested

GELLING AGENTS

Plant Tissue Culture takes place in three-dimensional space. Callus cells, singly or in very small clusters, can be grown in liquid media, but for shoots to extend up and then roots to penetrate, a semi-solid gel surface is needed. This necessity warrants the use of gelling agents, as an important component of the medium.

The primary reason to use gelling agents is to create a semi-solidified media gel providing proper anchorage to the cultures. The gelling agents also have inherent physical and chemical properties of controlling the movement and availability of water and ions in the matrix, thus contributing to osmotic potential of the medium.

The choice of gelling agent may change with the stage of micropropagation and can influence growth of the culture. Both purity and cost of the gelling agent are important factors in any research or production operation.

HiMedia offers a wide range of gelling agents with at par quality, clarity and gelling strength which includes Agar, CleriGel™ Ultra, CleriGel™ Super, CleriGar™, CleriGar™, HiGel Agar X™ and Carrageenan.

The Gel strength of the gelling agents is tested using calibrated gel strength tester machine, TAXT Express standard texture analyzer as well as by assessing firmness of the gel.

PLANT GROWTH REGULATORS

Plant hormones or plant growth substances are naturally occurring chemicals within plant tissues, which play a regulatory function in growth and development of a plant. These are usually synthesized in certain part of the plant and moved through the plant from one part to another. Chemicals prepared synthetically or through fermentation processes, which mimic the action of naturally occurring growth substances and have an ability to modify plant growth in some way, are termed as plant growth regulators.

The five major classes of Plant Growth Regulators are Auxins, Cytokinins, Gibberellins, Polyamines and Abscisic acid. Each of the growth regulator has a specific role and function which can be used to promote various physiological processes like callus induction, somatic embryogenesis, root formation, inhibition of axillary bud, cell elongation/ division, regulation of organogenesis, soma clonal variation, seed germination etc. Each response is often the result of two or more regulators acting together. Auxins and Cytokinins are by far the most commonly used regulators and usually form an integral part of nutrient media.

CONTAMINATION CONTROL SYSTEMS

Avoidance or prevention of microbial contamination in plant tissue culture is critical. Microbial contamination is one of the major challenges in Plant Tissue Culture. Microorganisms infecting plant tissue culture leads to depletion of nutrients in the medium and reduces chances of survival of the plant culture.

To counter the contamination issues, HiMedia offers a wide range of antimicrobials including antibiotics, antifungals and selection agents. Our proprietary products like Phytapro™ and antimicrobial supplement are broad spectrum biocide and have been specially designed for use in plant tissue culture.

The potential of antibiotics as selection agents has been very well realized in plant transformation systems and we provide a wide range of important selection agents including Hygromycin B, Kanamycin, Timentin, neomycin etc.

PLANT TISSUE CULTURE TESTED CHEMICALS

HiMedia is one of the foremost supplier of comprehensive range of plant tissue culture tested chemicals and biochemicals. The complete range of plant tissue culture tested chemicals are assessed analytically for chemical parameters along with specific plant tissue culture tests in order to verify their suitability in specific applications.

Many users prefer to design their own formulations, keeping this requirement in mind, we offer a wide range of chemicals including macroelements, microelements, amino acids, carbohydrates, vitamins and organic supplements.

All our products undergo stringent quality control required to maintain consistency and quality. We have developed in-house testing criteria for all our products and have defined release criteria. The routine testing protocol includes parameters such as:

Quality Parameter	Description
Appearance	Individual product is tested for Color, Texture, Nature, Consistency
Solubility	Individual product's solubility is tested in the solvents that they are soluble in
FTIR	Infrared absorption and emission spectra are measured and are matched with the standard spectrum
Assay	Qualitative/ Quantitative measurement of the analyte is done by carrying out different kinds of assays
Melting Range	Purity of a substance and amount of impurities present in a sample is determined
Plant Tissue Culture Test	Application test

PLANT TISSUE CULTURE SYSTEMS / ACCESSORIES

One of the important pre-requisite for any tissue culture plant is the requirement of sterile environment for their growth and development. We offer a wide range of plant tissue culture tested systems and accessories with best quality to provide sterile environment for the acceleration of your research processes. We provide a wide range of PhytaJars with varied shapes and sizes for better visualization along with more space for proliferation and growth of the culture. Other lab accessories includes stainless steel forceps, stainless steel stands, scalpel holder, scalpel blades etc. that are bio assayed for plant tissue culture tests.

As maintaining sterility is of prime importance in plant tissue culture, we offer PhytaCap™ and PhytaWrap™ for capping and sealing of the plant tissue containers, which would help our commercial users to a great extent.

Soil Analysis

Soil Testing Kit for Macronutrients

Fastest way to analyze macronutrients of your soil yourself

- An inexpensive and user friendly soil test kit
- This kit is very simple to use and very reliable It covers all the tests like pH, Nitrate-Nitrogen (N), Ammonical Nitrogen (N), Phosphorus (P), Potassium (K) and Organic Carbon (O.C.)
- Instructions guide book plus colour chart for pH, N, P, K and OC levels are included

Soil Testing kit for Micronutrients

PLANT TISSUE CULTURE

Lets make our world more green and beautiful...

Global food security that necessitates doubling of food production to meet the needs of an increasing population poses a real challenge for the future of food. In order to produce more as well as conserve more, it is imperative that we pay extra attention and care towards plant growth. Plant science is an interactive science with bridges between number of disciplines like plant biotechnology, Plant genetics, Plant physiology, Plant breeding, horticulture, plant molecular biology. Plant Tissue Culture techniques have been utilized appropriately for improvement of many agronomic and food crops to provide more food and planting material to farmers.

We provide researchers and growers a comprehensive range of PTC products which is driving force of customer research and success.

Choose green, to grow exponentially.

Higronics® ideas to grow

Introduction

Hydroponics, the technology of growing plants without soil, has gained popularity in India only in the past decade. The origin of hydroponics dates back to 19th Century, and since then, it has evolved such that, with advanced resources and technological intelligence, it has become possible to grow plants anywhere in the world, irrespective of the terrain and, for the matter of fact, crops can be grown even in space.

This technology has optimized space in the current agricultural set up, and has also reduced the consumption of fresh water (requires only 10% water as compared to conventional farming) and increased the quality of yield even in arid regions, thus bringing economic stability. Hydroponics, as a technology, has limited terrestrial biodiversity loss through reversion of large tracts of current stressed farmlands into sustainable and fundamentally natural environments.

If you want to grow the biggest, juiciest, yummiest plants you can possibly imagine, then hydroponics is the right choice of farming technology for you.

Philosophy

HiMedia® ventured into hydroponics in 2016 with a mission of sustainability, social responsibility, and most importantly, bringing about the much-needed change for the benefit of all. Our philosophy is built around the fundamentals of social upliftment through innovation and education, and thus began the journey of Higronics®.

From a humble start as a hydroponics company, to launching our first product, our major focus has always been to excel in product expertise, along with delivering an exceptional first of its kind experience to our customers. The higronics® platform is a One Point Solution (OPS) for all scales of hydroponics applications. We are thankful to our clients for being a part of this exciting journey.

We are sure that your support and encouragement will grow exponentially in the years to come.

Media Based Systems

Cocopeat Based Systems

Cocopeat Based Systems are very economical and easy to install. Cocopeat substrate allows increased aeration, thus giving increased yield & better quality of produce.

Single Planter Growbag System

This system includes our strong and UV Stabilized growbags, which are prefilled with either cocopeat or, a mixture of cocopeat and perlite. These are widely used to grow tomatoes and cucumbers, and are mainly used for climbers and creepers.

Minimum area for commercial cultivation: 500 square meter

Trough System

Our trough system gives the cultivator more control over growing medium. They have a longer life and can last for about 5-6 years. These are easy-to-install systems and are widely used in Greenhouses and Net houses.

Minimum area for commercial cultivation: 500 square meter

Multiplanter growbags

These are ready-to-use grow bags. They are durable; UV stabilized and can be used for a minimum of 2-3 years, depending upon the handling and extent of usage.

Minimum area for commercial cultivation: 500 square meter

Vertigrow system

These systems use our insulated pots designed for high density vertical farming. They are popular for usage in strawberry cultivation and for production of leafy vegetables.

Minimum area for commercial cultivation: 500 square meter

Hydroton Based Systems

The Dutch Bucket systems or Bato Bucket systems are a durable & sustainable method of hydroponic farming. This system conserves large amount of water & nutrients, thus saving substantial amount of resources.

Dutch Bucket

Combination of Hydroton, LECA or Perlite in our Dutch bucket is a perfect blend for growing any creeper vegetables with high crop values. These systems are normally used for growing crops like tomato, cucumber and capsicum.

