OUR COVER :

2024 is the 50th year of HiMedia!

What started as a Kitchen R&D for HiMedia has blossomed and reached Global heights!

A good idea never stops growing.

A pioneer in the development of Microbiology Media from 5 decades, HiMedia has also entered the fields of Cell Biology, Plant Tissue Culture, Molecular Biology, Genome Research, and Higronics innovating cost-effective products and proudly creating an ATMANIRBHAR BHARAT.

With over 15,000 products, 28,000 SKUs marketed in over 150 countries, 14 manufacturing locations, and 3 headquarters in India, Europe, and USA behind us and a lot more planned for the future, we at HiMedia, at the age of 50, feel that our incredible voyage has just begun.....

OUR QUALITY POLICY

- We all at HiMedia are firmly committed to design, develop and manufacture products like Dehydrated Culture Media, Ready Prepared Media, Culture Media Bases, Antimicrobial Susceptibility Discs, Bacteriological Differentiation Aids, Products used in Animal Cell Culture, Plant Tissue Culture, Molecular Biology, Diagnostic reagents & Kits, Diagnostic instruments, Medical devices and Marketing of Laboratory Chemicals that meet requirements of customers, interested parties, legal, Statutory and Regulatory requirements and enhance their satisfaction through effective implementation & improvement of Quality Management System including QMS & QMS for medical devices, providing worldwide technical service.

- We strive to achieve this through up-gradation of technical knowledge of all employees, their involvement & setting up quality objectives.

OUR QUALITY OBJECTIVE

- Continually assess and enhance customer satisfaction by constant interaction with the customers to achieve a minimum customer satisfaction index of 85%.

- Make constant efforts for innovation through Research and Development activity for increasing the range of HiMedia products by developing 20 new products and up-gradation of products every year.

- To develop culture of commitment to quality by up-gradation of skills and improvement in work methods to restrict the rejection level below 0.4%.

MiCroBiology™
Understanding Microbes

Microbiology Services

Welcome to HiMedia

HIMEDIA

Microbiological services

- Microbial strains preservation and supply
- Bacterial & Fungal identification in a polyphasic approach: Microscopy, Biochemical and MALDI-TOF
- Disinfectant qualification efficacy testing
- Antimicrobial susceptibility testing (In-vitro)
- Customized disc/MIC strips/MIC plates preparation in bulk
- Customized media development and providing up to 5 tons per batch
- Strain specific fermentation media development

We provide Accurate identity of your Microbe

Service code no.: SER-MICROID

Testing services & Training courses

- Microbial fermentation yield or strain improvement from the tube, shaker to the lab scale fermentation level
- Bacterial endotoxin test
- Sterility testing for the absence of viable forms of microorganisms in or on products

CERTIFICATE

Certificate of Registration

This is to certify that

Himedia Laboratories Pvt. Ltd.

B/4-6, M.I.D.C Palkhed, Nashik 422 202, Maharashtra. India.
Registered Office: Plot No. C-40, Road No. 21/Y, MIDC, Wagle Industrial Area. Thane (W) - 400 604. Maharashtra. India.

has been independently assessed and is compliant with the requirement of

WHO-GMP

Assessment done against codex Alimentarius Commission CAC/RCP 1-1969, Rev 4 (2003): Recommended International code of Practice - General Principles of Food Hygiene.

This certificate is applicable to the following scope:

Manufacture and Supply of Bioscience Products for Applications In Microbiology (Includes Dehydrated Culture Media, Culture Media Base, Antimicrobial Susceptibility System & Bacteriological Differentiation Aids), Animal Cell Culture, Plant Tissue Culture and Molecular Biology,

This certificate is issued under the following conditions:

1. It applies only to the quality system maintained in the manufacture of above referenced model products.
2. The certificate remains valid until the manufacturing conditions or the quality systems are changed and is subject to continuous surveillance according to the WHO-GMP Standard.
3. The certificate validity is conditioned by positive results or surveillance audits.

Registration No. : DAAS-HIL-00036

This certificate is valid from 13-Jan-2023 until 12-Jan-2026
Re-certification due date 12-Jan-2026

Signed for and behalf of QVR

Directorate of Accreditation for Assessment Services
973 Elizabeth St. Strathmore Alberta - T0C Canada
www.daasaccreditation.org / www.qvrcerts.com

To verify the validity of this unaccredited certificate please visit www.daasaccreditation.org or scan QR code. Surveillance audit shall be conducted at least once a calendar year. This is to certify that the management system of this company has been found to confirm to the above. If the certified client does not allow surveillance, re-certification audits, certificate would be return to Quality Verification Registrar. This certificate remain the property of Directorate of Accreditation for Assessment Services (DAAS). and this certificate is recognized by Directorate of Accreditation for Assessment Services (DAAS).

MEETING YOUR NEEDS

Celebrating 50 years of dedicated service to the scientific community, HiMedia Laboratories continues its mission of 'BioSciences in the service of Humankind.' From its inception, we have been unwaveringly committed to producing innovative products for global markets, proudly aligning ourselves with the 'Make in India' initiative. Despite facing numerous challenges, HiMedia has consistently held its position as a leading Indian Bio-supplier. Our commitment to delivering quality products at affordable prices resonates with our vision of 'Delivering excellence to your doorstep,' a pursuit evident across all our business verticals.

Introducing our 'Lab Super Mart,' a carefully crafted platform providing a comprehensive view of our diverse product range. This platform simplifies the process of selecting the right product from the extensive list of SKUs in various BioScience categories. In response to the scientific community's demands, we continue to expand our product offerings with diligence and dedication.

Quality, the Backbone

Since our establishment, HiMedia has embraced the principle of 'Quality First.' As a globally recognized brand, we have diligently acquired all essential Quality Certifications. Our commitment to excellence is reflected in the amalgamation of our global production expertise, unwavering commitment to perfection, and dedicated technical service for the scientific community. Serving customers in over 150 countries, we deliver world-class quality products amidst rigorous international competition. Despite seaweed shortages, we take pride in consistently supplying our valued patrons with high-quality agar media.

Product Leadership

Recognized as a premier brand with substantial global demand for innovative products such as HiCynth™ and HiVeg™, HiMedia stands unrivaled worldwide. The extensive popularity of over 1500 TSE/BSE-free HiVeg™ Culture Media underscores their significance, particularly in light of concerns about mad cow disease, swine flu, and bird flu epidemics. Eliminating TSE/BSE and intricate raw materials, HiMedia now offers a portfolio of more than 70 Chemically Defined Media to ensure consistent results. Both product lines prioritize environmental friendliness, reflecting our commitment to environmental conservation. As pioneers of technological advancements on a global scale from India, HiMedia has consistently earned the trust and loyalty of our patrons. With each passing year, we are dedicated to enhancing our service to you.

Multilingual Labels

To enhance communication with our global users, we employ descriptive multilingual labels on our product packaging. These labels are provided in English, German, Spanish, French and Portuguese to cater to a diverse international audience.

Multilingual Safety Data Sheets

While the terms 'safety data sheet' or 'SDS' are internationally recognized, the content requirements for these documents vary among different countries. In our commitment to meeting global standards, we are advancing by utilizing CHEMDOX to provide safety data sheets in multiple languages. This contemporary software ensures classification and documentation compliance with current chemical and transportation laws, adhering to diverse national and international regulations. Substance and mixture classification is based on various regulatory laws globally, including harmonized rules such as the GHS (Purple Book) or the UN Model Regulations for transport law (Orange Book). Compliance with the latest version of the REACH regulation is mandatory for all SDS intended

> "Science knows no country, because knowledge belongs to humanity, and is the torch which illuminates the world.
>
> ~ *LOUIS PASTEUR*

for European countries. Additionally, CHEMDOX offers regulatory information on the status of the substance or mixture, including its ingredients, under relevant safety, health, and environmental regulations.

Microbiome Zone

Typical products for Microbiome Research are marked as MZ in this catalogue for easy search as below.

BHI Agar (Brain Heart Infusion Agar) (Special Infusion Agar) for cultivation of fastidious pathogenic bacteria, yeasts and moulds. Gms/Lit : 52.00 9.62 Lit/500G Penicillin - 20 units/ml Streptomycin - 40 µg/ml ➤	M211-100G M211-500G MZ	100gm 500gm

Product Range

Within our broad spectrum of products, you will find numerous innovative offerings catering to Microbiology, Cell Biology, Plant Tissue Culture, Molecular Biology (inclusive of kits and reagents), Hydroponics, and more.

Furthermore, we produce a comprehensive array of culture media bases derived from both animal and plant sources. These bases serve as essential microbiological components for media preparation or act as raw materials for industries involved in fermentation processes.

Microbiology

Media

Repetition of usage, strength (g/l) and supplements if any in DCM section has been avoided in subsequent entries of the same product in various categories.

MEETING YOUR NEEDS

Microbiology Services : Your Need our Expertise

HiMedia is a pioneering organization in Biosciences and one of the world leaders in microbiological media.Our core expertise and skills in the various areas of Microbiology and needs of our esteemed patrons motivated us to initiate a service wing to assist all our Microbiology professionals, research institutes, students, and Industrial partners. We are delighted to share a list of some of the current services we offer. Any other services than these will also be considered based on your discussions with our R&D team. For further details, do not hesitate to contact us at micro.service@himedialabs.com.

Our Microbiology services include :

- Bacterial & Fungal identification by MALDI-TOF MS
- Preservation and Supply of Microbial strains
- Qualification and efficacy testing of disinfectants
- Antimicrobial susceptibility testing (in vitro)
- Bulk preparation of Customized disc/MIC strips/MIC plates
- Customized media development (providing up to 5 tons per batch)
- Strain-specific fermentation media development
- Microbial fermentation yield or strain improvement (from pilot scale to lab scale)
- Bacterial endotoxin test
- Sterility testing for a product's inherent contents and surfaces

Gamma Irradiation Services

HiMedia now also offers sterilization services through its in-house gamma irradiation facility at N-46, Ambernath. We are now equipped to sterilize a vast range of media and apparatus in bulk (processing limit: 50kg per drum/box). With a radiation capacity of 3 x 106 Curie and many certifications (B.R.I.T.; ISO; WHO-GMP & A.E.R.B.). The efficiently calculated radiation doses inflicted are in the range of 6-35 kGy (higher doses available in multiples of 25). This facility is open for our patrons to utilize for their particular research or industrial needs. All of our Ready Prepared Media product range is sterilized by this facility.

HiCynth™ Chemically Defined Media

The 5th generation of Dehydrated Culture Media named as HiCynth™ is a unique technology introduced in 2015, where animal and plant peptones are completely replaced with chemically defined peptones. The entire revolutionary range of products of this advanced generation of media is TSE/BSE/GMO risk-free and environment friendly as it minimizes the carbon footprint. They are more stable as they reduce the variability in the raw material sources and give consistent results. This will efficiently cater to the future demands of technological advancements in Microbiology.

Granulated Form

HiMedia is one of the leading manufacturers of media in granulated form using ultra-modern technology. These are safer, easily soluble, reliable, free-flowing, uniform and dust-free. This makes them highly convenient to use as compared to traditional powdered media. Granulated media have been prominently appreciated across the world, especially by our aerosol-sensitive users.

Powder Form

We still manufacture the majority of our Dehydrated Culture Media in powdered form using advanced manufacturing facilities to serve our longstanding users.

Culture Media Bases *pp* : 239-244

Dehydrated Culture Media Bases of sustained high quality have been our forte for the past quarter century. This includes a comprehensive range of products such as peptones of both conventional animal-based and animal-free types, enzyme hydrolysates of various proteins, extracts, infusion powders, bile salts, etc.

Intermediate, and Resistance zone sizes is as per CLSI & EUCAST guidelines.

Ready Prepared Media ***pp* : 5-70**

Ready-to-use, prepared, cultured media available in choice of plates, tubes, bottles, etc for the identification of microorganisms are referred to as Ready Prepared Media products. They are time and cost-saving, convenient to use, and provide consistent high quality. They find wide applications in clinical, food, water, pharmaceutical, dairy, and textile industries. In this product range, HiMedia offers Ready prepared plates, Scored plates, Ready prepared liquid medium, Ready prepared Solid Medium, Ready prepared transport swabs, Ready prepared Liquid transport medium with swabs, Tuberculosis Identification Slants, Rapid UTI Diagnostic Tests, Biochemical Identification test kits, HiBio-ID test kits, HiDip™ Slides, Multifunctional HiTouch™ Flexi plates, Mono phasic and Dual HiCombi™ HiSafe™ Blood Culturing system, Surface sampling kits, etc.

Lockable and/or Barcoded Ready Prepared Plates

EM-CULT ENLOCK™

Conventional ready prepared plates pose certain problems during operation and transport: there are chances of their lids getting opened or displaced. Recently launched EM-cult Enlock™ has an innovative locking system to avoid accidental opening of the plates during handling and to ensure integrity of results. For the convenience of our patrons for documentation, we also provide these plates with barcodes.

HiEnviro-Sponge™

High quality Environmental Monitoring Sponges and Sponge Sticks have been introduced. They are available in Dry and Hydrated Format with various media/buffers. These are durable sponges for sampling all types of environmental surfaces with no impact on recovery/ viability of organisms.

HiPetriSlim™

Compact, convenient ready prepared thin layered agar gel formats have been developed. It finds application in testing of water, food & cosmetics. They are meant for determination of total counts of bacteria, yeast & mold or pathogens.

Antimicrobial Susceptibility System ***pp* : 247-334**

To overcome the tedious broth micro dilution method, we have introduced HiMIC™ Plate Kit. This is developed for determining MIC using Micro dilution Method using an indicator-based system. It has 12-well detachable strips, diluent, HiMIC reading card, and separate incubation tray. The wells are coated with the growth medium and are deposited with exact gradient of the test antibiotic. It does not require any instrumentation. MIC breakpoint can be determined visually using the reading card. Interpretation for Antibiotic Sensitive, Intermediate, and Resistance zone sizes is as per CLSI & EUCAST guidelines.

Introductory The newly introduced HiComb™ Strip-Modified is gradient based method for determination of Minimum Inhibitory Concentration (MIC). It covers 15 two-fold dilutions in a single strip having highest concentration at the top and lowest concentration at the bottom. Quantitative analysis as per EUCAST and CLSI guidelines.

Apart from these, HiMedia's regular array of products under the umbrella of Antimicrobial Susceptibility Systems include Sensitivity disc (Single), Multi disc (Hexa disc, Octo Disc, Dodeca Disc, Icosa Disc) for disc diffusion method, and Ezy MIC™ Strips and HiComb™ Strip for determination of Minimum Inhibitory Concentration (MIC).

BioChemical Kits

BioChemical Identification Test Kits for bacterial identification, Epidemiology Screening, Niacin Detection, Pyrazinamidase Testing, Nitrate Reduction Test and Catalase Test for confirmation of *Mycobacterium tuberculosis* are a part of this section. We provide a range of biochemical kits including motility kits in miniature form for rapid detection of organisms. We have developed biochemical kits for detection of

MEETING YOUR NEEDS

V. cholerae, V. parahaemolyticus, Salmonella & Shigella species in alignment with fifteen specifications. We also provide services for customized kit development.

Stains, Indicators & Reagents
pp : 343-349

These include most of the commonly used, readymade Stains, Indicators and Reagents as solutions and kits suitable for morphological characterization in bacteriology, mycology, parasitology, hematology, cytology and histology.

Rapid Culturing System

Routine culture tests takes about 3 to 5 days for confirmation. Our novel HiDtect™ Rapid Culturing System does this in a single day, thus reducing the time frame. This has proven instrumental for testing in clinical diagnostics, food, water, dairy, environment, pharmaceuticals, etc.

Food Testing Kits

HiFast™ Food Pathogen Detection Kit aids in early detection of food pathogens such as *E.coli* (0157:H7 and other toxicogenic strains), and other genera like *Salmonella, Listeria, Staphylococcus* and *Clostridium.*

Water Testing Kits
pp : 1158-1165

A comprehensive range of kits for various chemical parameters of water as well as a variety of microbial testing kits suited to match every need for water testing of potable or processed water.

We have also introduced HiEcoli™ Test Kit (K092) for detection and enumeration of E.coli by MPN technique using compartment bags. HiFast™ Water Testing (HiColinella Fast™ Test-K096) Kit to detect presence of E.coli within 5 hours while, Salmonella & Citrobacter are detected in 6-7 hours, in heavily contaminated water.

Endotoxin Assay Kits, BET
pp : 387-388

3Complete range of Bacterial Endotoxin Testing (BET) kits and accessories with Amoebocyte lysates having minimal detection limit for endotoxin ranging from 0.03 to 0.5 EU/ml. We aim to suit your needs for assay of endotoxins from pharmaceuticals, biological products, radioactive medicine, medical devices and associated raw materials.

Diagnosing the Superbugs

The Superbug threat looms larger and uglier over our heads with each passing day. Fortifying ourselves with appropriate means to tackle these drug-resistant bacteria has become a dire necessity today. HiMedia delivers the first line measures in this respect; with efficient detection of these bugs through range of media variations including Multi-drug Resistant Candida auris Selective Media Base, HiCrome™ ESBL (Extended Spectrum β-Lactamase) Agar Base, HiCrome™ CarbaResist Agar Base (Carbapenem Resistant Enterobacteriaceae), HiCrome™ Rapid MRSA (Methicillin Resistant *Staphylococcus aureus*) Agar Base, HiCromeTM VRE (Vancomycin Resistant Enterococci) Agar Base.

Cell Biology
pp : 389-619

Cell Biology Media

HiMedia's core expertise lies in manufacturing ready-to-use cell biology media (RPM), both in powdered as well as liquid formulations, for mammalian and insect cell lines. Comprehensive design of experiments, rigorous raw material qualification and media production with no manual intervention using automated liquid handling platform and automatic filling line are our strengths that enable us to provide the widest range of cell biology media.

HiGlutaXL™ media in our catalog contains L-Alanyl-L-Glutamine (stabilized dipeptide form of L-Glutamine) which provides thermostability to media and reduces toxicity due to ammonia build up in cell cultures.

We offer LoSera™ media to counter the problems of differentiation of primary cells, protein interference in bioassays or difficulty in purification of cell biology products due to high serum content. This range of media contains low percentage of serum with parallel supplementation of nutrients which helps in improving reproducibility as well as considerable cost reduction.

HybridoXL™ media are specially formulated to support propagation and rapid growth of hybridoma cells. HiTransfect™ media have been designed for efficient transfection of various mammalian cell lines in serum-free and reduced serum formulations.

CryoXL™ cryopreservation media are ready-to-use freezing media optimized for effective cryopreservation of your cells. Introducing FREEZEin1™ Universal Freezing medium is a one solution for freezing cell lines, primary and stem cells and serum free cells. We have introduced CryoLITE™, DMSO free formulation for cryopreservation of your most precious cells.

Customized Media

It has been our endeavor to help researchers with specific requirements related to media and cell biology reagents. We provide customized products as per the unique requirements of the clients in terms of media formulations, packaging, labeling, documentation (e.g. certificates of origin, BSE/ TSE risk statements) and additional QC testing (e.g. virus testing, mycoplasma detection, amino acid profiling).

We are firmly committed to maintain the confidentiality of your project and we sign a confidentiality agreement to ensure that the integrity of your project is not compromised.

We produce over 1200 metric tons of common as well as specialized media per annum. For Powdered media, our manufacturing facility is equipped to take production in lot sizes varying from 1kg to lots as large as 5000kg. We have the capability to manufacture sterile liquid media in lot sizes starting from 5L to larger volumes.

Cell Culture Platform *pp* : 423-446

The introduction of cell culture methodology to the biological sciences ushered in a new era of rapid and exciting advances in the fields of virology, cytology, drug discovery, toxicology, cancer and stem cell research and therapy. HiMedia's comprehensive portfolio includes cell culture platform (media, sera and reagents), cell analysis and detection solutions, cell culture tested chemicals, cell culture systems, stem cells and primary cells, filtration solutions and also skill development modules to enable scientists to achieve milestones in their research endeavors.

Sera *pp* : 452-460

HiMedia provides a wide range of quality assured serum over decades that helps achieving consistency in cell growth. Our product listing includes sera from bovine fetus, adult bovine, newborn calf and other animals and specialty sera including charcoal treated, dialyzed, tetracycline negative and ES cell tested sera. All lots of the sera undergo comprehensive quality control testing that include sterility testing against mycoplasma, viruses and bacteria, antibody testing, analysis of growth promotion capacity, protein profiling, endotoxin content and physicochemical analysis.

Research Grade, Fetal Bovine Sera : An economical alternative for your research!

HiMedia's Research Grade FBS Sera provides exceptional value and quality for everyday applications. This serum helps to meet your research needs and budget requirements, offering the best value for basic cell culture, specialty research, and specific assays.

Sure Fetal Bovine Sera- : Certified serum for commercial applications

Sure Fetal Bovine Sera are manufactured from countries with negligible BSE risk zones following stringent manufacturing and quality control procedures. Suitable for many cell culture applications, this serum is comprehensively tested for performance and quality assurance.

NuSera™ is a semi-defined Serum Replacement Solution designed to replace fetal bovine serum in cell culture. It has been optimized to support long term in vitro growth of multiple cells lines irrespective of the species and the tissue from which they have been originated. NuSera™ is suitable for adherent as well as suspension cultures. 10 % of NuSera™ is equivalent to 10% Fetal Bovine Serum in the basal medium at 30% cost reduction.

Serum-free Platform

To counter the batch-to-batch variation and contamination issues related to use of serum in culture, the formulations of media excluding sera are

MEETING YOUR NEEDS

being favored by worldwide researchers. Serum-free media have a defined composition, resulting in a high reproducibility, accuracy, precision and consistency in results. HiMedia currently supplies serum-free media for CHO, Vero, MDCK and BHK cell lines that are most widely used for industrial production of recombinant proteins and vaccine.

Bioproduction *pp* : 403-408

With our Animal Component Free, Chemically Defined CHOin1™ Media & Universal feeds supplement, we provide a comprehensive range of clone-specific serum-free, protein free media and feed supplements and Bio-Production services

Viral Vaccine Media *pp* : 410-414

Accelerate Your Viral Vaccine Development with our host specific media for virus production. Our wide range of vaccine production media include Human viral vaccine media (CELLin1™ and HEKin1™), FMD Vaccine media (BHKin1™ and GMEM) and Avian Vaccine media (PrimaVac™).

Cultivated Meat Media

We offer a wide range of media formulations for cultivated meat.

Specialty Platforms

For the specialized segments of cell biology such as cytogenetics, transfection, hybridoma technology, IVF, viral transport, separation of different types of WBCs, HiMedia offers complete range of media and cell biology reagents.

Cytogenetics platform *pp* : 445-446

HiKaryoXL™ media are a series of ready-to-use media developed for short term in vitro culture of peripheral blood lymphocytes for cytogenetic studies.

HiMarrowXL™ Karyotyping Medium is a karyotyping medium recommended for short term in vitro culture of primary bone marrow cells for cytogenetic studies

HiAmnioXL™ Amniocyte Karyotyping Medium is developed specifically for the in vitro prenatal diagnostic testing of human amniotic fluid and CVS specimens and designed for ease of handling

Stem Cells & Media *pp* : 463-467

HiMedia provides HiFi™ Mesenchymal Stem Cells isolated from three sources- Wharton's Jelly, Adipose tissue and dental pulp. For successful culture of these cells, we offer specialized media in the form of classical, reduced serum and serum-free formulations along with HiDiff™ differentiation media for differentiation into specific lineages and EZstain™ staining kits.

Our Stem cell culture medias are specialized solutions designed to support the proliferation, differentiation, growth, and cryopreservation of stem cells and other cells. We have introduced a Complete, Defined, Serum free (SF), Xeno-free (XF) system for in vitro culture of human mesenchymal stem cells called Stemin1™

Primary Cells & Media *pp* : 468-478

HiMedia provides Primary cells including endothelial cells from human umbilical vein and artery; Fibroblast cells, Keratinocytes and Melanocytes from Human adult skin and juvenile foreskin, Peripheral Blood Mononuclear Cells from human blood and human Mammary Epithelial Cells.

Cytokines and growth factors *pp* : 479-484

Cytokines and growth factors are critical cell culture media components, particularly when serum-and animal-free conditions or defined media are required. We offer hundreds of purified, recombinant growth factors and cytokines for proliferation, differentiation, angiogenesis studies, and more. We offer over 100 gold-standard antibodies for all your electron microscopy imaging needs. The Antibodies can be used in several scientific applications, including Flow Cytometry, Western Blot, ELISA, Immunohistochemistry and Immunohistochemistry.

Cell Analysis & Detection Solutions *pp* : 487-496

The broad range of cell based assays offered by HiMedia gives researchers a tool to study the aspects of cytotoxicity, cell cycle, enzymology and cell signaling extensively.

We provide accurate, sensitive and reliable detection methods and robust and successful elimination methods for mycoplasma contamination in cell biology.

Our catalog includes a number of stains and indicators dyes including nuclear and cytoplasmic stains, DNA/ RNA-binding stains, viability stains or stains specific to any cell organelle used in cell biology on routine basis for particular applications.

Cell Biology Tested Chemicals ***pp* : 499-526**

HiMedia is one of the leading suppliers of comprehensive range of chemicals and specialty chemicals including amino acids, antibiotics, growth factors, biochemicals, cell dissociation and cryopreservation reagents used in cell culture. These chemicals apart from the analytical testing undergo cell culture test to verify their suitability in cell biology application.

In view of the challenges that some companies face in responding to an increasingly complex regulatory compliance, we provide quality grade chemicals meeting United States Pharmacopeia (USP) and European Pharmacopoeia (EP) testing specifications. Every lot released for supply is provided with a detailed Certificate of Analysis (COA) defining the product specifications.

Cell Culture Plasticware ***pp* : 528-548**

Cell biology is incomplete without a unique combination of culture vessels, liquid handling systems, storage bottles and pipetting aids. Committed to provide best quality, HiMedia supplies the quality grade of cell culture tested lab ware to maintain excellent growth conditions and high viability of the cell cultures.

Our PET and PETG are ideal for storage and sampling of media, biologicals and other aqueous solutions. Polyethylene terephthalate (PET) bottles are ideal for storage and sampling of media, biologicals, and other aqueous solutions. The PET resin makes the bottle lightweight, break resistant and as transparent as glass. We also offer plasticwares like Roller bottle, HiFactory and Erlenmeyer flasks for scaleup of viral vaccine production.

Filtration Systems ***pp* : 550-580**

HiMedia's product offering includes a broad range of filters, membranes, filter holders, funnels, vacuum-driven filters and related filtration devices. Filtration membranes and syringe driven filters are available with different membranes of Cellulose nitrate, Nylon-66, PVDF, PES, PTFE or MCE to help users select required pore size and membrane, correct membrane area and best filter design to suit their application.

Maximize your workspace environment by eliminating the need for separate manifold, vacuum pump and excess tubing and improve operation time with our HiFlo™ Pump.

Instrumentation ***pp* : 583-606**

Improve your experimentation results with trusted cell culture equipment, such as CO2 incubators, biohazard cabinets, standard centrifuges, laboratory refrigeration, automated cell counting devices, and cell imaging technology.
Streamline your cell culture workflow with our CERO a benchtop Incubator & Bioreactor. CERO grows Spheroids Organoids iPS Cells & Primary Cells

Our CASY is a comprehensive cell status monitoring label-free, with outstanding precision and reproducibility. CASY quantifies all relevant parameters of cells including cell viability, cell size and aggregation – at extremely low running costs.

Our 3D- Bioprinter " TRIVIMA™" manufactured by NBIL is designed not only for large pharmaceutical companies, but also for research institutes and schools interested in tissue engineering. Customization is essential in the global 3D bioprinting ecosystem, particularly in India. Our 3D-bioprinter is designed to be completely customizable in order to meet the needs of the Indian research community.

MEETING YOUR NEEDS

Molecular Biology *pp* : 621-774

HiGenoMB® Automation – Making The Impossible Possible!

Technology is akin to our expectations and the climb for advancements in technology is interminable. Just because we have achieved a limit does not mean there is no beyond to it. The gradual shift of focus towards Molecular Biology post Covid-19 has intensified its importance in solving the genomic mysteries.

Advancement in Nucleic Acid extraction from column-based method to magnetic bead based technology has created a buzz in the biotechnology market. Development of magnetic bead-based protocols not only reduces the time required for extraction but also improves the quality of the extracted nucleic acid. **HiGenoMB®'s** newly launched kits on the **InstaNX® Mag16^{Plus}** and **Insta NX® Mag32^{Plus}** automated extraction platforms serve the purpose for scientists all around the world. Prefilled Extraction kits for extraction of Nucleic Acid from Nematodes, Plant, Insect, Stool, Yeast, Seed and Fungus can be helpful in vigorous microbiome research studies. HiGenoMB® has also ventured deep into the clinical diagnostic industry by developing prefilled extraction kits for FFPE & MTB DNA along with Tissue, Blood, Semen, Fluids, Bone etc. extractions.

HiGenoMB®'s **Insta NX® Mag24** Automated DNA/ RNA Extractor provides a **simple, fast, reliable, high throughput automated system** for optimum extraction of cfDNA using HiPurA® Cell- free DNA Purification Kit. It is automation friendly, allowing the user flexibility to process a single NIPT/ Liquid biopsy sample or up to 24 **samples in a single run.** This automated solution **in just 75 minutes of processing time delivers high-throughput,** automated purification of high-quality circulating cell-free DNA (cfDNA) and ctDNA.

Our **Insta-Q96® AG** series is an Inbuilt touch screen Real Time PCR system carrying forward the excellent legacy of the Insta-Q96® family, using the thermoelectric refrigeration technology, a light source and optical circuit design. The unique constant current power supply and 6-zone independent temperature control method ensures that the product is fast, accurate and stable in fluorescence quantitative analysis. The product adopts modular design, with a variety of configuration options, at the same time, the addition of temperature gradient, sample 4°C cryopreservation, automatic dehumidification and other functions; fully meet the scientific research and clinical medical needs. **Prima® Flexi Series** - PCR Thermal Cycler boasts of 5 interchangeable block formats for seamless sample processing, ensuring precise temperature control and rapid thermal cycling. With its flexibility to accommodate diverse tube and plate formats, it's the ideal solution for various PCR applications in research and diagnostics.

Plasmid DNA Extraction **(Miniprep, Midiprep & Maxiprep)** are fundamental techniques in molecular biology. HiMedia's Plasmid DNA extraction kits are available in all the above formats. HiGenoMB has also developed endotoxin free Plasmid DNA Isolation Kit for **minimizing the level of endotoxin contamination in purified plasmid DNA. HiPurA® Pre- filled Cartridges for Plasmid Maxiprep DNA Purification** provides the fastest and easiest way to purify Plasmid DNA for reliable applications in PCR, library screening, sequencing, etc. Automation in the Mini & Midi format significantly reduces human intervention thus reducing the time required for completion of the protocol without hampering the quality of the extracted DNA.

The clinical presentations of SARS-CoV-2, influenza, and RSV infections have overlapping symptoms, thus differential diagnosis of these diseases is challenging. Rapid diagnosis is needed in elderly patients because SARS-CoV-2, influenza, and RSV infections result in substantial morbidity and mortality specifically in these patients. HiMedia has developed a Multiplex Real-Time Probe PCR kit which enables the clinicians and public health laboratories to quickly diagnose and differentiate SARS-CoV-2, Influenza and RSV infections. Similarly, to resolve the perplexing parasite infections in animals, we have developed a multiplex probe PCR kit to diagnose Babesia.

DNA Liv™ stabilizes and protects DNA in biological samples such as cells, tissues, blood, biological liquids, stool, etc. which eliminates the need of immediate processing or to freeze samples in liquid nitrogen for later processing. It is a single reagent that immediately inactivates DNases and stabilizes DNA within tissues or cells. **Microbiome Liv™** stabilizes and protects nucleic acids in environmental as well as microbiome samples which eliminates the need of immediate processing.

Midway through the 2010s, the field of DNA analysis experienced a surge of new technologies that had the power to revolutionize forensic casework. No matter which technique is used the first few steps of analysis remain the same: DNA extraction, DNA quantification and targeted DNA amplification. Himedia's HiGenoMB products have been certified to be used in forensic labs for forensic casework, paternity testing, or other human identity testing applications. Rapid tests are designed for use where a preliminary screening test result is required and are especially useful in resource-limited settings. HiMedia's foray into lateral flow assays with **Insta -LF™ Rapid-B kit,** serves the rapid identification of human blood for forensic purpose. The result is interpreted visually by the appearance of the test line and control line in human blood positive samples. The test is easy to perform and can be performed directly on site of crime.

We are very excited to present HiMedia's HiGenoMB's MB Grade Chemicals in such a way where you get to know the applications of each chemical as well as the industries to target. It will also help us to cater our customers in a more communicable way. Each and every batch of MB Grade Chemicals undergoes stringent quality control to ensure 100% compliance with the specified standards.

Keeping the various requirements of the scientists engaged in proteomic research, this year we have planned to cater the recombinant E.coli growth media suitable for molecular applications which includes high-yield plasmid DNA amplification, protein expression and production, cloning and transformation.

For efficient protein purification we have introduced HiPurA® Ni-NTA Protein Binding Magnetic Beads which is designed for rapid purification of 6XHis-Tagged proteins. As compared to the traditional agarose resins, these beads are faster, easier, and more efficient for purifying the proteins because of the four metal-binding chelation sites.

Like all the previous years, we have continued our effort in "Nurturing Curiosity" to ignite the budding scientific minds by developing HiPer® Gene Editing Teaching Kit (CRISPR based), where students will learn the CRISPR cascade mediated gene silencing.

Our **Hi-Gx360®** Sequencing and bioinformatics services have recently been **accredited by NABL** in compliance with **ISO/IEC17025:2017** for microbial identification services. Furthermore, we have **upgraded** the capacity of the sequencing facility with addition of **SeqStudio Flex Genetic Analyzers** & **Illumina Nextseq2000**, to the fleet of sequencers resulting in faster turnaround time and more data output capacity especially for whole genome sequencing (WGS), whole exome sequencing (WES) and Total RNA sequencing.

At HiGenoMB® *"We envision to find solutions for curtailing your obstacles in reaching the terminus of precision science"*

Plant Tissue Culture *pp* : 779-829

HiMedia serves plant researchers at every stage of the research process and provides a complete end-to-end solution for their problems. We provide an extensive range of classical and crop-specific media and their respective supplements in both powdered and liquid forms. Our products include a well-formulated range of varied MS media compositions along with specific media for commercially important crops like banana, orchid, gerbera, carnation and many more.

Plant Growth Promoters

We are the first Indian establishment to have introduced various classes of plant growth regulators as our products. They include all the major classes of plant growth regulators: Auxins, Gibberellins, Polyamines and Abscisic acid. Besides these, we also offer other hormones like Jasmonic Acid, elicitors like Chitosan, herbicides like Picloram, etc. which induce stimulatory responses in plants.

Plant Tissue Culture Tested Chemicals

HiMedia offers a comprehensive range of plant tissue culture tested chemicals including macroelements, microelements, amino acids, carbohydrates, vitamins, organic supplements, gelling agents, plant growth regulators, antibiotics for plant researchers and horticulturists to solve their toughest problems in plant biotechnology. All our products undergo stringent quality control required to maintain consistency and quality. This complete range is assessed analytically for physiochemical parameters; along with plant response tests to verify their suitability for specific applications.

Agro Sciences

For Agro-testing laboratories, this section offers a comprehensive range of Soil Testing Kits, Water Testing Kits and Training Schemes. For agricultural purposes, Kits for assessing Milk Adulteration and Mastitis Field Test have also been developed.

Higronics® *pp* :839-846

HiMedia ventured into Hydroponics with a mission of bringing about a much-needed change in agriculture. sector for the benefit of all. Keeping our promise to serve better with quality products, we have begun the beautiful journey of Higronics. The HigronicsTM platform is One Point Solution (OPS) for all scales of hydroponics applications.

Higronics is actively working towards Commercial Farming Systems, Urban Farming Systems, Hydroponic Nutrient Technology, Hydroponic Accessories, Water testing services, Agronomy services, Education and Training programs, and Project feasibility studies. Our collaboration with Autogrow Systems has enabled Higronics to reach new heights.

Professional Care Products *pp* : 1179-1198

This highly specialized range includes state-of-the-art products for maintaining a high degree of sterility in the medical and surgical professions. This section includes hand washes and gels, instrument sterilizers, floor & surface sanitizers, environment & laundry sterilizers, etc. All of these products aim to reduce the bioburden and answer most of the sophisticated needs of our Indian patrons.

Hospital Disinfectants

Narrow as well as broad spectrum Hospital Disinfectants of world-class quality are available in this section.

For Quality-Conscious Users

There is no alternative to Quality' is the noble belief that HiMedia follows. Many international brands are now available in the Indian market. However, our comparative-research showed that some of these global brands lack deeper understanding of tropical diseases. Hence, these brands are ill-suited for Indian conditions.

*** Warkem contact : 022-2500 0746 / 0653**

*The technology and the brand HiFoliar™ have been purchased by M/s. Warkem Biotech Pvt. Ltd. Our Patrons may contact them on the number given at the bottom of this page.

Moreover, these brands are shrewdly trying to substitute quality by selling their products for cheaper rates. However, it must be remembered that in Microbiology, product consistency is very crucial reference point for in vitro testing and diagnostics. In the absence of product consistency, qualitative testing fails to acquire any meaning. Hence, our esteemed patrons have always agreed with our motto 'Quality has no substitute' and have always appreciated the quality products that we provide them

Validation

We welcome you to browse through this catalogue and are hopeful that we have everything that you need. Please do not hesitate to ask us about products that you do not find here. We will happily address your queries since we always strive to meet your needs.

LOT

8 902729 011362

Directions: (EN)
Suspend 41.5 grams in 1000 ml purified/distilled water. Heat to boiling to dissolve the medium completely. Sterilize by autoclaving at 15 lbs pressure (121°C) for 15 minutes. Cool to 45-50°C. If the solidified culture medium is somewhat too red, then to remove the colour add a few drops (max. 1 ml/litre) of a freshly prepared 10% Sodium sulphite solution and boil. *Mix well and pour into sterile Petri plates.*
***For More Information Refer Technical Data**

Use
A selective medium recommended for confirmation of the presumptive test for members of the coliform group from clinical and non-clinical samples.

Danger
May cause cancer

Obtain special instructions before use. Avoid breathing dust/fume/gas/mist/vapours/spray. Wear protective gloves/protective clothing/eye protection/face protection. IF exposed or concerned: Get medical advice/attention.

Received _____ Opened _____
Expected Performance during specified expiry period when material is duly maintained in the original powder form

**Standard Formula

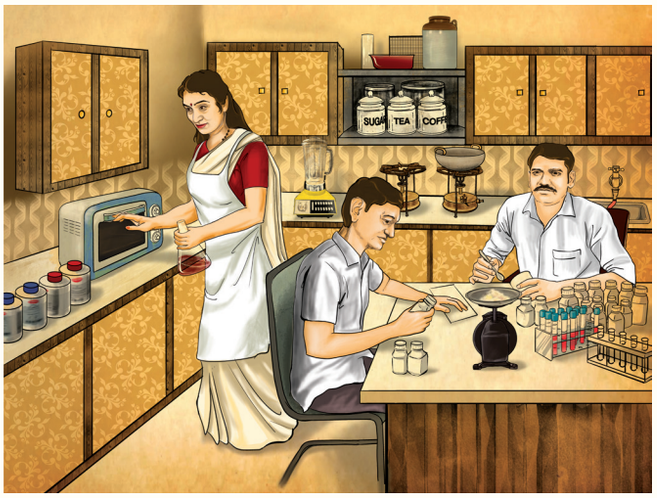
Ingredients	Gms/litre
Peptone	10.00
Lactose	10.00
Dipotassium hydrogen phosphate	3.50
Sodium sulphite	2.50
Basic Fuchsin	0.50
Agar	15.00
Final pH (at 25°C) 7.5±0.2	

**Formula adjusted, standardized to suit performance parameters

Disposal : User must ensure disposal by autoclaving and/or by incineration used or unusable preparations of this product and derivatives thereof on completion of work to avoid contagion

Anweisungen: (DE) — GERMAN (DIRECTIONS)
Lösen Sie 41,5 Gramm in 1000 ml gereinigtem/destilliertem Wasser auf. Bis zum Kochen erhitzen, um das Medium vollständig aufzulösen. Durch Autoklavieren für 15 Minuten bei 15 lbs Druck (121°C) sterilisieren. Auf 45-50°C abkühlen lassen. Ist das verfestigte Nährmedium etwas zu rot, so werden zur Entfernung der Farbe einige Tropfen (max. 1 ml/Liter) einer frisch zubereiteten 10%igen Natriumsulfitlösung zugegeben und gekocht. *Gut mischen und in sterile Petrischalen füllen.*

Instructions: (FR) — FRENCH (DIRECTIONS)
Mettre en suspension 41,5 grammes dans 1000 ml d'eau purifiée ou distillée. Porter à ébullition pour assurer la dissolution complète du milieu. Stériliser à l'autoclave à une pression de 15 lb (121 °C) pendant 15 minutes. Refroidir à 45-50 °C. Si le milieu de culture solidifié est trop rouge, on peut éliminer la couleur rouge en ajoutant quelques gouttes (1 ml/l au maximum) d'une solution de sulfite de sodium à 10 % récemment préparée, puis en portant à ébullition. *Bien mélanger et verser dans des boites de Pétri stériles.*



Instruções: (PT) — PORTUGESE (DIRECTIONS)
Suspender 41,5 gramas em 1000 ml de água purificada/destilada. Aquecer até à ebulição para dissolver completamente o meio. Esterilizar em autoclave a 15 libras de pressão (121°C) por 15 minutos. Arrefecer à 45-50°C. Se o meio de cultura solidificado estiver muito vermelho, para remover a cor, adicionar algumas gotas (máx. 1 ml/litro) de uma solução recém preparada de Sulfito de sódio a 10%, e depois ferver. *Misturar bem e despejar em placas de Petri estéreis.*

Instrucciones: (ES) — SPANISH (DIRECTIONS)
Suspender 41,5 gramos en 1000 ml de agua purificada/destilada. Calentar hasta hervir para disolver el medio completamente. Esterilizar por autoclave a 15 lbs de presión (121°C) durante 15 minutos. Enfriar a 45-50°C. Si el medio de cultivo solidificado es demasiado rojo, para quitar el color añadir unas pocas gotas (max. 1 ml/litro) de recién preparada solución de 10% de sulfito de sodio y hervir. *Mezclar bien y verter en placas de Petri estériles.*

COVER STORY

Born out of the Pioneer's belief that *'Life is precious'* and that *'There is more to a business beyond Bioscience',* **HiMedia,** India's premium Life Science company, came into existence, 50 years ago.

The legacy of excellence set by the **three founders, Dr. G.M.Warke, Mr. Vishnu M. Warke, and Mrs. Saroj G. Warke** has resulted in the transformation of their Kitchen R&D into HiMedia, a modern and technologically adept World-Class Organization!

HiMedia, as we see it today, is the result of an amazing combination of scientific expertise coupled with acute business acumen and above all, a zeal to make India self-reliant!

The three founders, known to convert challenges into opportunities, committed themselves relentlessly to scientific research and healthcare, thereby empowering Indian researchers by the production of high-quality, domestically produced microbiology medias. What started as a venture into the Microbiology media market eventually grew to encompass diverse fields like Cell Biology, Molecular Biology, Plant Tissue Culture, Higronics, etc.

The Journey and Beyond : Triggered by frustration and hopelessness, during his Ph.D. research, over the delay, scarcity, and exorbitant costs of imported microbiological media, Dr. G.M. Warke, resolved to manufacture affordable microbiological media of superior quality **indigenously,** thereby realizing the concept of **'ATMANIRBHAR BHARAT'!** What started as a mission has exceeded all expectations so much so that half a century ago, when HiMedia entered the market, there were only 3 competitors in the World, one from the UK, one from the USA, and one from Germany, but today only Brand HiMedia stands proudly among this elite group, and also surpasses them all with its innovative products!

HiMedia is essentially a family-run company, with **three generations** of highly educated and visionary Directors at the helm, many of whom chose to return to their homeland after completing their advanced education at reputed foreign Universities. This continuation of business to Gen Next has imparted a new **dynamic vision** plus a robust

sense of **stability** to the company. No wonder, investors and industries, customers and clients, sensing a bright future with HiMedia feel honored to associate themselves with it, investing in it funds, resources and technology, apart from their mandatory trust and time, and of course, money!

What distinguishes a *great* company from a *good* one are its achievements, which when extraordinary, propel it to grand heights of reputation and glory. HiMedia is one of those rare, blessed companies that has myriad experiences from developing a specialized media range for the scientific team of Antartica's *Dakshin Gangotri,* to manufacturing challenging products for a Japanese company on time and to recently fighting the Coronavirus pandemic by providing COVID detection and Virus Transport Medium Kits.

These and many other significant highlights of HiMedia can be assessed, in a detailed Timeline, by scanning the QR code below:

For more information

The visiting American team was also given a traditional farmer's bullockcart ride.

HiMedia, as a company, has always been committed to its **Core values** of pioneering excellence, delivering quality, emphasizing on innovation, and self-reliance, its **Vision** of excellence in quality and service & its **Mission** of serving Humankind by manufacturing quality and affordable products. It gives us immense pleasure to announce that HiMedia has been named the **'Pride of India'** by Bioscience experts as it is the **first registered organization of Indian origin manufacturing microbiology media** and is now even a reputed global brand! 'Going Global' naturally meant spreading one's tentacles of marketing network far and wide. HiMedia has invested in an extensive marketing network in India and to establish its global footprints, has acquired around 335 Global Channel Partners.

HiMedia, which believes in persistent improvement and continuous growth, also believes in adopting the latest technologies to compete with the best in the world. Consequently, HiMedia has installed many state-of-the-art manufacturing units and has also created RFID-enabled smart warehouses, smart laboratories (IOT), and smart invoicing, continuously innovating through Artificial Intelligence (AI) and Machine Learning. Though HiMedia has ventured into a number of fields, its strong points have primarily been Microbiology, Molecular Biology, and Cell Biology, where it has outshined others. Let us try to understand why it is so.

I) **Microbiology :** HiMedia's contribution to Microbiology is breathtaking! It manufactures more than 20,000 SKUs and boasts of a 5,000 tons per annum of media producing capacity along with 200 thousand per day ready-prepared-media-plates and 50 thousand ready prepared in liquid form making capacity. It has also installed its gamma irradiation sterilization system facility in 2023. Obviously, all these have unmistakably propelled HiMedia, making it one of the **Top 3 Powdered Media Manufacturers in the world!**

II) Molecular Biology : HiMedia has been catering to the entire Molecular Biology product range from Genomics to Proteomics under the brand name 'HiGenoMB®' for the last eighteen years and has become a 'One-Stop Destination' for all Molecular Biology works with automation in Nucleic Acid extraction, PCR, Liquid Handling systems, and Genomic Sequencing and has provided futuristic solutions to problems. HiMedia's team has also developed the HiPer® range of premium-quality teaching kits for hands-on experiments.

III) Cell Biology : HiMedia's Cell Biology is at the forefront of revolutionizing Cell Biology and Regenerative Medicine, leveraging advanced technologies and novel products. HiMedia's efforts are mainly focused on pioneering developments in Cell & Gene Therapy, Stem Cell Research, Clone Development, and CAR-T Research through sophisticated 3D cell culture techniques. Additionally, HiMedia is also innovating in cultivated meat media.

HiMedia's Success Story : Ensuring strict quality and safety levels at all stages, introducing an advanced microbiological products range, and developing advanced molecular automation & Hitech products for Life Sciences, besides fighting fearlessly as a **'Covid warrior'** during the **COVID-19 pandemic,** are some of the factors responsible for HiMedia's formidable and enviable success, in both the Science field as well as on the Social front! **Some of the major factors contributing to HiMedia's success are :**

• Maintaining **Quality** by restricting rejection levels below 0.4% and maintaining a minimum 85% customer satisfaction index, introducing HiMedia's Ready Prepared Media Facility with Board of Radiation and Isotope Technology (BRIT) certification, and ensuring that all its Production and Research Facilities strictly adhere to WHO GMP standards are the major factors that have helped HiMedia gain extraordinary success.

• Innovation of **Advanced Microbiology Products Range** such as HiPetrislim™ product range (HPS001-HPS010), HiMIC plate kit range for clinical antibiotics (MPK series), HiVibri™-O-Trap kit for aquaculture (K156), Automated anaerobiosis system, and Complete Microbiology Services from culture preservation to advanced microbial identification by MALDI-TOF MS, is hugely responsible for helping HiMedia become a much-sought-after Brand today.

• HiMedia pushed for **Advanced Molecular Automation** which is bound to expand the horizon of researchers. HiMedia

ensured the development of advanced **Insta NX® Mag16^{Plus}** and **Insta NX® Mag32^{Plus}** (Automated extraction platforms for a wide range of sample types), **Insta NX® Mag24** (an Automated DNA/RNA Extractor for NIPT/ Liquid biopsy samples), **Insta-Q96® AG** (a series of inbuilt touch screen Real-Time PCR machines), **Prima® Flexi Series** (of PCR Thermal Cyclers with 5 interchangeable block formats), and **Insta LiqWee™ Robo** (an Automatic Liquid Handling Instrument).

• HiMedia has developed a number of **Hitech products** like Higronics Soilless farming, Serum Free Media, and BHU-Vision-Soil testing devices, providing a boost to its Life Sciences Department.

• When the COVID-19 Pandemic hit the world, HiMedia, in keeping with its ideology of **'Nation First**' bravely rushed to the front as a **'COVID-19 Warrior**' by increasing its production to meet the Nation's demand since **it was the only company that had both the capability and the scale** to produce COVID kits in **India!** Extraordinarily, HiMedia sold over 70 million Viral Transport Medium (VTM) kits across India, 56 million RNA extraction kits along with RT-PCR machines and kits, and also developed an advanced version of VTM, Viral Lysis Transport Medium (VLTM), for the transportation of **COVID-19 suspected samples.** HiMedia also supplied an astounding number of tests (up to 350 million tests) and helped to test around 95% of patients! To meet the huge demand for elevated numbers in the testing of COVID-19 samples, HiMedia even designed magnetic bead-based automated high throughput extraction systems, InstaNX Mag16, InstaNX Mag 32, and InstaNX Mag96. HiMedia also introduced a 'ready-to-use pre-filled reagents plate' and also developed **India's one and only** Hi-PCR Coronavirus Multiplex Probe, a PCR Kit where 'four genes' are detected simultaneously in a single reaction tube. Along with this, HiMedia came up with a separate 'three genes' SARS-CoV-2 detection PCR Kit. For an easier prognosis and quicker treatment, HiMedia's team also developed a combi PCR kit that simultaneously identifies Influenza A, Influenza B, RSV, and SARS-CoV-2.

A Company's capability of standing out and shining amongst its competitors is essentially due to advancements in its R&D and many times, **'A Company is as good as its R&D'**. HiMedia's credibility and amazing progress are principally due to the superior and reliable innovative work done by its R&D, spurring its economic growth in the fiercely competitive commercial market.

All scientific researchers have their share of successes and failures. A lucky few have **'Eureka moments!'**. HiMedia is one of those rare companies!

• **A Eureka moment** that changed the Microbiology domain forever was **HiMedia's HiVeg™ Peptone!** HiMedia's HiVeg™ Peptone is a plant-based peptone, recommended for use as a culture media ingredient in a variety of media and for the commercial production of enzymes, vaccines, antibiotics, and -other products. The World of Microbiology has not failed to acknowledge this outstanding feat, with the result that **HiMedia's brand HiVeg™** is mentioned for a whopping **1,566 times** in the prestigious **'The Handbook of Microbiology'!** This once again re-emphasized the World of Microbiology's trust and respect for HiMedia's superior technology and its supreme commitment to quality and safety!

• During the COVID-19 pandemic, **HiMedia was the only Indian company** indigenously manufacturing HiPurA® Viral RNA Extraction Kit. HiMedia designed InstaNX Mag16, InstaNX Mag 32, and InstaNX Mag96 and this became humanity's **'ray of hope'** in the grim world of the Pandemic! During the Pandemic, when **'saving time literally meant saving life',** HiMedia came up with 'ready-to-use pre-filled reagents plates' compatible with these instruments, for the convenience of the users. It made the job of the already overburdened laboratory technicians easy as they just had to peel off the plate seals, add the samples, and place them in **HiMedia's InstaNX Mag** machines. Fighting simultaneously against both the fast-spreading Coronavirus and the fast-passing Time, both equally ruthless, HiMedia's technical team, with a vision to redefine viral RNA extraction at a **faster pace**, tirelessly designed experiments and successfully developed the **World's first Ultra-Rapid 'Super 11 Pre-filled Plates'** where an **unbelievable 96 samples** could be processed in just **'11 minutes'!** This exceptional achievement of the entire HiGenoMB team reinforced HiMedia's commitment to its people and its country. It was also a testimony proving that **HiMedia's slogan of 'Life is Precious' extends beyond its printed brochures and finds expression in visible and real 'life experiences' too!**

HiMedia, as a Brand, has grown due to the tremendous growth in various fields. **Some of HiMedia's major developments :**

• In **Microbiology,** in order to overcome Mad Cow Disease, HiMedia developed 100% veg-based peptones. It also developed 1,500 animal-free media. HiMedia has also developed Antibiotic ZoneScale [PW297] -an antibiotic zone scale for measuring the inhibition zone size of Antibiotic Sensitivity Discs with extraordinary ease and accuracy, and also created Chromogenic media that used the magic of colors to detect microbes easily. Besides this, HiMedia also created several water testing kits, including the MPN kit and HiMIC™ Plate Kit (which provides a hassle-free broth microdilution method for determination of Minimum Inhibitory Concentration). Among media, a new range of ready-prepared media, Dehydrated Culture Media, and Folic acid casei medium (M543) was developed. Brain-Heart Infusion (BHI) was exported to a Japanese Company against all odds. **With the matchless innovation of Artificial Intelligence (AI) assisted instruments, HiMedia has introduced instruments like HiCFUCounterC™ (HiCFU Colony Counter) and HiBioKemID™.** HiMedia has also filed several **patents** for various processes and devices, some of which have been granted, while others are published.

• HiMedia's developments in the field of **Molecular Biology,** listed below, are as significant as they are unique.

• HiPurA® series of manual column-based DNA/RNA extraction kits were developed.

• Hi-PCR® series of PCR and RT-PCR-based diagnostic kits for IVD, veterinary, etc.

• The simplicity& affordability of the 'Wee and Prima' series of Thermal cyclers have redefined PCR.

• HiPer® DIY Teaching Kits.

• InstaQ 96® Real-Time PCR machine with patented detection technology.

• The InstaNX series of magnetic bead-based automated nucleic acid extractors.

• Technology shifts from column to single sample processing.

•NABL-accredited Hi-Gx360® Sequencing and Bioinformatics Services.

• Forensic-ID DNA Quantification Software.

• Lateral flow-based InstaLF™ Point of Care Testing Kit.

Patents : Designs of three different containers for sample specimen collection and transport have been approved.

• Advancements in **Cell Biology** included introducing a range of Serum-Free Media for the Vaccine & Biopharma Industry, like:

- CHOin1™: [SFM045AP]- A comprehensive range of clone-specific serum-free, protein-free media and feed supplements. It is also India's first indigenous Serum-Free Media designed for Biopharma applications, launched at the Global Bio India (GBI) Conference BIRAC. Bio-Production service is also provided.
- NuSera™: [TCL280]- Launched NuSeraTM, a serum replacement solution to replace fetal bovine serum in cell culture.
- CryoXL™ Series of Cell Freezing Medias: a) Cryolite™: [TCL285] DMSO free Formulation for Cryopreservation of the most precious Mesenchymal Stem Cells. b) FREEZin1™ [TCL098] animal origin-free and serum-free cell freezing media.
- CELLin1™: [SFM036AP] a chemically defined, animal component-free, virus-production medium, designed for the growth and maintenance of cells, and is devoid of L-Glutamine.
- PET: [TCP269] & PETG: [TCP318I, TCP334I] -All-in-one-storage-solutions launched for Pharma and Biopharma, for tissue culture media, sera, buffers, reagents, and aqueous solutions.

• HiMedia's outstanding innovations in **Instrumentation** include development of HiMedia Compressed Air Sampler (diffuser) with LA881 HiAirflow Economical [LA1147-1NO] developed to test the quality of compressed air, gases used in cleanrooms, HiMedia HiAirflow Economical Air Sampler [LA881-1NO]-developed for monitoring of air biocontamination level in critical places, and HiMedia HiLoop Electric Sterilizer [LA832-1NO] developed for Without Flame and is most suitable for the sterilization of inoculation loops, needles and instruments.

• Major developments are **Plant Tissue Culture** media introduced in the dehydrated form PT099, PT021, PT100, PT018, PT011C. & Aerial disinfection system, FoggerJET™-PLA004, PLA005, PLA009 was introduced to combat microbial

load and provide a sterile working environment.

• **Warkem Biotech, a sister concern of HiMedia,** manufactures high-quality organic agricultural products such as Biostimulants (like SuprrBeon™, Warkem's HiFoliar Nutrient®), Organic fertilizers/manure in granular form (like Warkem's Soil Organic Supplement®, Warkem's Phosphate Rich Organic Manure®, which replace traditional chemical fertilizers like urea and DAP), Soil organic conditioners (like HumiKure®), Bio-fertilizers, Bioinsecticides, Bionematicides, Orgicare™(series of water-soluble nutrients), Neem Botanicals (Super Aza-Q series), Integrated Pest Management (like pheromone lures & traps, sticky pads, and rolls) and also manufactures Water, soil, and plant tissue testing kits.

HiMedia takes its Corporate Social Responsibilities very seriously and is always at the forefront when it comes to protecting and preserving the environment and exercising sustainable practices for the same. Accordingly, in order not to damage the environment, HiMedia treats all its effluents and uses them for irrigation of gardens in its facilities and persistently promotes sustainable practices in its operations. HiMedia also whole-heartedly collaborates with Jupiter Hospital by providing for concessional surgery subsidized package, supports Bhakti Vedanta Hospital and Research Institute, Deepstambh Foundation, Isha Vidhya, etc., and has also established an 'Autism Intervention Centre' for children at the Sion Hospital. At the same time, HiMedia's employers and employees, who are as proud of our traditions as much as they are eager to embrace modernity in scientific research, traditionally celebrate various festivals with enthusiasm!

The Scientific Community has duly acknowledged HiMedia's exemplary work in **'The Handbook of Microbiology Media'** and '**The Genus Yersinia-Entering the Functional Genomic Era',** a Russian book.

HiMedia's relentless intentions and dedicated efforts have been honored by innumerable **prestigious awards** like the **'Pride of Maharashtra Award'** awarded by Maharashtra Industrial and Economic Development Association (MIEDA) under the category **'Best Company of The Year Award',** during the inauguration of the 5th Edition of 'Maharashtra Economic Summit' in Mumbai, the **'Industry Achievement Award-Pharmaceuticals,'** conferred by Hurun India at Taj Lands' End, Mumbai,on February 2nd 2023, and **'India's top Biosupplier Award for 2021-22'** by Biospectrum in the year 2023.

Known to put **Safety and Quality** above everything, HiMedia has also been decorated with respectable **Certificates like ISO 9001:2015, ISO 13485:2016, WHO-GMP, and IVD manufacturing license granted by CDSCO, INDIA.**

Not one to rest on its extraordinary past laurels, HiMedia is, every single day inching and working towards greater greatness in the future. Equipped with ambitious plans for the future, HiMedia intends to continue its endeavor of scaling new heights, pushing every boundary and limitation, and achieving a formidable position of value, trust, and respect for itself in the World of Biosciences.

Future Plans :

• Providing service of Microbial identification by MALDI-TOF MS & fermentation, antimicrobial susceptibility testing, disinfectant validation testing, conducting training courses for microbiology, new media development, rapid techniques in microbial testing, besides development of customized MIC strip manufacture, and Advanced version of Air Sampler with Software.

• Emphasizes media development, optimization, and customization, focusing on advancing serum-free media and serum replacement solutions like NuSera™ for research, as well as specifically customizing these innovations for cultivated meat. HiMedia aims to enhance its portfolio in bio-inks, bioscaffolds, and monoclonal antibody production. HiMedia's strategy includes pushing the boundaries in 3D bioprinting materials and broadening its range of serum-free media. HiMedia is set to streamline biosimilar and monoclonal antibody production processes.

• **For Clinical Diagnostics,** specific panel-based multiplex PCR kits, antigen-antibody-based ELISA, and lateral flow kits are in the R&D stage. **For Oncology Research**, cell-free RNA isolation using InstaNX Mag24 and RT-PCR kits are to be developed. Noninvasive prenatal test (NIPT) has become very convenient by using the automated HiPurA® Cell-free DNA Purification Kit which can process 1 – 24 NIPT samples in just 75 minutes resulting in high-quality circulating cell-free DNA (cfDNA). **In the Forensic segment,** STR amplification systems are under development for human identification, paternity, and relationship testing. The newly launched instruments Insta-Q96 ®AG series of Real-time PCR machines, Prima ® Flexi Series of PCR Thermal Cyclers, and InstaLiqWee™ Robo Automatic Liquid Handling Instrument will take molecular research to the next level with high precision. For launching more services in the clinical sector, the accreditation process (under ISO 15189:2022) has been initiated. Furthermore, the division will also be undertaking initiatives to enable the launch of HiMedia's line of **Next Generation Sequencing**

Library preparation solutions to address the critical need of the genomic services market. This will be coupled with our very own Liquid Handling system that will enable easy automation of the library preparation process.

• HiMedia has invested in a probiotic innovation facility at Nagpur, genome sequencing service, Maldi-TOF Mass Spectrometry (MS) services for the identification of microbes, 3D bioprinting, and Liquid chromatography–mass spectrometry (LCMS).

• HiMedia has also ventured into an ambitious Agro-based project.

• HiMedia has got a tech transfer of diagnostics technology from Bhabha Atomic Research Centre.

• HiMedia has signed an agreement with the National Institute of High-Security Animal Diseases (NISHAD) for the development of an indirect ELISA Kit for Avian Influenza virus antibody detection in chickens.

• HiMedia plans to enter the fields of pre-biotics, probiotics, and post-biotics for humans, livestock, and agricultural crops.

HiMedia's 50-year journey has been **as spectacular and beautiful as life itself,** with its surprising turns and twists, its remarkable ups and downs, and its superb lessons and learnings!

HiMedia, stands today, as a sum total of the Warke family's ambition and vision, the endurance and optimization of their dedicated and motivated employees, and above all their self-belief!

HiMedia today is **also a sum total** of the uncompromising efforts of its qualified engineers, researchers, factory employees, and efficient staff, each of whom, strongly believing that **HiMedia** means, *'more than mere Bioscience Business',* have **aligned themselves** with the Company's motto of *'Life is Precious',* and have always put forth their best, for the betterment of the society!

The three founder's vision and determination have enabled HiMedia to become a premium life science company, with over 15,000 products, 28,000 SKUs marketed in over 150 countries, 14 manufacturing locations, 3 headquarters in India, Europe, Brazil and USA catering to Research, Pharma and Biopharma, Vaccine, Food and Beverage industries, Hospitals and diagnostic Laboratories, Schools and Universities.

With such remarkable achievements **behind us** and a lot more **planned for the future**, we at **HiMedia, at the age of 50, feel that *our incredible voyage has just begun……***

The above was a **short description of HiMedia's** inspiring and exciting journey.

Ready Prepared Media

5-70

MP813IA	BCYE Agar Plate w/ GVPC
MP434	GC Agar Plate
MP154	Reinforced Clostridial Agar Plate
MPV2113GT	Tryptone Soya HiVeg™ Agar Plate w/ Sodium pyruvate, Yeast extract & LTHTh, Modified (γ-irradiated, Triple Pack)
MP1946LGT	Sabouraud Chloramphenicol Agar Plate w/ 1% Glycerol (Lockable Plate, γ-irradiated, Triple Pack)
MP1995LGT	Sabouraud Dextrose Agar Plate w/ LTHTh (Lockable Plate, γ-irradiated, Triple Pack)
SP186LGT	Dey Engley Neutralizing Agar Plate (Lockable Plate, γ-irradiated, Triple Pack)
SP1995LGT	Sabouraud Dextrose Agar Plate w/ LTHTh (Lockable Plate, γ-irradiated, Triple Pack)
SP2112ABLGT	SCDA Plate w/ Sodium pyruvate, Yeats extract& LTHTh & 1% Glycerol (Barcoded, Lockable, γ- irradiated, Triple Pack)
SP290LGT	Soyabean Casein Digest Agar Plate (Tryptone Soya Agar Plate) (Lockable Plate, γ-irradiated, Triple Pack)
SP1691BLGT	Tryptone Soya Agar Plate w/ LTHTh (Barcoded, Lockable, γ-irradiated, Triple Pack)
SP1691LGT	Tryptone Soya Agar Plate w/ LTHTh (Lockable Plate, γ-irradiated, Triple Pack)
SP5562GT	SCDA Plate w/ 0.5% Soya Lecithin & 0.7% Polysorbate 80 (γ-irradiated, Triple Pack)
MP5569GT	SCDA w/1% Glycerol, 0.5 % Polysorbate 80, 0.07% Soya Lecithin & 10IU/Plate β-lactamase mixture (γ-irradiated, Triple Pack)
MP5570GT	SCDA w/1% Glycerol, 0.5 % Polysorbate 80, 0.07% Soya Lecithin & 15IU/Plate β-lactamase mixture (γ-irradiated, Triple Pack)
MP5566GT	Tryptone Soya Agar Plate w/ Lecithin, Polysorbate 80 & β lactamase II (γ-irradiated, Triple Pack)
SP5569GT	SCDA w/1% Glycerol, 0.5 % Polysorbate 80, 0.07% Soya Lecithin & 10IU/Plate β-Lactamase mixture (γ-irradiated, Triple Pack)
SP5570GT	SCDA w/1% Glycerol, 0.5 % Polysorbate 80, 0.07% Soya Lecithin & 15IU/Plate β-Lactamase mixture (γ-irradiated, Triple Pack)
SP1691BGT	Tryptone Soya Agar Plate w/ LTHTh (Barcoded, γ-irradiated, Triple pack)
MF040	Chromogenic Bacillus Medium (without Membrane filter)
MF041	Chromogenic Listeria Medium (without Membrane filter)
MF042	Chromogenic Listeria Ottaviani Agasti Medium
LQ361IX	Buffered Sodium Chloride Peptone Solution pH 7.0 w/ 3% Tween 80, 0.3% Soya Lecithin & 0.1% L-Histidine hydrochloride
LQ372X	Middlebrook 7H9 Broth w/ Glycerol
LQ369X	Modified Postgate Medium B
LQ370X	Phenol Red Dextrose Broth, pH 7.00 (AFB Media)
LQ379IX	Phosphate Buffer, pH 7.2 (1:800 Dilution)
LQ361C	Buffered Sodium Chloride Peptone Solution pH 7.0 w/ 3% Tween 80, 0.3% Soya Lecithin & 0.1% L-Histidine hydrochloride
LQ362C	Dey Engley Neutralizing Broth w/o BCP
LQ584C	Dey Engley Neutralizing Broth w/o BCP (Double strength)
LQ377CCL	Mueller Hinton Broth No. 2 Control Cations
LQ381C	Neutralizing fluid with 0.3% Soya Lecithin & 3% Polysorbate 80
LQ579CS	0.1% Peptone w/1% Tween 80
LQ580CS	0.1% Peptone w/0.07% Soya Lecithin and 4% Tween 20
LQ379C	Phosphate Buffer, pH 7.2 (1:800 Dilution)
LQ371C	SCDM w/ 0.1% Tween 20
LQ378C	SCDM w/ 0.1% Tween 80 & 0.05% Lecithin
LQ367CS	SCDM w/ 4% Soya Lecithin & 6% Polysorbate 80 (Single Strength)
LQ366CS	SCDM w/ 4% Soya Lecithin & 6% Polysorbate 80 (Double Strength)
LQ368CS	SCDM w/ 6% Soya Lecithin & 8% Polysorbate 20
LQ365CS	SCDM w/ 6% Soya Lecithin & 8% Polysorbate 80
LQ198C	Tryptone Soya Broth w/ 0.1% Polysorbate 80 (SCDM w/ 0.1% Polysorbate 80)
LQ026ACDW	Fluid Thioglycollate Medium, Double packed
LQ024DW	Sterility Kit - I (Crimp Pack) (Double Wrapped)
LQ024ADW	Sterility Kit - I (Screw cap) (Double Wrapped)
LQ123XCK	Buffered Sodium Chloride Peptone Solution pH 7.0
LQ165CK	Phosphate Buffer, pH 7.2
SM414CCL	Letheen Agar
SM137CCL	Malt Extract Agar
SM5557C	Sabouraud Dextrose Agar w/ 1% Soya lecithin & 4% Polysorbate 20
SM5552C	SCDA w/ 1% Soya Lecithin & 4% Polysorbate 20
SM608CCL	Thioglycollate Agar
SM1272CC	Tryptone Yeast Extract Agar

INTRODUCING New

HD050	HiDip™ TSA-Rose Bengal Medium - Cetri Medium
HD051	HiDip™ PCA-HiCrome™ Chromogenic Coliform Agar (CCA Agar)
HD052	HiDip™ SDG-TGE
MS5553	HiCulture™ Swab w/0.9% saline and second tube containing 0.9% saline , 0.07% Soya Lecithin & 0.5% polysorbate 80 (γ-irradiated, Triple pack)
MS5554	HiCulture™ Swab w/ Nylon swab, one tube containing 0.9% saline & second tube contain SCDM w/ 25000IU/lit β-lactamase I.

MS5307IX	HiCulture™ Transport Swabs w/ 9 ml Buffered Sodium Chloride Peptone Solution, pH 7.00
MS5307N	HiCulture™ Sterile Nylon Swab w/ Buffered Sodium Chloride Peptone Solution
MS5576GT	EM-CULT™ Pre wetted swab w/ Dey Engley Neutralizing Broth w/ BCP (γ-irradiated, Triple Pack)
MS5448GT	EM-CULT™ PA Pre wetted swab w/ Soyabean Casein Digest Medium w/ Tween 80 & Lecithin (γ-irradiated, Triple Pack)
MS5575GT	EM-CULT™ Pre wetted swab w/ Saline (γ-irradiated, Triple Pack)

Dehydrated Culture Media, Bases and Supplements 73-220

M2172	Fraser Broth Base, Modified w/o NaCl
GM1991AI	HiCrome™ Chromogenic Coliform Agar (CCA Agar) w/1% Agar, Granulated
M2167	HiCrome™ m-EI Agar Base
M2169I	Modified Eugon LT Broth
M2164	Modified Postgate Medium B
M2165I	Modified Scholten's Broth
M2168	Nutrient Broth

M2170	Salt Sabouraud Dulcitol Agar
M2171	Salt Sabouraud Dulcitol Broth
M2173I	Semisolid Modified Scholten's Agar (ssMSA)
M181I	Sulfite Indole Motility Medium (SIM Agar)
GM1483	Universal Beer Agar Modified, Granulated
GM031I	XLD Agar, Modified, Granulated
FD367	MEI Selective Supplement

Antimicrobial Susceptibility Systems (AST) 247-334

EM702	Arbekacin
EM714	Cefepime/Sulbactam

Bacteriological Differentiation Aids 337-349

DD057	Nitrocefin Discs
DD058	Urease Discs (50 discs / vl)

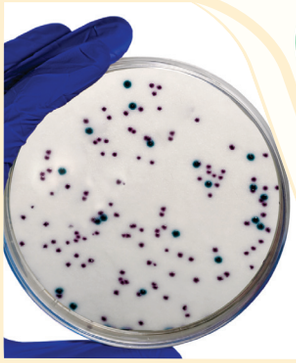
PRODUCT FOCUS

EM-CULT™ Pre-wetted Swabs New

- Convenient, flexible, ready to use and easy to applicable and handling EM-CULT™ Swabs
- The qualitative test for monitoring microbial contamination
- A single tube containing pre- wetted swabs and medium within itself, separated by flexible breakable snap valve, that allows to flow through tube and wet swabs
- Applicable in Pharmaceutical, food and beverages industries wherein, surface monitoring of uneven surfaces or difficult accessible area can be carried out



Code no. : **MS5448GT, MS575GT, MS576GT,**
Refer Page : **53**

K156 HiVibri-O-Trap Kit

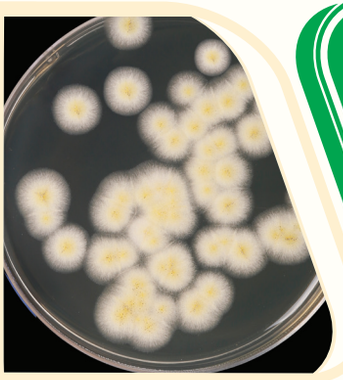
- Highly nutritious medium, supports the growth of desired microorganisms - *Vibrio* sp
- Chromogenic technology imparts distinct colours making identification easier
- Selective medium helps to inhibit the unwanted microbial flora
- Enumeration and differentiation are easier
- Disinfectant solution provided to ensure safe disposal

Code no. : **K156**
Refer Page : **70**

Ready™ PREPARED HIMEDIA

LQ374M Modified Guillards Media

- Precisely formulated for diatoms and algae
- Enhances growth and coloration
- Easy to use and store
- Environmentally conscious production
- Medium & Kit K156 provieds complete solution for Aqua Culture



Code no. : **LQ374M**

Ready™ PREPARED HIMEDIA

Rehydration Fluid for GPT (Fungus)

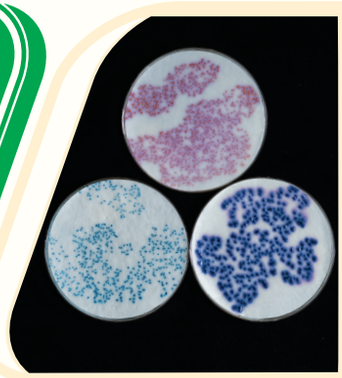
- Growth Promotion Tests (GPT), described in various pharmacopoeias (USP, BP, EP, JP, IP) is carried out to determine suitability of test medium for growth of specified microorganisms.
- Dilution methods for GPT are tedious while commercial cfu preparations are expensive.
- Aquino™ Rehydrol F for fungus.
- Culture preparations in this fluid can be stored upto 20 days
- Reduces overall time taken for inoculum preparation.
- Overcomes tedious dilutions preparations.
- Cost effective.