Minimum area for commercial cultivation: 500 square meter

Water Culture Systems : NFT Systems

Nutrient film technique (NFT) is a hydroponic technique where a thin stream of water containing all the dissolved nutrients required for plant growth is re-circulated past the bare roots of plants in a gully, also known as channels. NFT systems require lesser water and consume less amount of nutrients. They avoid the supply, disposal and cost problems associated with media based systems. NFT systems are relatively easy to disinfect roots and hardware compared to other system types. The absence of medium makes it easy to inspect roots for signs of disease, feed adequacy, etc. NFT systems are the best systems for leafy vegetables. A-Shape NFT provides more planting footprint per sq. meter area and this usage of 3 dimensional spaces gives a very high yield per acre.

Horizontal NFT

NFT system can work in either horizontal or vertical setups depending on the grow space and the types of plants you wish to grow (like trying to grow vertical stacks of tomatoes would be difficult).

Minimum area for commercial cultivation: 500 square meter

Vertical NFT A-Shape

A-Shape NFT provides more planting footprint per sq. meter area. This design offers optimum 3 dimensional space utilization, thus providing maximum yield per acre.

Minimum area for commercial cultivation: 500 square meter

Indoor Hydroponics with NFT Systems

The 'City Farming' revolution starts here. This cultivation process involves growing crops/plants in small indoor areas using multi-storied stacks to maximize production. All the required elements that influence healthy plant growth can be easily controlled and maintained. These include factors like light, temperature, humidity, pH levels, nutrients and water. The ability to control these elements makes hydroponic gardening easier and less time consuming against conventional soil gardening.

NFT systems provide a recurring flow of nutrient solution without the use of a timer (unlike aeroponic system). Rather, the roots of plants hang down in the solution and plants absorb the necessary nutrients from the flowing stream of nutrient solution.

Indoor hydroponics is a beautiful combination of technology and aesthetic beauty which not only saves up on cost, space and manual labour, but also looks beautiful and contributes to your overall health and well-being. Your indoor house setups are incomplete without a small hydroponics system. Who would have known living in the modern times could be so exciting!

Autogrow™

Higronics has now joined hands with Autogrow

We bring solutions from horticulture technology experts for growers at affordable price. We are authorized resellers of all Autogrow products & offerings

Advantages of Automation in Hydroponics

For growers looking to optimize, modernize and grow their business for sustainable crop production- the key is automation. The overall benefits of automating your growing operation are vast and plentiful. Regardless of how you're looking to develop your growing enterprise, automation offers universal benefits that allow you to achieve your goals - and then some.

Save time, Reduce Costs

Help growers produce sustainable crops using automation

New growers setting up their grow sites

Existing growers looking to modernize

Our goal is to allow growers to work more efficiently, and to put their energy in the places that need it most

Improve Crop Health & Yields

Automation and data analytics can not only help you grow healthier plants and save on labour, it can significantly lower your risk of crop loss

With remote access control from any mobile device you can know immediately if anything goes wrong with text and email alerts

Affordable, Scalable Solutions

Products for all levels of growers' needs, from introductory products perfect for those undertaking their first steps at controlling fertigation, to multi-crop / multi-area systems to help you manage your nutrient, irrigation and climate control

AUTOMATION SYSTEMS			
Easy Grow (Customized Automated Control System) New	**HGAC615-1NO**	**1no**	**On Request**

This is the customized automated control panel which helps growers to get real time data. Hydroponic monitoring system enables simple graphical user interface-based programmable time control and other monitoring of the system. Hydroponics system controller automatically manages all aspects of hydroponic greenhouse climate control from temperature to CO2, lighting to humidity.

Benefits:
1. Decrease Your Labor Cost.
2. High Accuracy
3. Increases Quality and Yield

Autoclavable Petri Plates▲

Precautions to be observed for Autoclavable Petri Plates

- Avoid dry heat sterilization.
- Avoid acid, solvents or disinfectant for washing.
- Avoid drying of plates above 50°C.
- Avoid direct contact of water with plates while autoclaving.
- Recommended sterilization by autoclaving at 15 lbs pressure (121°C) for 30 minutes.
- Recommended to use only Soap powder or Teepol for washing.

Centrifuge Tubes# Autoclavable

A nomogram can be used to derive the rpm setting for your centrifuge.

1) Measure the radius (cm) from the center of the centrifuge spindle to the end of the test tube carrier. Mark this value on scale A.
2) Mark the relative centrifugal force (e.g. 400) on scale B.
3) With a ruler, draw a straight line between points on columns A & B, extending it to intersect column C. The reading on column C is the RPM setting for the centrifuge.

ELISA Plates

- 300 - 400 μl/well.
- Alphanumerically marked tray (holder).
- High binding capacity, 300 ~ 400 ng IgG/cm^2 suitable as solid phase of protein with medium / large molecular weight (>10kD).
- Medium binding capacity, 200 ~ 300 ng IgG/cm^2 suitable as solid phase of protein with large molecular weight (>20kD).
- Animated, binding capacity of 100 ng IgG/cm^2 suitable as solid phase of protein with small molecules.
- Polystyrene material.

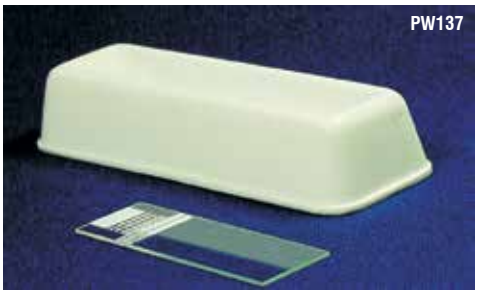
Auto HiPette™

Auto HiPette™

LA692



HiMedia introduced AutoHiPette™ (LA692), an easy-to-use pipette controller with the following striking features:

- Has a safety valve and hydrophobic filters that provide protection against fluid penetration.
- Three different speed modes- High, Low and Gravity Drain.
- Provide better control of speed (convenience of fine-tuning pump speed).
- Cadmium-free environment-friendly NiMH batteries (extended operational life).
- Batteries can be changed very easily by the user.
- Has a low battery indicator.

Hi-Igloo Ice Cold Pack

Hilgloo Ice Cold Packs :

- Keeps perishables colder, for longer time in an efficient and convenient manner.
- Contents non-toxic & safe.
- Extremely economical because of multiple usability.
- For cold chain transport in:
  - Vaccine Pharma Industry.
  - Dairy Industry.
  - Fisheries, Fruit and Food Industry.
  - Hospitals & Pathology labs for cold transport of heat sensitive materials such as blood and patient's samples.

Hi-Igloo Ice Cold Pack Keeps colder for a long time. Contents non-toxic and safe.	**LA521-10X100G** **LA521-10X450G**	**10x100gm** **10x450gm**	**270** **455**

Cryogenic Permanent Marker (Dual point)

- Dual point high quality permanent ink marker
- Extra fine and fine points; 2 pens in 1
- Durable, heavy duty long lasting nibs (withstand rough treatment and provide delicate touch on various materials); Low odour
- Permanent and waterproof (all colours are equally permanent and lasting as black colour)
- Excellent performance on plastic, metal, cloth and other surfaces
- Not for glass surface
- Easy to handle for applications in bio-medical laboratories

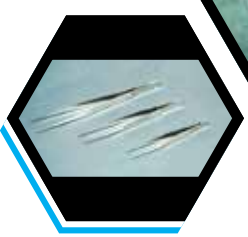
For Histopathology & Cytology

Stains

- S034 - Haematoxylin[Harris]
- S039 - May-Grunwalds stain
- S007 - Eosin, 25w/v, 2%w/v

Embedding Cassettes

- 12 different attractive non-cytotoxic colours
- Multiple colours help to differentiate specimens like kidney from bone, eye, etc
- Molded from a high-density polymer that is totally resistant to histological solvents.
- Large labeling areas located on 3 sides of the cassette.



Slides, Coverslips & Mountant

- BG003 - Frosted glass slides
- BG001 - Glass slide Plain
- BG014C - Premium quality coverglass
- GRM655 - DPX mountant (Liquid)

Staining Accessories

- CG147 - Slide staining jar
- CG149 - SS staining rack
- PW354 - Coplin Autoclavable Jar
- CG144 - Coplin slide staining Glass Jar

Accessories

- LA707 - SS Blunt Forceps
- LA771 - Sterile Scalpel blade no 20
- LA830 - SS Scalpel holder
- LA710 - SS pointed forceps

Fixatives

- S102 - Cyto/ Histo Fixative
- S109 - Buffered Formalin Fixative
- S118 - Haematology Fixative
- S119 - Fixative [BFA]

Chemicals

- AS100 - Glycerol 85% AR
- AS080 - Xylene AR
- AS017 - Formaldehyde LR
- AS059 - Methanol

Paraffin Wax

- GRM1137 - Paraffin Wax (noncaking)
- GRM10680 - Paraffin Wax (noncaking) in block
- GRM10702 - Paraffin Wax pellets
- GRM9945 - Paraffin Wax with ceresine

Sample Containers & Markers

- PW016T - 50 ml Sample Container
- PW047 - 50 ml Multipurpose container
- LA483 - Permanent Glass marker
- LA 697 - Cryogenic Permanent Marker (Black)

Personal Protective Accessories

- LA228 - Disposable mask
- LA232 - Disposable Apron
- LA885 - Latex Gloves, Mediuum
- LA886 - Bluple Nitrile Gloves, Medium

FLAPPING HOMOGENIZER

Product Code : **LA1082**

For Homogenisation of Food Samples for Microbiological Analysis

PRODUCT FEATURES

- Stainless steel housing with plastic coating
- Easy to clean working chamber
- Control panel with digital display
- Leading microprocessor technology for flap control
- Adjustable flapping speed (20~600 Strokes / min, 10~300 rpm)
- Timer function from 1 min to 24 hours
- Maintenance-free brushless DC motor

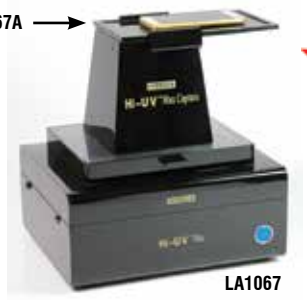
Transilluminator Series

UV Transilluminator



Unique features:

Auto shut down with timer for longer life of UV tubes.