Code no. : **LQ313IX**
Refer Page : **28**

AQUINO™ REHYDROL-F

GRANTED PATENT GRANTED

PRODUCT FOCUS



Code no. :
HPS001 - HPS010

HiPetriSlim™ Product Range

- Ready-to-use medium in dry and concise form
- Recommended for testing liquid samples
- Widespread Industrial application (Water, Food & Cosmetics)
- Compact packing reduces storage space
- No Preparation time
- User-friendly ready-to-use products
- Available in wide range of products that can be customized as per requirement

Code no. : **K158**
Refer Page :
70

K158 Rapid HiUTI Kit

- Ready-to-use kit for detection of UTI pathogens
- Chromogenic technology imparts distinct colours making identification easier
- Enumeration and differentiation of UTI pathogens is easier

Refer Page :
247-248

HiMIC™ Plate Kit

- A breakthrough in the evaluation of MIC with ease & accuracy
- Easy breakpoint-based visual evaluation
- Interpretation for Sensitive, Intermediate and Resistance as per CLSI & EUCAST guidelines
- 7 concentrations in a single strip covering breakpoint scale
- 12 tests per kit with detachable strips inclusive of HiMIC™ diluent, HiMIC™ reading card & HiMIC™ incubation tray
- No instrumentation required

Refer Page :
67-68

HiEnviro-Sponge™ for Sample Collection

- Biocide free sponges with no impact on recovery/viability of organisms
- Durable sponge for all types of environmental surfaces
- Available in Dry format and Hydrated with various media/buffers
- Sponge stick version allows to reach difficult to reach areas
- Sponges & sponge stick in completely sealed sampling bags and gamma irradiated providing assurance of sterility

PRODUCT FOCUS

HiBioKem ID™

- Instrument with camera for the automated identification of microorganisms using Biochemical strips
- Automated System for identification for microorganisms
- Compatible with biochemical kits (KB…)
- Ideal for detection of pathogen from pharma, food, water and clinical sector
- Saves time and labour
- Rapid, reliable and reproducible technology that is easy to perform

Code no. : **LA1142**
Refer Page : **941**

HIMEDIA® HiBioKem ID™

HiCFU Counter C™

- Instrument with camera for the automated determination of the colony count or CFU (Colony forming unit) on Agar plate
- Automated system for determination of colony count or CFU (Colony forming unit) on Agar plate
- Accurate and time saving
- Avoids manual errors
- Widespread application in all industrial sectors including pharma, food, water, dairy and research institutes
- Finds application in CFU determination while performing GPT (Growth Promotion Test)
- Economical

Code no. : **LA1143**
Refer Page : **941**

HIMEDIA® HiCFU Counter C™ COLONY COUNTER

Nitrocefin Disc

- Nitrocefin impregnated ready to use disc
- Permits rapid detection of β- lactamase produced by Gram positive and Gram-negative microorganisms that confers resistance to penicillins and cephalosporins.
- Sensitive and effortless interpretation- colour change from pale yellow to pink indicates positive reaction

Code no. : **DD058**
Refer Page : **20**

Ready™ PREPARED HIMEDIA

Urease Disc

- Urea impregnated ready to use disc.
- Streamlined product for differentiation of *Proteus* species from *Salmonella* and *Shigella* species based on urea utilization method.
- Effortless testing and easy result interpretation.

Code no. : **DD057**
Refer Page : **20**

Ready™ PREPARED HIMEDIA

CHOin1™

Chemically defined, Animal Component Free, Serum free CHO Medium and Feed

- Customised Media Development
- Customised Media Optimization
- CHO Monoclone Generation and Validation
- Spent Media Analysis
- Process Validation

Food Grade Chemicals

Biochemicals Meeting Food grade Testing Specification

- 100% food-grade,
- Animal free
- Allergen free food products.
- Edible amino acids
- Sugar, salts, acids, vitamins

Code no. : **SFM039AP-10L & SFM038AP-10L**

Refer Page : 412

HEKin1™ Media for Viral Vaccine Production

Serum Free & Animal Component Free Media Designed for Growth of HEK293

- Scalability for use in shake flasks bioreactors
- Completely defined system eliminates variability
- Supports high cell density, culture longevity and increased yield
- Manufactured in GMP ISO 9001 certified facility

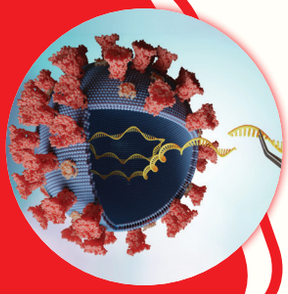
Cultivated Meat Media

Serum Free Media Optimization and Bioprocessing Services for Customer Cells

- Customised Media
- Food grade and feed grade media
- 60T/day media manufacturing capacity
- cGMP/ USFDA/ ISO22000 Compliant plant
- Serum-free media optimization & Bio-processing services
- Food grade testing as per regulatory guidelines

PRODUCT FOCUS

Vaccine Production Platform



Chemically defined Animal free, Serum free media designed for growth of BHK-21 & Chick embryo primary fibroblasts

- Media : CELLin1™
- Roller Bottle : Smooth ramping, digitally controlled rotation accurate to 0.01 rpm
- Erlenmeyer Flask
  - Available in PETG and Polycarbonate,
  - Ideal for Shaker Culture Application

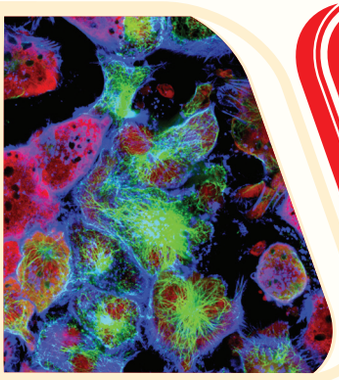
Refer Page : 410-414

Code no. : **SFM036AP, TCP116, AI0091, TCP116**

Clean Room Garment

- Suitable for working with ISO class 4 and higher
- Light weight, Breathable fabric, Shrink resistant
- washable and Autoclavable
- Available in various sizes S to 5XL
- Available colour

Refer Page : 604-606

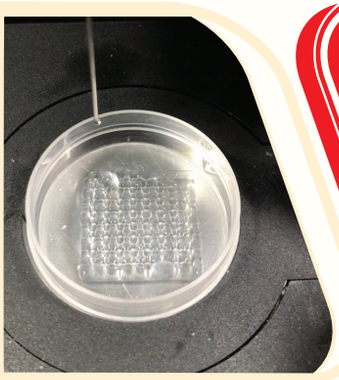


Code no. : **TCP113 - TCP311**

ATCC

Cell lines and Cell line-related services ATCC offers a complex array of human, animal, insect, fish and stem cells to choose from.

- Human and Animal Cell Lines
- Cell Culture Reagents, Media and Antibiotics
- HTERT, Luciferase Cell Lines, Tumor Cell Panels (TCP), Human Cancer Model
- Services- Cell Proliferation, Mycoplasma Kit and STR authentication Services



Refer Page : 399-400

Urban Farming systems

- Innovative and dynamic systems termed as 'Home farm series' gives the opportunity to have your own garden.
- Right from the kids to adults, the whole family can indulge in hydroponic farming.
- Compared to traditional soil cultivation, requires less water and less space and produces more yield.
- Extremely simple to assemble and use; Great for beginners! No experience required; It is easy to take care, no arable land, no weeds, saving time and energy.

Refer Page : 839

higronics ideas to grow

Nutrients

- The hydroponic nutrient solution is the sole source of nutrients to the plant.
- The advanced manufacturing technology used in the process results in perfect homogenized blend of nutrients.
- Unique blend of macro and micro nutrients designed specifically enhance all stages of plant growth

Refer Page : 846

higronics ideas to grow

Automation-Autogrow

- Intelligrow is a cloud based solution which enables growers to access, set, monitor and manage their Intellidose and Intelliclimate control systems- anywhere, anytime.
- It consists of :
- Intellidose, Intelliclimate, Intellilink,pH mini and EC mini.
- It is fully customizable, perfect for multiple crop types and flexible.

RESEARCH INTERFACE

Edward Jenner

A healer whose pioneering spirit unlocked the door to a world free from smallpox's grip.

INTRO

Edward Jenner, an English physician, played a crucial role in developing and promoting a smallpox vaccination. His groundbreaking efforts not only saved numerous lives but also earned him the titles of the 'father of immunology' and, subsequently, vaccinations.

Born on May 17, 1749, in Berkeley, Gloucestershire, Jenner's enduring impact is closely tied to his crucial involvement in the advancement of the smallpox vaccine. His birth coincided with a period of evolving practices and education in British medicine. The traditional distinction between physicians trained at Oxford or Cambridge and less-educated apothecaries or surgeons, who gained medical knowledge through apprenticeship rather than formal academia, was gradually fading. Hospital work was gaining prominence during this transformative phase in British medical history.

Jenner, born into a rural environment to the clergyman Stephen Jenner and his wife Sarah, faced an early tragedy with the loss of his father at the tender age of five. Raised by an elder brother, also a clergyman, Jenner developed a deep love for nature. His educational journey took him to schools in Wotton-under-Edge and Cirencester. During this period, he underwent smallpox inoculation, which had a lasting impact on his overall health. At the age of 13, he embarked on an apprenticeship with a local surgeon, actively participating in this endeavor by the age of 14. Over the subsequent eight years, he gained a thorough understanding of both medical and surgical practices. Upon completing his apprenticeship at 21, Jenner moved to London, becoming the house pupil of John Hunter, a distinguished surgeon at St. George's Hospital. Hunter's influence extended beyond surgery, encompassing roles as an anatomist, biologist, and experimentalist. In addition to collecting biological specimens, Hunter dedicated attention to addressing challenges in physiology and function.

The strong bond of friendship between the two individuals endured until Hunter's death in 1793. Jenner could not have found anyone else who provided the kind of inspiration that firmly reinforced his innate inclination—a broad fascination with biological phenomena, honed powers of observation, a sharpened critical mindset, and a reliance on experimental inquiry. It was from Hunter that Jenner received the distinctive counsel, "Why engage in mere speculation—why not embark on the experiment?"

Apart from his expertise and background in biology, Jenner advanced in the field of clinical surgery. Following his studies in London from 1770 to 1773, he returned to rural practice in Berkeley and achieved considerable success. Jenner proved himself to be capable, adept, and well-liked. Alongside his medical practice, he actively participated in two medical societies dedicated to the advancement of medical knowledge and contributed occasional medical papers. Beyond his medical pursuits, Jenner engaged in playing the violin within a musical club, composed light verse, and, as a naturalist, conducted numerous observations, particularly focusing on the nesting behaviors of the cuckoo and bird migration. Additionally, he gathered specimens for Hunter, leading to the preservation of many letters from Hunter to Jenner, though regrettably, Jenner's letters to Hunter have been lost. After a romantic setback in 1778, Jenner entered marriage in 1788.

In the 18th century, smallpox was prevalent, with occasional outbreaks of intense severity resulting in a high death rate. This disease, a major cause of mortality during that era, did not discriminate based on social class, and patients who recovered often experienced disfigurement. The primary method to combat smallpox was variolation, a primitive form of vaccination involving intentionally infecting a healthy individual with "matter" from a patient undergoing a mild smallpox attack. This practice, originating in China and India, relied on two key concepts: first, that one episode of smallpox provided

HIMEDIA®

effective protection against subsequent occurrences, and second, that deliberately infecting a person with a mild case of the disease would confer safe immunity. In modern terms, it was an "elective" infection given to a person in good health. Unfortunately, the transmitted disease didn't always remain mild, leading to occasional mortality. Moreover, the inoculated person could spread the disease to others, serving as a focal point of infection.

Jenner was struck by the observation that milkmaids who were in close contact with cows, very rarely contracted the disease. With this revelation, Jenner was interested in testing a theory that those who had experienced cowpox—a relatively harmless disease contracted from cattle—were immune to smallpox, meaning they could not be infected, whether accidentally or intentionally exposed. Contemplating this phenomenon, Jenner deduced that not only did cowpox provide protection against smallpox, but it could also be deliberately transmitted from one person to another as a protective mechanism.

The utilization of the cowpox virus in this manner had been experimented with sporadically in the past. For instance, farmers like Benjamin Jesty intentionally exposed their families to cowpox infections. Nevertheless, these informal trials failed to substantiate anything significant to the skeptical medical and scientific community.

In May 1796, Jenner identified a young dairymaid named Sarah Nelmes, who had recently contracted cowpox on her hand. On May 14, utilizing material from Sarah's lesions, he inoculated an eight-year-old boy named James Phipps, who had never experienced smallpox. Phipps exhibited slight illness over the next 9 days but fully recovered on the 10th. On July 1, Jenner inoculated the boy again, this time with smallpox material. No disease manifested; complete protection was evident. In 1798, after incorporating additional cases, Jenner privately published a concise book titled "An Inquiry into the Causes and Effects of the Variolae Vaccine."

The response to the publication was not immediately favorable. Jenner went to London in search of volunteers for vaccination but encountered little success during his three-month stay. Vaccination gained popularity in London through the efforts of others, particularly surgeon Henry Cline, to whom Jenner had provided some inoculant, and doctors George Pearson and William Woodville. Challenges emerged, including attempts to diminish Jenner's credit by Pearson and the contamination of cowpox matter with the smallpox virus by Woodville, a physician in a smallpox hospital. Despite these difficulties, vaccination rapidly demonstrated its effectiveness, and Jenner actively promoted its adoption. The practice quickly spread to America, Europe, and eventually worldwide.

Although faced with errors, occasional controversies, and opposition, the smallpox death rate significantly declined due to vaccination. Jenner received global recognition and numerous honors, yet he did not seek personal enrichment from his discovery. He dedicated substantial time to advocating for vaccination, leading to the detriment of his private practice and personal affairs. In 1802, Parliament granted him £10,000, followed by an additional £20,000 in 1806. Despite honors, Jenner faced opposition, attacks, and defamation, but he persisted in his vaccination efforts. His wife, afflicted with tuberculosis, passed away in 1815, prompting Jenner's retirement from public life.

He passed away on January 25, 1823, following a stroke from which he never recovered. "It is said that through his contributions to vaccinations, Jenner saved more lives than anyone else." Jenner's efforts would ultimately be validated; in 1840, 17 years after his death, the British government, through an act of Parliament, prohibited the use of variolation and provided free cowpox inoculation. By 1979, the World Health Organization (WHO) declared smallpox eradicated—a remarkable accomplishment in which Jenner's pioneering work on immunization played a crucial role.

His esteemed reputation led to his appointment as a physician extraordinary to King George IV and conferred the title of Justice of the Peace upon him. HiMedia Inspired by the philosophy of Edward Jenner embracing the visionary philosophy of Edward Jenner, HiMedia stands at the forefront of progress in vaccine development. Committed to advancing the field, HiMedia has played a crucial role in supporting the development and manufacturing of media and adjuvants for the next generation of vaccines. Through its steadfast support, HiMedia empowers researchers and manufacturers to explore new frontiers in vaccine technology. By fostering collaboration and leveraging expertise, HiMedia continues to be a key player in the global effort to address emerging health challenges, echoing the spirit of Edward Jenner's transformative contributions to immunology.

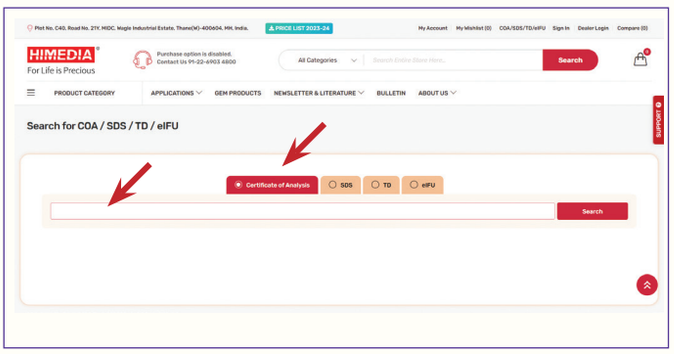
COA & SDS

HiMedia Laboratories website – www.himedialabs.com provides you the service to download Certificate of Analysis (COA) and Multilingual Safety Data Sheet (SDS) from the website.

Follow the highlighted steps to download the Certificate of Analysis (COA) and Safety Data Sheet (SDS).

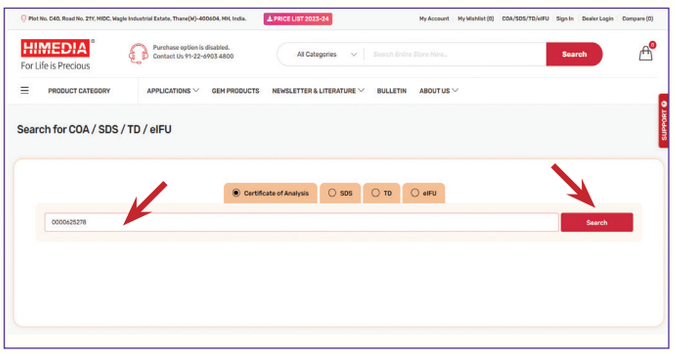
To Access this Option -

Open any browser viz, Internet Explorer, Mozilla Firefox and Google Chrome. Type the URL- www.himedialabs.com. This will take you to the home page of HiMedia Laboratories as shown in the screenshot here. Then click on the COA/SDS/TD/eIFU link on top right of the home page to download COA/SDS, as seen in the screen 1.1.



Screen 1.1

A. Certificate of Analysis (COA) :

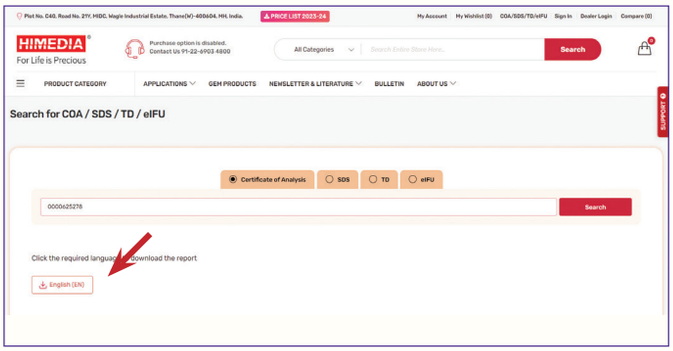


This will open up the COA/SDS/TD/eIFU page as seen in screen 1.2. Here you have to select the option of Certificate of Analysis.

Once you select Certificate of Analysis, it will show an area where you have to enter Lot No. or Batch No.

The same is seen as under the screen 1.3 below.

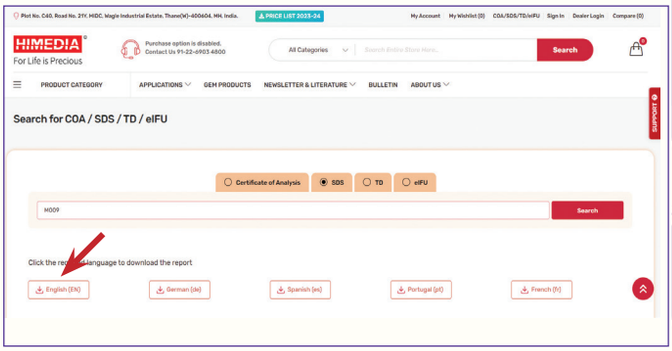
Screen 1.2



Screen 1.3

INSTRUCTIONS FOR DOWNLOADING COA & SDS

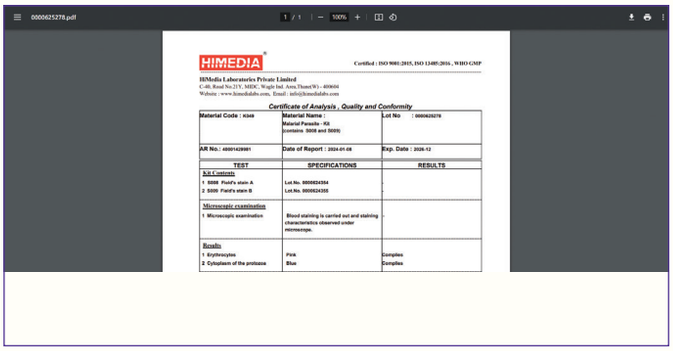
Press "Search" Key :



After you enter the Lot No. and select the option of Certificate of Analysis, this will process and show the link to the file with multi-languages for Certificate of Analysis as shown in screen 1.4. Click on the link to view the COA in pdf format.

Screen 1.4

Press “Search” key to search for SDS :



This process will show the file link with multi-languages for SDS as shown in the screen 2.2. Click on the link to view the SDS in pdf format.

GENERAL INSTRUCTIONS TO THE USERS

PRELIMINARY PRECAUTIONS TO BE OBSERVED

The dehydrated media are highly hygroscopic and must be stored in a cool, dry place away from bright light. These media are meant for laboratory use only.

Carefully read the instructions given on the label. Note the ingredients, directions and use. Also note the expiry date and Lot number. Ensure before use that the medium is not deteriorated physically.

Culture Media have a tendency to form lumps due to following conditions :

(i) High humidity during storage

(ii) Container left open for too long

(iii) Container not tightly sealed after every use

(iv) Medium is too old and not recommended to use after alloted shelf life

Reconstitution of Dehydrated Media

For rehydration, use clean, undamaged glassware and distilled or deionized water that meets the specifications for purified water - U.S.P./I.P./E.P./B.P./J.P. Place appropriately weighed amount of the medium in a clean dry flask, 2-3 times larger than the final volume of the prepared medium. Add part of the required amount of distilled water and swirl to dissolve. Now gradually add the remaining water from the side of container. Majority of broth media are clear and dissolve at this stage. For completely dissolving, heat using an open flame, hot plate or boiling water bath taking care to avoid excessive heating or scorching of the medium.

Microwave oven can also be used for dissolving the medium completely by boiling. After initial boiling in the microwave oven, remove the medium and gently stir. Return the medium to the oven for repeated heating of short time periods. Continue until complete dissolution of Agar particles (approximately 2-3 minutes of total heating time).

pH Adjustment

The pH value of the reconstituted dehydrated culture media prepared with distilled or deionised or purified water (as specified) shall produce the equivalent value prescribed on the label at a temperature of 25°C. If old material is being used, it is recommended to check the pH and correct if necessary before use.

pH measurement and correction of the pH should be carried out at 25°C for liquid culture media and reconstituted solid (Powder / Granulated) culture media. Also pH is verified at 40°C for solid (Powder/Granulated) culture media in molten state. For liquid culture media, pH measurement after sterilization cycle should be carried out by cooling the medium to 25°C. An aliquot of liquid medium is taken aseptically and measured for pH. In case of solid (Powder/Granulated) culture media, an aliquot of solid medium cooled to 40°C is taken aseptically and measured for pH. The temperature knob should be adjusted to 40°C. pH for solid media can also be measured after sterilization at 25°C as specified in different pharmacopoeias by use of surface electrode. The pH should be checked for value specified. It is corrected by adding 1N or 0.1N hydrochloric acid or sodium hydroxide solution to a sample of known volume taken from the reconstituted culture medium (e.g. 50 to 100ml). Finally after calculation, the required acid or alkali is added in the remaining prepared culture medium.

STERILIZATION

Moist Heat Sterilization

Moist heat in the form of pressurized steam is regarded as the most dependable method for the destruction of all forms of life, including bacterial spores. The autoclave is used to sterilize bacteriological media, glasswares and metal wares (19).

Dispense the dissolved medium and sterilize as directed on the label. Generally sterilization is done at 121°C (15 lbs pressure) minutes using an autoclave. Some media require sterilization temperature of 115°C or 118°C depending on the media composition which corresponds to 10 lbs or 12 lbs pressure respectively. Temperature pressure relation is listed in Table 1.

GENERAL INSTRUCTIONS TO THE USERS

5 lbs	108	226.4
10 lbs	116	240.8
15 lbs	121	249.8
20 lbs	127	260.6
25 lbs	131	267.8
30 lbs	134	273.2

*lbs - pounds per square inch

Efficiency of autoclaving should be ascertained from time to time. Temperature conditions inside autoclaves are not uniform. This can be tested by putting 2 bottles containing 2% w/v glucose in 2% w/v disodium phosphate in the autoclave at different places. Heat produces browning of solution. Bottle near steam inlet will be more brown than the one away from it. It is highly recommended that the users strictly follow the directions on the label.

When heat labile enrichments or supplements are to be added, the sterile media should be cooled before the additions. Additions are made aseptically to liquid media cooled to room temperature and to agar media cooled to 45-50°C as directed on the label. Some bile salt containing media such as XLD (Xylose Lysine Deoxycholate Agar (M031/ GM031), Hektoen Enteric Agar (M467/ GM467), Violet Red Bile Agar (M049/ GM049) should not be autoclaved. Heating the medium to boiling (100°C for 30 minutes) suffices. It is important to follow label directions.

Sterilization Check

It is recommended to check all the autoclaves regularly to ensure that their performance is effective and efficient. Physical measurements should be made of temperature and pressure readings. The quality of the steam must be checked including the steam and safety valves. The desired temperature must reach all parts of the load. Do not overload the autoclave chamber, and place contents such that there is a free flow of steam around the contents. While sterilizing media, plug tubes or flasks of liquids with nonabsorbent cotton or cap loosely (19). In certain cases, biological indicators are compulsory to demonstrate ability of the autoclave for sterilization. Chemical indicators will demonstrate the temperature attained or exceeded and some will indicate the time held at the specified temperature.

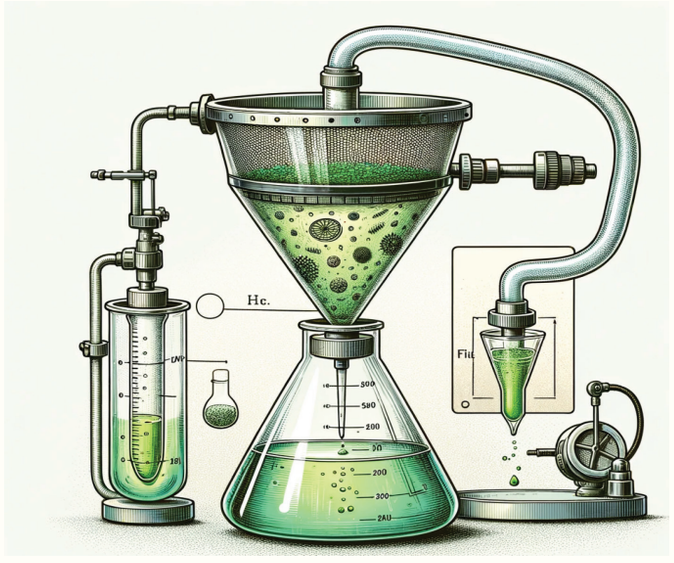
Fractional Sterilization

Before the development of the autoclave, liquids and other objects were sterilized by exposure to free flowing steam at 100°C for 30 minutes on each of 3 successive days with incubation periods between the steaming. This method is called as fractional sterilization because a fraction was accomplished on each day. Fractional sterilization has assumed renewed importance in modern microbiology with the development of high technology instrumentation and new chemical substances.

Boiling Water Bath

Moist heat kills microorganisms by denaturing their proteins. Immersion in boiling water is the first of several moist heat methods. Culture media containing agar or gelatin must be heated, in order to dissolve the media completely. However boiling water is not considered as a sterilizing agent.

Pasteurization



It is not the same as sterilization. Its purpose is to reduce the bacterial population of a liquid such as milk and to destroy organisms that may cause spoilage and human disease. Spores are not affected by pasteurization.

Sterilization by Filtration

Although heat is a valuable physical agent for controlling microorganisms, sometimes it is impractical to use it. Filters came into prominent use in microbiology as interest in viruses grew during the 1890's. The filter is a mechanical device for removing microorganisms from a solution. Sterilization by filtration can be performed under vacuum. As fluid passes through filter, organisms are trapped in the pores of the filter. Several types of filters are available e.g. Inorganic filters, Organic filters and Membrane filter is a third type of filter that has received broad acceptance. In Culture Media preparation membrane filters are widely used with a pore size of 0.22µ and 0.45µ.

Air can also be filtered to remove microorganisms. The filter generally used is a HEPA filter (High Efficiency Particulate Air). This

GENERAL INSTRUCTIONS TO THE USERS

can remove over 99% of all particles, including microorganisms with a diameter larger than 0.3 µm.

Dry Heat Sterilization

The dry heat sterilization time is 120 minutes at 160°C. It is employed for materials such as glassware's, metal instruments which can withstand higher temperatures.

The Direct Flame

The most rapid sterilization method is the use of direct flame in the process of incineration. The flame of Bunsen burner is employed for few seconds to sterilize the bacteriological loop before removing a sample from a culture tube and after inoculation (19).

HiLoop Electric Sterilizer

Incineration can also be done using an Electric loop steriliser (LA832) and is recommended for upto contact of 10-15 seconds.

Gamma Irradiation

Gamma irradiation requires many hours of exposure for sterilization. Gamma rays are generated by radioactive isotopes,

Cobalt 60. The risk of mycoplasma always lurks in the raw materials used. Moreover mycoplasma can move through 0.2µm filters and reach high titers without producing pH changes or media turbidity providing itself as an invisible threat. In such cases a prudent step ahead to provide maximum quality assurance is to provide gamma irradiated material. Gamma irradiation does not affect product performance and results in contaminant free materials, this has been evaluated by comparative studies on growth performance.

New

LA1152 LA1151

Chemical Disinfection

Chemical agents are effectively used to control the growth of microorganisms even though they do not achieve sterilization. Most disinfectants have some toxic effects therefore using protection is mandatory. Equipments and lab rooms can be decontaminated by fumigation with formaldehyde gas or UV radiation.

Effects of Overheating

High temperature and prolonged heating is a common cause of pH drift, darkening of medium, precipitation, poor gel strength and deterioration in the quality of the culture medium.

It is suggested that all the Culture Media should be in solution before sterilization otherwise there are chances of darkening of the medium (Maillard type reaction). Pouring of Sterilized media into the Petri plates.

(a) Pouring of Sterilized Media

Sterile agar media should be poured into plates at about 45-50°C (in molten stage) to avoid the formation of condensed water in the lids of the Petri plate. The medium should be evenly mixed without bubble formation and aseptically poured into sterile Petri plates. A volume of 18-20 ml molten agar medium is poured into Petri plates so that an agar layer thickness of atleast 2-3 mm is obtained. Before inoculation, ensure that the agar surface is dry to avoid microbial swarming. This can be done by drying at 30-40°C in an incubator for 15-20 minutes. Do not overdry agar plates.

(b) Addition of Supplements

Supplements may contain hazardous and toxic agents. Follow the instructions on the label/ inserts and rehydrate the supplement by adding the reconstitution fluid. Suspend the contents of vial by gently swirling. Check for complete dissolution, most of the supplements contain antibiotics or antibiotic mixtures. On rehydration and subsequent storage at 2-8°C, the performance of the supplement may not be at par with the freshly rehydrated supplements. Therefore it is advisable to use a freshly rehydrated supplement for optimum performance.

(c) Addition of Blood

Defibrinated blood is recommended for the preparation of blood agar media rather than blood containing an anticoagulant. It is preferable to use blood as fresh as possible. If stored blood (2-8°C, not frozen) is used, warm the blood in an incubator to about 35-37°C before adding to sterile cooled molten agar base (45-50°C).

Storage of Prepared Media

If the medium is not used on the same day of preparation, it should be stored properly in moisture proof containers to prevent drying of the medium. It is important to note that unless the stability of the prepared medium is known it should not be stored for longer periods. Similarly agar containing media should not be held at higher temperatures (40-50°C) for longer time as agar tends to clump. It is recommended to use fresh media than stored media. Media containing labile beta-lactam selective agents have very

GENERAL INSTRUCTIONS TO THE USERS

short active lives and therefore should be used within a few days of preparation.

Agar plates should be stored at 2-8°C in sealed conditions in containers to avoid loss of moisture. Liquid media in test tubes or flasks should also be provided with airtight seals. Loss of water can result in precipitation and crystallisation of certain substances in the Culture Media. The stability of prepared Culture Media is limited and it varies considerably.

If not otherwise specified under controlled conditions, media can be stored at 12 to 15°C for several months. Media should not be stored below 0°C as it destroys their gel structures. Before inoculation, plates should be carefully examined for contamination, uneven filling or bubbles on surface of agar, colour changes, haemolysis and cracks due to shrinking and loss of volume. Discard such defective plates or tubes.

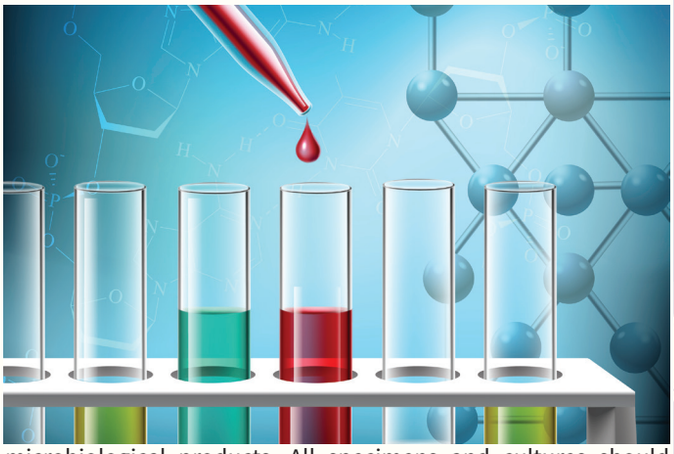
Quality Control

A new lot of culture medium is always tested in parallel with previously approved lot of the same culture medium. For cultural response serially dilute the cell suspension in normal saline so as to obtain 50 to 100 CFU per plate. Media used for sterility testing or for special application should be checked for GPT in accordance with respective Pharmacopoeias.

Quality Control Strains

If a culture medium is being subjected to quality control testing, quality control organisms are included. Microorganisms should be obtained from American Type Culture Collection (ATCC) or other commercial sources. While using commercial stock cultures, follow the manufacturer's recommendation for growth and maintenance.

The Pharmacopoeias, ISO 11133-2014, Standard Methods for the Examination of water and wastewater recommend specific test organisms to be used. The quality control of Culture Media is conducted with working cultures which are subcultures from reference strain. Working cultures may be stored at 2-8°C for up to 4 weeks.



Disposal of Prepared Media

(i) Laboratory Environment

The microbiology laboratory poses many hazards to unsuspecting and untrained people, therefore, access should be limited to those who have been informed of which actions they can perform safely. The environment in which microbiological cultures are handled must also be taken into account. Most countries have laid down their standards for handling microorganisms and accordingly categorised the laboratories to handle cultures. For the most dangerous organisms a totally contained and highly protected environment is specified. Violations of these rules and regulations may be considered as a criminal offence.

(ii) Personnel Practices

Handling of infectious materials and inoculated media should be done only by qualified personnel who has been trained in

microbiological products. All specimens and cultures should be handled properly and should not be disposed without autoclaving. User should ensure that any machinery or apparatus used and by chance contaminated must be safely disinfected or sterilized. Cultures in reusable glass vessels (e.g. conical flasks, culture test tubes, glass Petri Plates) must first be destroyed in the autoclave (approximately 30 minutes at 121°C). Autoclave used to sterilize Culture Media or other material should not used for disposal of material.

(iii) Biological Safety

It should be recognized that inoculation of Culture Media with organisms, deliberately or accidently leads to great numbers of organisms being produced. Such high concentration of any organisms are potentially dangerous and infectious, therefore, must be disposed off safely by approved methods. National guidelines for transport and storages of microbiological samples must be strictly followed. Contaminated as well as unused media must be disposed according to the local or national guidelines.

Handling of Dehydrated Culture Media

All the dehydrated Culture Media are supplied in fine powder or granulated form. These products are meant for carrying out bacteriological work in the laboratory as specified under the use of individual medium and should not be used for human or animal consumption directly or indirectly.

Culture Media should not be inhaled because irritation of the upper respiratory tract may occur. If skin rashes occur, avoid prolonged contact with these. Ensure that excessive dust is not produced while using powder media. Any residue should be washed off with ample cold water.

To prevent the risk of inhaling fine dust, it is recommended to use approved masks while handling dehydrated media. Safety Data Sheets are available for individual products.

HANDLING OF HAZARDOUS AND TOXIC PRODUCTS

A number of Culture Media may contain toxic substances as the constituents of the medium and therefore must be used in accordance with product specific 'Material Safety Data Sheet'. The product label specifies such relevant Risk and Phrases, if any toxic substances are present in the material.

GENERAL INSTRUCTIONS TO THE USERS

Sodium Azide

Generally, when sodium azide is used in any medium, the concentration is less than 1% which has low toxicity. However, some persons are sensitive to this substance and therefore precautions must be taken to prevent ingestions or inhalation of the dust. Sodium azide has a property to react with many metals, particularly copper and lead which produce explosive metal azides. It is recommended to observe strict regulation of local and national legislation of disposal. Sufficient water should be used to prevent the powder from remaining in contact with pipe line and drains. Such precautions are required to be observed in the case of any biological solution which contains sodium azide as a preservative.

Lithium Chloride

Lithium chloride is harmful. Avoid bodily contact and inhalation of vapours. On contact with skin immediately wash with plenty of water.

Basic Fuchsin

Basic Fuchsin is a potential carcinogen and care should be taken to avoid inhalation of the powdered dye and contact with the skin.

Sodium Hydrogen Selenite

Sodium Hydrogen Selenite is a highly toxic, teratogenic, corrosive agent. Hence it should be handled with great care. If there is skin contact wash immediately with plenty of water.

First Aid Measures

The following First Aid procedures should be followed in cases of accident while handling any of the toxic or hazardous products.

Inhalation

Person should be removed from the area of exposure. Should rest and keep warm and if required seek medical advice.

Skin Contact

It is suggested to remove all the contaminated clothings immediately and wash the affected area thoroughly with soap and water. After completing this procedure, if any symptoms occur, seek medical advice.

Ingestion

In case of ingestion of material, wash the mouth thoroughly with plenty of water. One pint of water should be drunk immediately and if any symptoms occur, seek medical advice.

Eye Contact

Eyes should be washed thoroughly with plenty of water. If required, seek medical advice.

Spillage

Following precautions must be observed if material is spilled.

For Large Quantities

Wear protective overalls, gloves, eye protection and face mask. Material should be collected in suitable container and then properly sealed. Disposal of such material is to be carried out according to local regulations. Wash away the residue with plenty of water.

For Small Quantities

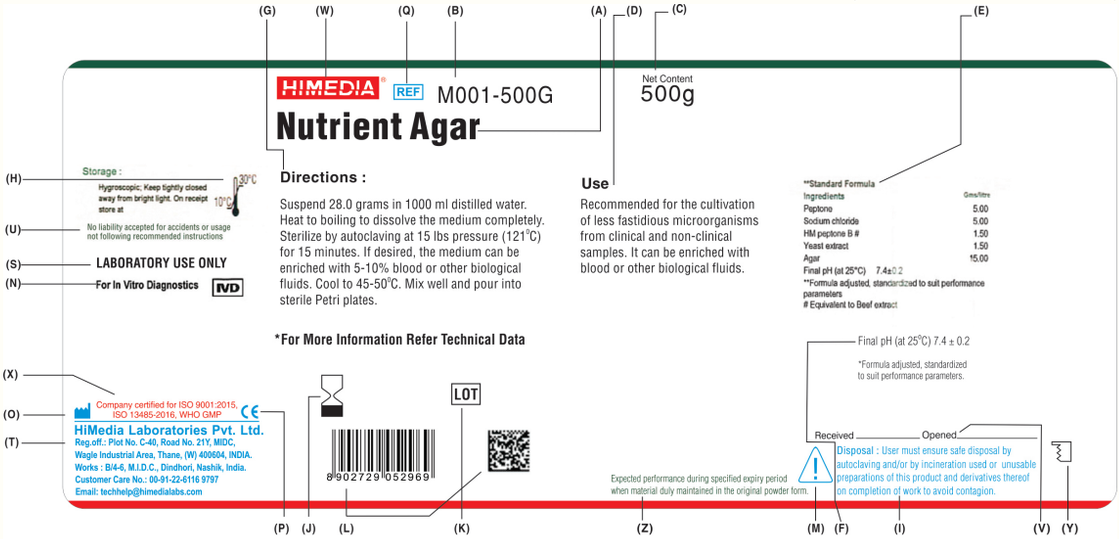
By using protective gloves, wash away the material with large volumes of running water.

SOME CARE NEEDED WHILE USING POWDER AND GRANULATED CULTURE MEDIA

Faults		Causes
Drift in pH	:	Overheating, incomplete mixing, prolonged sterilization, overheating of media containing carbohydrates, use of alkaline glass, impure water, repeated remelting, hydrolysis of ingredients, prolonged storage at high temperature.
Incomplete solubility	:	Inadequate heating of agar media, incomplete mixing, too small container, (Occasionally a precipitate can be an essential part of medium as in Bismuth Sulphite Agar).
Darkening	:	Overheating of the medium, excess amount of dehydrated powder, improper mixing.
Soft gel	:	Agar not in solution, incomplete reconstitution of dehydrated medium, acid hydrolysis of agar, failure to compensate for dilution of agar by the inoculum.
Loss of growth promoting property	:	Repeated remelting, excessive heating, incomplete mixing, failure to compensate for dilution of ingredients, disturbance in the formula by the inoculum carriers, etc.
Abnormal colour of medium	:	Deteriorated Dehydrated Medium, improperly washed glassware, impure water, overheating.
Toxicity of medium	:	Improperly washed glassware, impure water, burning or scorching of medium.
Contamination	:	Improper/ Insufficient sterilization, poor technique in adding enrichments and pouring plates.

Safety Check List

Handling and Use



1. Read the label before opening the container.
2. Check that the product is the one required.
3. Consider the hazards including violent reactions between chemicals. Wear protective clothing and equipment.
4. Open container carefully in well ventilated area.
5. Take care while extracting and using hazardous chemicals and use methods which reduce the risk of inhalation, ingestion and contact with skin, eyes and clothing.
6. Avoid using contaminated apparatus and instruments.
7. Seal the container tightly after use.
8. Do not eat, drink or smoke while handling and using chemicals.
9. Wash hands and exposed areas thoroughly and change contaminated clothing.
10. Deal with spillages using precautions and methods appropriate to the hazards.
11. Seek medical attention immediately if affected by chemicals and use appropriate first aid until medical attention is available.

Storage

1. Preferable storage temperature has been mentioned (as indicated on the label) for some items wherever required. All other products to be stored below 30°C.
2. Store in dry ventilated area protected from extremes of temperature and sources of ignition.
3. On opening, product should be properly stored dry, after tightly capping the bottle in order to prevent lump formation due to the hygroscopic nature of the product. Improper storage of the product may lead to lump formation. In such cases no liability is accepted by the Company.
4. Secure chemicals from unauthorized use.
5. Segregate stock to reduce hazards.
6. Inspect stocks from time to time and dispose off deteriorated materials.
7. Do not smoke where flammable chemicals are stored.
8. Take care in handling containers with hazardous residues.
9. It should be used by trained personnel only.

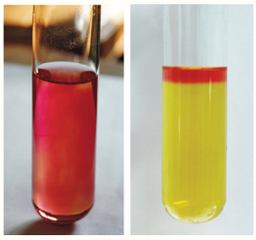
Troubleshooting (Commonly Encountered Problems While Using Dehydrated Culture Media)

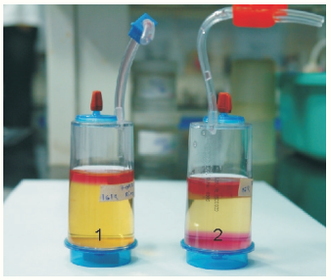
Abnormalities	Possible Causes	Troubleshooting Tips
Drift in pH	1. Overheating 2. Prolonged sterilization 3. Use of alkaline glass, residues in containers, impure water 4. Repeated remelting, hydrolysis of ingredients 5. Prolonged storage at high temperature 6. pH measured at a temperature above 25°C 7. Initial pH of distilled water	1. Do not overheat 2. Sterilization should be carried out according to the specified time and temperature 3. Check pH of the glassware 4. Reconstitute only the required amount of medium and avoid re-melting multiple times. Avoid preparing excess medium. 5. Store the media in a dry ventilated room protected from extremes of temperature 6. pH of carbohydrate containing media drastically changes on overheating 7. pH of distilled water should be preferably between 6.0-7.0. Therefore sterilization should be strictly done as per stipulated instructions. For media in which carbohydrate has to be externally added, sterilize the medium add carbohydrate separately and mix before dispensing.
	  1 2	1. M031-XLD Agar Standard colour of Medium - Red and Clear 2. M031-XLD Agar Haziness of the Medium due to acidic pH of distilled water
Incomplete Solubility	1. Inadequate heating of agar media, lack of homogenization 2. pH measured at a temperature above 25°C 3. Use of too small container. (Occasionally a precipitate can be a essential part of medium like Bismuth Sulphite Agar). 4. Residues in containers or use of alkaline glass	1. Boil the medium prior to sterilization 2. Check pH of the distilled water. The pH should be between 6.0 - 7.0. 3. Use sufficiently big containers 4. Check the pH of glass ware
	  1 2	1. M173 Mueller Hinton Agar-Non Homogeneous Medium 2. M173 Mueller Hinton Agar-Homogeneous Medium
Darkening	1. Overheating of the medium 2. Incorrect weighing of the medium, excess amount of dehydrated powder 3. Incorrect pH 4. Repeated remelting 5. The culture medium is expired or deteriorated	1. Do not overheat 2. Do not use excess powder. Reconstitute the medium powder, as per the gms/ litre. 3. Check pH of the distilled water. pH of the water should be 6.0-7.0. 4. Avoid remelting and preparation of medium 5. Use the culture medium within its expiry period
	  1 2	1. M011 SCDM Standard colour Light Yellow 2. M011 SCDM Amber colour due to over heating



Troubleshooting

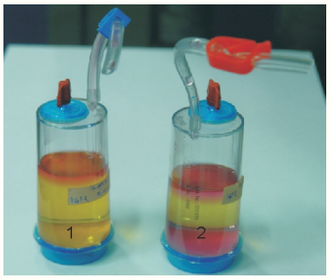
Abnormalities	Possible Causes	Troubleshooting Tips
Soft gel	1. Agar not in solution, incomplete reconstitution of dehydrated medium 2. Acid hydrolysis of agar 3. Failure to compensate for dilution of agar by the inoculums carriers, etc.	1. Check pH of distilled water. pH of distilled water should be between 6.0-7.0 2. Acidic pH of distilled water leads to hydrolysis of agar resulting incomplete solubility 3. Sterilization should be strictly done as per stipulated instructions. Avoid over sterilization which may lead to soft gel formation.
	  1 2	1. M091-Plate Count Agar Improper gelling 2. M091-Plate Count Agar Proper gelling
Loss of Growth	DUE TO THE CULTURE MEDIA : 1. Repeated re-melting 2. Excessive heating 3. Incomplete mixing 4. Failure to compensate differentiating properties for dilution of ingredients 5. The culture medium is expired or deteriorated 6. Incorrect formulation used	1. Avoid repeated re-melting. Reconstitute only the required amount of medium at a given time. 2. Do not overheat 3. Ensure proper homogenization 4. Use of appropriate amount of inoculum at proper dilution. Do not use the medium past its expiry date. 5. Use the culture medium within its expiry period 6. Use the appropriate amount of medium as per the direction on the label of the respective medium
	 1 2	1. M290-Soyabean Casein Digest Agar - Good recovery, use of media within the expiry period 2. M290-Soyabean Casein Digest Agar - Poor recovery, use of media beyond the expiry period
	DUE TO THE SUPPLEMENTS : 1. The supplement is expired or deteriorated 2. Poor reconstitution of the supplement. Adding a concentration lower than required. Supplements added incorrectly. E.g. when medium is too hot or at wrong concentration. 3. Poor homogenization of the supplement with the Culture Medium	1. Use the supplement before the expiry period 2. Reconstitute the proper amount of supplement in appropriate concentration as per the directions on the label 3. Ensure proper homogenization of the supplement with the culture medium
	 1 2	1. M043-Baird Parker Agar - Good recovery, use of supplements withtin the expiry period 2. M043-Baird Parker Agar - Poor recovery, use of supplements beyond the expiry period

Troubleshooting



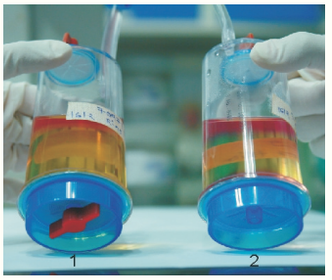
Abnormalities	Possible Causes	Troubleshooting Tips
Change in Colour of Medium on Preparation [indicator containing medium]	If pH of medium before and after sterilization is not in specified standard limits	1. Check pH of water used for preparation of distilled water. pH of distilled water should be preferably between 6.0-7.0 2. In case of drift in pH, the pH of medium before and after sterilization may be adjusted using 0.1 N HCl / 0.1 N NaOH as desired to obtain pH in specified range.
	 pH 6.8 pH 7.0 pH 7.1	1. M099 Simmons Citrate Agar Standard pH 6.8±0.2 I Colour variation due to pH
Precipitation of Medium	Generally found in case of Inorganic salts containing medium	1. Distilled water is recommended to be used for reconstitution. Purified water can also be used. 2. Overheating or over-sterilization of medium other than recommended, can cause precipitation 3. This is observed generally in case of medium containing phosphate salts. Compatibility test of water for its suitability should be performed.
	 1 2	1. Initial distilled water use for preparation of medium free of phosphate salts, clear 2. Haziness occured due to impurities of phosphate salts in distilled water
Darkening of Prepared Medium on Storage	In case if media contains high concentration of sugars and is exposed to continual heating. Storage of media at high temperatures.	1. Do not overheat 2. Sterilization should be carried out according to the recommended time and temperature. Overheating of medium should be avoided. 3. Avoid continual remelting of prepared medium 4. Avoid exposure of prepared medium at high temperature above 50˚C for long durations
	 1 2	1. M033 - Sabouraud Dextrose Broth standard colour of medium, light yellow 2. M033 - Sabouraud Dextrose Broth darkening of medium due to storage at high temperatures

Troubleshooting



Abnormalities	Possible Causes	Troubleshooting Tips
Inconsistent & Distorted Ring Formation in Fluid Thioglycollate Medium FTM (M009)	1.Improper digestion of agar 2. Insufficient boiling	1. Undigested agar particles 2. Ensure complete digestion of agar particle prior to autoclaving to avoid insufficient percentage of agar which leads to phase separation. 3. Compact ring is formed on correct digestion, autoclaving and cooling if left undisturbed
	 1 2	1. Appearance of medium due to insufficient boiling and improper digestion of agar, no ring observed 2. Compact ring due to proper boiling and proper digestion of Agar, autoclaving and cooling
Flaccid Ring in Prepared FTM (M009)	Disturbance of prepared medium	While handling, ring may loose its compactness which can be restored on reheating in free flowing steam if required and allowing the medium to cool down
	 1 2	1. Flaccid ring due to disturbance of medium 2. Restoration of ring on reheating and cooling
Double Ring Formation in FTM (M009) when used in Canesters while Sterility Testing	Due to absorption of oxygen	Ensure that bottom vent is properly clamped. If loose, absorption of atmospheric oxygen will lead to a double ring formation.

Sterility Testing by using Canister



M009 - Fluid Thiogycollate Medium

No.2 Canester showing double ring on top and bottom of Canester

Storage of HiMedia Products

It is essential to store all the HiMedia products at specified conditions to achieve optimum performance. Products should not be stored beyond the allocated shelf-life. The storage conditions and expiry dates of each product are shown on the respective label, container or product insert. It is recommended that products should be used in order of their lot/batch numbers.

Following environmental conditions are the frequent causes of instability of products.

Light

It is preferable that all the prepared culture media should be stored away from light and exposure to direct sunlight at all times.

Humidity and Temperature

It is important not to leave bottles open to atmosphere since dehydrated powder will be affected by high humidity. Hot media preparation rooms are not suitable to store containers of culture media, particularly containers which are frequently opened and closed.

Recommended Storage Temperature and Time

Temperature sensitive materials will be transported using cold ice packs"Blue Ice". Upon receipt material should be stored at temperatures specified on labels.

Ready Prepared Media / Ready Prepared Plates

General storage : Ready Prepared Media should be stored at 2 to 8°C. Ready Prepared Liquid Media should be stored at 15-30°C. Ready Prepared Plates should be stored between 20 to 30°C. Refer individual product label & specifications

Dehydrated Media (M)/(MV)/(G)/(GM)/(GMV)/MCD

Dehydrated media stored unopened under optimal conditions have a shelf-life of 1½ to 5 years. HiMedia's dehydrated powder & granulated media are supplied in opaque, waterproof, screw-cap HDPE plastic bottles, with an internal lid which eliminates the need for an intermediate seal. The lid should be replaced quickly after media has been taken out and the cap should be closed tightly. Sealed, unopened containers should be stored at temperature below 8 or 30°C as specified on individual product label. When a container is opened for the first time the date should be noted on the container.

Proper Storage Conditions — Improper Storage Conditions

A Homogeneous free flowing powder

B Soft Lumps

C Hard Lumps

HiEncap™ Media

Encapsulated media when stored under recommended conditions have shelf-life of 2 years.

Selective Supplements (FD)

Store at 2-8°C except Horse serum RM1239, FD100, FD214, FD227 at -20°C. Shelf-life 1 to 2½ years.

Antimicrobial Susceptibility Discs, MIC Determination Strips & Kits (SD, HX, OD, IC, DE, MD, MDM, Ezy MIC, MPK)

Store at -20 to 8°C but keep working stock at 2-8°C
For long term storage store at -20°C.

Media Bases (RM)

Sealed, unopened containers should be stored below 30°C. Shelf-life 3 to 5 years.

Bacteriological Differentiation Aids (DD)

Store at 2 to 8°C or below 30°C as specified
Carbohydrate discs below 30°C. Shelf-life 9 months to 2 years.

Animal and Insect Cell Culture Products

Temperature sensitive materials are transported using cold ice packs For storage conditions upon receipt of material please refer to the table below :

Sr. No.	Storage temperature	Products
1.	-20°C	Serum, Antibiotics, L-Glutamine, Trypsin, Vitamin concentrates.
2.	2 - 8°C	Powdered animal, plant and insect culture media and diets. Animal and Insect liquid cell culture media. Powdered and liquid balanced salt solutions. Amino acid concentrates (powder), Sodium pyruvate.
3.	15 - 30°C	Sodium bicarbonate, Tissue/Molecular biology grade water, Sodium hydroxide and hydrochloric acid solutions, Phenol Red and Trypan blue solutions.

Plant Tissue Culture Products

Sr. No.	Storage temperature	Products
1	2-8°C	Powdered plant tissue culture media, balance salt, vitamins, antibiotics, antiviral, indicators, plant growth regulators, Liquid balanced salt, vitamins, phycology media
2	Below 30°C	Macroelements, microelements, vitamins, amino acids, organic supplements, organic acids, carbohydrates, buffer, gelling agent, adsorbent
3	-20°C	Liquid antibiotics solution.

Molecular Biology Products

Sr. No.	Storage temperature	Products
1.	10-30°C	Molecular Biology Growth Media, Chemicals for Molecular Biology
2.	15-25°C	HiPurA® Kits, Molecular Biology Buffers & Reagents, HiPer® Teaching Kits, Hematology Kits, InstaDNA™ Kit, InstaDNA™ Cards, Protein Crystallography, Molecular Biology Accessories
3.	2-8°C	Protein Purification, HiPer® Teaching kits, Molecular Biology Buffers & Reagents, Chemicals for Molecular Biology, PCR Enhancers, Hematology Kits, Latex Agglutination Test Kits
4.	-20°C	HiPer® Teaching Kits, Restriction Enzymes, PCR Kits for Pathogen Detection, Food Pathogen Detection Combo kits, HiPurA® Competent cells, Molecular Biology Buffers & Reagents, Chemicals for Molecular Biology, Hematology Kits, dNTP Solutions, PCR Master Mixes, DNA Polymerases, Reverse Transcriptases, PCR & Reverse Transcription PCR Kits, Modifying Enzymes, Ladders, Positive Controls for PCR

"QUALITY IS NO ACCIDENT"

In HiMedia, we believe that customer deserves the best quality. We feel responsible for giving our valued customers the best service at an affordable price. We cater to the massive needs of big industrial set-ups like the fermentation pharma sector as well as to the smallest labs and various educational institutions .

At HiMedia, we have made 'Quality' possible by maintaining consistent Quality systems in the Design as well as Production phase. Further to enhance production facilities since last 3 years we have introduced WHO GMP at every stage to ensure "Quality" of products manufactured. Our motto "in the service of mankind" has remained the same since our establishment in 1976. Constant quest for innovation and an eye for perfection has made us the world leader in the field of Dehydrated Culture Media. Predominantly known as a Culture Media company, we soon expanded our product range to the allied applications like antimicrobial susceptibility systems, ready to use media and kits, bacteriological differentiation aids etc. Our first chromogenic medium was introduced in 1997. Looking at the immense advantage of chromogenics in today's microbiological diagnostics, we stepped up our R&D. Today, we boast of having one of the widest range of chromogenic media in the world. We have also introduced products in molecular biology field such as kits for latex agglutination, genomic isolation and lymphocyte separation.

At HiMedia, we believe in rising up to needs of today and preparing for the needs of tomorrow. The biological threat of BSE/TSE prompted us to launch the wide range of vegetable peptones which are free from animal origin products. Realising the diverse need of the users and today's industrial sector, we were successful in developing full range of vegetable peptones, which now replaces all animal derived peptones, the first of its kind in the entire world. Coming out with animal origin free Culture Media, was the next natural step. Today, with the introduction of more than 1500 vegetable peptone based media, we are about to start a green revolution in the field of microbiology. We take pride in calling ourselves the pioneers in the field of vegetable peptones and finished media.

Our recent launch HiCynth™, Chemically Defined Media have been introduced to take care of regulatory requirements while export where media containing animal based peptones are restricted.

Be it chromogenic media or vegetable peptones or Chemically Defined Media, Quality is our priority.

Our Quality Systems are :

ISO 9001:2015, ISO 13485:2016, WHO GMP and CE compliant. In order to meet the high quality standards, all the raw materials and the finished goods must pass the extensive quality control testing. The production processes are also streamlined and are monitored to ensure lot-to-lot consistency.

We maintain an annual maintenance plan of the key production equipment wherein the details of preventive and day to day maintenance is clearly chalked out. All other equipments used for production as well as quality control are validated/ calibrated as per the ISO guidelines and meets WHO-GMP norms.

... Brands May Come And Brands May Go

But Quality Goes On Forever .

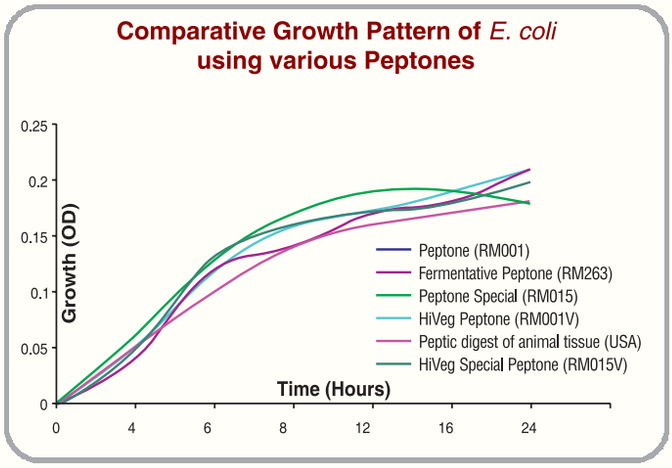
QUALITY ASSURANCE PROGRAMME

HiMedia offers a very broad range of media formulations; standard media and customer specified media in dehydrated form for use in different fields; clinical, food, environment, cosmetic, dairy, water, pharmaceutical industries etc. This also includes media specified by various pharmacopoeias recommended for different applications as sterility testing, microbial examination of nonsterile products (formerly microbial limit tests) etc (1, 2, 3, 4, 5).

OUR QUALITY ASSURANCE

Program is broadly divided into three sub-categories :

1. Raw material testing
2. Inprocess sample testing
3. Finished product testing

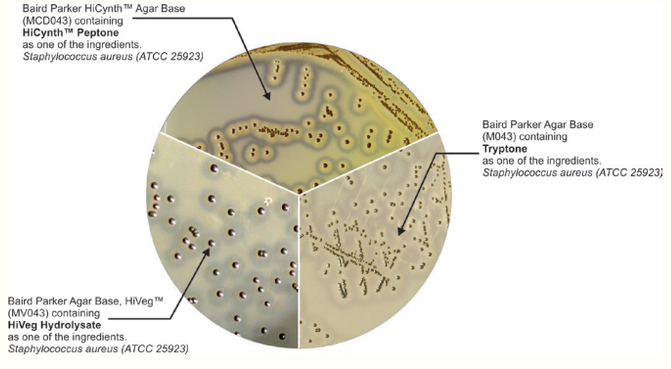


Raw Materials

The design of Microbiological Culture Media requires statistical evaluation of each ingredient and measurement of the interaction of each ingredient with the other. Awareness of this is of vital importance and accordingly various quality control measures are adopted by HiMedia prior to and during the manufacturing processes so that; desired end products with predictable reproducible results are obtained.

Only the highest quality raw materials are used in the making of HiMedia products. The raw materials are bought only from approved vendors who meet all the acceptance standards. Each raw material is analysed for grade, quality and purity as per the standards specified in various pharmacopoiea (1, 4, 5). For the raw materials and chemicals whose standards are not specified, we have our own in-house standards set by our quality assurance department.

Various raw materials incorporated in Dehydrated Culture Media are :

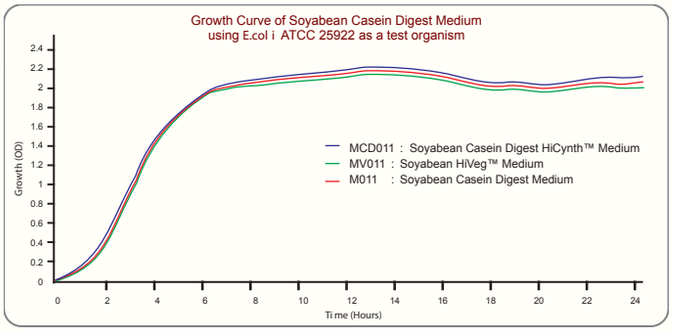


1. Peptones, HiVeg™ Peptones and HiCynth™ Peptones, HM Peptone B (Equivalent to Beef Extract) as nitrogen source
2. Carbohydrates as carbon source
3. Minerals (Metals and inorganic salts)
4. Selective Agents
5. Dyes and pH Indicators
6. Solidifying Agent
7. Vitamins
8. Chromogenic Substances

1. Peptones (HM Peptone B, M Protein, Soyabean, Gelatin, Yeast), HiVeg™ Peptones and HiCynth™ Peptones :

The degradation products of protein hydrolysis, commonly called peptones, are mixtures of polypeptides, oligopeptides, amino acids, organic nitrogen bases, salts and trace elements. The variety of peptones produced reflects the differing demands of microorganisms for amino acids and peptides. Depending on the protein substrate (casein, meat or soya) and the type of hydrolysis, enzyme (trypsin, pepsin or papain) hydrolysis or acid hydrolysis, the characteristic of the peptone changes.

HiCynth™ Peptones are chemically defined peptones providing



QUALITY ASSURANCE PROGRAMME

nitrogeneous nutrient sources at par with any other animal or vegetable peptones.

Besides HiMedia's own specifications, in general, peptones are analysed as specified in USP (1) under the title "Peptic Digest of Animal Tissue", similar criteria for "Pancreatic Digest of Casein".

2. Carbohydrates

Some organisms utilize a very wide range of carbohydrates while others are much more selective or have definite preference to certain carbohydrates. These latter organisms can be identified by their fermentative or oxidative assimilation of test carbohydrates added to the medium. A large number of media formulations in which specific carbohydrates and an indicator are included to

detect the specific enzyme reactions are particularly adopted in diagnostic bacteriology (6, 7, 8, 9, 10, 11, 12, 13, 14 and 15).

Carbohydrates used in Culture Media are tested to ensure their identity and purity from adulterants (1, 16).

Growth supportive properties of carbohydrates are tested by preparing liquid and solid Culture Media alongwith known standard carbohydrates. On solid media, colony characteristics on reference and test carbohydrate media are compared after sufficient incubation period for size, colour, shape and enzyme reaction with indicators.

3. Minerals and Chemicals

Some inorganic mineral salts are essential for the growth and metabolism of all living cells. Most bacterial requirements are met

1 2 3 4

MV378 MIO HiVeg™ Medium (Motility Indole Ornithine HiVeg™ Medium)

1. Control
2. *Escherichia coli* (ATCC 25922)
3. *Klebsiella pneumoniae* (ATCC 13883)
4. *Proteus mirabilis* (ATCC 25933)

by the addition of sodium, potassium, magnesium, manganese, ferrous or ferric ions in the form of their chlorides, phosphates and sulphates to the Culture Media.

4. Selective Agents (Bile Salts and Bile Salts Mixture)

Bile derivatives are selective agents used to differentiate between those bacteria which have the capacity to survive in the gut and those which cannot live in that environment. By increasing the concentration of bile or bile derivative(s), selective media are prepared for bacteria which are differentiated on the basis of bile tolerance.

Bile Salts are analysed chemically as described in National Formulary for Sodium deoxycholate, Sodium cholate and Sodium taurocholate (1, 4). Following criteria are used for passing bile salts. When bile salts are incorporated into Culture

1. Control
2. *Citrobacter freundii* (ATCC 8090)
3. *Enterobacter aerogenes* (ATCC 13048)
4. *Escherichia coli* (ATCC 25922)
5. *Klebsiella pneumoniae* (ATCC 13883)
6. *Proteus vulgaris* (ATCC 13315)
7. *Pseudomonas aeruginosa* (ATCC 9027)
8. *Salmonella* Typhi (ATCC 6539)
9. *Shigella flexneri* (ATCC 12022)

QUALITY ASSURANCE PROGRAMME

Media they should not affect the colour of the indicator dye(s) or their subsequent change in colour as desired in the medium. It should not form a surface scum or deposit in the medium after storage. Further, bile functional test is carried out, using standard bile salts as controls. Also recovery test of bacteria is carried out with E. coli as one of the test organism when a bile salt of known performance is used as a control. Solid media prepared with different bile salts are tested by the Miles-Misra (17) surface drop test. The growth recovery of various Enterobacteriaceae is recorded for each medium.

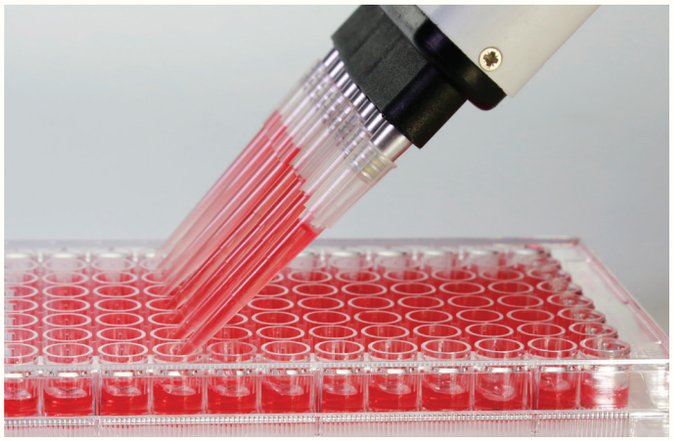
5. Dyes and pH Indicators

Dyes added to Culture Media also function as selective agents or as pH or Eh indicators. When used as selective agents, interaction may occur between dye and other components in the formulation. Thus, the same sample of brilliant green may show different inhibition titers against *E. coli* when tested in different Peptone solutions. Bile Salts interact with brilliant green and reduce the toxicity of the dye and therefore toxic level of such dyes are ascertained by adding to Bile Salts Medium. Aniline dyes are more toxic when fully oxidised and therefore a change in it's toxicity is possible as reduction of the dye takes place when it is sterilized in the presence of Peptone or Tryptone. Also if Agar used in Culture Media is high in minerals, incompatibility with the media constituents may occur.

Therefore, we analyse the dyes used in our Culture Media as specified by H.J. Conn's (18). Besides ascertaining chemical purity of dyes, microbiological suitability is carried out by adding dyes in Culture Media. These are then tested with various test organisms and compared with standard known dyes.

6. Solidifying Agent

The primary purpose of agar in Culture Media is to form a solid gel. The clarity of agar gel in Culture Media is an important characteristic. Ideally, the molten solution should be crystal clear without any haziness or deposit. Haziness in agar is due to mineral incompatibilities or minute fragments of debris which have passed through the filters during manufacturing. Another characteristic of agar is it's ability to allow diffusion of compounds while locking water into a rigid gel. This property is exploited in microbiological assay of certain vitamins and antibiotics. Here the diffusion from a central reservoir of antibiotic results in proportionate killing of the test organism while in the case of vitamins yields proportionate zone of growth referred to as zone of exhibition.



M1938 HiCrome™ Acinetobacter Agar Base

Various chemical impurities are analysed while testing agar for bacteriological purpose.

Besides above tests, toxicity test is carried out to ascertain the presence of toxic and inhibitory substances. This is done by growing fastidious organisms on Culture Media where agar is incorporated and the growth, colony size, shape, pigments, etc. are compared with known standard agar.

7. Vitamins

Vitamins and Biochemicals are analysed as per the U.S. Pharmacopoeia (1) and Food Chemical Codex, U.S.A. (6) for chemical purity and other tests specified under the monograms. Beside the chemical analysis, potency is further confirmed by

microbiological methods specified as in A.O.A.C. (19).

8. Chromogenic Substances

The HiCrome™ range of Culture Media have chromogenic substances as an ingredient. It is often added as mixture of two chromogens. The chromogens serves as substrate that is cleaved by specific enzymes produced by growing bacteria and / or fungi. The resulting chromophores colours the colony that can be differentiated on basis of different colour reaction. For example : X-glucoronide is cleaved by the enzyme-glucoronidase produced by *E. coli* strains to yield glucuronic acid, that imparts a bluish green coloration to the colonies of *E. coli.*

In Process Sample

A sample lot is prepared from tested and approved components and analysed in parallel with a previously approved reference lot of complete medium. After ascertaining all the specifications like

QUALITY ASSURANCE PROGRAMME

colour, clarity, pH, solubility, gelling and cultural characteristics of the sample lot including compatibility of component ingredients, large scale lot is approved for manufacturing. While manufacturing, very close attention is paid to each stage by observing good manufacturing practice (GMP). Samples are withdrawn at intermediate stages and forwarded to quality control laboratory for microbiological evaluation and purity as per HiMedia's own specifications. Lot in process is continuously recorded under controlled conditions of temperature, moisture, humidity, etc. The manufacturing process is carried out by using equipment of stainless steel or glass taking care to avoid product contamination with toxic metals.