Features:

- Light weight with superior sensitivity.
- Long-life, pure-UV quartz filter.
- Resistant to most chemicals, minor scratches, polarization.
- High intensity UV tubes are used to view DNA and RNA gels.
- Highly polished reflectors for uniform illumination.
- Electronic high frequency ballast to allow instant start.
- Ultra safe UV blocking lid to protect from direct exposure to UV light.

HiBioKem ID™ Reader

Usage
Appliance for rapid automated identification of microorganisms using Biochemical reactions.
(KB001, KB002, KB003, KB004, KB005A, KB006, KB007, KB008, KB010,KB011, KB012A, KB013, KB014 & KB016, KB019, KB020, KB021).

Advantages
- A rapid Automated System for identification for microorganisms.
- Automated Colour identification leads to results.
- Ideal for detection of microbes from pharma, food, water and clinical sector.
- Rapid, reliable and reproducible technology
- Easy to perform.

LA1143
HiCFU Counter™ C

Usage
Automated counting of the microbial colonies as colony forming unit(CFU) on any solidified medium.

Advantages
- AI Enabled Automated system for rapid counting of microbial colonies.
- Results under 30 seconds.
- Avoid errors while manual counting.
- Can be trained to read colonies based on individual
- Ideal for but not exclusive for pharma, food, water, dairy and research institutes.
- Ideal for growth promotion test(GPT) readings.
- Any type/any size of colonies can be counted.
- Colonies can be add/Remove.

Flat Bottom pH Electrode

Flat Bottom pH Electrode (LA693)

For general purpose use when precise pH determination is required. This electrode is recommended for use on soft, moist surface agar gel plates both solid and semi solid such as meat, bread, dough or small samples.

Durable epoxy body featuring sealed gel-filled reference, that require no refilling and may be used in pressurized systems without difficulties.

Dimension: 122 mm (Length) x 12 mm (diameter).

HiAirflow Economical

For monitoring Airborne Microorganisms

- Advance technology
- Data logging with 21 CFR compliance software interface

Main Features

- Economical and Light weight model.
- Advanced technology with 21 CFR compliance software interface.
- Used with contact Petri plates 90mm ± 2 mm.
- Rechargeable battery operated (memory effect free).
- Silent electric fan microprocessor controlled to assure the maximum reliability of the air volume sampled.
- Low battery control and alarm.
- User friendly. Prompts in English languages: functions are visualised "step-by-step".
- Delay start.
- Total volume of sampled air programmable from 1 up to 2000 litres, with 1 litre steps.
- Manual sampling (for air volumes greater than 1000 litres).
- Sequential sampling also available.
- Storing and visualising up to 99 samplings, with record of progressive number, date, hour, volume or time of sampling, flow rate, type of sampling (manual, sequential, programmable).
- USB port to download data to PC.
- Remote switch with infra-red rays control.
- Two sampling positions (90°-180°) and built-in socket for tripod.

- Structure: Body in anti-shock polyuretane compound with aspirating chamber.
- Aspirating head: Stainless steel (included).
- Aspirating chamber: for 90 mm Petri dish disposable.
- Battery charger: cable connection 90-264 Vac / 18Vcc 15W.
- Control screen: alphanumeric reading screen.
- Cable connection: for data download to PC.
- Cable connection: for battery charging.
- Main Electronic board: Main CPU board with microcontroller for full parameters real time monitoring.
- **LA1058** – Flow rate **100 litres** per minute
  LA1071 – Flow rate **180 litres** per minute
- Programmed volumes of aspirated: 30, 50, 100, 150, 200, 250, 400, 500, 750, 1.000
- Calibration Certificate: Included.
- Instruction Manual: Included.
- Qualification documents - IQ-OQ-PQ.

Air Purifier Systems Mark III, V

Banish Pathogens From Indoors

Pathogens are a health hazard in all enclosed work-spaces.

Air Purifier **4 stage** Purification System traps them, reduces the bioburden in the air automatically and silently so that you can take a deep breath of clean purified air without any health hazard.

In a compact and light weight, sturdy.

Air Purifier Mark III Capacity range : 1000 ft3	**LA522-1NO**	**1no**	**54210**
Air Purifier Mark V Capacity range - 3500 ft3	**LA636-1NO**	**1no**	**54395**

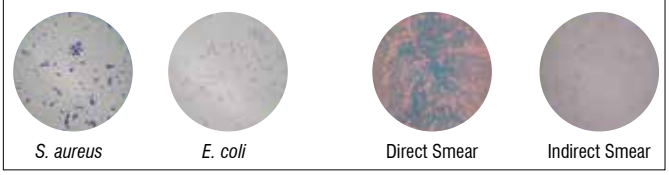
Gram Staining & Acid Fast Staining (Ziehl-Neelsen)

HiMono Auto Gram Stainer™

Facilitates Gram staining of 20 slides per cycle

Product	Code	Packing	Price in ₹
HiMono Auto Gram Stainer™ Automated system for Gram staining.	**LA1011-1NO**	**1no**	**On Request**
HiDuo Auto Stainer™ Automated system for dual staining, Gram staining and Acid Fast Bacilli Staining.	**LA999-1NO**	**1no**	**On Request**

Heating system for Ziehl-Neelsen hot staining method
LA999 : The automatic heating function is built in to stain it with heating. Temperature in the tray can be controlled. Duration and level of temperature can be pre programmed.



Salient Features

- Available to stain for **Gram** and **Ziehl-Neelsen (2 in one)**
- Stain and dry up to **10 slides in 13 minutes**
- **No cross-contamination** in all process
- Reduction in **labour costs**
- **Heating system** to Ziehl-Neelsen staining
- **Easy cleaning system** to clean tray and Staining nozzle
- Checking and Warning for **lower level of reagent**
- **Minimize personal variation** during AFB staining

Simplicity: Just need to set desired Q'ty and start the staining cycle.
All of staining process can be controlled by program.
It provides reproducibility by controlling all phase of Stain cycle precisely.

No Cross Contamination
LA999 / LA1011 is available to apply fresh reagent on slides mounted in a rotating tray. Specimens contact only fresh, precisely metered stain from separate nozzles.

Sterility Testing Canisters

HiSteriCan™ to fit for sterility testing of variety of drugs and formulations

- Closed systems to avoid the extraneous contamination
- ETO sterilized, Gamma sterilized
- 0.45 μ membrane, **MCE, NYLON, PVDF available**
- 100% membrane integrity
- Recommended for single use
- Recommended for variety of applications:
  - LVP in bottle with or without antibiotics,
  - Powder in vails with or without antibiotics
  - Lyophilized Powder for Injection (Biological products)
  - Emulsions for hard filtering aqueous solutions
  - For prefilled syringes

Flapping Homogenizer (Stomaker)

- Flapping Homogenizer is also called Sterile Homogenizer, can be use to abstract bacteria from solid samples. Put the original samples and the diluents into the sterile bag, then put the bag into the homogenizer, through the flapping of the paddles, the material in the bag can rapidly reach a homogenized state by the pressure, shaking and vibration.
- To guarantee the uniformity of the effective extraction of the microorganism inside and on the surface of the solid sample, make sure to include all the material in the sterile bag. The homogenized sample then can be used for the following analysis, the sterile bag avoids the cross contamination.
- Using disposable sterile homogeneous bags to guarantee the sample safety and non-contamination, leakless process omits cleaning of the instrument. The advantage of the flapping homogenization is convenient, quick, mild, accurate and good repeatability. Samples will not be contaminated, damaged, heated, and no sterilization as well as no container is needed, thus no container cleaning process either.