Finished Product

Each HiMedia product has defined product specifications. The specification includes validated release criteria which stipulate the finished part inspection necessary for acceptability and release of each lot of finished product. The final product must meet the following criteria :

Physicochemical Parameters

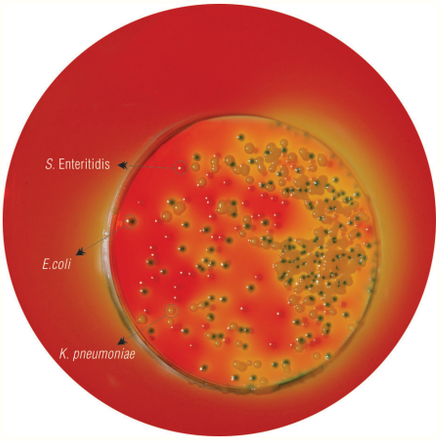
Appearance
Colour
Odour
Moisture
Solubility
Clarity
Gelling temperature (where agar is used)
pH

Biological Parameters

Growth Promotion
Differentiation
Biochemical Performance
Recovery of Small Inocula
Selectivity
Microbial Load

In addition, we also have unique in house criteria developed specifically to zero down any batch to batch variation that may arise due to the interplay of biological materials.

Traceability



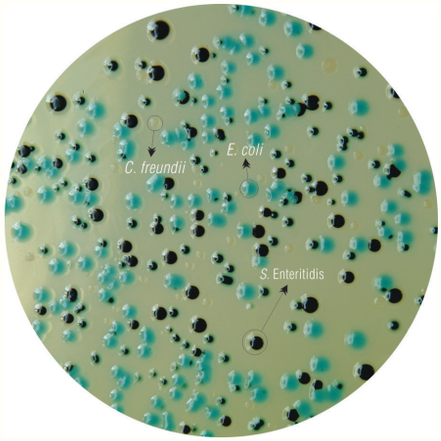
Being a ISO/CE certified company, traceability is an important criterion on which our quality systems are based. Each raw material used and each production process is meticulously documented. Approved final product samples and various records generated during manufacturing process are retained for future reference.

Validation

User intending to use any of our medium listed in our published list for any specific purpose beyond the claim made in our COA/ TD/ Manual, such intent if not timely shared would obviate our liability in the matter. With such intent it is advisable to validate the medium and the test procedure in your own laboratory. HiMedia is your reliable partner to help in the process with relevance of the media used in testing validation.

Stability Study

Stability studies are carried on representative lot to determine the shelf-life of new products and also to verify the efficacy of the existing product. After six months interval, representative lot are retested to verify the stability of products by comparing with reference product.



M1569 HiCrome™ M-Lauryl Sulphate Agar

Certificate of Analysis

Every lot released is provided with a detailed Certificate of Analysis which defines the product specifications and the test results. Hard copies of Certificate of Analysis are provided on request or can be directly downloaded from our website - www.himedialabs.com.

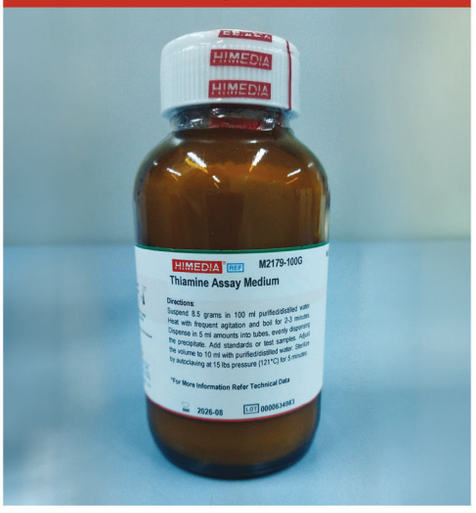
New

Introducing 1st Time in India

Thiamine Assay Medium

HiMedia's Groundbreaking "Thiamine Assay Medium" Sets a New Standard and a Game-Changer

Unavailable Elsewhere but AVAILABLE ONLY AT HiMedia!



Thiamine Assay Medium measures thiamine levels via microbiological assay with *Lactobacillus fermentum* ATCC 9338 as a test organism.

Best choice for food and pharma industries

Features:

- Storage : 2-8°C.
- Gms/litre : g/100ml: 8.5.
- Litres /100g : 1.176 lites.
- Packing : M2179-100G.
- Selective growth conditions for thiamine-dependent microorganisms.
- Use of indicator organisms like *Lactobacillus fermentum*.
- The medium is devoid of thiamine for the enhanced detection sensitivity.
- Growth-based detection method.
- Quantification through thiamine standards.
- Rigorous quality control measures.
- The assay can detect as little as 3 ng L^{-1} thiamine.

Thiamine Assay Medium M2179

TERMS AND CONDITIONS

Prices

Prices mentioned in the Price List are Consumer Prices ruling at the time of printing of the Price List and are subject to change without prior notice. Invoices will be made on the basis of prices ruling on the date of dispatch/delivery of goods.

PAYMENTS

Payments are to be made through :

1. RTGS / NEFT / BT in favor of "HiMedia Laboratories Pvt. Limited", Bank Account No. : 30291668992, Bank : State Bank of India, Commercial Branch, Mumbai, Mumbai - 400023. IFS Code : SBIN0006070.
2. RTGS / NEFT / BT in favor of "HiMedia Laboratories Pvt. Limited", Bank Account No. : 57500000042325, Bank : HDFC Bank Ltd., Ghatkopar (West), Branch, Mumbai - 400086. IFS Code : HDFC0000406.
3. RTGS / NEFT / BT in favor of "HiMedia Laboratories Pvt. Limited", Bank Account No. : 811200227872, Bank : DBS Bank India Limited., Nariman Point, Branch, Mumbai - 400021. IFS Code : DBSS0IN0811.
4. Demand Draft drawn in favor of "HiMedia Laboratories Pvt. Limited" payable at Mumbai crossed *Account Payee only.*

Payees responsibility to intimate bank as per postive pay or other system / law in force.

Unless specifically committed by us, full payments are to be made in advance against Proforma Invoice.

Taxes and Duties

The prices quoted here are exclusive of GST. Other taxes and levies if any applicable will be charged extra as and when applicable. In case states levies paid by Courier Service/ Transporter that amount along with taxes if any, has to be paid to the concerned Courier Service/ Transporter in cash, while taking delivery of the consignment.

Road/ Entry Permit

Road/ Entry Permit Form or any Form, wherever applicable should be sent along with each order. Orders sent without applicable Road/ Entry Permit Form or any Form will be held-up, until applicable Road/ Entry Permit is sent to us.

E-way Bill

E-way bill sent alongwith tax invoice wherever required at the time of dispatch of goods as per prevailing GST Law in force.

Dispatch/ Delivery

1. Dispatches will be made within 30 days from the date of receipt of firm and correct order.
2. Orders above Rs. 5000/- value will be supplied on F.O.R. **CUSTOMERS CITY/TOWN BASIS** by the company approved mode of transport upto the transporter's godown. Carrying the material from transporter's godown to customer's site will be customer's responsibility.

Damage or Loss in Transit

Materials are packed with utmost care under expert supervision. Our responsibility will cease after a consignment is accepted by the Transporters/ Courier/ Post Office in good condition and no responsibility is taken by the company for any damage or loss in transit. Customers should arrange for Transit Insurance themselves.

Discount

1. Unless otherwise quoted, listed prices mentioned in the Price List will be charged in the Invoice.
2. Discount if any allowed, will be calculated on the list prices only.
3. Enquiries for bulk quantities are solicited from the Actual users and for which Special prices can be quoted.

Product Usage

1. Chemicals/ Reagents supplied by us are not to be considered as reference standards, unless wherever specified.
2. Our products are meant for Diagnostic and Laboratory purpose only unless wherever specified for industrial use. We do not undertake any responsibility if they are used for any other (including but not limited to, Medical, Food, Cosmetic or Pharmaceutical) applications.
3. User intending to use any of our medium listed in our published list for any specific purpose beyond the claim made in our COA / TD / Manual, such intent if not timely shared would obviate our liability in the matter. With such intent it is advisable to validate the medium and the test procedure in your own laboratory. HiMedia is your reliable partner to help in the process with relevance of the media used in testing validation.

Special Note

1. No liability is accepted for accidents arising in handling or use.
2. No responsibility shall be accepted for any incidental, consequential or special damages claimed of any sort implied from use or failure of the products supplied. The amount of damages claimed shall not in any event exceed the actual unit price of the product supplied.
3. No amendment or cancellation of order will be accepted once the goods are dispatched.
4. Subject to Thane / Mumbai, Maharashtra Jurisdiction.
5. **FORCE MAJEURE** - We shall not be responsible for any delay in delivery, or in the event of our inability to supply the material order to you in case of Acts of God or India's enemies, war revolution, embargo, riots, Lockdown, civil commotions or political disturbance, strikes, lockouts, stoppage of labour through any cause, go slow policy of labour, shortage of power, non-availability of essential raw material, etc. or any other cause beyond our control or that of our suppliers/ sub-contractors as the case may be, and such delay shall not entitle the customer either to cancel the order or claim compensation.

If any error is found through printing oversight or otherwise the final arbiter should be HiMedia in correcting the same.

Understanding Microbes

CHEMICALLY DEFINED MEDIA

What if your choice can mitigate the safety risks of animal and plant hydrolysates using defined chemical components and ensure consistency.

With newer challenges posed by regulatory bodies, the highly controlled Pharma and Biopharma industry direct their focus on the more defined chemical ingredients. The ***component variability*** in animal and plant hydrolysates can be overcome by the ***component consistency*** of synthetic ingredients. To meet the need of the hour, we have introduced HiCynth™, a complete range of Chemically Defined Microbiology Media.

HiCynth™ MEDIA

- Free from Plant and Animal Derivatives
- Reduced Risk
- Increased Consistency
- No worry of KOSHER / HALAL
- Improved Reproducibility
- Comparable Productivity

Lockable Plates

READY PREPARED MEDIA

- Highest level of quality performance
- Consistent quality
- Time and cost saving
- Economical

PREPARED PLATES

- Assured sterility by γ-irradiation sterilization process
- Sterile gamma irradiated, triple wrapped, water impermeable packaging
- Primary packing impermeable to H_2O_2
- Lockable plates available
- Barcoded Plates available

FACILITIES

- State-of-the-Art manufacturing facility
- WHO GMP Compliant Clean Zones
- Quality Management Systems ISO 9001:2015, ISO 13485:2016
- Production capacity 1,50,000 plates per day

Ready Prepared Media in Polystyrene Plates

- Ready to use sterile poured plates
- Saves preparation and sterilization time
- Wide range of media in prepared form, to cover needs of microbiologists and pathologists
- Ready to use prepared medium in 90 mm, 100 mm, 120 mm, 150 mm & 200 mm plates - pack of 5 plates
- If required any medium can be available in Triple pack and γ irradiated
- Customization of media available

Product	Code	Per Pack	Price in ₹
Anaerobic Agar (Brewer) Plate for the isolation and sensitivity testing of anaerobic and microaerophilic organisms and study of colonial morphology.	MP491-50PT	50plts	3345
***#Anaerobic Blood Agar Plate** for cultivation of anaerobic microorganisms including very fastidious organisms from clinical specimens.	MP975A-20PT MP975A-50PT	20plts 50plts	1945 4100
***#Anaerobic Blood Agar Plate w/ Neomycin** for isolation and cultivation of Group A and Group B Streptococci from throat cultures and other clinical samples.	MP1345-10PT MP1345-50PT	10plts 50plts	970 4110

Product	Code	Per Pack	Price in ₹
***Burkholderia cepacia Agar Plate** for selective isolation of *Burkholderia cepacia* from clinical sample.	MP1640-20PT MP1640-50PT	20plts 50plts	2305 5025
***Burkholderia cepacia Selective Agar Plate** for isolation of *Burkholderia cepacia* from the respiratory secretions of patients with cystic fibrosis and other non-clinical specimens in accordance with USP.	MP2089-20PT MP2089-50PT	20plts 50plts	2590 5450
***Citrate Azide Tween Carbonate Agar Plate** recommended for the identification of Enterococci in meat, meat products, dairy products and other foodstuffs.	MP1618-20PT MP1618-50PT	20plts 50plts	1850 4065
C.L.E.D. Agar w/ Bromothymol Blue Plate for isolation and differentiation of urinary pathogens on the basis of lactose fermentation.	MP792-20PT MP792-50PT	20plts 50plts	1530 3450
***#CNA Agar Plate with 5% Sheep Blood** for selective isolation of pathogenic Gram positive cocci from clinical and non clinical specimens.	MP5208-50PT	50plts	3300
***#Campylobacter Agar Plate** for selective isolation of *Campylobacter* species from faecal specimens, food and environmental specimens.	MP994-20PT MP994-50PT	20plts 50plts	2140 4805
Candida Selective Agar Plate recommended for the selective isolation of *Candida* species (appears as white coloured) from clinical samples.	MP5477-20PT MP5477-50PT	20plts 50plts	2280 4985
Cetrimide Agar Plate for selective isolation of *Pseudomonas aeruginosa* from clinical specimens.	MP024-20PT MP024-50PT	20plts 50plts	1600 3590
Cetrimide Agar Plate for the selection and subculture of *Pseudomonas aeruginosa* in accordance with the harmonized method of USP/EP/BP/JP/IP.	MPH024-20PT MPH024-50PT	20plts 50plts	1675 3770
Cetrimide Agar Plate (Triple Pack) for usage refer MPH024	MPH024T-20PT	20plts	1725
Cetrimide Agar Plate (γ-irradiated, Triple pack) for usage refer MPH024	MPH024GT-20PT MPH024GT-50PT	20plts 50plts	1760 4140
***Chocolate Agar Plate** for isolation of *Neisseria gonorrhoeae* from chronic and acute cases of gonococcal infections.	MP103-20PT MP103-50PT	20plts 50plts	2100 4620
***Chocolate Agar Plate w/ Bacitracin** for selective isolation of *Neisseria gonorrhoeae* from chronic and acute cases of gonococcal infections.	MP5333-50PT	50plts	4685
Columbia Agar Plate for the selection and subculture of *Clostridium sporogenes* in accordance with the harmonized method of USP/EP/BP/JP/IP.	MPH144-20PT MPH144-50PT	20plts 50plts	1675 3770
Columbia Agar Plate (γ-irradiated, Triple pack) for usage refer MPH144	MPH144GT-20PT MPH144GT-50PT	20plts 50plts	1760 4140

Product	Code	Per Pack	Price in ₹
***#Columbia 5% Sheep Blood Agar Plate** for isolation and cultivation of fastidious organisms.	MP144-20PT MP144-50PT	20plts 50plts	1945 4375
Crystal Violet, Neutral Red, Bile Agar with Glucose for detection and enumeration of *Enterobacteriaeceae* in accordance with BP	MP1684B-50PT	50plts	3770
D.C.L.S. Agar a selective medium used to detect and isolate *Salmonella* and *Shigella* species. Also useful for isolation of *Vibrio cholerae*.	MP160-10PT MP160-50PT	10plts 50plts	910 3590
***DNase Test Agar Plate w/ Methyl green** for detection of deoxyribonuclease activity of bacteria and fungi and especially for identification of pathogenic Staphylococci.	MP1419-10PT	10plts	2950
***DNase Test Agar Plate w/ Toluidine Blue** for detection of deoxyribonuclease activity of microorganisms.	MP1041-10PT	10plts	2610
***D.T.M Agar Plate** for selective isolation of dermatophytes.	MP188-10PT MP188-50PT	10plts 50plts	910 3590
Deoxycholate Citrate Agar Plate selective medium for the isolation of enteric pathogens particularly *Salmonella* and *Shigella* species.	MP065-10PT MP065-50PT	10plts 50plts	860 3525
❖Dey Engley Neutralizing Agar Plate in disinfectant testing where neutralization of the chemical is important for determining its bactericidal activity.	MP186-50PT	50plts	3590
❖Dey Engley Neutralizing Agar Plate (γ-irradiated, Triple Pack) for usage refer MP186	MP186GT-50PT	50plts	4135
Dichloran Rose Bengal Chloramphenicol (DRBC) Agar Plate (100mm plate) for selective isolation of fungi-yeasts and moulds of significance in food spoilage. The composition and performance criteria are in accordance with ISO 21527-1:2008.	MP1881C-20PT MP1881C-50PT	20plts 50plts	1765 3955
EMB Agar Plate for differential isolation of Gram-negative enteric bacilli from clinical and non clinical specimens.	MP317-20PT MP317-50PT	20plts 50plts	1995 4490
EMB Agar, Levine Plate for isolation, enumeration and differentiation of members of *Enterobacteriaceae*.	MP022-20PT MP022-50PT	20plts 50plts	1995 4490
***Endo Agar Plate** for the confirmation of the presumptive test for members of the coliform group.	MP029-20PT	20plts	1675
Environmental Testing Agar Plate recommended for the monitoring of environmental samples.	MP5414-20PT MP5414-50PT	20plts 50plts	2140 4750
***#GBS Agar Plate** for rapid detection of group B Streptococci from clinical specimens.	MP5384-10PT MP5384-50PT	10plts 50plts	875 3685
***GC Agar Plate** New for selective isolation and cultivation of Gonococci.	MP434-20PT MP434-50PT	20plts 50plts	1770 3890

On receipt, all the above products to be stored between 20-30°C

# Due to short shelf life this product will be directly supplied to the customer
❖ This plates are trademarked as EM-CULT™ and can be used for environmental monitoring

Product	Code	Per Pack	Price in ₹
***G.Vaginalis Selective Agar Plate** for qualitative isolation and differentiation of *Gardnerella vaginalis* from clinical specimens.	MP1057-10PT MP1057-50PT	10plts 50plts	1120 4545
***#Haemophilus Test Agar Plate** for the susceptibility testing of *Haemophilus influenzae*.	MP1259-10PT	10plts	1005
Hektoen Enteric Agar Plate for differential and selective isolation of *Salmonella* and *Shigella* species from enteric pathological specimens.	MP467-10PT MP467-50PT	10plts 50plts	910 3590
***#Helicobacter pylori Selective Agar Plate** for detection of *Helicobacter pylori* in clinical specimens.	MP5390-10PT MP5390-50PT	10plts 50plts	1260 5155
***HiCrome™ Bacillus Agar Plate** for isolation and differentiation between various species of *Bacillus* from a mixed culture.	MP1651-20PT MP1651-50PT	20plts 50plts	2415 5700
***HiCrome™ Candida Differential Agar Plate** for rapid isolation and identification of *Candida* species from mixed cultures.	MP1297A-20PT MP1297A-50PT	20plts 50plts	2305 5025
***HiCrome™ Chromogenic Coliform Agar Plate (CCA Plate)** for detection of *Escherichia coli* and coliforms in water samples. The composition and performance criteria of this medium are as per the specifications laid down in ISO 9308-1:2014.	MP1991I-20PT MP1991I-50PT	20plts 50plts	2200 4935
***HiCrome™ Coliform Agar Plate, Modified** recommended for the simultaneous detection of *Escherichia coli* and total coliforms in water and food samples.	MP1832-20PT MP1832-50PT	20plts 50plts	1965 4375
***HiCrome™ E.coli Agar Plate** for the detection and enumeration of *Escherichia coli* in foods without further confirmation on membrane filtration or by indole reagent.	MP1295-20PT MP1295-50PT	20plts 50plts	2070 4355
***HiCrome™ E. coli Agar Plate** for the detection and enumeration of *Escherichia coli* in food without further confirmation on membrane filtration or by indole reagent. The composition and performance criteria of this medium are as per the specifications laid down in ISO 16649-2:2001.	MP1295I-20PT MP1295I-50PT	20plts 50plts	2305 5065
***HiCrome™ ECO157 : H7 Selective Agar Plate, Modified** for selective isolation and easy detection of *Escherichia coli* O157 : H7 from food samples.	MP1575A-10PT MP1575A-50PT	10plts 50plts	1185 5020
***HiCrome™ ESBL Agar Plate** for the detection of Extended Spectrum β-Lactamase-producing organisms from clinical & environmental samples.	MP1829-10PT MP1829-50PT	10plts 50plts	1320 5540
***HiCrome™ KPC Agar Plate** for detection of Gram-negative bacteria with a reduced susceptibility to carbapenem agents from clinical samples.	MP1831-20PT MP1831-50PT	20plts 50plts	2305 5540
***HiCrome™ Listeria Agar Plate** for rapid and direct identification of Listeria species in accordance with FDA BAM, 2022.	MP1417F-50PT	50plts	4935

Product	Code	Per Pack	Price in ₹
***HiCrome™ Listeria Ottaviani Agosti Agar Plate** recommended for the selective and differential isolation of *Listeria monocytogenes*. The composition and performance criteria of this media is as per the specification laid down in ISO 11290-1:2017 and ISO 11290-2:2017.	MP1540I-20PT	20plts	5660
***HiCrome™ MDR Acinetobacter Agar Plate** for selective isolation of resistant *Acinetobacter* species from environmental and clinical samples.	MP1938-50PT	50plts	7500
***HiCrome™ MeReSa Agar Plate** for isolation and selective identification of Methicillin Resistant *Staphylococcus aureus* (MRSA) from clinical specimens.	MP1674-20PT MP1674-50PT	20plts 50plts	2305 5025
***HiCrome™ Rapid MRSA Agar Plate** for rapid isolation and identification of Methicillin Resistant *Staphylococcus aureus* (MRSA) from clinical specimens.	MP1974-20PT MP1974-50PT	20plts 50plts	2415 5435
***HiCrome™ Salmonella Agar Plate** for the isolation and differentiation of *Salmonella* species from coliforms by chromogenic method.	MP1296-10PT MP1296-50PT	10plts 50plts	1785 7500
***HiCrome™ Staph Agar Plate, Modified** selective medium for the isolation and enumeration of *Staphylococcus aureus*.	MP1837-20PT MP1837-50PT	20plts 50plts	2325 5175
***HiCrome™ Strep B Selective Agar Plate** for selective isolation of Group B streptococci from clinical sample.	MP1966-10PT MP1966-50PT	10plts 50plts	1275 5375
***HiCrome™ UTI Agar Plate** for presumptive identification of microorganisms mainly causing urinary tract infections.	MP1353-20PT MP1353-50PT	20plts 50plts	2100 4565
***HiCrome™ Universal Agar Plate** for presumptive identification of microorganisms from clinical & non clinical specimens.	MP1600-20PT	20plts	2305
***HiCrome™ VRE Agar Plate** for selective isolation and differentiation of Vancomycin Resistant *Enterococcus faecalis* and *Enterococcus faecium* from clinical samples.	MP1925-10PT MP1925-50PT	10plts 50plts	1095 4565
***Hoyles Media Plate with supplements** for selective isolation and differentiation of *Corynebacterium diphtheria* types.	MP015-50PT	50plts	3590
Lead Acetate Agar Plate for detection of hydrogen sulphide producing enteric bacteria.	MP180-20PT	20plts	1695
Luria Bertani Agar Plate for the cultivation and maintenance of recombinant strains of *E.coli* for genetic and molecular studies; may be used for routine isolation, cultivation of not particularly fastidious microorganisms.	MP1151-20PT MP1151-50PT	20plts 50plts	1600 3590
***Luria Bertani Agar Plate w/100µg/ml Ampicillin** for the cultivation and maintenance of recombinant strains of *E.coli* for genetic and molecular biology studies.	MP1151A-20PT MP1151A-50PT	20plts 50plts	1680 4030

M 7 Hr FC Agar Plate for examination of water and waste water.	MP635-20PT MP635-50PT	20plts 50plts	1745 3685
***M-Endo Agar Plate** for enumeration of coliforms in water using a two step membrane filtration technique.	MP1106-20PT	20plts	2085
***M-Endo Agar Plate, Triple Pack** for usage refer MP1106	MP1106T-20PT	20plts	2440
M-(HPC) Heterotrophic Plate Count Agar Plate recommended for enumeration of heterotrophic microorganisms from water samples using membrane filtration technique.	MP1123-20PT MP1123-50PT	20plts 50plts	1665 4245
***MYP Agar Plate (100mm plate)** recommended for isolation and identification of pathogenic Staphylococci and *Bacillus* species.	MP636C-20PT MP636C-50PT	20plts 50plts	1850 4160
MacConkey Agar Plate for selective isolation and differentiation of *E. coli* and other enteric bacteria from pharmaceutical products in accordance with the microbial limit testing by harmonized methodology of USP/EP/BP/JP.	MPH081-20PT MPH081-50PT	20plts 50plts	1395 2825
MacConkey Agar Plate (Triple Pack) for usage refer MPH081	MPH081T-10PT	10plts	1175
MacConkey Agar w/ 0.15% Bile Salts, CV and NaCl Plate for selective isolation and differentiation of coliform organisms and other enteric pathogens.	MP081-20PT MP081-50PT	20plts 50plts	1335 2705
MacConkey Agar w/o CV, NaCl w/ 0.5% Sodium Taurocholate Plate for cultivation and differentiation of enteric bacteria, restricting swarming of *Proteus* species from specimens such as urine which may contain large number of *Proteus* species as well as potentially pathogenic Gram-positive organisms.	MP082-20PT MP082-50PT	20plts 50plts	1335 2705
MacConkey Agar RS Plate for isolating and differentiating Gram negative enteric bacilli from specimens containing swarming strains of *Proteus* species.	MP1702-10PT MP1702-50PT	10plts 50plts	785 3250
MacConkey Sorbitol Agar Plate for isolation and identification of enteropathogenic *Escherichia coli* strains associated with infant diarrhoea.	MP298-20PT MP298-50PT	20plts 50plts	1335 2705

Product	Code	Per Pack	Price in ₹
MacConkey Sorbitol Agar Plate recommended as the selective medium for isolation and detection of *Escherichia coli* O157: H7 from food and animal feeding stuffs. The composition and performance criteria of this medium are as per the specification laid down in accordance with Draft: ISO/DIS 16654:2001.	MP298I-50PT	50plts	3290
Mannitol Salt Agar Plate for selection and subculture of *Staphylococcus aureus* in accordance with the harmonized method of USP/EP/BP/JP/IP.	MPH118-20PT MPH118-50PT	20plts 50plts	1395 2825
Mannitol Salt Agar Plate (Triple Pack) for usage refer MPH118	MPH118T-10PT	10plts	1175
Mannitol Salt Agar Plate for selective isolation of pathogenic Staphylococci.	MP118-20PT MP118-50PT	20plts 50plts	1335 2705
***Martin Lewis Agar Plate** for the isolation and cultivation of *Neisseria* species from clinical specimens.	MP2085-10PT MP2085-50PT	10plts 50plts	935 3935
Malt extract Agar Plate for detection, isolation and enumeration of yeasts and moulds.	MP137-20PT MP137-50PT	20plts 50plts	1425 3100
***MeReSa Agar Plate** for the selection, isolation and identification of Methicillin Resistant *Staphylococcus aureus* from clinical specimens.	MP1594-10PT	10plts	1045
***Middlebrook 7H11 Agar w/ PANTA supplement** for selective isolation of *Mycobacterium* species.	MP5426-20PT MP5426-50PT	20plts 50plts	1950 4100
***Modified Charcoal Cefoperazone Deoxycholate Agar Plate** recommended for selective detection and enumeration of *Campylobacter* species from food chain. The composition and performance criteria of this medium are as per the specifications laid down in ISO 10272-2:2017.	MP887I-10PT MP887I-50PT	10plts 50plts	830 3475
***Modified MYP Agar Plate** for isolation and identification of *Bacillus* species and pathogenic Staphylococci.	MP1139-50PT	50plts	3660
Modified Plate Count Agar Plate for enumeration of bacteria in milk and milk products, rinse waters, icecreams etc.	MP163-10PT MP163-50PT	10plts 50plts	875 3670
Mucormycosis Selective Agar Plate recommended for the selective isolation of Mucor fungi species (after sporulation appears as black fungi) from clinical samples.	MP5476-20PT MP5476-50PT	20plts 50plts	2280 3890
Mueller Hinton Agar Plate MZ for determination of susceptibility of microorganisms to antimicrobial agents.	MP173-20PT MP173-50PT	20plts 50plts	1470 3050
Mueller Hinton Agar Plate (100 mm Plate) MZ for usage refer MP173	MP173C-50PT	50plts	3520
Mueller Hinton Agar Plate (120mm plate) MZ for usage refer MP173	MP173M-20PT	20plts	2230

HiCFU Counter C™

LA1143

Instrument with camera for the automated determination of the colony count or CFU (Colony forming unit) on Agar plate

- Automated system for determination of colony count or CFU (Colony forming unit) on Agar plate
- Accurate and time saving
- Avoids manual errors
- Widespread application in all industrial sectors including pharma, food, water, dairy and research institutes
- Finds application in CFU determination while performing GPT (Growth Promotion Test)
- Economical

On receipt, all the above products to be stored between 20-30°C

Ready Prepared Media in 55 mm Surface Monitoring Plates

55mm Equivalent to RODAC Plate
For Environmental Sampling (Triple Pack, γ irradiated)

Scored Prepared Plates Also available Triple pack, γ irradiated

- 55 mm Scored Polystyrene Petri plate equivalent to RODAC Plate
- Scored Polystyrene Petri plates (Triple Pack, γ irradiated)
- For Environmental Sampling, sterility testing etc.,
- Grid molded for easy colony counting

Ready Prepared Media in Polystyrene Plates with β Lactamase

Ready prepared β-lactamase plates

- Sterile ready to use agar plates w/ β Lactamase available in 90mm plates & 55mm Scored Plates
- The beta lactamases can efficiently inactivate a range of antibiotics as per their activity, thus finding applications such as,
  1. Inactivation of Penicillin, Cephalosporin of first, second, third & fourth generation and give true bioburden count during environmental studies.
  2. Environmental studies in facilities where presence of Beta lactam antibiotics is suspected.

90 mm Ready Prepared Plates with β Lactamase

Product	Code	Per Pack	Price in ₹
Potato Dextrose Agar Plate w/ β Lactamase a general purpose media for isolation of yeasts and moulds and for inactivation of β-lactam antibiotics.	MP5201-20PT MP5201-50PT	20plts 50plts	2100 4565

Ready Prepared Media in Polystyrene Plates with β Lactamase Lockable plates

Product	Code	Per Pack	Price in ₹
Soyabean Casein Agar Plate w/ β-Lactamase, Lockable (γ-irradiated, Triple Pack) recommended for cultivation of wide variety of organisms and for inactivation of β-lactam antibiotics.	MP1765ALGT-50PT	50plts	5605
Soyabean Casein Digest Agar Plate w/ β-lactamase (Tryptone Soya Agar Plate) (Barcoded, Lockable Plate, γ-irradiated, Triple pack) for usage refer MP1765ALGT	MP1765BLGT-20PT	20plts	3555
	MP1765BLGT-50PT	50plts	7460
Soyabean Casein Digest Agar Plate w/ Lecithin and tween 80, w/ β-lactamase (Barcoded, Lockable Plate, γ-irradiated, Triple Pack) for determining efficiency of containers, equipment surfaces, water miscible cosmetics and inactivation of β lactam antibiotics.	MP1809BLGT-20PT	20plts	3895
	MP1809BLGT-50PT	50plts	8185

Product	Code	Per Pack	Price in ₹
Soyabean Casein Digest Agar Plate w/ β-lactamase II (Lockable plate, γ-irradiated, Triple pack) a general purpose medium for cultivation of wide variety of organisms and for inactivation of cephalosporins of first, second, third and fourth generation.	MP1805LGT-50PT	50plts	4095
Soyabean Casein Digest Agar Plate w/ Lecithin and Tween 80 w/ β-lactamase II (Lockable plate, γ-irradiated, Triple pack) for determining efficiency of containers , equipment surfaces, water miscible cosmetics and for inactivation of cephalosporins of first, second, third and fourth generation.	MP1808LGT-50PT	50plts	4915
Tryptone Soya Agar Plate w/ Lecithin and Tween 80 w/ β-lactamase (Lockable Plate, γ-irradiated, Triple Pack) recommended for determining efficiency of containers, equipment surfaces, water miscible cosmetics and for inactivation of β-lactam antibiotics.	MP1809ALGT-20PT	20plts	3595
	MP1809ALGT-50PT	50plts	7840

On receipt, all the above products to be stored between 20-30°C.

Barcoded Plates

Barcoded Plates

- Available in barcoded format with all the relevant details like Product code, Lot. No. Expiry date, Unique plate number.
- Enables hassle free and paperless record maintenance of the plates
- Plates are trademarked as EM-CULT™ and can be used for environmental monitoring

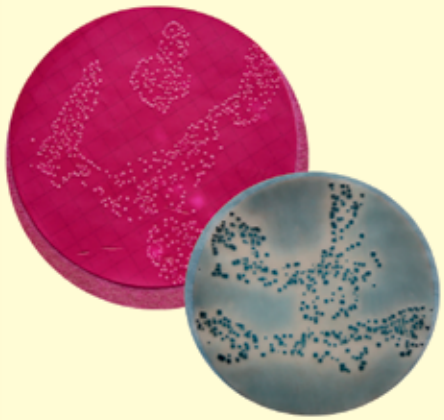
Product	Code	Per Pack	Price in ₹
Soyabean Casein Digest Agar Plate w/ 1% Glycerol, (Barcoded, γ-irradiated, Triple Pack) recommended for cultivation of wide variety of microorganisms	MP290ABGT-50PT	50plts	5195
Soyabean Casein Digest Agar Plate (Barcoded, Lockable, γ-irradiated, Triple Pack) recommended as a general purpose medium used for cultivation of a wide variety of microorganisms.	MP290BLGT-50PT	50plts	10155
Soyabean Casein Digest Agar Plate (Barcoded, 150mm plate, γ-irradiated, Triple Pack) recommended as a general purpose medium used for cultivation of a wide variety of microorganisms and for sterility testing in pharmaceutical procedures.	MP290BCLGT-50PT	50plts	10155
Soyabean Casein Digest Agar Plate w/ Lecithin & Polysorbate 80, (Barcoded, γ-irradiated, Triple Pack) for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	MP449BGT-50PT	50plts	4780
Soyabean Casein Digest Agar Plate w/ Lecithin & Polysorbate 80, (Barcoded, γ-irradiated, Triple Pack, 100mm Plate) for usage refer MP449BGT	MP449BCGT-50PT	50plts	5820

Product	Code	Per Pack	Price in ₹
Soyabean Casein Digest Agar Plate w/ 0.5% Lecithin & 2% Polysorbate 80 & 1% Glycerol (Barcoded, γ-irradiated, Triple pack) recommended for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	MP5297BGT-50PT	50plts	5280

55mm Scored Petriplate

Soyabean Casein Digest Agar Plate w/ Lecithin & Polysorbate 80, (Barcoded, γ-irradiated, Triple Pack) for usage refer MP449BGT	SP449BGT-50PT	50plts	4935
Soyabean Casein Digest Agar Plate w/ Lecithin and Tween 80 (Tryptone Soya Agar w/ Lecithin and Tween 80) w/ β Lactamase (Barcoded, γ-irradiated, Triple pack) for determining efficiency of containers, equipment surfaces, water miscible cosmetics and inactivation of β lactam antibiotics.	SP1809BGT-100PT	100plts	10005
Tryptone Soya Agar Plate, (Barcoded, γ-irradiated, Triple Pack) recommended for cultivation of wide variety of microorganisms and for sterility testing in pharmaceuticals.	SP290BGT-100PT	100plts	7635
Tryptone Soya Agar Plate w/ LTHTh (Barcoded, γ-irradiated, Triple pack) New for determining the efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics, etc. It can also be used to enumerate the organisms from water insoluble products and fatty products containing preservatives or antimicrobials.	SP1691BGT-100PT	100plts	9450

Ready Prepared Media in Polystyrene BiPlates



- Unique combination of two media on a single biplate
- Ready to use sterile poured biplates
- Saves preparation and sterilization time
- Wide range of media in prepared form to cater to the needs of microbiologists and pathologists
- If required any medium can be made available in different combinations as per users convenience

# Due to short shelf life this product will be directly supplied to the customer

DriFilter™ Membrane Nutrient Pad Media

- For testing Water, Brewery, Dairy, Food, Pharmaceutical and Cosmetic products
- Sterile ready prepared medium absorbed and dried on 50 mm filter pads
- Wide range of media nutrient pads to cover water and fluids testing
- Reduces time and labour of media preparation and easy to handle
- Rehydrate with sterile distilled water, place membrane filter used for filtration of sample on nutrient pad and incubate
- Interpretation of results directly by counting the CFUs, also quantitates the microbial load present

HiTouch™ Flexi Plate™ series

- Available in 55mm plate size
- Wide range of Flexi plates available for coliforms, Staphylococci, *Pseudomonas*, *Salmonella*, lactic acid bacteria, yeasts and moulds.
- Saves media preparation and sterilization time.
- Easy for direct enumeration, determines exact count of microorganisms.
- Occupies less storage space.
- No additional addition of reagent required.
- Multifunctional use for contact method, sample dilution and moistened swab method.