Applications:

Food microbiological analysis

Homogenization of animal tissues, biological samples, and cosmetics

Homogenization of meats, fish, vegetables, and fruits

Medicines, clinics, molecules, detection of toxins and bacteria

Flapping Homogenizer Door Design: SS-Door With Observation Window Capacity Range: 50-400 mL Flapping Speed: Fixed to 8 times / Sec Exterior Size (LxWxH) (W x D x H, cm): 45 x 21 x 24 Interior Size(W x D x H, cm): 10 x 19 x 22	**LA1082-1NO**	**1no**	**On Request**

Oil-Free Piston Vacuum Pumps

HiVac series vacuum pump is a piston-powered, oil-free pump. With innovative electronic, mechanical technology and human design concept make, compact and light weight, clean and maintenance free, safe and comfortable.

Features

- **No air pollution, maintenance free**

HiVac series pumps are driven by Piston, without the need of lubricant, regular oil changes and maintenance; with no oil pollution.

- **Moisture trap with filter cartridge**

HiVac series pumps are equipped with filter cartridge in air inlet to filter particle and moisture to prolong the life of pump.

- **Vacuum regulator**

HiVac series pumps are equipped with vacuum regulator to adjust vacuum.

- **Thermal protection device**

Every motor opumps has a built-in thermal protection device to shut off the pump automatically when overheated and then resume working when the temperature cools down.

Francis Harry Compton Crick

British molecular biologist, biophysicist, and neuroscientist Francis Crick. Discovered the structure of DNA 100 years ago.

INTRO

Francis Harry Compton Crick, a British biophysicist, achieved renown primarily for his collaboration with colleague James Watson in uncovering the structure of DNA, the molecule that serves as the blueprint of life. Building upon the work of other notable scientists such as Erwin Chargaff, Maurice Wilkins, and Rosalind Franklin, Crick and Watson's breakthrough discovery catalyzed the development of powerful scientific techniques, including genetic engineering and gene sequencing. These advancements have paved the way for multi-billion-dollar technologies utilized by scientists worldwide today.

In recognition of their groundbreaking achievement, Francis Crick, James Watson, and Maurice Wilkins were jointly awarded the Nobel Prize in Physiology or Medicine in 1962. Their determination of the molecular structure of deoxyribonucleic acid (DNA) fundamentally reshaped the field of genetics, earning acclaim as one of the most significant discoveries in 20th-century biology.

Francis Crick came into the world on June 8th, 1916, in Northampton, England, as the eldest child of Harry Crick and Annie Elizabeth Wilkins. He had a younger brother, A. F. Crick, who pursued a career in medicine in New Zealand.

Crick received his education at Northampton Grammar School and later at Mill Hill School in London. His academic journey continued as he pursued a degree in physics at University College, London, where he earned a B.Sc. in 1937. Following this, he commenced research for a Ph.D. under the supervision of Prof E. N. da C. Andrade. However, his academic pursuits were interrupted by the outbreak of World War II in 1939.

During the war, Crick diverted his focus to work as a physicist, contributing to the development of magnetic mines for naval warfare. After the war, he shifted his attention to biology and joined the Strangeways Research Laboratory at the University of Cambridge in 1947. Driven by a fascination with pioneering efforts to determine the three-dimensional structures of large molecules within living organisms, he transferred to the university's Medical Research Council Unit in 1949. Crick remained a member of this unit, initially housed in the Cavendish Laboratory in Cambridge, which later relocated to t

In 1950, Crick embarked on a second stint as a research student, gaining acceptance as a member of Caius College, Cambridge. He completed his Ph.D. in 1954, with a thesis titled "X-ray diffraction: polypeptides and proteins."

In 1951, upon the arrival of American biologist James Watson at the laboratory, it was well-established that nucleic acids, particularly DNA, played a pivotal role in determining the hereditary structure and function of cells. Watson persuaded Crick that understanding the three-dimensional structure of DNA would elucidate its role in heredity. Leveraging the X-ray diffraction studies conducted by Wilkins and the X-ray diffraction images generated by Rosalind Franklin, Watson, and Crick developed a molecular model that aligned with the known physical and chemical characteristics of DNA.

Their model depicted two intertwined helical strands composed of sugar-phosphate, interconnected horizontally by flat organic bases. Watson and Crick proposed that upon separation, each strand would act as a template for the synthesis of a new identical sister strand from small molecules within the cell, elucidating the replication of genes and chromosomes during cell division. Additionally, their model suggested that the sequence of bases along the DNA molecule constituted

a code interpreted by cellular mechanisms, ultimately translating it into the specific proteins responsible for a cell's unique structure and function.

In collaboration with S. Brenner, Crick directed his focus towards biochemistry and genetics, exploring concepts such as protein synthesis (the "adaptor hypothesis") and the genetic code, while also delving into research on acridine-type mutants.

Crick was elected a Fellow of the Royal Society (F.R.S.) in 1959. By 1961, he had amassed evidence demonstrating that each triplet of bases (codon) on a single DNA strand corresponded to the position of a specific amino acid on the protein molecule's backbone. He contributed to determining the codons responsible for coding each of the 20 amino acids typically found in proteins, shedding light on how the cell translates the DNA "message" into protein synthesis. In recognition of his contributions, he received the Prix Charles Leopold Meyer from the French Academy of Sciences in 1961, as well as the Award of Merit from the Gairdner Foundation in 1962.

Together with J.D. Watson, Crick was honored as the Warren Triennial Prize Lecturer in 1959 and received a Research Corporation Award in 1962. He, along with J.D. Watson and M.H.F. Wilkins, was bestowed with a Lasker Foundation Award in 1960. In 1962, he was elected a Foreign Honorary Member of the American Academy of Arts and Sciences and became a Fellow of University College, London. Additionally, he served as a Fellow of Churchill College, Cambridge, from 1960 to 1961 and currently holds a non-resident fellowship at the Salk Institute for Biological Studies in San Diego, California.

In 1966, Crick shifted his focus to the triplet codon. Collaborating with Sydney Brenner, they elucidated that each amino acid in a protein corresponds to three bases in the genetic code. Crick introduced the wobble hypothesis, suggesting that while the first two bases in a triplet were consistently paired during tRNA's binding with mRNA, the third base was subject to more relaxed pairing—a phenomenon termed 'wobble'—in the translation of the genetic code into proteins.

With over thirty years of experience in molecular biology and authorship of some 87 papers, Crick held the distinguished position of professor at the Salk Institute for Biological Studies in San Diego, California, from 1977 until his passing. Here, he delved into research on the neurological underpinnings of consciousness.

Crick's literary contributions include "Of Molecules and Men" (1966), which explores the ramifications of the molecular biology revolution, and "What Mad Pursuit: A Personal View of Scientific Discovery" (1988). In recognition of his achievements, Crick was honored with the Order of Merit in 1991.

In 1940 Crick married Ruth Doreen Dodd. Their son, Michael F. C. Crick is a scientist. They were divorced in 1947. In 1949 Crick married Odile Speed. They have two daughters, Gabrielle A. Crick, and Jacqueline M. T. Crick. The family lives in a house appropriately called «The Golden Helix», in which Crick likes to find recreation in conversation with his friends. He died July 28, 2004, San Diego, California, U.S.

OUR QUALITY POLICY

- We at HiMedia, are firmly committed to design, develop and manufacture products like Dehydrated Culture Media, Ready Prepared Media, Culture Media Bases, Antimicrobial Susceptibility Discs, Bacteriological Differentiation Aids, Products used in Animal Cell Culture, Plant Tissue Culture, Molecular Biology, Diagnostic reagents & Kits, Diagnostic instruments, Medical devices and Marketing of Laboratory Chemicals that meet requirements of customers, interested parties, legal, Statutory and Regulatory requirements and enhance their satisfaction through effective implementation & improvement of Quality Management System including QMS & QMS for medical devices, providing worldwide technical service.

- We strive to achieve this through up-gradation of technical knowledge of all employees, their involvement & setting up quality objectives.

OUR QUALITY OBJECTIVE

- Continually assess and enhance customer satisfaction by constant interaction with the customers to achieve a minimum customer satisfaction index of 85%.

- Make constant efforts for innovation through Research and Development activity for increasing the range of HiMedia products by developing 20 new products and up-gradation of products every year.

- To develop culture of commitment to quality by up-gradation of skills and improvement in work methods to restrict the rejection level below 0.4%.

MEETING YOUR NEEDS

In this section of our comprehensive Price List, we offer a competitive range of common as well as specialty chemicals to match your specific needs.

As a global brand with network reach spanning over 150 countries, HiMedia has always been committed to serving our patrons. It gives us great gratification that we have been able to match our products and services to your specific research, industrial, or educational needs.

Lab Supermart

pp : i42-i44

HiMedia is delighted to serve your comprehensive needs with over 7000 chemicals, comprising Hi-AR™/ ACS, Hi- AR™, Hi-Cert™ & Hi-LR™ grades of Inorganic chemicals, Organic reagents & their intermediates, Indicators / Dyes / Stains, Vitamins, Antibiotics, Sugars, Acids & Solvents, Chemicals and other Biochemicals, for Molecular Biology, Tissue Culture (Animal Cell Culture and Plant Tissue Culture), Amino acids and their derivatives.