HiTouch™ Aerobic Count *Flexi* Plate™ for enumeration (count) of aerobic microorganisms.	FL001-50PT#	50plts	4040
HiTouch™ E.coli/Coliform Count *Flexi* Plate™ for enumeration (count) of all coliforms along with differential count of *E.coli*.	FL002-50PT#	50plts	5075
HiTouch™ Coliform Count *Flexi* Plate™ for enumeration (count) of coliform bacteria.	FL003-50PT#	50plts	4205
HiTouch™ High Sensitivity Coliform Count *Flexi* Plate™ for enumeration (count) of coliform bacteria.	FL004-50PT#	50plts	4205
HiTouch™ Rapid Coliform Count *Flexi* Plate™ for enumeration (count) of coliform bacteria.	FL005-50PT#	50plts	4360
HiTouch™ Yeast and Mould Count *Flexi* Plate™ for enumeration (count) of yeast and mould (fungal) population.	FL006-50PT#	50plts	4295
HiTouch™ Rapid S. aureus Count *Flexi* Plate™ for enumeration (count) of *S. aureus*.	FL007-50PT#	50plts	5560
HiTouch™ Lactic Acid Count *Flexi* Plate™ for enumeration (count) of lactic acid bacteria.	FL008-50PT#	50plts	4360
HiTouch™ Enviromental Testing Flexi Plate™ for enumeration (count) of environmental organisms.	FL009-50PT#	50plts	5825
HiTouch™ Environmental Testing *Flexi* Plate™ (γ-irradiated) for usage refer FL009	FL009G-50PT#	50plts	6855
HiTouch™ Selective Yeast and Mould Count *Flexi* Plate™ for enumeration (count) of yeasts and moulds.	FL010-50PT#	50plts	5560
HiTouch™ *Flexi* Plate™ - SB for enumeration (count) of yeasts and moulds	FL011-50PT#	50plts	3850
HiTouch™ *Flexi* Plate™ - VJ for enumeration (count) of *S. aureus*.	FL012-50PT#	50plts	3850

Product	Code	Per Pack	Price in ₹ #
HiTouch™ *Flexi* Plate™ - VR for enumeration (count) of *Enterobacteriaceae*.	FL013-50PT#	50plts	3850
HiTouch™ *Flexi* Plate™ - CT for enumeration (count) of *Pseudomonas aeruginosa*.	FL014-50PT#	50plts	3850
HiTouch™ *Flexi* Plate™ - DA for determining bactericidal activity of disinfectants.	FL015-50PT#	50plts	4040
HiTouch™ *Flexi* Plate™ - Bacillus Counts for enumeration (count) of *Bacillus*.	FL016-50PT#	50plts	3850
HiTouch™ *Flexi* Plate™ - Thermophillic Bacillus for enumeration (count) of thermophillic *Bacillus*.	FL017-50PT#	50plts	3850
HiTouch™ ECC Count *Flexi* Plate™ for enumeration (count) of *Escherichia coli* and coliforms.	FL022-50PT#	50plts	5560
HiTouch™ Salmonella Count *Flexi* Plate™ for selective isolation and enumeration of *Salmonella* Typhi and other *Salmonella* species.	FL023-50PT#	50plts	5560
HiTouch™ Listeria Count *Flexi* Plate™ for isolation of *Listeria* species.	FL024-50PT#	50plts	5560
HiTouch™ Enteric Pathogen Count *Flexi* Plate™ for selective isolation and differentiation of coliform organisms and other enteric pathogens.	FL030-50PT#	50plts	5560
HiTouch™ HexaCrome *Flexi* Plate™ for differentiation of six pathogenic organisms - *Escherichia coli, Klebsiella, Enterococcus, Proteus, Staphylococcus aureus* & *Pseudomonas*.	FL031-50PT#	50plts	5560
HiTouch™ OGYE *Flexi* Plate™ for isolation, enumeration & differentiation of yeasts and moulds.	FL032-50PT#	50plts	5560
HiTouch™ *Flexi* Plate™ - M-TA for isolation & enumeration of coliforms.	FL033-50PT#	50plts	5560
HiTouch™ *Flexi* Plate™- TJA for isolation & enumeration of Lactobacilli.	FL034-50PT#	50plts	5560

On receipt all the above products to be stored between 2-8°C.
Delivery Charges will be extra

Product	Code	Per Pack	Price in ₹
***HiTouch™ SCDA w/Polysorbate 80 & Lecithin *Flexi* Plate™** for determining the efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics,etc. It can also be used to enumerate the organisms from water insoluble products and fatty products containing preservatives or antimicrobials.	FL035-50PT#	50plts	3855
***HiTouch™ SCDA w/ Polysorbate 80 & Lecithin *Flexi* Plate™ (γ-irradiated)** for usage refer FL035	FL035G-50PT#	50plts	5170
***HiTouch™ SCDA w/ Polysorbate 80 & Lecithin *Flexi* Plate™ (γ-irradiated, Triple Pack)** for usage refer FL035	FL035GT-50PT#	50plts	6310
HiTouch™- HiCrome™ *Ent. Sakazakii* Agar *Flexi* Plate™ for enumeration (count) and differentiation of *Enterobacter sakazakii* (*Cronobacter sakazakii*).	FL036-50PT#	50plts	5500
HiTouch™ *Flexi* Plate™ - R2A for enumeration (count) of treated potable water using longer incubation periods.	FL037-50PT#	50plts	5170
HiTouch™ SCDA w/ β-Lactamase *Flexi* Plate™ a general purpose medium for cultivation of wide variety of organisms and for inactivation of β lactam antibiotics.	FL038-50PT#	50plts	5170
HiTouch™ Sabouraud Dextrose Agar w/ LTHTh *Flexi* Plate™ for determining the efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics,etc.	FL039-50PT#	50plts	5170

Product	Code	Per Pack	Price in ₹
HiTouch™ Sabouraud Dextrose Agar w/ LTHTh *Flexi* Plate™, (γ-irradiated, Triple Pack) for usage refer FL039	FL039GT-50PT#	50plts	6295
HiTouch™ Sabouraud Chloramphenicol Agar *Flexi* Plate™, (γ-irradiated) for selective cultivation of yeasts and moulds.	FL041G-50PT#	50plts	7220
HiTouch™ HiCrome™ Universal Agar *Flexi* Plate™ for presumptive identification of microorganisms from clinical & non clinical specimens.	FL042-50PT	50plts	5835
HiTouch™ HiCrome™ UTI Agar *Flexi* Plate™ for presumptive identification of microorganisms mainly causing urinary tract infections.	FL043-50PT	50plts	5835
HiTouch™ SCDA w/ Polysorbate 80 (20% of 1000 IU/litre) β-lactamase mixture *Flexi* Plate™ a general purpose medium for cultivation of wide variety of organisms and recommended for determining efficiency of containers, equipment surfaces, water miscible cosmetics and for inactivation of penicillins, cephalosporins of first, second, third and fourth generation and penems.	FL044-50PT	50plts	5335
HiTouch™ Coliconfirm Agar *Flexi* Plate™ for selective isolation and identification of *E.coli* and coliforms from water samples.	FL045-50PT	50plts	6150

On receipt all the above products to be stored between 2-8°C.
*On receipt all the above products to be stored between 15-30°C.
Delivery Charges will be extra

Ready Prepared Liquid Medium in Tubes

- Easy and convenient biochemical testing
- Saves laborious media preparation time
- No sterilization required

Product	Code	Per Pack	Price in ₹
Alkaline Peptone Water for enrichment of *Vibrio* species.	LQ069-25X5ML LQ069-50X5ML	25X5ml 50X5ml	975 1530
#Andrade Peptone Water as a base for carbohydrate fermentation reaction study of pure cultures of microorganisms.	LQ174-50X5ML	50X5ml	1605
♦# Aquino Rehydrol B™ Rehydration Fluid for GPT (Bacteria) recommended as a diluting fluid for performing Growth Promotion Test for bacteria with longer stability.	*LQ254IX-25X9ML *LQ254IX-50X9ML	25X9ml 50X9ml	1970 3410
⊙#Aquino Rehydrol F™ Rehydration Fluid for GPT (Fungus) recommended as a diluting fluid for performing Growth Promotion Test for fungus with longer stability.	LQ313IX-25X9ML	25X9ml	2170
#Bile Broth for cultivation of *Enterobacteriaceae*.	*LQ079V-50X5ML LQ079-25X10ML LQ079-50X10ML	50X5ml 25X10ml 50X10ml	1605 1440 2330
BHI Broth for propagation of pathogenic cocci and other fastidious organisms associated with blood culture work and allied pathological investigations.	LQ077-25X5ML LQ077-50X5ML *LQ077XX-50X20ML	25X5ml 50X5ml 50X20ml	1040 1600 3960
#Brucella Broth for enrichment and cultivation of *Brucella* from clinical and non clinical specimens.	*LQ180V-25X5ML *LQ180V-50X5ML	25X5ml 50X5ml	1215 2065
Buffered Glycerol Saline recommended for collection and transportation of faecal specimens.	*LQ341XV-50X15ML	50X15ml	2480

Product	Code	Per Pack	Price in ₹
Buffered Sodium Chloride Peptone Solution pH 7.0 for the preparation of test suspension in accordance with harmonized methods of USP, EP, BP, JP & IP.	*LQ123VIII-25X8ML *LQ123VIII-50X8ML *LQ123-25X9ML *LQ123-50X9ML *LQ123X-25X10ML *LQ123X-50X10ML *LQ123XX-25X20ML	25X8ml 50X8ml 25X9ml 50X9ml 25X10ml 50X10ml 25x20ml	1340 2205 1340 2205 1525 2440 2505
Buffered Sodium Chloride Peptone Solution pH 7.0 w/ 0.05% Polysorbate 80 for the preparation of test suspension.	*LQ255X-25X10ML *LQ255X-50X10ML	25X10ml 50X10ml	1600 2720
Buffered Sodium Chloride Peptone Solution pH 7.00 w/ 1% Polysorbate 80 & 0.5% Soya Lecithin recommended for the preparation of test suspension.	*LQ240IX-25x9ML *LQ240IX-50X9ml *LQ240X-25X10ML *LQ240X-50x10ML	25X9ml 50X9ml 25X10ml 50x10ml	1620 2710 1855 3065
Buffered Sodium Chloride Peptone Solution pH 7.00 w/ 1% Polysorbate 80 and 0.05% Soya Lecithin recommended for the preparation of test suspension.	*LQ343X-25X10ML *LQ343X-50x10ML	25X10ml 50x10ml	1855 3065
Buffered Sodium Chloride Peptone Solution pH 7.0 w/ 3% Tween 80, 0.3% Soya Lecithin & 0.1% L-Histidine hydrochloride New for the preparation of test suspension.	*LQ361IX-25X9ML *LQ361IX-50X9ML	25X9ml 50X9ml	1920 3260

Product	Code	Per Pack	Price in ₹
#Campylo Thioglycollate Broth w/ Selective Supplement for isolation and maintenance and transport of cultures of *Campylobacter* species.	LQ132-50X5ML	50X5ml	2330
#Cooked M Medium for cultivation of aerobes and anaerobes, especially pathogenic Clostridia and also for the maintenance of stock cultures.	*LQ080V-25X5ML	25X5ml	965
	*LQ080V-50X5ML	50X5ml	1705
	LQ080-25X10ML	25X10ml	1470
	LQ080-50X10ML	50X10ml	2375
#Cooked M Medium w/ Glucose, Hemin & Vitamin K for cultivation of aerobes and anaerobes, especially pathogenic Clostridia and also for the maintenance of stock cultures.	LQ093-25X10ML	25X10ml	1590
	LQ093-50X10ML	50X10ml	2495
#Cronobacter Selective Broth recommended for screening *Cronobacter* (formerly *Enterobacter sakazakii*) from food. The composition and performance of this media are as per specifications laid down in ISO 22964:2017.	*LQ1786IX-50X10ML	50X10ml	2735
#Decarboxylase Broth Base, Moeller with the addition of appropriate L-amino acid, it is used to differentiate bacteria on the basis of their ability to decarboxylate the amino acid.	LQ156-25X5ML	25X5ml	970
	LQ156-50X5ML	50X5ml	1550
Dey Engley Neutralising Broth for neutralising and testing antiseptics and disinfectants.	*LQ162X-25X10ML	25X10ml	1950
	*LQ162X-50X10ML	50X10ml	3250
Diluent TSB with Cap4 for total aerobic microbial count of water soluble specimens to be tested in pharmaceuticals, cosmetics etc.	LQ506-25X9ML	25X9ml	1650
	LQ506-50X9ML	50X9ml	2650
Enterobacteria Enrichment Broth, Mossel for the enrichment of bile tolerant organisms in accordance with the harmonized methods of USP/BP/EP/JP/IP.	*LQ119X-25X10ML	25X10ml	1450
	*LQ119X-50X10ML	50X10ml	2425
Eugonic LT100 Broth for activation of fastidious organisms.	LQ208-25x10ML	25X10ml	2360
	LQ208-50X10ML	50X10ml	3940
Fluid Casein Digest Soya Lecithin Polysorbate 20 Medium recommended for sanitary examination of surfaces.	*LQ291IX-20X9ML	20X9ml	1590
Fluid Thioglycollate Medium sterility test medium prepared in accordance with USP, EP, BP & JP.	*LQ026V-25X5ML	25X5ml	1010
	*LQ026V-50X5ML	50X5ml	1675
	*LQ026IX-20X9ML	20X9ml	1315
	*LQ026IX-100X9ML	100X9ml	4600
	*LQ026X-25X10ML	25X10ml	1415
	*LQ026X-50X10ML	50X10ml	2395
Gelatin Liquefication recommended for determining gelatin liquefaction.	*LQ300X-25x10ML	25X10ml	2240
	*LQ300X-50X10ML	50X10ml	3675

Product	Code	Per Pack	Price in ₹
Hugh Leifson Medium recommended for detecting aerobic and anaerobic breakdown of glucose.	*LQ296X-25X10ML	25X10ml	1680
	*LQ296X-50X10ML	50X10ml	2690
Indole Nitrate Broth for identification of microorganisms by means of nitrate reduction and indole production.	LQ081-25X5ML	25X5ml	975
#Kirchner Medium Base for cultivation of *Mycobacterium tuberculosis* Poctri supplement (Containing Polymyxin B, Amphotericin B, Carbenicillin & Trimethoprim for LQ105).	LQ105-25X4ML	25X4ml	975
	FD241-5VL	5vl	425
Koser's Citrate Medium to differentiate *Escherichia coli* and *Klebsiella aerogenes* on the basis of citrate utilization.	LQ091-25X5ML	25X5ml	975
Letheen Broth recommended for screening cosmetic products for microbial contamination	*LQ108IX-25X9ML	25X9ml	1590
	*LQ108IX-50X9ML	50X9ml	2545
Luria Bertani Broth for the cultivation and maintenance of recombinant strains of *Escherichia coli* and may be used for routine cultivation of not particularly fastidious microorganisms.	LQ118-25X10ML	25X10ml	1085
	LQ118-50X10ML	50X10ml	1760
Luria Bertani HiVeg™ Broth for the cultivation and maintenance of recombinant strains of *Escherichia coli* and may be used for routine cultivation of not particularly fastidious microorganisms.	LQ127-50X10ML	50X10ml	1960
#Lysine-Ornithine -Arginine Kit for differentiation of bacteria based on their ability to decarboxylate amino acids. One Kit contains 24 tubes (8 tubes each of **LQ015**- Moeller Decarboxylase Broth w/ Ornithine HCl; **LQ016**- Moeller Decarboxylase Broth w/ Lysine HCl; **LQ017**- Moeller Decarboxylase Broth w/ Arginine HCl).	K093-1KT	1kit	1075
M10 Medium (Motility Indole Ornithine Medium) recommended for the identification of *Enterobacteriaceae* on the basis of motility, indole production and ornithine decarboxylase activity.	*LQ295V-25x5ML	25x5ml	1245
M-Broth for detecting *Salmonella* in food and feeds by the accelerated enrichment serology procedures.	*LQ216X-25X10ML	25X10ml	995
#MIU Medium for detection of motility, urease and indole production.	LQ092-25X10ML	25X10ml	1440
	LQ092-50X10ML	50X10ml	2330

*For customer's convenience, suffix has been added to the different packings of one code

Product	Code	Per Pack	Price in ₹
MR-VP Broth (Glucose Phosphate Broth) for performance of Methyl Red and Voges Proskauer tests in differentiation of coli-aerogenes group.	LQ082-25X5ML LQ082-50X5ML	25X5ml 50X5ml	975 1560
MacConkey Broth for the selective enrichment of *Escherichia coli* in accordance with harmonized methods of USP, EP, BP & JP.	LQ115-50X10ML	50X10ml	2565
Mannitol Salt Broth for selective enrichment of presumptive pathogenic Staphylococci.	*LQ181V-25X5ML *LQ181V-50X5ML	25X5ml 50X5ml	1140 1825
#Mannitol Selenite Broth for selective enrichment of Salmonellae from clinical specimens.	LQ146-50X10ML	50X10ml	2645
Medium 11. GN Broth recommended for the enrichment of *Shigella* from pharmaceutical products in accordance with IP 2018.	LQ151-50X10ML	50X10ml	3390
#Middlebrook 7H9 Broth w/ Glycerol New for cultivation and sensitivity testing of *Mycobacterium tuberculosis*.	*LQ372X-50X10ML	50X10ml	5370
Modified Postgate Medium B New for enumeration of Sulphate Reducing bacteria in water samples. (Available in crimp vial packing)	*LQ369X-25X10ML *LQ369X-50X10ML	25X10ml 50X10ml	1605 2565
Modified Soyabean Casein Digest Medium w/ BTB designed to be utilized in conjunction with BIS containing *Bacillus atrophaeus* to monitor Ethylene Oxide (EWO), Dry Heat, Vaporized Hydrogen Peroxide (VH_2O_2), Chlorine Dioxide (ClO_2) processes.	LQ201-25X4ML LQ201-50X4ML	25X4ml 50X4ml	1425 2715
Modified Soyabean Casein Digest Medium w/ BCP designed to be utilized in conjunction with BIS containing *Bacillus stearothermophilus* to monitor steam at 121°C to 134°C, Vaporized Hydrogen Peroxide (VH_2O_2), Chlorine Dioxide (ClO_2) processes, Chemiclave and Formaldehyde processes.	LQ202-25X4ML LQ202-50X4ML	25X4ml 50X4ml	1425 2715
#Moeller Decarboxylase Broth w/ Arginine Hydrochloride for differentiation of bacteria on the basis of their ability to decarboxylate L-Arginine hydrochloride.	LQ017-50X5ML	50X5ml	1530
#Moeller Decarboxylase Broth w/ Lysine Hydrochloride for differentiation of bacteria on the basis of their ability to decarboxylate L-Lysine hydrochloride.	LQ016-25X5ML LQ016-50X5ML	25X5ml 50X5ml	960 1530
#Moeller Decarboxylase Broth w/ Ornithine Hydrochloride for differentiation of bacteria on the basis of their ability to decarboxylate L-Ornithine hydrochloride.	LQ015-25X5ML LQ015-50X5ML	25X5ml 50X5ml	960 1530
Mueller Hinton Broth to determine the susceptibility of bacteria to sulphonamides by the tube dilution method.	*LQ182V-25X5ML *LQ182V-50X5ML	25X5ml 50X5ml	1045 1685

Product	Code	Per Pack	Price in ₹
7.5% NaCl, Sterile recommended for the enrichment of halophilic organisms.	*LQ548X-50X10ML	50X10ml	2590
1 N HCL, sterile recommended as a solvent.	*LQ334X-25X10ML	25X10ml	690
1 N NaOH, sterile recommended as a solvent.	*LQ335X-25X10ML	25X10ml	945
Nitrate Broth for detection of nitrate reduction by bacteria.	LQ083-25X5ML LQ083-50X5ML	25X5ml 50X5ml	975 1560
Nutrient Broth for general cultivation of less fastidious microorganisms.	LQ071-25X5ML LQ071-50X5ML	25X5ml 50X5ml	975 1560
#OF Medium w/ Dextrose for differentiation of Gram-negative bacteria on the basis of fermentative and oxidative metabolism of Dextrose.	LQ018-25X5ML LQ018-50X5ML	25X5ml 50X5ml	975 1560
0.1% Peptone used as a growth medium and as a base for carbohydrate fermentation media.	*LQ172X-25X10ML *LQ172X-50X10ML *LQ172X3-10X30ML	25X10ml 50X10ml 10X30ml	1390 2305 1120
Peptone Water all purpose growth medium and as a base for carbohydrate fermentation media.	LQ089-25X5ML LQ089-50X5ML *LQ089X-25X10ML *LQ089X-50X10ML	25X5ml 50X5ml 25X10ml 50X10ml	975 1560 1175 1995
#Phenol Red Broth Base as a base for carbohydrate fermentation reaction study of pure cultures of microorganisms.	LQ173-25X5ML LQ173-50X5ML	25X5ml 50X5ml	975 1560
Phenol Red Dextrose Broth, pH 7.00 (AFB Media) New for Dextrose fermentation studies of acid producing bacteria. (Available in crimp vial packing)	*LQ370X-25X10ML *LQ370X-50X10ML	25X10ml 50X10ml	1420 2275
Phosphate Buffer pH 7.0 used as a diluent as recommended by United States Pharmacopoeia.	LQ164-25X9ML LQ164-50X9ML	25X9ml 50X9ml	1525 2460
Phosphate Buffer pH 7.2 used as a diluent as recommended by FDA BAM.	LQ165-25X9ML LQ165-50X9ML	25X9ml 50X9ml	1525 2460
Phosphate Buffer, pH 7.2 with glass beads for usage refer LQ165.	*LQ165B-50X9ML	50X9ml	2560
Phosphate Buffer, pH 7.2 (1:800 Dilution) New used as a diluent as recommended by FDA BAM and USP.	*LQ379IX-25X9ML *LQ379IX-50X9ML	25X9ml 50X9ml	1525 2460
R2A Broth for cultivation and maintenance of heterotrophic bacteria from potable waters.	*LQ251X-25X10ML *LQ251X-50X10ML	25X10ml 50X10ml	1335 2265

TAT Broth w/ beads for sterility testing of highly viscous or gelatinous substances such as salves, ointments and other cosmetic products, in accordance with USP.	*LQ525IXB-25X9ML *LQ525IXB-50X9ML	25X9ml 50X9ml	1880 2990
Tetrathionate Broth selective enrichment medium for isolation of *Salmonella* from foods and other pathological materials.	LQ088-25X10ML LQ088-50X10ML	25X10ml 50X10ml	1440 2330
# Thioglycollate Medium with Hemin & Vitamin K recommended for routine cultivation of fastidious anaerobic microorganisms. Also used for blood culturing and studying fermentation reactions.	*LQ319V-25X5ML *LQ319V-50X5ML *LQ319VIII-25X8ML *LQ319VIII-50X8ML	25X5ml 50X5ml 25X8ml 50X8ml	1480 2405 1690 2705
Tryptone Broth w/o NaCl recommended as a biochemical test in identification of *Vibrio* species.	*LQ297X-25X10ML *LQ297X-50x10ML	25x10ml 50x10ml	1595 2645

Product	Code	Per Pack	Price in ₹
Tryptone Broth w/ 8% NaCl recommended as a biochemical test in identification of *Vibrio* species based on salt tolerance.	*LQ298X-25X10ML *LQ298X-50x10ML	25x10ml 50x10ml	1630 2745
Tryptone Broth w/10% NaCl recommended for enumeration of *Staphylococcus aureus*.	*LQ214X-25X10ML	25X10ml	1680
Tryptone Soya Broth w/ 15% glycerol recommended for the preservation and maintenance of bacterial cultures.	*LQ278II-25X2ML	25X2ml	1335
Tryptophan Solution recommended for detection of indole production.	LQ085-25X5ML LQ085-50X5ML	25X5ml 50X5ml	975 1560
Tween 80 recommended as a surfactant and emulsifier.	*LQ520X-25X10ML	25X10ml	1500
#Urea Indole Medium to differentiate micro-organisms especially *Enterobacteriaceae* on the basis of their ability to hydrolyze urea and indole production.	LQ126-25X3ML LQ126-50X3ML	25X3ml 50X3ml	1080 1745

Ready Prepared Liquid Media in Septum Bottles

- Modified version of bottles for sterility testing
- It can be used for open sterility and closed sterility
- It can be unscrewed (open) as well as injected (closed) sterility

*For customer's convenience, suffix has been added to the different packings of one code
All the above products to be stored between 15-30°C.
On receipt, all the above products to be stored between 2-8°C

Ready Prepared Liquid Medium in Glass Bottles

- **Ready prepared liquid medium in glass bottles available for general cultivation**
- **Sterility test media also available for easy detection of aerobes, anaerobes and fungi**
- **Medium available for Microbial Limit test in accordance with harmonized methods of USP/EP/BP/JP/IP**

Product	Code	Per Pack	Price in ₹
Screw Capped Bottle			
BHI Broth for propagation of pathogenic cocci and other fastidious organisms associated with blood culture work and allied pathological investigations.	*LQ210C-5X100ML *LQ210D-5X500ML	5X100ml 5X500ml	820 2115

Ready Prepared Media

Product	Code	Per Pack	Price in ₹
Diluting Fluid D w/1% Tween 80 diluent in testing of pharmaceuticals and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ560C-10X100ML	10X100ml	2370
Diluting Fluid A w/0.5% Polysorbate 80 & 0.07% Soya Lecithin diluent in testing of pharmaceuticals and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ561C-10X100ML	10X100ml	2370
Dey Engley Neutralizing Broth for neutralizing and determining bactericidal activity of quarternary ammonium compounds.	*LQ162C-10X100ML *LQ162CC-5X200ML	10X100ml 5X200ml	7580 7580
Dey Engley Neutralizing Broth w/o BCP New recommended to be used in disinfectant testing where neutralizaton of antiseptics and disinfectants is important for determining its bactericidal activity.	*LQ362C-10X100ML	10X100ml	7480
Dey Engley Neutralizing Broth w/o BCP (Double strength) New recommended to be used in disinfectant testing where neutralizaton of antiseptics and disinfectants is important for determining its bactericidal activity.	*LQ584C-10X100ML	10X100ml	9450
Eugonic LT100 Broth for cultivation of fastidious organisms.	*LQ208L-5X50ML *LQ208CCL-5X250ML	5X50ml 5X250ml	2100 8680
Fluid Thioglycollate Medium w/ 0.5% Soya Lecithin and 4% Tween 20 recommended as sterility test medium also used for cultivation of wide variety of microorganisms and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ288C3S-5X300ML	5X300ml	5270
Fluid Thioglycollate Medium w 0.5% Soya Lecithin & 4% Tween 80 sterility test medium for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ270C3-5X300ML *LQ270CD-5X400ML	5X300ml 5X400ml	5335 6000
Fluid Thioglycollate Medium w/ 1% Tween 80 recommended for sterility testing of biologics and for cultivation of aerobes, anaerobes and microaerophiles.	*LQ281C-10X100ML	10X100ml	2725
Fluid Thioglycollate Medium w/0.5% Tween 80 and 0.5% Soya Lecithin sterility test medium also used for cultivation of wide variety of microorganisms and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ553D-5X500ML	5X500ml	5885
GN Broth, Hajna for the selective enrichment of Gram negative organisms of the enteric group from clinical & non clinical sample.	LQ157-5X100ML	5X100ml	3570
0.3% Lecithin & 3% Tween 80 recommended as a surfactant and emulsifier.	*LQ279C-5X100ML	5X100ml	3705

Product	Code	Per Pack	Price in ₹
Lactose Broth for the detection of coliform bacteria in water, foods, dairy products as per standard methods.	*LQ212D-5X500ML	5X500ML	4335
Letheen Broth for determination of bacterial activity of quarternary ammonium compounds using *Escherichia coli* or *Staphylococcus aureus*.	LQ108-5X100ML	5X100ml	1120
Letheen Broth Modified for determination of bacterial activity of quarternary ammonium compounds using *Escherichia coli* or *Staphylococcus aureus*.	*LQ131C-5X100ML *LQ131C3-5X300ML *LQ131D-5X500ML	5X100ml 5X300ml 5X500ml	1120 2860 4450
Letheen Broth Modified (w/Tween 80) for screening cosmetic products for microbial contamination.	*LQ133C-5X100ML *LQ133C3-5X300ML *LQ133D-5X500ML	5X100ml 5X300ml 5X500ml	1340 2860 4960
Luria Bertani Broth for the cultivation and maintenance of recombinant strains of *Escherichia coli* and may be used for routine cultivation of not particularly fastidious microorganisms.	*LQ118D-5X500ML	5X500ml	5450
Malt Extract Broth recommended for detection and enumeration of yeasts, moulds and aciduric microorganisms.	*LQ311C-10X100ML	10X100ml	2435
Medium 11.GN Broth for the enrichment of *Shigella* from pharmaceutical products in accordance with IP 2014.	*LQ151C-5X100ML	5X100ml	3710
Mueller Hinton Broth No. 2 Control Cations New recommended to be used in quantitative procedures for susceptibility testing of rapidly growing aerobic and facultatively anaerobic bacteria	*LQ377CCL-5X250ML	5X250ml	5190
Neutralizing fluid with 0.3% Soya Lecithin & 3% Polysorbate 80 New recommended to be used in disinfectant testing where neutralizaton of antiseptics and disinfectants is important for determining its bactericidal activity.	*LQ381C-5X100ML	5X100ml	5380
0.1% Peptone Water used as a growth medium and as a base for carbohydrate fermentation media.	*LQ172C-5X100ML *LQ172D-5X500ML	5X100ml 5X500ml	1120 4450
0.1% Peptone Water w/ 0.1% Tween 80 used as a growth medium and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ253C-5X100ML	5X100ml	1925
0.1% Peptone w/1% Tween 80 New recommended as a growth medium.	*LQ579CS-5X100ML	5X100ml	1990
0.1% Peptone Water w/ 0.5% Soya Lecithin and 4% Tween 80 used as a growth medium and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ268C-10X100ml	10X100ml	3705
0.1% Peptone Water w/ 0.5% Soya Lecithin and 4% Tween 20 used as a growth medium and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ269C-10X100ml	10X100ml	4000

Ready Prepared Solid Media in Glass Bottles▲

- Wide range of media available to meet the needs of microbiologists and pathologists
- On request other media can also be made available as ready to use sterile solid media ▲
- Ready to use sterile solid media in glass bottles
- No sterilization required, just melt and pour into plates
- Economical and saves preparation time

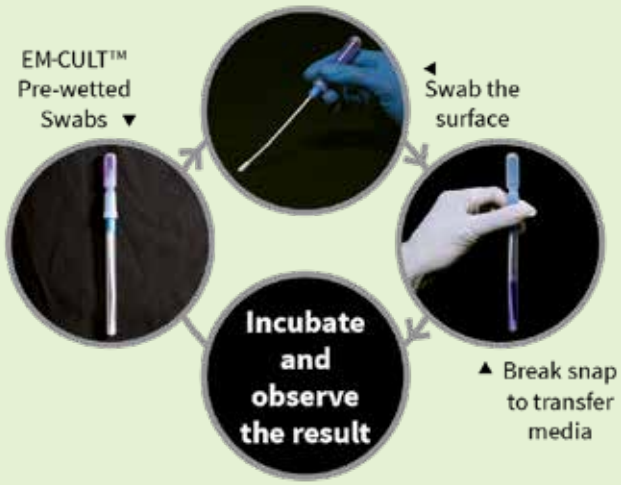
HiCulture™ 0.9% Saline, w/ 0.5% Tween 80 & 0.07% Soya Lecithin for transporting microbial specimens.	MS5328-25NO MS5328-50NO	25nos 50nos	2740 5215

Product	Code	Per Pack	Price in ₹
HiCulture™ Sterile swab w/ SCDM, Lecithin & Polysorbate 80 (γ-irradiated, Triple Pack) for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	MS5342GT-10NO MS5342GT-50NO	10nos 50nos	1325 4855
HiCulture™ Transport Swab w/ Todd Hewitt Broth w/ Colistin & Nalidixic Acid recommended for the selective transportation of Group B Streptococci.	MS2127-25NO MS2127-50NO	25nos 50nos	2065 3705
HiFungal Transport Medium w/swab for transporting fungal specimens.	MS5478-25NO MS5478-50NO	25no 50no	4595 8275



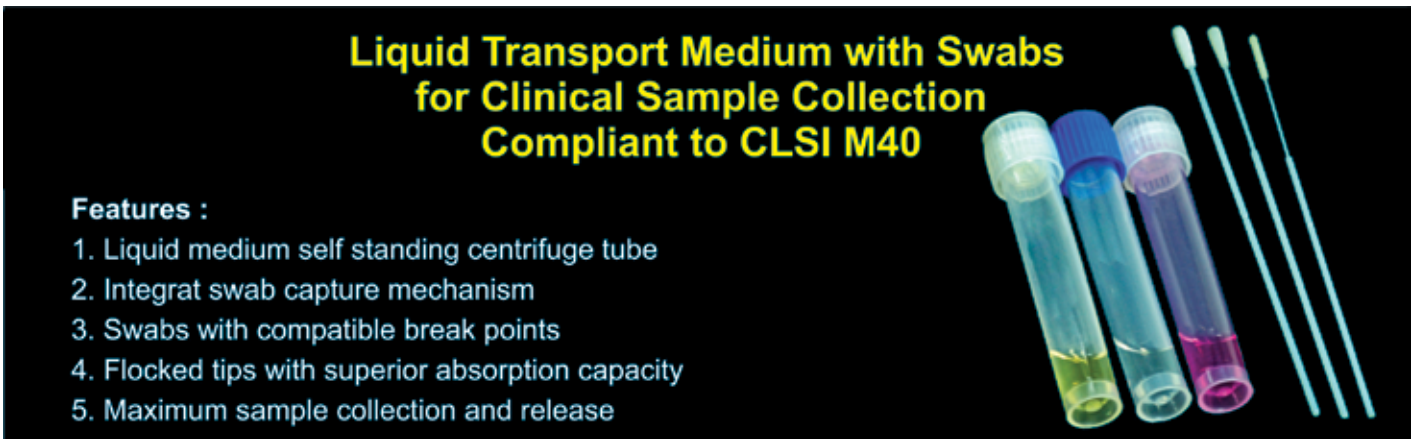
HiCulture™ Transport Swab for Environmental Monitoring

HiCulture™ Transport Swab for Environmental Sampling for detection of microbial contamination on various surfaces & equipments.	MS5259-10NO MS5259-50NO	10nos 50nos	1565 6240

RPM

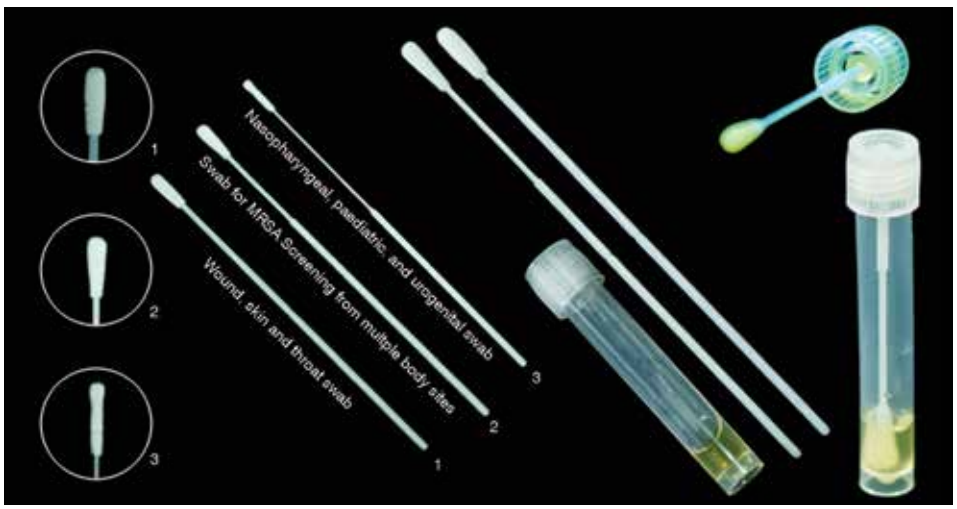
EM-CULT™ Pre-wetted Swabs

NEW



- Convenient, flexible, ready to use and easy to applicable and handling EM-CULT™ Swabs
- The qualitative test for monitoring microbial contamination
- A single tube containing pre- wetted swabs and medium within itself, separated by flexible breakable snap valve, that allows to flow through tube and wet swabs
- Applicable in Pharmaceutical and food and beverages industries wherein, surface monitoring of uneven surfaces or difficult accessible area can be carried out

Product	Code	Per Pack	Price in ₹
EM-CULT™ Pre wetted swab w/ Dey Engley Neutralizing Broth w/ BCP (γ-irradiated, Triple Pack) New for monitoring of clean rooms and difficult to access areas where neutralization of antiseptics and disinfectants is important for determining its bactericidal activity.	MS5576GT-25NO MS5576GT-50NO	25nos 50nos	4030 7250



Product	Code	Per Pack	Price in ₹
EM-CULT™ PA Pre wetted swab w/ Soyabean Casein Digest Medium w/ Tween 80 & Lecithin (γ-irradiated, Triple Pack) New for monitoring of clean rooms and difficult to access areas where neutralization is important for determining its bactericidal activity.	MS5448GT-25NO MS5448GT-50NO	25nos 50nos	3470 6250
EM-CULT™ Pre wetted swab w/ Saline (γ-irradiated, Triple Pack) New for monitoring of clean rooms and difficult to access areas.	MS5575GT-25NO MS5575GT-50NO	25nos 50nos	3195 5750

Liquid Transport Medium with Swabs

Product	Code	Per Pack	Price in ₹
HiCulture™ Transport swabs w/ Amies Medium (A) with 1.0 ml Medium and one swab recommended for collection & transport of aerobic, anaerobic and fastidious organisms from wound, skin and throat.	**MS684A-50NO**	**50nos**	**4480**
HiCulture™ Transport swabs w/ Amies Medium (B) with 1.0 ml Medium and two swabs recommended for collection & transport of aerobic, anaerobic and fastidious organisms from wound, skin and throat & MRSA Screening.	**MS684B-50NO**	**50nos**	**6465**
HiCulture™ Transport swabs w/ Amies Medium (C) with 1.0 ml Medium and three swabs recommended for collection & transport of aerobic, anaerobic and fastidious organisms for, MRSA Screening and multiple body sites.	**MS684C-50NO**	**50nos**	**8450**
HiCulture™ Transport swabs w/ Amies Medium (D) with 1.0 ml Medium and one swab recommended for collection & transport of aerobic, anaerobic and fastidious organisms from nasopharyngeal, paediatric and urogenital specimen.	**MS684D-50NO**	**50nos**	**4100**

Product	Code	Per Pack	Price in ₹
HiCulture™ Transport Swab w/ Soyabean Casein Digest Medium w/ 6.5% NaCl with 2.0 ml TSB Medium and one swab recommended for collection & transport of aerobic, anaerobic and fastidious organisms from nose, throat, axilla, perineum, groin for MRSA Screening.	**MS2016A-50NO**	**50nos**	**9445**
HiCulture™ Transport Swab w/ Soyabean Casein Digest Medium w/ 6.5% NaCl with 2.0 ml TSB Medium and one swab recommended for collection & transport of aerobic, anaerobic and fastidious organisms from rectum.	**MS2016B-50NO**	**50nos**	**6790**
HiCulture™ Transport swabs w/ Selenite Medium (A) with 2.0 ml Medium recommended for enrichment of enteric organisms from faecal specimens.	**MS052A-50NO**	**50nos**	**4975**
HiCulture™ Transport swabs w/ Cary Blair Medium (A) with 2.0 ml Medium recommended for collection & transport of enteric organisms from faecal specimens.	**MS202A-50NO**	**50nos**	**4975**

On receipt, all the above products to be stored between 5-30°C

EZ-Rapid Shot Kit

EZ-Rapid Shot - Simplify your Growth Promotion Testing

- Ready to use format of lyophilized cultures and fixed volume of Rehydration fluid
- Time saving and convenient to use, avoid cumbersome steps such serial dilutions
- With Lyophilized cultures in a ready to use format one can avoid extensive culture maintenance activities
- Proven results for recovery on selective media

EZ-Rapid Shot kit include below mentioned based on the pack size

- 10 or 20 vials of a single quantitated microorganism (1 lyophilized pellet per vial)
- 10 or 20 vials of hydrating fluid (1.2 mL in each vial)

Ready Prepared L. J. Media Slant / Kits

- **Ready to use L.J. Media slants for cultivation of *Mycobacterium***
- **Saves tedious preparation time**
- **Convenient testing of susceptibility and resistance**
- **Assorted antibiotic slants as per requirement can be supplied**
- **Enhanced growth of *Mycobacterium* on SL001 within 12-15 days**

Product	Code	Per Pack	Price in ₹

LQ313IX Rehydration Fluid for GPT (Fungus)

LQ313IX

- Growth Promotion Tests (GPT), described in various pharmacopoeias (USP, BP, EP, JP, IP) is carried out to determine suitability of test medium for growth of specified microorganisms.
- Dilution methods for GPT are tedious while commercial cfu preparations are expensive.
- Aquino™ Rehydrol F for fungus.
- Culture preparations in this fluid can be stored upto 20 days
- Reduces overall time taken for inoculum preparation.
- Overcomes tedious dilutions preparations.
- Cost effective.