This method of classification avoids repetition of chemical identification in every entry of the same chemical.

Lab Chemist's Basket

In this extravagant basket, we offer you Hi-AR™/ACS, Hi-AR™ and Hi-LR™ grades of Inorganic chemicals (along with HPLC) as well as solvents required for laboratory chemists and other customers. The size of this basket is ever growing to accomplish the requirements of scientists and chemists working in industries as well as research institutes.

Acetamide C_2H_5NO MW : 59.07 CAS : 60-35-5 Store below 30°C		
Acetamide, Hi-AR™ Assay : ≥99%	**GRM1780-100G** **GRM1780-500G**	**100gm** **500gm**
Acetamide For synthesis Assay : ≥98%	**GRM1096-500G**	**500gm**

Specialty Chemicals

A wide range of specialty chemicals mentioned in the price list covers chemicals for specialized applications which include Animal Cell & Tissue Culture (ACC & ATC), Plant Tissue Culture (PTC), Molecular Biology (MB), AgroChemicals (PGE) and certain specialized chemicals such as RM and CMS.

Solvents & Reagents

Acetonitrile (HPLC grade), Methanol (HPLC grade), Karl Fischer reagent, and other solvents have always been in high demand by various industries as well as research institutes. Our specialty chemicals being at par with the international standards, with our prompt customer service, have created a special respect for these amongst our patrons. We indeed value your support, praise, and feedback about our products & services.

Cell Culture Tested Chemicals

pp : 499-526

We are the only Indian company to offer all Cell Culture grade tested chemicals that are fully validated at our in-house facility in Mumbai. These consist of Amino Acids, Antibiotics, Growth Factors, Biological Buffers, BioChemicals, Cell Dissociation and Cryopreservation Agents. They can easily find these products in the price list by using special codes like 'TC' (Animal Cell Culture) and 'PCT' (Plant Tissue Culture) Chemicals.

HiMedia has always had a quality commitment to all users. All our chemicals are of multicompendial biopharmaceutical grade. They comply with guidelines of multiple pharmacopoeia-JP,BP, IP, USP, and EP in order to follow complex regulatory protocols and criteria. Every lot released by us is provided with a Certificate of Analysis (COA) that defines the product's specifications.

Quality chemicals delivered at your doorstep under this label

Molecular Biology Chemicals

pp : 689-712

HiMedia provides a broad range of Ultrapure, high quality Molecular Biology (MB) grade chemicals which can be used for all fundamental experimental methods in the field of Molecular Biology. For such research experiments, highest quality chemicals are a prerequisite to ensure exact and reproducible results as traces of chemical impurities can interfere in the results or during the analyses.

MB grade chemicals are evaluated for the following aspects: physical parameters, chemical parameters, testing for the presence of a degrading enzyme against substrate/product (DNase, RNase, Protease). These chemicals also undergo specific functionality tests as follows:

1. Nucleic Acids- Extraction and Electrophoresis.
2. Proteins- Extraction, Purification & Electrophoresis
3. Chromatography
4. Dyes and Stains- Staining Properties
5. Solvent tests
6. Antibiotic sensitivity tests

HiMedia AgroSciences

Increasing demands from the Indian agricultural sector for quality products encouraged HiMedia to increase its agrosciences product range comprising specially formulated plant growth regulators (PGRs), PGR powders, with pure & water-soluble chemicals.

HiMedia AgroDiagnostics

A separate specialty chemicals section on agro diagnostics segregates chemicals meant for that specific purpose. This includes comprehensive soil Testing kits, numerous water testing kits, field testing kits (milk testing kits and mastitis testing kits), and training schemes for building agrotesting laboratories.

BioChemicals

Providing high quality HiMedia BioChemicals have been our forte for the past quarter of century for enabling biological and biochemical experiments. These include a wide range of Enzymes, Coenzymes, Amino Acids, Carbohydrates, Fatty Acids, Steroids, and Group Specific Reagents, etc.

Contd...

Stains & Indicators

These include the most commonly used stains and indicators of practical grade and Hi-Cert™ grade in powdered form for diagnostic applications.

Water Testing Kits

pp : 1158-1165

Various types of Water Testing Kits to assess multiple chemical parameters, as well as a large variety of Microbial Testing Kits are available. These kits are suited to match practically every need that may arise with respect to testing purity and safety of potable or filtered water.

BioChemical Kits

Frequently required amino acids and carbohydrates for biochemistry, microbiology, and molecular biology applications are offered in assorted kits such as Amino Acid Kit and Carbohydrate Kit.

Universal Indicator Papers & Filter Papers

pp : 1170-1176

Different types of quantitative filter papers (in various grades), especially analytical filter papers and student grade filter papers are a part of this section. It includes all standard universal indicator papers in various convenient denominations.

Bulk Packs for Manufacturing

pp : 1166-1167

Bulk packs of laboratory grade chemicals are available for manufacturers in drums of 25kg, 50kg and 100kg as per your specific requirements.

Laboratory Aids

pp : 859-918

Laboratory Aids in the form of Lab Consumables and Instrumentation are important segments of our price list. This section includes miscellaneous items: Culture Vessels and Accessories, Environmental Monitoring Aids and Inoculation Aids, Sampling Aids, Sterilization Indicators, Autoclave Accessories and Culture Aids, Counting and Sampling Aids, Identification Aids, Gram Staining and Acid-Fast Staining Aids, Pipettes and Tips, Products for Cryopreservation, etc. Various reusable/ disposable Petri Plates are also included among various lab consumables in this section.

Professional Care Products

pp : 1179-1198

Besides maintaining personal hygiene, these products reduce bioburden at various critical places or surfaces: hospitals, production facilities, operation theatres, laboratories, medical equipment, etc. Based on your needs, we have several categories of these disinfectants classified according to their composition and target applications. This section contains Hand Disinfectants, Floor Sanitizers, Environmental Sanitizers, Biowizard odour controlling products etc.

Instrumentation Products

pp : 921-960

Scientists employ a variety of instruments to measure, analyze, cultivate, sterilize, and arrive at conclusive results. To cater to such needs, we provide a wide range of instruments for Microbiology, Molecular Biology, Animal Cell Culture, Plant Tissue Culture, Air Purification, Sterility testing, Identification Aids and so on. Laboratory and field-testing instruments are one of our prime supplies for the laboratory chemist. Our Instrumentation Division is charged with development, manufacturing and servicing of all these sophisticated instruments.

Matching Your Needs

Your expanding research needs are our prime concern, as we are committed to serving you as per them. We shall be glad to receive your feedback. This would enable us to serve you better in the future.

Validation

Users intending to use any of our products listed in our published list for any specific purpose beyond the claim made in our COA / TD / Manual, such intent if not timely shared, would obviate our liability in the matter. With such intent, it is advisable to validate the product and the test procedure in your own laboratory. HiMedia is your reliable partner to help in the process with relevance of the product used in testing validation.

Bovine Immuno-gamma globulin (see : Globulin immuno-gamma, bovine) Purified, gamma globulin preparations are isolated from pooled normal serum by fractionation and ion-exchange or gel filtration chromatography. Gamma globulin preparations are provided as lyophilized powders. Purity levels are 67% gamma globulin as analyzed by SDS-PAGE. These preparations are especially useful as a co-precipitant in RIA methods employing polyethylene glycol or ammonium sulfate precipitation steps. WT007A-1NO **WT007-1NO**	**AQUACheck Nitrite Testing Kit** Kit contains 3 reagent bottles and 1 test jar	Drop titration	5 - 100 mg/L, 50 - 1000 mg/L as $NaNO_2$	**100 Tests** **250 Tests**	**940** **1435**
WT007B-1NO **WT007C-1NO**	**AQUACheck Nitrite Testing Kit** Kit contains 4 reagent bottles, 1 test jar with spoon and colour chart	Colour Comparator	0.0 - 0.8 mg/L as $NaNO_2$	**100 Tests** **300 Tests**	**1435** **3335**
Orthophosphate Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT008A-1NO	**AQUACheck Orthophosphate Testing Kit (High level)** Kit contains 3 reagent bottles, 1 test jar with spoon and colour chart	Comparator	0 - 40 mg/L as PO_4	**100 Tests**	**1180**
WT008B-1NO	**AQUACheck Orthophosphate Testing Kit (Low level)** Kit contains 3 reagent bottles, 1 test jar with spoon and colour chart	Comparator	0.5 - 10 mg/L as PO_4	**100 Tests**	**1180**
Silica Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT009-1NO	**AQUACheck Silica Testing Kit** Kit contains 3 reagent bottles, 1 test jar with spoon and colour chart	Colour Comparator	0 - 80 mg/L as SiO_2	**100 Tests**	**1290**
Iron Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT010-1NO	**AQUACheck Iron Testing Kit** Kit contains 2 powder reagent bottles, 1 test jar with spoon and colour chart	Colour Comparator	0.3 - 2.0 mg/L as Iron (Fe)	**100 Tests**	**1290**
Hydrazine Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT011-1NO	**AQUACheck Hydrazine Testing Kit** Kit contains 1 powder reagent bottle, 1 test jar with spoon and colour chart	Colour Comparator	0.1 - 0.75 mg/L as Hydrazine	**100 Tests**	**1290**
Fluoride Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT012-1NO	**AQUACheck Fluoride Testing Kit** Kit contains 2 Reagent Bottles, 1 Test jar & colour comparator chart	Colour Comparator	0.0 - 2.5 mg/L (ppm) as Fluoride (F)	**100 Tests**	**1290**

Nitrate Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT013-1NO	**AQUACheck Nitrate Testing Kit** Kit contains 3 Reagent Bottles, 1 Test jar with spoon & colour chart	Colour Comparator	0.0 - 100 mg/L (ppm) as Nitrate (NO_3 - N)	**100 Tests**	**1290**
Arsenic Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT025-1NO	**Arsenic Test Kit** Kit contains 2 Reagent bottles with 2 spoon, 1 Reaction vessel, Container with 50 test strips & colour chart	Colour Comparator	0.05 - 3.0 mg/L (ppm) as Arsenic (As)	**50 Tests**	**1290**
TDS Meter					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT018-1NO	**AQUACheck TDS meter for Water testing Kit** Kit contains TDS meter	Visual	0 - 9990mg/L (ppm)	**1 no**	**4835**

Multi Parameter Water Testing Kits			
Code	**Product**	**No. of Tests**	**Price in**
WT015-1NO	**AQUACheck Multi Parameter Water Testing Kit and 2 standard Turbidity vials** Kit contains 16 Reagent bottles, 1 Test jars with spoon, 2 Empty vials, 2 Turbidity measuring tubes, pH strips, Comparator charts for Iron, Chlorine, Fluoride & Nitrate Tests.	**100 Tests**	**8245**
WT023-1NO	**Octo Aqua Test Kit (Water Testing Kit for 8 Test parameters)** Kit contains 19 Reagent bottles, 1 Test jar with spoon, 4 standard turbidity vials & 1 sample vial, pH strips, colour chart for Fluoride, Iron and Nitrate Tests.	**100 Tests**	**6810**

Test & Range	Type	Test & Range	Type
1) pH test : pH test strips of range 2.0 - 10.5	Visual	5) Fluoride : 0.0 - 2.5 mg/L (ppm) as F	Comparator
2) Turbidity : standards of 0, 5, 10 & 25 NTU	Visual	6) Iron : 0.0 - 2.0 mg/L (ppm) as Fe	Comparator
3) Chloride : 10 - 200 mg/L (ppm) and 50-1000mg/L (ppm) as Cl	Drop titration	7) Nitrate : 0.0 - 100 mg/L (ppm) as Nitrate (NO_3-N)	Comparator
4) Total hardness : 25 - 600 mg/L (ppm) as $CaCO_3$	Drop titration	8) Residual (Free) chlorine : 0.0 - 3.0 mg/L (ppm)	Drop titration

Code	Product	No. of Tests	Price in
WT068-1NO	**Boiler Water Testing Kit (9 Test Parameters)** Kit contains 16 reagent bottles, 2 test jars with Spoon, pH Strips, TDS Meter, colour chart for Orthophosphate, Silica and Hydrazine	**100 Tests**	**5215**

Test & Range	Type	Test & Range	Type
1) pH test : pH test strips of range 2.0 - 10.5	Visual	6) Orthophosphate : 0.5 - 10.0 mg/L (ppm) as PO_4	Comparator
2) Total Hardness : 5-100 mg/L (ppm) as $CaCo_3$	Drop Titration	7) Silica : 0.0 - 80.0 mg/L (ppm) as SiO_2	Comparator
3) Caustic Alkalinity : 10-200 mg/L (ppm) as $CaCO_3$	Drop titration	8) Hydrazine : 0.1 - 0.75 mg/L (ppm) as Hydrazine	Comparator
4) Total Alkalinity : 10-200 mg/L (ppm) as $CaCO_3$	Drop Titration	9) Total Dissolved Solid : 0.0 - 9990 mg/L (ppm) as TDS	Visual
5) Chloride : 10-200 mg/L (ppm) as Cl	Drop titration

WT075-1NO	**Swimming Pool Water Testing Kit (3 Test Parameters)** Kit contains 2 reagent bottles, 1 test jar, pH Strips, colour chart for Cyanuric Acid and Free Chlorine Tests	100 Tests	1300

Test & Range	Type	Test & Range	Type
1) pH test : pH test strips of range 2.0 - 10.5	Visual	3) Free Chlorine : 0.0 - 2.0 mg/L (ppm) as Chlorine	Comparator
2) Cyanuric Acid : 0-100 mg/L (ppm) as CYA	Comparator		

Code	Product	No. of Tests	Price in
WT082-1NO	**RO (Reverse Osmosis) Plant Water Testing Kit (8 Test Parameters)** New Kit contains 23 reagent bottles, 2 test jars with Spoon, pH Strips, colour chart for Silica, Sulphate, Iron, Nitrate and Nitrite	100 Tests	4850

Test & Range	Type	Test & Range	Type
1) pH test : pH test strips of range 2.0 - 10.5	Visual	5) Sulphate : 0.0-800 mg/L (ppm) as SO_4	Comparator
2) Total Hardness : 2-40 mg/L (ppm) as $CaCo_3$	Drop Titration	6) Iron : 0.0-2.0 mg/L (ppm) as Fe	Comparator
3) Calcium Hardness : 5-100 mg/L (ppm) as $CaCO_3$	Drop titration	7) Nitrate : 0.0 - 50.0 mg/L (ppm) as NO_3-N	Comparator
4) Silica : 0.0-80.0 mg/L (ppm) as SiO_2	Comparator	8)Nitrite : 0.0-0.8 mg/L (ppm) as $NaNO_2$	Comparator

Code	Product	No. of Tests	Price in
WT083-1NO	**Salt Water Testing Kit (4 Test Parameters)** New Kit contains 9 reagent bottles, 2 test jars with Spoon, pH Strips, colour chart for Ammonia, Nitrate and Nitrite	100 Tests	3700

Test & Range	Type	Test & Range	Type
1) pH test : pH test strips of range 6.5 - 9.0	Visual	3) Nitrate : 0.0 - 150.0 mg/L (ppm) as NO_3-N	Comparator
2) Ammonia : 0.0-8.0 mg/L (ppm) as NH_3	Comparator	4) Nitrite : 0.0-5.0 mg/L (ppm) as $NaNO_2$	Comparator

Dissolved Oxygen Test					
WT028A-1NO WT028-1NO	**AQUACheck Dissolved Oxygen Testing Kit** (Kit contains 5 reagent bottles, 1 reaction vial and 1 test jar)	Drop Titration	0 -10 mg/L as Oxygen (O)	100 Tests 250 Tests	1335 2415
Carbon Dioxide Test					
WT040-1NO	**AQUACheck Carbon Dioxide Testing Kit** Kit contains 4 reagent bottles and 1 test jar	Drop Titration	2.0 - 40.0 mg/L 10 - 200 mg/L as CO_2	300 Tests	860

Code	Product	Type	Range	No. of Tests	Price in ₹
Hydrogen Sulphide Test					
WT041A-1NO **WT041-1NO**	**AQUACheck Hydrogen Sulphide Testing Kit** Kit contains 4 reagent bottles, 1 reaction vial and colour chart	Colour Comparator	0.5 - 5.0 mg/L as H_2S	**100 Tests** **300 Tests**	**645** **1180**
Ammonia Test					
WT042A-1NO **WT042-1NO**	**AQUACheck Ammonia Testing Kit** Kit contains 2 reagent bottles, 1 test jar and colour chart	Colour Comparator	0.1 - 2.0 mg/L as NH_3	**100 Tests** **300 Tests**	**3025** **7535**
Sulphate Test					
WT043A-1NO **WT043-1NO**	**AQUACheck Sulphate Testing Kit** Kit contains 3 reagent bottles, 1 test jar with spoon and colour chart	Colour Comparator	0 - 800 mg/L as SO_4	**100 Tests** **300 Tests**	**700** **1090**
Zinc Test					
WT044-1NO	**AQUACheck Zinc Test Kit** Kit contains 5 reagent bottles, 1 test jar with spoon and colour chart	Colour Comparator	0 - 25 mg/L as Zinc (Zn)	**100 Tests**	**2685**
Manganese Test					
WT045A-1NO **WT045-1NO**	**AQUACheck Manganese Test Kit** Kit contains 3 reagent bottles, 1 test jar and colour chart	Colour Comparator	0 - 1.0 mg/L as Manganese (Mn)	**100 Tests** **300 Tests**	**570** **1090**
Copper Test					
WT046A-1NO **WT046-1NO**	**AQUACheck Copper Testing Kit** Kit contains 2 reagent bottles, 1 test jar and colour chart	Colour Comparator	0 - 2.0 mg/L as Copper (Cu)	**100 Tests** **300 Tests**	**570** **1090**
Chromium Test					
WT050-1NO **WT050A-1NO**	**AQUACheck Chromium Testing Kit** Kit contain 2 reagent bottles, 1 test jar and colour chart	Colour comparator	0.0 - 1.0 mg/L Chromium as (Cr)	**300 Tests** **100 Tests**	**500** **415**
Aluminium Test					
WT051-1NO	**AQUACheck Aluminium Testing Kit** Kit contain 5 reagent bottles, 1 test jar with 1 spoon and colour chart	Colour comparator	0.0 - 1.0 mg/L Aluminium as (AL)	**100 Tests**	**1030**