AQUINO™ REHYDROL-F

GRANTED PATENT GRANTED

SL000L* The medium is provided in long tubes (165mm X 16mm)

Ready Prepared Biochemical Test Kits for Mycobacteria

Product	Code	Per Pack	Price in ₹
Kit for Selective Isolation of M. tuberculosis (sufficient for 5 tests) recommended for selective isolation of *M. tuberculosis* from suspected clinical samples. Kit Contents: Part A : SL001 Lowenstein Jensen Medium 5 nos, Part B : LQ105 Kirchner medium base (4 ml) 5 nos., Part C : FD241 Poctri supplement 5 vls., (Containing Polymyxin B, Amphotericin B, Carbenicillin & Trimethoprim.)	**K050-KT**	**Kit**	**1885**
Nitrate Reduction Test Kit for Mycobacteria to study the ability of Mycobacteria to reduce nitrite. Kit contains : a) R056-Nitrate buffer in glass tube for Mycobacteria - 10 nos.b) R060-Nitrate Reagent for Mycobacteria - 1 no.	**K043-KT**	**Kit**	**3340**
Catalase Test Kit for Mycobacteria to study catalase activity of Mycobacteria. Kit contains : a) SL122-HiCatalase™ glass tubes w/ 5ml of L.J. medium - 5 nos. b) R057-Catalase buffer 0.5ml (for heat stable catalase study) - 5 nos. c) R058, Part A : H_2O_2 (30%) - 5 ml & Part B : Tween 80 (10%) - 5 ml.	**K044-KT**	**Kit**	**3390**
Pyrazinamidase Test Kit for Mycobacteria (contains SL121 & R059) to study pyrazinamidase activity of Mycobacteria. Kit contains :a) SL121-HiPyrazide glass tube w/ PYZ agar - 10 nos. b) R059, PYZ reagent - 10 ml - 1 no.	**K045-KT**	**Kit**	**2005**

Product	Code	Per Pack	Price in ₹
Thiophene Carboxylic Hydrazide Test Kit for Mycobacteria (contains MP511) to study the inhibition of Mycobacterial growth by Thiophene-2-Carboxylic Hydrazide, for the differentiation between *M. tuberculosis* and *M. bovis*. Kit contains : a) a ready prepared quadrant media plate MP511; Middlebrook 7H10 / 7H11 Agar w/TCH - 10 nos. In Quadrant I : Positive control (without antibiotic) Quadrant II : 1 mcg/ml Quadrant III : 5 mcg/ml Quadrant IV : Negative control (without antibiotic, uninoculated).	**K046-KT**	**Kit**	**3340**
Niacin Detection Kit w/ Syringe to study the accumulation of niacin for differentiation of *Mycobacterium* species especially *Mycobacterium tuberculosis* / for (presumptive) identification of *Mycobacterium tuberculosis*. Kit contains :1. Part A : Reagent (1ml) : 10 vials 2. Part B : Reagent (1ml) : 10 vials 3. R055 : Reagent P (4ml) : 1 vial 4. Sterile syringe (1ml capacity) : 2 nos.	**K047-KT**	**Kit**	**3340**
Niacin Detection Kit Modified w/o Syringe to study the accumulation of niacin for differentiation of *Mycobacterium* species especially *Mycobacterium tuberculosis* / for (presumptive) identification of *Mycobacterium tuberculosis*. Kit contains :1. Part A : Reagent (1ml) : 10 vials, 2. Part B : Reagent (1ml) : 10 vials 3. R055 : Reagent P (4ml) : 1 vial.	**K048-KT**	**Kit**	**3070**

SL179 L. J. Medium Slopes for BCG Vaccine

- Complies as per I.P. Chapter 2.2.5 (Test for colony forming Units CFU)
- Manufactured in class 100 and class 10,000 area
- Broad surface area for enumeration of CFU
- High Quality SPF eggs are used.
- Validated against BCG Vaccines.

On receipt, all the above products to be stored between 2-8°C

Triple Sugar Iron Agar Slants in tubes for usage refer SL045.	**SL045T-10SL** **SL045T-25SL**	**10slants** **25slants**	**825** **1600**
Urea Agar Slant for detection of urease production, particularly by *Proteus vulgaris*, Micrococci and paracolon organisms.	**SL035-10SL** **SL035-25SL**	**10slants** **25slants**	**890** **1765**
Urea Agar Slant in tubes for usage refer SL035.	**SL035T-25SL**	**25slants**	**1680**
Detection Kit- Mucormycosis recommended for sample collection, transportation, detection of suspected *Mucor* species (after sporulation appear as black fungi) and *Candida* species (appear white in color) causing Mucormycosis.	**K144-2KT** **K144-10KT**	**2kits** **10kits**	**885** **3890**

Ready Prepared Hiaureus™ Confirmation Kit

Hiaureus™ Coagulase Confirmation Kit

Confirmation of *Staphylococcus aureus* Positive Reaction - Clot formation Coagulase reaction

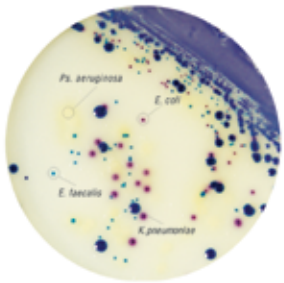
- Reliable, simple, swift and economical
- Confirmatory Test for *Staphylococcus aureus* is the coagulase reaction

Product	Code	Packing	Price in ₹
Hiaureus™ Coagulase Confirmation Kit (w/o swabs) Confirmation of *Staphylococcus aureus* based on coagulase reaction. Kit of 25 tubes containing dehydrated media and suspension fluid.	**K053AD-1KT**	**1 Kit**	**4490**

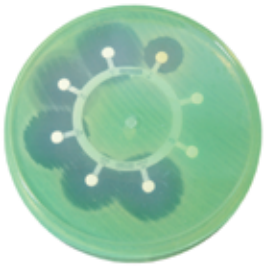
Product	Code	Packing	Price in ₹
Hiaureus™ Coagulase Confirmation Kit (w/swabs) Confirmation of *Staphylococcus aureus* based on coagulase reaction. Kit of 25 tubes containing dehydrated media, suspension fluid along with 25 nos swabs.	**K053ADS-1KT**	**1 Kit**	**4835**

On receipt, all the above products to be stored between 2-8°C

Ready Prepared UTI Diagnostic Kits



- Readily available kit which covers the entire testing protocol
- Media plates for isolation , Octadiscs for sensitivity, and sterile uricol for sample collection
- Testing with 16 different antibiotics with the use of just two octadiscs
- Most Economic and sensitive.
- Effortless testing of the most prevalent UTI Infections.



Uricol

SM1353

Isolation on
HiCrome™ UTI Agar Plate

Octo Disc on
Mueller Hinton Agar Plate

Product	Code	Per Pack	Price in ₹
Ecopathology Uro Kit - I (One kit is sufficient for 5 samples) for diagnosis of Urinary Tract Infection and subsequent antibiotic susceptibility testing. Very economical and rapid diagnostic kit. Kit contains : a) HiCrome™ UTI Agar (SM1353) -1x100ml, b)Mueller Hinton Agar (SM173) - 2x100ml, c)Sterile Petri plates(Empty 90 mm) - 15 Nos, d)Octodiscs OD066R - 5 Nos, OD067R - 5 Nos, (Each OD is a combination of 8 different antibiotics), e) Sterile Uricol - 5 Nos.	**K084A-1KT** **K084A-2KT**	**1kit** **2kits**	**1535** **2705**
Ecopathology Uro Kit- I, Modified for isolation and differentiation of Urinary pathogens on the basis of Lactose fermentation subsequent antibiotic susceptibility testing Very economical and rapid diagnostic kit. Kit contains : a) C.L.E.D. Agar w/ Bromothymol Blue (SM792) - 1X100ml, b) Mueller Hinton Agar (SM173) - 2x100ml, c)Sterile Petri plates(Empty 90 mm) - 15 Nos. d)Octodiscs OD066R - 5 Nos, OD067R - 5 Nos, (Each OD is a combination of 8 different antibiotics), e) Sterile Uricol - 5 Nos.	**K084B-1KT** **K084B-2KT**	**1kit** **2kit**	**1490** **2620**
Ecopathology Uro Kit - 2 (One kit is sufficient for 5 samples) for diagnosis of Urinary Tract Infection and subsequent antibiotic susceptibility testing. Very economical and rapid diagnostic kit. Kit contains : a) HiCrome™ UTI Agar (SM1353) -1x100ml, b)Mueller Hinton Agar (SM173) - 3x100ml, c)Sterile Petri plates (Empty 90 mm) - 5 Nos, (for SM1353) & 120 mm-10Nos for (SM173) d)Octodiscs OD066 - 5 Nos, OD067- 5 Nos, (Each OD is a combination of 8 different antibiotics), e) Sterile Uricol - 5 Nos.	**K085A-1KT** **K085A-2KT**	**1kit** **2kits**	**2055** **3600**

Product	Code	Per Pack	Price in ₹
Ecopathology Uro Kit -3 (One kit is sufficient for 5 samples) for diagnosis of Urinary Tract Infection and subsequent antibiotic susceptibility testing. Very economical and rapid diagnostic kit. Kit contains : a)HiCrome™ UTI Agar (SM1353) -1x100ml, b)Mueller Hinton Agar (SM173) - 2x100ml, c)Sterile Petri plates(Empty 90 mm) - 15 Nos, d)Octodiscs OD022/R - 5 Nos, OD021/R - 5 Nos, (Each OD is a combination of 8 different antibiotics) small size, e) Sterile Uricol - 5 Nos.	**K089-2KT**	**2kits**	**2705**
Ecopathology Uro Kit -4 (One kit is sufficient for 5 samples) for diagnosis of Urinary Tract Infection and subsequent antibiotic susceptibility testing. Very economical and rapid diagnostic kit. Kit contains : a)HiCrome™ UTI Agar (SM1353) -1x100ml, b)Mueller Hinton Agar (SM173) - 3x100ml, c)Sterile Petri plates: 90 mm - 5 Nos (for SM1353) and 120mm - 10 Nos for (SM173) d)Octodiscs: OD022 - 5 Nos, OD021 - 5 Nos, (Each OD is a combination of 8 different antibiotics) e) Sterile Uricol - 5 Nos.	**K090-2KT**	**2kits**	**3600**

On receipt, all the above products to be stored between 2-8°C

Biochemical Test Kit

Biochemical Kits in accordance with Indian Specifications (IS)

- **Kits designed for identification of Bacterial food pathogens based on biochemical profile**

  Vibrio cholerae and *Vibrio parahaemolyticus* IS 5887 Part V
  Shigella species IS 5887 Part VII
  Salmonella species IS 15187 : 2002 & ISO 6340 : 1995

- **Ready to use, easy to perform biochemicals in the form of biochemical Motility strip, liquid media and slants**

Product	Code	Per Pack	Price in ₹
Biochemical Test Kit for Vibrio cholerae **Kit contains Part A:** HiMotility™ Biochemical kit for *V. cholerae* (KBM004) : A combination of 12 biochemical tests for the confirmation of *V.cholerae* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Voges Proskauer's, Arginine utilization, Ornithine utilization, Lysine utilization, Catalase, H_2S production and 4 different Carbohydrate utilization tests - Mannitol, Sucrose, Glucose and Inositol ***Reagents** : Barritt Reagent A (R029) and Barritt Reagent B (R030) **Part B :** Biochemical test for *Vibrio cholerae* (in tubes) (K138B) Biochemical tests to detect 1)Aerobic fermentation 2) Anaerobic fermentation 3)Growth in Tryptone Broth w/o NaCl 4)Growth in Tryptone Broth w/8% NaCl 5)Growth in Tryptone Broth w/10% NaCl 6) Oxidase discs.	**K138-5KT** **K138-10KT**	**5kits** **10kits**	**4310** **8190**
Biochemical Test Kit for Vibrio parahaemolyticus **Kit contains Part A:** HiMotility™ Biochemical kit for *V. parahaemolyticus* (KBM005) A combination of 12 biochemical tests for the confirmation of *V.parahaemolyticus* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Voges Proskauer, Arginine utilization, Ornithine utilization, Lysine utilization, Catalase, H_2S production and 4 different Carbohydrate utilization tests - Mannitol, Sucrose, Glucose and Inositol ***Reagents** : Barritt Reagent A (R029) and Barritt Reagent B (R030) **Part B :** Biochemical test for *V.parahaemolyticus* (in tubes) (K139B) Biochemical tests to detect 1) Aerobic fermentation 2) Anaerobic fermentation 3) Growth in Tryptone Broth w/o NaCl 4) Growth in Tryptone Broth w/8% NaCl 5) Growth in Tryptone Broth w/10% NaCl 6) Oxidase discs.	**K139-5KT** **K139-10KT**	**5kits** **10kits**	**4330** **8210**

Product	Code	Per Pack	Price in ₹
Biochemical Test Kit for Shigella **Kit contains Part A:** HiMotility™ Biochemical kit for *Shigella* (KBM006) : A combination of 12 biochemical tests for the confirmation of *Shigella* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Indole, Voges Proskauer's, Citrate, Malonate and 6 different Carbohydrate utilization tests - Glucose, Lactose, Mannitol, Sucrose, Salicin and Dulcitol, TDA Reagent (R036) ***Reagents :** Kovacs Reagent (R008), Barritt Reagent A (R029) and Barritt Reagent B (R030) **Part B :** Biochemical test for *Shigella* (in tubes) (K140B) Biochemical tests to detect 1) Aerobic fermentation 2) Anaerobic fermentation 3) Arginine utilization 4) Ornithine utilization 5) Lysine utilization 6) Urease 7) Catalase 8) H_2S 9) Gelatin liquefaction 10)Oxidase discs 11) Phenylalanine Agar Slant.	**K140-5KT** **K140-10KT**	**5kits** **10kits**	**6270** **11290**
Biochemical Test Kit for Salmonella **Kit contains** 1) SL045 - Triple Sugar Iron Agar Slant 2) SL035 - Urea Agar Slant 3) LQ016 - Moeller Decarboxylase Broth w/ L-Lysine hydrochloride.	**K141-5KT** **K141-10KT**	**5kits** **10kits**	**1235** **2215**

On receipt, all the above products to be stored between 2-8°C
* Quantity of reagents supplied is sufficient for respective packs

Ready Prepared Biochemical Identification Test Kits

Product	Code	Per Pack	Price in ₹
HiIMViC™ Biochemical Test Kit **a combination of 12 tests for differentiation of *Enterobacteriaceae* species.** (Kit contains sterile media for Indole, Methyl red, Voges Proskauer's, Citrate utilization tests and 8 different carbohydrates- Glucose, Adonitol, Arabinose, Lactose, Sorbitol, Mannitol, Rhamnose, Sucrose).***Reagents supplied with kit :** Kovac's Reagent (R008) for Indole Test, Methyl Red Indicator (I007), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB001-5KT** **KB001-10KT** **KB001-20KT**	**5Kits** **10Kits** **20Kits**	**3670** **6245** **8920**
HiAssorted™ Biochemical Test Kit **a combination of 12 tests for identification of Gram-negative rods.** (Kit contains sterile media for Citrate utilization, Lysine utilization and Ornithine utilization, Urease detection, Phenylalanine deamination (TDA), Nitrate reduction, H_2S production test and 5 different carbohydrates for utilization test - Glucose, Adonitol, Lactose, Arabinose, Sorbitol). ***Reagents supplied with kit :** TDA Reagent (R036), Nitrate Reagents : α - Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015).	**KB002-5KT** **KB002-10KT** **KB002-20KT**	**5Kits** **10Kits** **20Kits**	**3985** **6775** **9685**

Product	Code	Per Pack	Price in ₹
Hi25™ Enterobacteriaceae Identification **a combination of 25 tests for identification of *Enterobacteriaceae* species.** (Kit contains discs for oxidase test and sterile media for ONPG, Lysine utilization, Ornithine utilization, Urease detection, Phenylalanine deamination (TDA), Nitrate reduction, H_2S production, Citrate utilization,Voges Proskauer's, Methyl red, Indole, Malonate, Esculin hydrolysis tests and 11 different carbohydrates utilization test - Arabinose, Xylose, Adonitol, Rhamnose, Cellobiose, Melibiose, Saccharose, Raffinose, Trehalose, Glucose, Lactose). ***Reagents supplied with kit :** TDA Reagent (R036), Nitrate Reagents : - α Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test, Methyl Red Indicator (I007), Kovac's Reagent (R008) for Indole Test.	**KB003-5KT** **KB003-10KT** **KB003-20KT**	**5Kits** **10Kits** **20Kits**	**6855** **11640** **16620**
HiStaph™ Identification Kit **a combination of 12 tests for identification of *Staphylococcus* species.** (Kit contains sterile media for Voges Proskauer's, Phosphatase, ONPG, Urease production, Arginine utilization tests and 7 different carbohydrates utilization tests - Mannitol, Sucrose, Lactose, Arabinose, Raffinose,Trehalose, Maltose). ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB004-5KT** **KB004-10KT** **KB004-20KT**	**5Kits** **10Kits** **20Kits**	**3985** **6775** **9685**
HiStrep™ Identification Kit **a combination of 12 tests for identification of *Streptococcus* species.** (Kit contains sterile media for Voges Proskauer's, Esculin hydrolysis, PYR, ONPG, Arginine utilization tests and 7 different carbohydrates utilization tests - Glucose, Lactose, Arabinose, Sucrose, Sorbitol, Mannitol, Raffinose). ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test, PYR Reagent (R043).	**KB005A-5KT** **KB005A-10KT** **KB005A-20KT**	**5kits** **10kits** **20kits**	**3985** **6775** **9685**

On receipt, all the above products to be stored between 2-8°C
* Quantity of reagents supplied is sufficient for respective packs

Product	Code	Per Pack	Price in ₹
HiCandida™ Identification Kit **a combination of 12 tests for identification of *Candida* species.** (Kit contains sterile media for Urease production and 11 different carbohydrates utilization tests - Melibiose, Lactose, Maltose, Sucrose, Galactose, Cellobiose, Inositol, Xylose, Dulcitol, Raffinose, Trehalose).	**KB006-5KT** **KB006-10KT** **KB006-20KT**	**5kits** **10kits** **20kits**	**3670** **6245** **8920**
HiVibrio™ Identification Kit **a combination of 12 tests for identification of *Vibrio* species.** (Kit contains sterile media for Voges Proskauer's, Arginine utilization, Salt tolerance, ONPG, Citrate utilization, Ornithine utilization and 6 different carbohydrates utilization tests - Mannitol, Arabinose, Sucrose, Glucose, Salicin, Cellobiose). ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB007-5KT** **KB007-10KT** **KB007-20KT**	**5kits** **10kits** **20kits**	**3670** **6245** **8920**
HiNeisseria™ Identification Kit **a combination of 12 tests for identification of *Neisseria* species.** (Kit contains sterile media for Urease production, ONPG, Voges Proskauer's, Oxidase, Catalase, Nitrate reduction test and 6 different carbohydrates utilization tests - Glucose, Maltose, Lactose, Sucrose, Fructose, Mannose). ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test, Gordon-McLeod Reagent (Oxidase Reagent) (R026), Nitrate Reagents : α - Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015).	**KB008-5KT** **KB008-10KT** **KB008-20KT**	**5kits** **10kits** **20kits**	**3985** **6775** **9685**
HiCarbo™ Kit **a combination of 35 tests for utilization of carbohydrate tests.** Kit contains Part A, Part B each having 12 carbohydrates utilization tests and Part C containing 11 sugar and 1 control.	**KB009-5KT** **KB009-10KT** **KB009-20KT**	**5kits** **10kits** **20kits**	**5155** **9685** **15145**
HiCarbo™ Kit- Part A Lactose, Xylose, Maltose, Fructose, Dextrose, Galactose, Raffinose, Trehalose, Melibiose, Sucrose, L-Arabinose, Mannose.	**KB009A-5KT** **KB009A-10KT** **KB009A-20KT**	**5kits** **10kits** **20kits**	**2595** **4415** **8395**
HiCarbo™ Kit- Part B Inulin, Sodium gluconate, Glycerol, Salicin, Dulcitol, Inositol, Sorbitol, Mannitol, Adonitol, Arabitol, Erythritol, α-Methyl-D-glucoside.	**KB009B1-5KT** **KB009B1-10KT** **KB009B1-20KT**	**5kits** **10kits** **20kits**	**2595** **4415** **8395**
HiCarbo™ Kit- Part C Rhamnose, Cellobiose, Melezitose, α-Methyl-D-Mannoside, Xylitol, ONPG, Esculin, D-Arabinose, Citrate, Malonate, Sorbose and 1 control. **Note : KB009 is available as a total kit and also individually as Part A, Part B and Part C**	**KB009C-5KT** **KB009C-10KT** **KB009C-20KT**	**5kits** **10kits** **20kits**	**3115** **5300** **10070**
HiE. coli™ Identification Kit **a combination of 12 tests for identification of *E. coli*.** (Kit contains sterile media for MR test, Voges Proskauer's, Citrate utilization, Indole, Glucuronidase, Nitrate reduction, ONPG, Lysine utilization tests and 4 different carbohydrates utilization tests - Lactose, Glucose, Sucrose, Sorbitol).***Reagents supplied with kit :** Methyl Red Indicator (I007), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test, Kovac's Reagent (R008) for Indole Test, Nitrate Reagents : α-Naphthylamine Solution(R009) and Sulphanilic Acid 0.8% (R015).	**KB010-5KT** **KB010-10KT** **KB010-20KT**	**5kits** **10kits** **20kits**	**3985** **6775** **9685**

Product	Code	Per Pack	Price in ₹
HiSalmonella™ Identification Kit **a combination of 12 tests for identification of *Salmonella* species.** (Kit contains sterile media for MR test, Voges Proskauer's test, Urease production, H_2S production, Citrate utilization, Lysine utilization, ONPG tests and 5 different carbohydrate utilization tests - Lactose, Arabinose, Maltose,Sorbitol, Dulcitol). ***Reagents supplied with kit :** Methyl Red Indicator (I007), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB011-5KT** **KB011-10KT** **KB011-20KT**	**5kits** **10kits** **20kits**	**3985** **6775** **9685**
HiListeria™ Identification Kit **a combination of 12 tests for identification of *Listeria* species.** (Kit contains sterile media for Catalase, Nitrate reduction, Esculin, Voges Proskauer's, Methyl red, and 7 different carbohydrates utilization tests - Xylose, Lactose, Glucose, α-Methyl-D-Mannoside, Rhamnose, Sucrose, Mannitol). ***Reagents supplied with kit :** Nitrate Reagents : - α-Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015), Methyl Red Indicator (I007), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB012A-5KT** **KB012A-10KT** **KB012A-20KT**	**5kits** **10kits** **20kits**	**3985** **6775** **9685**
HiBacillus™ Identification Kit **a combination of 12 tests for identification of *Bacillus* species.** (Kit contains sterile media for Malonate, Voges Proskauer's, Citrate, ONPG, Nitrate reduction, Catalase, Arginine utilization and 5 different carbohydrates utilization tests - Sucrose, Mannitol, Glucose, Arabinose, Trehalose). ***Reagents supplied with kit :** Nitrate Reagents : - α Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB013-5KT** **KB013-10KT** **KB013-20KT**	**5kits** **10kits** **20kits**	**3985** **6775** **9685**
HiAcinetobacter™ Identification Kit **a combination of 24 test for the identification of *Acinetobacter* species** (Kit contains sterile medium in Strip1 for Indole, Voges Proskauer's, Citrate utilization, Lysine utilization, Ornithine utilization, Arginine utilization, Nitrate reduction, Malonate, Urease, Phenylalanine deamination (TDA), H_2S production and ONPG; and Strip 2 for 12 carbohydrate utilization tests- Glucose, Mannitol, Xylose, Inositol, Sorbitol, Rhamnose, Sucrose, Lactose, Arabinose, Adonitol, Raffinose and Salicin. ***** **Reagents supplied with kit :** TDA Reagent (R036), Nitrate Reagents: α-Naphthylamine Solution (R009) and Sulphanilic acid , 0.8% (R015), Barrit Reagent A (R029) and Baritt Reagent B (R030) for VP test, Kovac's Reagent (R008) for Indole test).	**KB014-5KT** **KB014-10KT** **KB014-20KT**	**5kits** **10kits** **20kits**	**6855** **11640** **16620**
Hi24™ Enterobacteriaceae Identification Kit, Modified **a combination of 24 test for the identification of *Enterobacteriaceae* species** (Kit contains sterile medium in Strip1 for ONPG, Lysine utilization, Ornithine utilization, Urease detection, Phenylalanine deamination (TDA), Voges- Proskauer's, Methyl red, Indole, PYR, β- Glucuronidase, α- Galactosidase, β-Xylosidase and Strip 2 for Esculin hydrolysis and 11 different carbohydrates utilization test - Sucrose, Sorbitol, Trehalose, Glucose, Cellobiose, Melibiose, Salicin, Mannose, Maltose, Raffinose, Lactose ***Reagents supplied with kit :** TDA Reagent (R036) Barritt Reagent A (R029), Barritt Reagent B (R030), Methyl Red Indicator (I007), Kovac's Reagent (R008), PYR Reagent (R043).	**KB016-5KT** **KB016-10KT** **KB016-20KT**	**5kits** **10kits** **20kits**	**7870** **13385** **19115**

On receipt, all the above products to be stored between 2-8°C
* Quantity of reagents supplied is sufficient for respective packs

Product	Code	Per Pack	Price in ₹
Hi24™ Nonfermenters Identification Kit A combination of 24 tests for the identification of non fermenters (Kit contains sterile medium in Strip 1 for Indole, Esculin hydrolysis, Citrate utilization, Arginine utilization, Nitrate reduction, ONPG, Alkaline phosphatase, Phenylalanine deamination, Urease, Cetrimide tolerance, Lysine utilization, Oxidase and Strip 2 for 12 different carbohydrate utilization test (Lactose, Maltose, Mannitol, Trehalose, Sucrose, Arabinose, Cellobiose, Fructose, Galactose, Glucose, Inositol, Xylose).	**KB019-5KT** **KB019-10KT** **KB019-20KT**	**5kits** **10kits** **20kits**	**6855** **11640** **16620**

Product	Code	Per Pack	Price in ₹
HiLacto™ Identification Kit A combination of 12 tests for differentiation of *Lactobacillus* species.Kit contains sterile material for Esculin hydrolysis, Catalase and 10 different carbohydrates utilization tests- Xylose, Cellobiose, Arabinose, Maltose, Galactose, Mannose, Mellibiose, Raffinose, Sucrose and Trehalose.	**KB020-10KT** **KB020-20KT**	**10kits** **20kits**	**7855** **13860**
HiBifido™ Identification Kit A combination of 12 tests for differentiation of *Bifidobacterium* species. Kit contains sterile material for Catalase and 11 different carbohydrates utilization tests - Arabinose, Cellobiose, Fructose, Lactose, Maltose, Mannose, Melibiose, Raffinose, Sucrose, Xylose and Salicin.	**KB021-10KT** **KB021-20KT**	**10kits** **20kits**	**7855** **13850**

RPM

Ready Prepared Motility and Biochemical Test Kits

Product	Code	Per Pack	Price in ₹
HiMotility™ Biochemical Kit for E.coli **a combination of 12 tests for confirmation of *E. coli* based on motility and other biochemical tests.** (Kit contains sterile media for Motility test in first 2 wells followed by Indole, Citrate utilization, Glucuronidase, Nitrate reduction, ONPG, Lysine utilization tests and 4 different carbohydrates utilization tests - Lactose, Glucose, Sucrose, Sorbitol). ***Reagents supplied with kit :** Kovac's Reagent (R008) for Indole Test, Nitrate Reagents : α - Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015).	**KBM001-10KT** **KBM001-20KT**	**10kits** **20kits**	**6185** **8845**
HiMotility™ Biochemical Kit for Salmonella **a combination of 12 tests for confirmation of *Salmonella* based on motility and other biochemical tests.** (Kit contains sterile media for Motility test in first 2 wells followed by Citrate utilization, Urease production, Arginine utilization, Lysine utilization, H_2S production, ONPG tests and 4 different carbohydrates utilization tests - Arabinose, Lactose, Maltose, Trehalose).	**KBM002-5KT** **KBM002-10KT** **KBM002-20KT**	**5kits** **10kits** **20kits**	**3630** **6185** **8845**
HiMotility™ Biochemical Kit for Listeria **a combination of 12 tests for confirmation of *Listeria* based on motility and other biochemical tests.** (Kit contains sterile media for Motility test in first 2 wells (Motility + Esculin), followed by Catalase, Nitrate reduction, Voges Proskauer's, Methyl red and 6 different carbohydrates utilization tests -Xylose, Lactose, α - Methyl-D-Mannoside, Rhamnose, Glucose, Mannitol).***Reagents supplied with kit :** Nitrate Reagents : α - Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test, Methyl Red Indicator (I007).	**KBM003A-5KT** **KBM003A-10KT** **KBM003A-20KT**	**5kits** **10kits** **20kits**	**3630** **6185** **8845**

Product	Code	Per Pack	Price in ₹
HiMotility™ Biochemical Kit for Vibrio cholerae A combination of 12 biochemical tests for the confirmation of *V.cholerae* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Voges Proskauer, Arginine utilization, Ornithine utilization, Lysine utilization, Catalase, H_2S production and 4 different Carbohydrate utilization tests - Mannitol, Sucrose, Glucose and Inositol. ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030).	**KBM004-5KT** **KBM004-10KT** **KBM004-20KT**	**5kits** **10kits** **20kits**	**3495** **5950** **8505**
HiMotility™ Biochemical Kit for Vibrio parahaemolyticus A combination of 12 biochemical tests for the confirmation of *V.parahaemolyticus* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Voges Proskauer, Arginine utilization, Ornithine utilization, Lysine utilization, Catalase, H_2S production and 4 different Carbohydrate utilization tests - Mannitol, Sucrose, Glucose and Inositol ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030).	**KBM005-5KT** **KBM005-10KT** **KBM005-20KT**	**5kits** **10kits** **20kits**	**3495** **5950** **8505**
HiMotility™ Biochemical Kit for Shigella A combination of 12 biochemical tests for the confirmation of *Shigella* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Indole, Voges Proskauer's, Citrate, Malonate and 6 different Carbohydrate utilization tests - Glucose, Lactose, Mannitol, Sucrose, Salicin and Dulcitol ***Reagents supplied with kit :** Kovacs Reagent (R008), Barritt Reagent A (R029) and Barritt Reagent B (R030).	**KBM006-5KT** **KBM006-10KT** **KBM006-20KT**	**5kits** **10kits** **20kits**	**3495** **5955** **8505**

⊙The animal based peptones in this medium have been fully replaced by TSE/BSE and GMO free Vegetable peptones
Chemically Defined

HiEnviro-Sponge™ Hydrated for Sample Collection

- *Biocide free sponges with no impact on recovery/viability of organisms*
- *Durable sponge for all types of environmental surfaces*
- *Available in Dry format and Hydrated with various media/buffers*
- *Sponge stick version allows to reach difficult to reach areas*
- *Sponges & sponge stick in completely sealed in sampling bags and γ-irradiated providing assurance of sterility*

K156 HiVibri-O-Trap Kit

Salient features :

- Highly nutritious, supports the growth of desired microorganisms - *Vibrio* sp
- Chromogenic technology imparts distinct colours making identification easier
- Selective medium helps to inhibit the unwanted microbial flora
- Microbial Enumeration and differentiation steps are easier
- Disinfectant solution provided to ensure safe disposal