Hydrogen peroxide Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT056-1NO **WT056A-1NO**	**AQUACheck Hydrogen peroxide Testing Kit** Kit contain 4 reagent bottles, 1 test jar and colour chart	Colour comparator	0.0 - 1.0 mg/L Hydrogen Peroxide as (H_2O_2)	**300 Tests** **100 Tests**	**1925** **810**
Bromine (Br_2) Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT057-1NO **WT057A-1NO**	**AQUACheck Bromine (Br_2) Testing Kit** Kit contain 4 reagent bottles, 1 test jar and colour chart	Colour comparator	0.0 - 1.0 mg/L Bromine as (Br_2)	**300 Tests** **100 Tests**	**1010** **540**
Bromide (Br) Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT058-1NO **WT058A-1NO**	**AQUACheck Bromide (Br) Testing Kit** Kit contain 5 reagent bottles, 1 test jar and colour chart	Colour comparator	0.0 - 1.0 mg/L Bromide as (Br)	**300 Tests** **100 Tests**	**1425** **690**
Organic Phosphate Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT059-1NO	**AQUACheck Organic Phosphate Testing Kit** Kit contain 8 reagent bottles, 1 test jar with 1 spoon, 1 conical Flask and colour chart	Colour comparator	0.0 - 5.0 mg/L Organic Phosphate as (OP)	**100 Tests**	**2880**
Nickel Test					
Code	**Product**	**Type**	**Range**	**No. of Tests**	**Price in ₹**
WT060-1NO **WT060A-1NO**	**AQUACheck Nickel Testing Kit** Kit contain 3 reagent bottles, 1 test jar and colour chart	Colour comparator	0.0 - 1.0 mg/L Nickel as (Ni)	**300 Tests** **100 Tests**	**1165** **665**

Code	Product	Type	Range	No. of Tests	Price in ₹
Boron Test					
WT063-1NO	**AQUACheck Boron Testing Kit** Kit contain 4 reagent bottles, 1 test jar with 1 Spoon and colour chart	Colour comparator	0.0 - 5.0 mg/L Boron as (B)	100 Tests	4130
Molybdenum Test					
WT066A-1NO WT066-1NO	**AQUACheck Molybdenum Testing Kit** Kit contains 3 reagent bottles, 1 test jar and colour chart	Colour comparator	0.0 - 1.0 mg/L Molybdenum as (Mo)	100 Tests 300 Tests	575 780
Phenol Test					
WT067-1NO	**AQUACheck Phenol Testing Kit** Kit contains 4 reagent bottles, 1 test jar with Spoon and colour chart	Colour comparator	0.0 - 2.0 mg/L Phenol as (C_6H_5OH)	100 Tests	1250
Cadmium Test					
WT070-1NO	**AQUACheck Cadmium Testing Kit** Kit contains 4 reagent bottles, 1 test jar and colour chart	Colour comparator	0.0 - 1.0 mg/L Cadmium as (Cd)	100 Tests	765
Selenium Test					
WT071-1NO	**AQUACheck Selenium Testing Kit** Kit contains 4 reagent bottles, 1 test jar and colour chart	Colour comparator	0.0 - 2.0 mg/L Selenium as (Se)	100 Tests	1380
Tannin Test					
WT072-1NO	**AQUACheck Tannin Testing Kit** Kit contains 2 reagent bottles, 1 test jar and colour chart	Colour comparator	0.0 - 10.0 mg/L Tannin as (Tannic Acid)	100 Tests	1070
Free Chelant Test					
WT073-1NO	**Free Chelant Testing Kit** Kit contains 4 reagent bottles and 1 test jar	Drop Titration	2 - 40 mg/L & 10 -200 mg/L Free Chelant as (EDTA)	100 Tests	595
Total Chelant Test					
WT074-1NO	**Total Chelant Testing Kit** Kit contains 4 reagent bottles and 1 test jar with Spoon	Drop Titration	2 - 40 mg/L & 10-200 mg/L Total Chelant as (EDTA)	100 Tests	685

Filter Paper

Qualitative Filter Papers

Standard Grades (Non-Wet-Strengthened)

Standard qualitative filter papers are suitable for quadrant folded or gravity flow applications. These grades contain a high level of alpha-cellulose that provides high purity but weakens when wet. The inherent strength of standard (untreated) grades does not pose a problem when they are used in routine quadrant folded applications. We do not recommend these grades for use in vacuum work or when wet handling is required.

601 equivalent to Grade 1

HiMedia 601:11µm - Medium speed

This grade covers a wide range of laboratory applications and is used for clarifying liquids and for rapid filtration of coarser precipitates such as lead sulfate, lead chromate, calcium oxalate, calcium carbonate, aluminium phosphate, barium carbonate and beryllium hydroxide. HiMedia 601 can be used in soil analysis, seed testing and in air pollution to collect dust-laden air. It is also commonly used in the food industry to separate foodstuffs from associated liquid or extracting liquid.

642 equivalent to Grade 2

HiMedia 642 : 2µm - Medium Speed

The grade has finer particle retention than HiMedia 601 but with slightly lower filtration speed. HiMedia 642 also has higher absorption than HiMedia 601. It is used in general laboratory application to retain particles above 2µm in size. HiMedia 642 can be used in agricultural and environmental laboratories for plant growth trials, soil testing, air analysis for monitoring specific contaminants and in the filtration of organic and sulfide precipitates.

237 equivalent to Grade 3

HiMedia 237 : 3µm - Medium speed

This high absorbency grade is twice as thick as grade 642 with similar particle retention. The superior absorbency offers excellent performance when used as a sample carrier. The extra thickness gives higher wet strength and loading capacity, enabling more precipitate to be held without clogging the filter. HiMedia 237 is also highly suitable for use in Buchner funnels and for dye filtration.

631 equivalent to Grade 4

HiMedia 631 : 10 µm - Medium Speed

This grade is used for the filtration of coarse particles and gelatinous precipitates such as ferric aluminium and magnesium hydroxides. HiMedia 631 is used in air monitoring and gas filtration when high flow rate is needed. This grade is also found in routine cleanup analysis of insoluble liquids such as biological fluids and organic elements.

610 equivalent to Grade 5

HiMedia 610 : 1.5 µm - Slow Speed

This grade is a slow flowing filter designed to retain fine particles encountered in qualitative analysis. HiMedia 610 is widely used for water analysis, biological products and fine precipitates such as cold-precipitated barium sulfate. HiMedia 610 is also used in Buchner funnels and to clarify cloudy suspensions.

Wet-Strengthened Grades

Qualitative wet-strengthened grades are manufactured for applications using filter paper in a system or apparatus that operates under pressure or vacuum conditions. These systems require the use of extremely strong filter paper such as those in HiMedia's Binder Series. These grades contain a small amount of chemically stable, insoluble binding resin that strengthens the natural fiber-to-fiber bonds under wet conditions. Grades containing wood fibers or resins containing nitrogen, are not recommended for use in quantitative ashing techniques and in kjeldahl estimations. HiMedia's qualitative wet-strengthened filter papers are also used in industrial laboratories where techniques require a strong and economical filter paper with consistent quality and performance.

950 equivalent to Grade 6

HiMedia 950 : 2.0 µm - Slow Speed

This slow flow rate grade with very good retention is used in the filtration of fine precipitates and super phosphates. HiMedia 950 is also recommended for boiler water analysis applications and gas filtration.

Typical Grade Properties

Quantitative Filter Paper

Ashless Filters (Ashless Grades) (Ash 0.007%)

These standard ashless grades are high purity filter papers suitable for routine quantitative gravimetric techniques and in the preparation of samples for use in analysis involving instrumental techniques.

54 equivalent to Grade 41

HiMedia 54 : 10 µm - Fast Speed

This is a fast filtering grade for rapid filtration of coarse particles and gelatinous precipitates such as iron, zirconium and aluminium hydroxides, and cobalt sulfide. HiMedia 54 is also used in air pollution testing to determine gaseous compounds. It is recommended for fast analysis procedures for unstable precipitates such as silicon, which requires speedy filtration

74 equivalent to Grade 40

HiMedia 74 : 2.0 µm - Medium Speed

This grade has medium flow rate and good particle retention and is the most commonly used acid-washed filter. HiMedia 74 covers a wide range of general ashless filtration applications. It is used for gravimetric analysis of numerous components (e.g. cements, copper, clay, bismuth, silicon, iron) found in heavy industries such as construction, mining or steel. HiMedia 74 is also used as a high purity filter for speedy filtering of trace elements such as silver chromate, lead sulfate, zinc and ammonium hydroxides. HiMedia 74 is also found in general soil analysis for separating solid from aqueous extracts.

Hardened Filters (Hardened Ashless Grades) (Ash 0.006%)

These specially treated hardened ashless grades are available for critical quantitative analytical techniques requiring increased wet-strength and handling capacity. These high purity filter papers have a tough, smooth surface free of loose fibers and are ideal for collecting wet precipitates. Each grade offers a convenient combination of particle retention and flow rate and are generally used because of their high chemical resistance to strong acid and alkali.

95 equivalent to Grade 50 and 542

HiMedia 95 : 1.5 µm - Slow Speed

This is an extremely fine retention filter for critical gravimetric analysis and metal determination of very fine particles such as barium and lead sulfates, stannic and nickel sulfide, calcium oxalate and calcium fluoride.

Glass Microfiber Filters

Standard Glass Microfiber Filters

Standard glass microfiber filters contain no binders or other additives that may cause interference to sensitive enzymatic or other chemical reactions. The unique characteristics of glass microfiber filters make its use particularly advantageous to laboratory filtration by enabling fast filtration of large volumes and difficult solutions without premature clogging

111 equivalent to Grade GF/A

HiMedia 111 : 1.2 µm - Fast Speed

This grade offers fine particle retention with high filtration speed and good loading capacity. HiMedia 111 is used in general laboratory filtration including atmospheric and water pollution monitoring such as intake controls, ozone-level, and water effluents. Grade 111 is also well suited for filtration of water and protein, testing of algae, bacterial cultures and for radioimmunoassay with weak beta emitters. HiMedia 111 is also recommended for filtering solvents in a high-resolution laboratory.

161 equivalent to Grade 934-AH				
HiMedia 161 : 1.1 µm - Medium Speed				
This popular grade offers finer particle retention and higher flow rate than traditional analytical filter papers. HiMedia 161 is used in general laboratory applications, cell harvesting, liquid scintillation counting and in the monitoring of air and water pollution. HiMedia 161 is generally recommended for water pollution monitoring techniques for total suspended solids				
Typical Grade Properties				
Standard grade - 161, Retention in 1.1 µm, Filtration speed rapidity - 100 ml / min and Loading capacity - Very high

151 equivalent to Grade GF/F				
HiMedia 151 : 0.7 µm - Slow Speed				
This high performance grade is designed to retain extremely fine particles down to 0.7 µm. HiMedia 151 has retention comparable to membrane filters while providing higher flow and loading capacity. HiMedia 151 is recommended for filtering fine precipitated proteins, filtration of nucleic acids and difficult biochemical solutions. HiMedia 151 is used in combination with HiMedia 141 as a highly efficient protective and retentive pre-filter to extend the loading capacity of membrane filters. Grade 151 is recommended for use in TCLP testing as described in test methods for evaluating solid wastes, EPA method 1311.				
Typical Grade Properties

Chromatography, Electrophoresis and Blotting Paper

HiMedia Thin Papers				
Thin papers are 100% pure cotton grades that are used in chromatography techniques where solute loading is not heavy. HiMedia thin papers series are ideal for general separations and for use as spacers in gel transfer techniques.				
601 equivalent to Grade 1 CHR				
HiMedia 601 : 0.18 mm - 125 mm / 30 min.				
This thin paper with medium flow rate is the world standard in paper chromatography. The smooth, uniform white surface provides good resolution. HiMedia 601 is also used as a gel drying support and as a spacer in capillary and electroblotting sandwiches.				
Typical Grade Properties				
Standard grade - 601, Thickness in mm - 0.18, Klemm 1/16th / min - 13 and Absorption speed - 125 mm / 30 min				
6018-4657-100S		46 x 57	100s	38730
642 equivalent to Grade 2 CHR, 20 CHR				
HiMedia 642 : 0.20 mm - 120 mm / 30 min				
This thin paper with a flow rate lower than HiMedia 601 offers higher resolution and is recommended for optical or radiometric scanning techniques.				
Typical Grade Properties				
Standard grade - 642, Thickness in mm - 0.20, Klemm 1/16th / min - 12 and Absorption speed - 120 mm / 30 min				
6428-4657-100S		46 x 57	100s	85165

237 equivalent to Grade 3 CHR				
HiMedia 237 : 0.41 mm - 150 mm / 30 min				
This medium thick paper is recommended for general applications with medium-heavy solute loading. Like HiMedia 238, this grade is ideal for use as wicks in protein or nucleic acid blotting to provide a uniform flow of buffer through the gel to the transfer membrane in a blotting sandwich. HiMedia 237 is also suited for electrophoresis and the separation of inorganic compounds and for use in removing gels from glass supports.				
Typical Grade Properties				
Standard grade - 237, Thickness in mm - 0.41, Klemm 1/16th / min - 18 and Absorption speed - 150 mm / 30 min				
2378-4657-100S		46 x 57	100s	84000
243 equivalent to Grade 17 CHR				
HiMedia 243 : 1.02 mm - 180 mm / 30 min.				
This is one of the thicker grades in the HiMedia thick paper series. HiMedia 243 offers both moderately high flow and absorption when solute loading is heavy.				
Typical Grade Properties				
Standard grade - 243, Thickness in mm - 1.02 Klemm 1/16th / min - 21 and Absorption speed - 180 mm / 30 min				
2438-4657-100S		46 x 57	100s	On request

Students Grade Filter Paper or General Laboratory Filtration Methods and Qualitative Analysis Papers

Standard Grades (Non Wet-Strengthened)

These filter papers are comparable to non wet-strengthened standard grade filter papers suitable for quadrant folded or gravity flow applications. These grades contain a high level of alpha-cellulose that provides high purity but will weaken when wet. The inherent strength of standard (untreated) grades does not pose a problem when they are used in routine quadrant folder applications. We do not recommend these grades for use in vacuum work or when wet handling is required.

HiMedia 613 : For Asphalt and Sugar testing

This is a strong filter paper with a medium flow rate and retention. HiMedia 613 is commonly used in student laboratories. This strong general purpose filter is also used in Buchner funnels for barium carbonate, lead chromate and beryllium hydroxides. It can also be used for Asphalt Testing and Sugar Testing.

Typical Grade Properties

HiMedia 615 : For General filtration use

This fast filtering grade is an intermediate grade between HiMedia 617 and HiMedia 631. HiMedia 615 has a rough surface and is used for filtering aluminium, ferric and magnesium hydroxides. It is also found in general construction filtration work and in the filtration of insoluble iron and ore.

Speciality Analytical Filter Papers For Different Application

Pleated (Fluted) Filter Paper

HiMedia offers a full range of standard pleated grades to meet your needs from grades with rapid flow rates for filtration of viscous materials to grades with tight matrices for removal of fine precipitates. HiMedia's pre-pleated grades can save valuable time and maximize the efficiency of the laboratory filter system. Pleating improves the effective surface area increasing flow rate and loading capacity thus decreasing filtration time. Pleated circles are available in 12.5 to 24 cm diameters.

Beer testing Filter Papers

HiMedia offers full range of laboratory filter papers for use in the beer industry.
HiMedia 642 is recommended for the WORT colour test. Product range is available under Standard Grade (Non Wet- Strengthened) section.
HiMedia 515 and 509 pleated filter grades are used in the SCABA analyzer and IBU test respectively.
HiMedia 111, a 100% glass microfiber filter is also used in the beer industry to remove each cell before analysis. Product range is available under Glass Microfiber filters section.

Professional Care Products

Amongst our wide range of products, Professional care products (disinfectants) play an important role in reducing Bioburden especially in critical areas such as operation theatres, hospitals, laboratories, medical equipments, production areas as well as in maintaining personal hygiene. Different disinfectants have different target ranges and not all disinfectants can kill all microorganisms. For this reason we have different categories of disinfectants based on their application & composition.

Hand Disinfectants

Triclogel Instant Hand Disinfectant Gel

Clear transparent gel,
with Ethyl alcohol (75%) and Triclosan (0.3%) as disinfectants with Vit. E and Aloe Vera as moisturizers and skin softners.
Disinfect hands instantly without using water, soap or towel.

Smart Care for the Hands that Care
Gel with Vitamin E & Aloe vera

1. Plate inoculated with hands that had handled a floor cleaning mop.

2. Plate inoculated with same hands after a 2 shots rub with Triclogel.

Antimicrobial activity : Kills pathogenic microorganisms like *Pseudomonas, E. coli, Staphylococci, Salmonella, Listeria, Dysentery bacilli, Tubercule bacilli* under conditions for disinfection as directed on the label.