K158 Rapid HiUTI Kit

- Ready-to-use kit for detection of UTI pathogens
- Chromogenic technology imparts distinct colours making identification easier
- Enumeration and differentiation of UTI pathogens is easier

Product	Code	Packing	Price in ₹
HiVibri-O-Trap Kit recommended for the selective enumeration and differentiation of *Vibrio* species from water samples. Kit contents: 1.HiVibri-O-Trap Plate (RP001)- 10Nos 2.Container for Sample - 10Nos 3.Syringe - 10Nos 4.Disinfectant tablet - 10Nos 5.Round Sealing Tape for Petri plate - 10Nos	**K156-1KT**	**1kit**	**On Request**

Dehydrated Culture Media (Powder Form) for Microbiology - Sterile Media (Animal Protein Based) for Media Fill Trials - Sterile Media (Vegetable Protein Based) for Media Fill Trials	
Water Testing (Field) Kits, Microbiology	

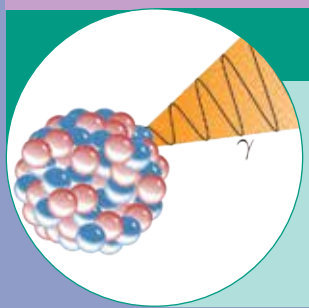
Service Provider

MiCroBiology™ Understanding Microbes

HiMedia's Gamma (γ) Irradiation sterilization facility

- 3 Million Curie Capacity Facility
- ISO 9001:2015 QMS
- WHO-GMP
- A.E.R.B. approved
- B.R.I.T. approved

Unique selling proposition



HiMedia Gamma Irradiation Facility

- Processing data tracked through a Barcode System - from material receipt in the Facility till the dispatch of treated Material
- Dosimeter batch received verified at user end
- Dose Mapping study carried out challenging with B.I.'s
- Efficiency in dose calculation
- Maximum acceptable weight for processing- 50kg per box/drum
- Automated scissor lift for material movement

Product Segments

- Empty Swabs, Plastic tubes, Bottles, Petri plates
- Powders & Raw Material
- Plastic Packing, Plastic tubes, bottles, Petri plates
- Garments
- Silicon tubes
- Disinfectants
- Pharmaceutical / Cosmetic containers
  - Bottles, Syringes, Eyedroppers, Eyedropper Bottles
  - Surgical Products (disposable products)

Doses

- 6-12 kGy
- 13-20 kGy
- 25-35 kGy
- Above 25kGy (in multiples of 25)

Plot No. - N46, Additional Ambernath MIDC, Anand Nagar, Ambernath (East) 421506, Maharashtra, India

Anaerobic Fermentation Medium Base for the detection of fermentation reactions of anaerobic microorganisms. Gms/Lit : **40.00** **12.5 Lit/500G**	**M978-500G**	**500gm**	**5145**
Anaerobic Thioglycollate Medium Base for the cultivation of anaerobes. Gms/Lit : **40.55** **12.33 Lit/500G**	**M1616-500G**	**500gm**	**4405**
Anaerobic Tryptone Soya Agar for screening anaerobes in cosmetic products such as talcum powder. Gms/Lit : **50.41** **9.92 Lit/500G**	**M975-500G**	**500gm**	**5385**
Andrade Peptone Water a basal medium to which various carbohydrates can be added to study fermentation reactions. Gms/Lit : **15.10** **33.11 Lit/500G**	**M885-100G** **M885-500G**	**100gm** **500gm**	**930** **3915**
Andrade HiVeg™ Peptone Water for usage & grams per litre refer M885	**MV885-100G** ◉	**100gm**	**955**
Andrade Peptone Water as a basal medium, which with carbohydrate addition is used to study fermentation reactions. It is recommended by BIS Committee under the specifications IS:5887 (Part I and V): 1976, Reaffirmed 2005. Gms/Lit : **15.10** **6.62 Lit/100G**	**M885S-100G**	**100gm**	**930**
Andrade Peptone Water w/ Meat Extract (Revised as Andrade Peptone Water w/HM Extract) as a basal medium for studying fermentation reactions, particularly of members of the *Enterobacteriaceae*. Gms/Lit : **18.10** **27.62 Lit/500G**	**M909-500G**	**500gm**	**4465**
Andrade Peptone Water w/ HiVeg™ Extract No. 1 for usage & grams per litre refer M909	**MV909-500G** ◉	**500gm**	**4695**
Andrade Peptone Water, Modified for carbohydrate fermentation studies of particularly Enterobacteriaceae members in accordance with FDA BAM, 1998. Gms/Lit : **23.02** **21.72 Lit/500G**	**M909F-500G**	**500gm**	**4900**
Antibiotic Assay Medium B for microbiological assay of colistumethate sodium using *Bordetella bronchiseptica* ATCC 4617 & *E.Coli* ATCC 10536. Gms/Lit : **45.00 +** **11.11 Lit/500G** **10 gm/lt polysorbate 80** ◀	**M1346-500G**	**500gm**	**5345**
Antibiotic Assay Medium B for microbiological assay of colistumethate sodium using *Bordetella bronchiseptica* ATCC 4617 & *E.Coli* ATCC 10536 in accordance with EP/BP Gms/Lit : **44.77+** **11.16 Lit/500G** **10 gm/lt polysorbate 80** ◀	**MAP1346-500G**	**500gm**	**5590**
Antibiotic Assay Medium C as the broth medium in tubidimetric assay of a wide variety of antibiotics. Gms/Lit : **20.00** **25 Lit/500G**	**M555-500G**	**500gm**	**5085**
Antibiotic Assay Medium C as the broth medium in turbidimetric assay of a wide variety of antibiotics in accordance with EP/BP. Gms/Lit : **19.90** **25.13 Lit/500G**	**MAP555-500G**	**500gm**	**5485**

Product	Code	Packing	Price in ₹
Antibiotic Assay Medium D for microbiological assay of Erythromycin using *Klebsiella pneumoniae*. Gms/Lit : **19.40** **25.77 Lit/500G**	**M556-500G**	**500gm**	**5085**
Antibiotic Assay Medium D for the microbiological assay of Erythromycin and Neomycin using *Klebsiella pneumoniae* as a test organism in accordance with EP/BP. Gms/Lit : **19.40** **25.77 Lit/500G**	**MAP556-500G**	**500gm**	**5485**
Antibiotic Assay Medium E for microbiological assay of Neomycin sulphate and Framycetin sulphate using *Bacillus subtilis* and *Bacillus pumilus*. Gms/Lit : **28.67** **17.44 Lit/500G**	**M1347-500G**	**500gm**	**5105**
Antibiotic Assay Medium E for microbiological assay of Neomycin sulphate and Framycetin sulphate using *Bacillus subtilis* and *Bacillus pumilus* in accordance with EP/BP. Gms/Lit : **28.67** **17.44 Lit/500G**	**MAP1347-500G**	**500gm**	**5305**
Antibiotic Assay Medium F for microbiological assay of Amphotericin B and Nystatin using *Saccharomyces cerevisiae* & Candida tropicalis respectively. Gms/Lit : **60.00** **8.33 Lit/500G**	**M923-500G**	**500gm**	**5305**
Antibiotic Assay Medium F for microbiological assay of Amphotericin B and Nystatin using *Saccharomyces cerevisiae* & Candida tropicalis in accordance with EP/BP. Gms/Lit : **59.09** **8.46 Lit/500G**	**MAP923-500G**	**500gm**	**5515**
Antibiotic Assay Medium G for microbiological assay of Bleomycin sulphate using *Mycobacterium smegmatis*, as a test organism. Gms/Lit : **38.00 +** **13.15 Lit/50** **10 gm/lt glycerol**	**M553-500G**	**500gm**	**5290**
Antibiotic Assay Medium G for the microbiological assay of Bleomycin using *Mycobacterium smegmatis*, as a test organism in accordance with EP/BP. Gms/Lit : **38.00 +** **13.15 Lit/500G** **10 gm/lt glycerol**	**MAP553-500G**	**500gm**	**5515**
Antibiotic Assay Medium H for turbidimetric assay of Apramycin using *Salmonella Cholerasuis* as a test organism. Gms/Lit : **18.00** **27.78 Lit/500G**	**M1665-500G**	**500gm**	**5290**
Antibiotic Assay Medium H for turbidimetric assay of Teicoplanin using *Bacillus subtilis* as a test organism in accordance with EP. Gms/Lit : **23.00** **21.74 Lit/500G**	**ME1665-500G**	**500gm**	**5290**
Antibiotic Assay Medium H for the microbiological assay of Teicoplanin using *Bacillus subtilis* ATCC 6633 as a test organism in accordance with BP. Gms/Lit : **23.00** **21.74 Lit/500G**	**M1863B-500G**	**500gm**	**5715**
Antibiotic Assay Medium I for the microbiological turbidimetric assay of Apramycin using *Salmonella cholerasuis* as a test organism in accordance with BP 2016. Gms/Lit : **18.00** **27.78 Lit/500G**	**M1847B-500G**	**500gm**	**5450**

* On receipt store between 2 - 8°C.
△ Approx. number of vials required per 500gm of powder / granulated medium. ◀ To be added but not provided.
◉ The Animal based peptones in this medium have been fully replaced by TSE/BSE and GMO free Vegetable peptones.

Product	Code	Packing	Price in ₹
Antibiotic Assay Medium L- AOAC for microbiological assay of Monensin using *Bacillus subtilis* ATCC 6633 as test organism. Gms/Lit : **28.64** **17.46 Lit/500G**	M991-500G	500gm	5290
Antibiotic Assay Medium M- AOAC for microbiological assay of Lasalocid using *Bacillus subtilis* as test organism. Gms/Lit : **33.64** **14.86 Lit/500G**	M992-500G	500gm	5290
Antibiotic Assay Medium No.1 (Seed Agar) for microbiological assay of ß-lactam and other antibiotics. Gms/Lit : **30.50** **16.39 Lit/500G**	M003-100G M003-500G	100gm 500gm	1150 4595
Antibiotic HiVeg™ Assay Medium No.1 (Seed HiVeg™ Agar) for usage & grams per litre refer M003	MV003-100G ⦿ MV003-500G ⦿	100gm 500gm	1210 4820
Antibiotic Assay Medium No.1 for microbiological assay of ß-lactam and other antibiotics in pharmaceutical and food related preparations in accordance with USP/IP. Gms/Lit : **30.50** **16.39 Lit/500G**	MAP003-100G MAP003-500G	100gm 500gm	1235 4935
Antibiotic Assay Medium A for microbiological diffusion assay of several antibiotics in accordance with EP Gms/Lit : **30.40** **16.45 Lit/500G**	ME003-100G ME003-500G	100gm 500gm	1235 4935
Antibiotic Assay Medium A recommended for microbiological assay of several antibiotics in accordance with British Pharmacopoeia. Gms/Lit : **30.45** **16.42 Lit/500G**	M003B-100G M003B-500G	100gm 500gm	1235 4935
Antibiotic Assay Medium No. 2 (Base Agar) for microbiological assay of antibiotics. Gms/Lit : **25.50** **19.61 Lit/500G**	M005-500G	500gm	5215
Antibiotic HiVeg™ Assay Medium No. 2 (Base HiVeg™ Agar) for usage & grams per litre refer M005	MV005-500G ⦿	500gm	5475
Antibiotic Assay Medium No. 2 used as basal medium for microbiological assay of antibiotics in accordance with USP. Gms/Lit : **25.50** **19.61 Lit/500G**	MU005-500G	500gm	5610
Antibiotic Assay Medium B used as basal medium for microbiological assay of antibiotics in accordance with IP. Gms/Lit : **25.50** **19.61 Lit/500G**	MM005-500G	500gm	5610
Antibiotic Assay Medium No. 3 (Assay Broth) for microbiological assay of antibiotics. Gms/Lit : **17.50** **28.57 Lit/500G**	M042-100G M042-500G	100gm 500gm	975 4350
Antibiotic HiVeg™ Assay Medium No. 3 (Assay HiVeg™ Broth) for usage & grams per litre refer M042	MV042-100G ⦿ MV042-500G ⦿	100gm 500gm	1035 4550
Antibiotic Assay Medium No. 3 used as the broth medium in turbidimetric or serial dilution assay of a wide variety of antibiotics in accordance with USP/IP. Gms/Lit : **17.50** **28.57 Lit/500G**	MAP042-100G MAP042-500G	100gm 500gm	1075 4725

Product	Code	Packing	Price in ₹
Antibiotic Assay Medium No. 4 (Yeast MB Agar) for detection of Penicillin-G in milk samples using *Bacillus stearothermophilus*. Gms/Lit : **26.50** **18.87 Lit/500G**	M140-500G	500gm	5555
Antibiotic HiVeg™ Assay Medium No. 4 (Yeast MB HiVeg™ Agar) for usage & grams per litre refer M140	MV140-500G ⦿	500gm	5820
Antibiotic Assay Medium No. 4 used for detection of Penicillin-G in milk samples and in microbiological assay of different antibiotics in accordance with USP. Gms/Lit : **26.5** **18.87 Lit/500G**	MU140-500G	500gm	5645
Antibiotic Assay Medium No. 5 (Streptomycin Assay Agar w/ Yeast extract) for microbiological assay of Dihydrostreptomycin, Framycetine and Kanamycin B using *Bacillus subtilis*. Gms/Lit : **25.50** **19.61 Lit/500G**	M006-500G	500gm	5455
Antibiotic HiVeg™ Assay Medium No. 5 (Streptomycin HiVeg™ Assay Agar w/ Yeast extract) for usage & grams per litre refer M006	MV006-500G ⦿	500gm	5735
Antibiotic Assay Medium No. 5 for microbiological assay of Dihydrostreptomycin using *Bacillus subtilis* in accordance with USP/IP. Gms/Lit : **25.50** **19.61 Lit/500G**	MAP006-500G	500gm	5610
Antibiotic Assay Medium No. 6 for induction of spore production in *Bacillus subtilis* strains used in antibiotic assay. Gms/Lit : **30.03** **16.65 Lit/500G**	M223-500G	500gm	4830
Antibiotic HiVeg™ Assay Medium No. 6 for usage & grams per litre refer M223	MV223-500G ⦿	500gm	5075
Antibiotic Assay Medium No. 8 (Base Agar w/ low pH) for microbiological assay of *Oxytetracycline, tetracycline* and *Vancomycin*. Gms/Lit : **25.50** **19.61 Lit/500G**	M041-500G	500gm	4980
Antibiotic HiVeg™ Assay Medium No. 8 (Base HiVeg™ Agar w/ low pH) for usage & grams per litre refer M041	MV041-500G ⦿	500gm	5225
Antibiotic Assay Medium No. 8 for microbiological assay of Vancomycin in accordance with USP/IP. Gms/Lit : **25.50** **19.61 Lit/500G**	MAP041-500G	500gm	5360
Antibiotic Assay Medium No. 9 (Polymyxin Base Agar) as a base layer medium for assaying the products containing Polymyxin-B. Gms/Lit : **50.00** **10 Lit/500G**	M147-500G	500gm	5105
Antibiotic HiVeg™ Assay Medium No. 9 (Polymyxin HiVeg™ Base Agar) for usage & grams per litre refer M147	MV147-500G ⦿	500gm	5350

Product	Code	Packing	Price in ₹
Antibiotic Assay Medium No. 9 used as base layer for microbiological plate assay of Carbenicillin, Colistimethate sodium and Polymyxin B in accordance with USP. Gms/Lit : **50.00** **10 Lit/500G**	**MU147-500G**	**500gm**	**5495**
Antibiotic Assay Medium No. 10 (Polymyxin Seed Agar) as a seed layer medium for assaying the products containing Polymyxin-B, also for assaying Carbenicillin, Colistin and Colistimethate sodium. Gms/Lit : **42.00 +** **11.90 Lit/500G** **10 ml of polysorbate 80** ◀	**M225-500G**	**500gm**	**5195**
Antibiotic HiVeg™ Assay Medium No. 10 (Polymyxin Seed HiVeg™ Agar) for usage & grams per litre refer M225	**MV225-500G** ◉	**500gm**	**5455**
Antibiotic Assay Medium No. 10 as seed layer for antibiotic plate assay of carbenicillin, colistimethate sodium and polymyxin B in accordance with USP/IP. Gms/Lit : **42.00 +** **11.90 Lit/500G** **10 ml of polysorbate 80** ◀	**MAP225-500G**	**500gm**	**5605**
Antibiotic Assay Medium No.11 (Neomycin, Erythromycin Assay Agar) (Erythromycin Seed Agar) for microbiological assay of antibiotics. (Note : pH of the Medium is 8.3 : +0.2) Gms/Lit : **30.50** **16.39 Lit/500G**	**M004-100G** **M004-500G**	**100gm** **500gm**	**1035** **4655**
Antibiotic Assay Medium No.11, Granulated (Neomycin, Erythromycin Assay Agar, Granulated)(Erythromycin Seed Agar, Granulated) for usage & grams per litre refer M004	**GM004-500G**	**500gm**	**5780**
Antibiotic HiVeg™ Assay Medium No.11 (Neomycin, Erythromycin HiVeg™ Assay Agar) (Erythromycin Seed HiVeg™ Agar) for usage & grams per litre refer M004	**MV004-100G** ◉ **MV004-500G** ◉	**100gm** **500gm**	**1305** **5275**
Antibiotic Assay Medium No. 11 for microbiological assay of antibiotics in accordance with USP. Gms/Lit : **30.50** **16.39 Lit/500G**	**MU004-100G** **MU004-500G**	**100gm** **500gm**	**1225** **4935**
Antibiotic Assay Medium A with pH 7.9 for microbiological assay of antibiotics in accordance with EP. Gms/Lit : **30.40** **16.45 Lit/500G**	**ME004-100G** **ME004-500G**	**100gm** **500gm**	**1225** **4935**
Antibiotic Assay Medium A with pH 7.9 for microbiological assay of antibiotics in accordance with BP. Gms/Lit : **30.45** **16.42 Lit/500G**	**M004B-100G** **M004B-500G**	**100gm** **500gm**	**1225** **4935**
Antibiotic Assay Medium D for microbiological assay of antibiotics in accordance with IP. (Note : pH of the Medium is 7.9) Gms/Lit : **30.50** **16.39 Lit/500G**	**MM004-100G** **MM004-500G**	**100gm** **500gm**	**1225** **4935**
Antibiotic Assay Medium No. 12 (Nystatin Assay Agar) for microbiological assay of Amphotericin B and Nystatin using *Saccharomyces cerevisiae* ATCC 2601. Gms/Lit : **62.50** **8 Lit/500G**	**M280-500G**	**500gm**	**5455**
Antibiotic HiVeg™ Assay Medium No. 12 (Nystatin HiVeg™ Assay Agar) for usage & grams per litre refer M280	**MV280-500G** ◉	**500gm**	**5735**
Antibiotic Assay Medium No. 13 (Nystatin Assay Broth) for microbiological assay of Candicidin using *Saccharomyces cerevisiae* ATCC 9763. Gms/Lit : **30.00** **16.67 Lit/500G**	**M254-500G**	**500gm**	**5040**
Antibiotic HiVeg™ Assay Medium No. 13 (Nystatin HiVeg™ Assay Broth) for usage & grams per litre refer M254	**MV254-500G** ◉	**500gm**	**5290**
Antibiotic Assay Medium No. 13 for the turbidimetric microbiological assay of Candicidin using *Saccharomyces cerevisiae* as the test organism. It is in accordance with USP. Gms/Lit : **30.00** **16.67 Lit/500G**	**MU254-500G**	**500gm**	**5290**
Antibiotic Assay Medium No. 19 for microbiological assay of Amphotericin B, Natamycin and Nystatin using *Saccharomyces cerevisiae (ATCC 9763, ATCC 2601) as the test organisms*. Gms/Lit : **60.00** **8.33 Lit/500G**	**M101-500G**	**500gm**	**5105**
Antibiotic HiVeg™ Assay Medium No. 19 for usage & grams per litre refer M101	**MV101-500G** ◉	**500gm**	**5360**
Antibiotic Assay Medium No. 19 for microbiological assay of Amphotericin B, Natamycin and Nystatin using *Saccharomyces cerevisiae* as the test organisms in accordance with USP/IP. Gms/Lit : **60.00** **8.33 Lit/500G**	**MAP101-500G**	**500gm**	**5290**
Antibiotic Assay Medium No. 20 (Yeast MB Broth) for microbiological assay of Amphotericin B using *Candida tropicalis ATCC 13803*. Gms/Lit : **42.50** **11.76 Lit/500G**	**M167-500G**	**500gm**	**5190**
Antibiotic HiVeg™ Assay Medium No. 20 (Yeast HiVeg™ Broth) for usage & grams per litre refer M167	**MV167-500G** ◉	**500gm**	**5450**
Antibiotic Assay Medium No. 32 for preparing inoculum of *Bacillus subtilis* during assay of Dihydrostreptomycin and Vancomycin. Gms/Lit : **30.80** **16.23 Lit/500G**	**M1141-500G**	**500gm**	**5105**
Antibiotic HiVeg™ Assay Medium No. 32 for usage & grams per litre refer M1141	**MV1141-500G** ◉	**500gm**	**5360**
Antibiotic Assay Medium No. 32 for preparing inoculum of *Bacillus subtilis* to be used as test organism for assaying Dihydrostreptomycin and Vancomycin by plate assay method in accordance with USP. Gms/Lit : **30.80** **16.23 Lit/500G**	**MU1141-500G**	**500gm**	**5290**
Antibiotic Assay Medium No. 34 for preparation of suspension of *Mycobacterium smegmatis* ATCC 607 used as the test organism for the assay of Bleomycin. Gms/Lit : **23.00 +** **21.73 Lit/500G** **10 gm/lt glycerol**	**M797-500G**	**500gm**	**4830**

* On receipt store between 2 - 8°C. ◀ To be added but not provided.
△ Approx. number of vials required per 500gm of powder / granulated medium.
◉ The Animal based peptones in this medium have been fully replaced by TSE/BSE and GMO free Vegetable peptones.

MEDIA SUPPLEMENTS

Your perfect choice of media supplements can meet your quality control and research needs, to enable right detection of microorganisms.

Product	Page
Media Supplements (FD)	**221-236**

• Enrichment Supplements
  • Selective Inhibitory Supplements
  • Selective Growth Supplements
  • Vitamin & Growth Factor Supplements
  • Antibiotic Mixtures
  • Supplements for Diagnostic Purpose	

• Supplements for identification and growth of - *Listeria, Campylobacter, Legionella, Neisseria, Leptospira, Mycoplasma, Lactobacilli, Bacillus anthracis, Mycobacteria, Pseudomonas, Haemophilus, Bacillus, Aeromonas, Bacteroides, Bifidobacteria, Burkholderia, Clostridia* etc.	
• Supplements for Selective Growth of Mycobacteria • Supplement for processing of sputum samples of Mycobacteria • Egg Yolk Supplements • Supplements with Tellurite formulations • Chromogenic & Fluorogenic Supplements	

Product	Page
• Supplements for detecting enzymatic activity • Sterile Enrichments • Serum and other derivatives of Biological origin such as - Horse serum - Rabbit serum - Coagulase Plasma - Haemoglobin Powder	
• Supplements for selective isolation of drug resistant strains like MRSA, VRE, ESBLs, Carbapenem Resistant, MDR strains etc.

BETA-LACTAMASES
MEDIA SUPPLEMENTS

Choice of Beta-lactamases for Environmental Monitoring

Environmental monitoring during aseptic production of Beta-lactam antibiotics can give deceptive results if the traces of the antibiotic are found in the environment. The air sampling thus should be conducted with agar medium containing a Beta-lactamase for neutralization of antibiotic to avoid any false negative results.

HiMedia offers a range of products to aid the environmental monitoring in the antibiotic production area.

Beta-lactamase Supplements in Powder Form are available as :

FD267 : Beta-lactamase I Supplement (containing 3300 IU of Penicillinase enzyme)

FD268 / **FD268G** : Beta-lactamase Mixture Supplement (containing ≥ 50 IU / vial of Cephalosporinase & ≥ 500 IU / vial of Penicillinase enzyme)

FD289 : Beta-lactamase Mixture Supplement (containing ≥ 2 KIU / vial of Cephalosporinase & ≥ 20 KIU / vial of Penicillinase enzyme)

FD267 can inactivate penicillin group of antibiotics whereas

FD268 / **FD268G** / **FD289** can inactivate a wide range of antibiotics like Penicillins, Cephalosporins of first, second, third and fourth generations and Penems.

AC Selective Supplement recommended for selective isolation of MDR strains of *Acinetobacter* One vial is sufficient for 1000 ml medium : M1839 / M1938	FD271-5VL	5 vl	2100
AC3F Selective Supplement is used for the detection of Extended Spectrum β-Lactamase-producing organisms. One vial is sufficient for 500 ml medium : M1829	FD278-5VL	5 vl	1825
ACC Selective Supplement recommended for the selective isolation of Methicillin Resistant *Staphylococcus aureus* One vial is sufficient for 1000 ml medium : M1974	FD319-5VL FD319-5X5VL	5 vl 5x5 vl	1770 4970
ACN Supplement for selective enrichment of *Listeria* species from food samples. One vial is sufficient for 1000 ml medium : M2048	FD342-5VL	5 vl	1550
ACV Selective Supplement recommended for the isolation of Enterohemorrhagic *E. coli* (EHEC). One vial is sufficient for 500 ml medium : M1851	FD284-5VL	5 vl	4495
AD Selective Supplement recommended for selective isolation and differentiation of *Aeromonas* species from water samples using membrane filter technique. One vial is sufficient for 1000 ml medium : M1262	FD107A-5VL FD107A-5X5VL	5 vl 5x5 vl	1335 4175
ANC Selective Supplement recommended for the selective cultivation of *Listeria* species. One vial is sufficient for 500 ml medium : M1578 / MV1578 / GM1578 / M889 / MV889 / GM889 / M1474	FD063I-5VL FD063I-5x5VL	5 vl 5x5 vl	1345 4720
APR Selective Supplement (100 X) (5 ml per vial) recommended for cultivation of *Borrelia burgdorferi*. One vial is sufficient for 500 ml medium : M1668	FD179-5VL	5 vl	1560
ASLA Enrichment Supplement a growth supplement for selective cultivation of *Propionibacteria*. One vial is sufficient for 500 ml medium : M904	FD097-5VL	5 vl	1095
Albumin Glucose Supplement recommended for rapid cultivation of *Mycobacterium tuberculosis*. One vial is sufficient for 200 ml medium : M067 / MV067	FD201-5VL	5 vl	1470

Product	Code	Packing	Price in ₹
AmCC Selective Supplement recommended for the selective isolation of Methicillin Resistant *Staphylococcus aureus* (MRSA) One vial is sufficient for 1000 ml medium : M2126	FD363-5VL	5 vl	1795
Amp Selective Supplement recommended for the selective isolation of *Aeromonas* species. One vial is sufficient for 500 ml medium : M884 / MV884 / MCD884	FD039-5VL	5 vl	1270
Anaero Supplement an enrichment Supplement recommended for the selective isolation or cultivation of nonsporing anaerobic bacteria. One vial is sufficient for 500 ml medium : M832 / MV832 / M863 / MV863	FD001-5VL	5 vl	1410
AntiF MDR Selective Supplement A selective supplement for the isolation of MDR C.auris. One vial is sufficient for 500 ml medium : M2114 / M2123	FD360-5VL	5vl	4315
AzCe Selective Supplement recommended to differentiate *Enterococcus faecium* from *Enterococcus faecalis*. One vial is sufficient for 500 ml medium : M1576 / M1580 / MV1580	FD226-5VL	5 vl	2185
BCSA Selective Supplement An antibiotic supplement recommended for isolation of Burkholderia cepacia from the respiratory secretions of patients with cystic fibrosis and other non-clinical specimens. MU2089	FD361-5VL	5vl	1755
BCYE Growth Supplement recommended for enhancing growth of *Legionella* species. One vial is sufficient for 440 ml medium : M809A / GM809A, If desired M1845	FD142-5VL	5 vl	1945
BCYE Growth Supplement A chemical enrichment supplement recommended for enhancing growth of Legionella species. One vial is sufficient for 100 ml medium : M809A / GM809A, If desired M1845	FD142X-5VL FD142X-5X5VL	5vl 5X5vl	380 1815
BL I Supplement (w/ 3300 IU of Penicillinase) A Beta lactamase enzyme recommended for inactivation of penicillin group of antibiotics. M290 / MV290 / GM290 / MCD290 / M449 / MV449 / GM449	FD267-1VL	1 vl	14115
BL II non sterile powder supplement for inactivation wide range of antibiotics like Penicillins, Cephalosporins of first, second, third & fourth generations and Penems. M290 / MV290 / GM290 / MCD290 / M449 / MV449 / GM449	FD316-1VL	1 vl	On Request

BLm Supplement w/ > 50IU of Cephalosporinase & > 500 IU of Penicillinase A mixture of Beta Lactamase enzymes recommended for inactivation of a wide range of antibiotics like Penicillins, Cephalosporins of first, second, third and fourth generations and Penems. M290 / MV290 / GM290 / MCD290 / M449 / MV449 / GM449	FD268-1VL	1 vl	7670
BLM Supplement w/ 2KIU of Cephalosporinase & 20 KIU of Penicillinase use and media as specified in FD268	FD289-1VL	1 vl	42795
BLm Supplement 50-500 (Sterile) w/ > 50IU of Cephalosporinase & > 500 IU of Penicillinase use and media as specified in FD268	FD268G-1VL	1 vl	8430
BMPA Selective Supplement recommended for selective isolation of *Legionella* species. One vial is sufficient for 450 ml medium : M809A / GM809A	FD144-5VL FD144-5X5VL	5 vl 5x5 vl	1500 4500
BP S Selective Supplement recommended for suppression of *Proteus* species growing on Baird Parker Agar Base. One vial is sufficient for 1000 ml medium : M043 / MV043 / GM043 / MCD043 / M043I	FD069-5VL	5 vl	1155
****BSK-H Supplement** selected for ability to support growth of *Borrelia burgdorferi*. One vial is sufficient for 100 ml medium : M1668	FD180-100ML	1x100 ml	3150
BT Selective Supplement used for the selective enrichment of *Yersinia enterocolitica*. One vial is sufficient for 1000 ml medium : M1861	FD286-5VL FD286-5x5VL	5 vl 5X5 vl	1430 3895
#Basic Fuchsin (0.17 gm per vial) recommended for preparation of Endo Agar which is used for confirmation of the presumptive test for the members of the coliform group. One vial is sufficient for 1000 ml medium : M1481	FD059A-5VL	5 vl	660
#Basic Fuchsin (6.0 gm per vial) recommended for preparation of Endo Agar which is used for confirmation of the presumptive test for the members of the coliform group. M1077 / MV1077	FD059-1VL	1 vl	685
Blaser-Wang Selective Supplement recommended for the selective isolation of *Campylobacter* species. One vial is sufficient for 500 ml medium : M834 / MV834 / MCD834 / M834A / MV834A / GM834A / M074 / MV074 / GM074 / M348 / MV348 / M908 / MV908 / M994 / MV994 / M943 / M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A / M1268	FD006-5VL	5 vl	1345

Product	Code	Packing	Price in ₹
Bolton Selective Supplement recommended for selective isolation of *Campylobacter* species One vial is sufficient for 500 ml medium : M1592 / GM1592	FD231-5VL	5 vl	1670
Bos Selective Supplement recommended for the selective isolation of *Bordetella pertussis*. One vial is sufficient for 500ml or 1000 ml medium : M175 / M175A / MV175 / MV175A / M344 / MV344 / M1053 / MV1053	FD004-5VL	5 vl	1400
#Bromo Cresol Purple (15 mg per vial) a dye supplement recommended for identification of faecal *Streptococci*. One vial is sufficient for 1000 ml medium : M248 / MV248	FD093-5VL	5 vl	750
#Bromo Thymol Blue Supplement (20 mg per vial) a dye supplement which helps to differentiate microflora in urinary tract. One vial is sufficient for 1000 ml medium : M1146 / MV1146	FD091-5VL	5 vl	525
Butzler Selective Supplement an antibiotic supplement for the isolation of *Campylobacter* species. One vial is sufficient for 500 ml medium : M834 / MV834 / MCD834 / M834A / MV834A / GM834A / M074 / MV074 / GM074 / M348 / MV348 / M908 / MV908 / M994 / MV994 / M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A / M1268	FD007-5VL FD007-5X5VL	5 vl 5x5 vl	1625 4565
Butzler VI Selective Supplement recommended by ISO for the selective isolation of thermotolarent *Campylobacter* species. One vial is sufficient for 470 ml medium : M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A	FD106-5VL FD106-5X5VL	5 vl 5x5 vl	1735 4565
C.B.I. Supplement recommended for the selective isolation of *Clostridium botulinum*. One vial is sufficient for 450 ml medium : M911 / MV911	FD049-5VL	5 vl	1430
C3V Selective Supplement recommended for the selective isolation of *Legionella* species from mixed cultures. One vial is sufficient for 500 ml medium : M813 / M892 / MV892	FD037-5VL	5 vl	1700
CA Selective Supplement recommended for rapid and direct identification of *Listeria* species. One vial is sufficient for 500 ml medium : M1417 / M1417F / M1924	FD181-5VL	5 vl	1535
CAC Selective Supplement Recommended for improved detection of Methicillin Resistant *Staphylococcus aureus* (MRSA). One vial is sufficient for 500 ml medium : M1882	FD299-5VL FD299-5X5VL	5 vl 5x5 vl	2205 6625

NO 5 Selective Supplement an antibiotic supplement for presumptive identification of *Aeromonas hydrophila*. One vial is sufficient for 250/1000 ml medium : M576 / MV576 / M1285 / GM1285 / M1282 / M1286 / M1286I / MV1286	**FD096-5VL** **FD096-5x5VL**	**5 vl** **5x5 vl**	**1540** **3825**
NoCef Selective Supplement for selective isolation & differentiation of *Salmonella* species from coliforms by chromogenic method. One vial is sufficient for 1000 ml medium : M1842 / MCD1842	**FD274-5VL** **FD274-5X5VL**	**5 vl** **5x5 vl**	**1380** **3685**
NP Selective Supplement recommended for selective isolation and easy detection of *E.coli* O157:H7 from food samples. One vial is sufficient for 1000 ml medium : M1575A / MV1575A / MCD1575A	**FD187-5VL**	**5 vl**	**940**
NPBCVN Selective Supplement recommended for the selective isolation of *Brucella* species from milk. One vial is sufficient for 500 ml medium : M834 / MV834 / MCD834 / M834A / MV834A / GM834A / M074 / MV074 / GM074 / M348 / MV348 / M822 / M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A	**FD005-5VL** **FD005-5x5VL**	**5 vl** **5x5 vl**	**1535** **3825**
NPt Selective Supplement recommended for isolation and easy detection of *Escherichia coli* O157:H7 from food and environmental samples. One vial is sufficient for 500 ml medium : M1598	**FD230-5VL**	**5 vl**	**1670**
NYC Supplement recommended for the isolation and cultivation of pathogenic *Neisseria* species. One vial is sufficient for 500 ml medium : M1348	**FD150-5VL**	**5 vl**	**1465**
Neo Enrichment Selective Supplement An antimicrobial supplement recommended for selective isolation of *Listeria* species from samples in 24 hours. One vial is sufficient for 500 ml medium : M1733	**FD249-5VL**	**5 vl**	**1620**
Neo Selective Supplement recommended for isolation and differentiation of *Candida* species. One vial is sufficient for 500 ml medium : M1390	**FD174-5VL**	**5 vl**	**1380**
Neo30 Selective Supplement recommended for selective isolation of *Streptococcus* species. One vial is sufficient for 940 ml medium : M1345	**FD149-5VL**	**5 vl**	**1095**
OA Selective Supplement A selective supplement recommended by ISO Committee for the isolation of *Listeria* species One vial is sufficient for 500 ml medium : M1540I, M1552	**FD212A-5VL**	**5 vl**	**2710**

Product	Code	Packing	Price in ₹
OADS Suplement recommended for the isolation and cultivation of *Mycobacteria*. One vial is sufficient for 500 ml medium : M197 / M196 / M199 / M511 / MV511 / M511A	**FD348-5VL** **FD348-5x5VL**	**5 vl** **5x5 vl**	**2805** **11510**
OFPBL Selective Supplement recommended for selective isolation of *Burkholderia cepacia* from clinical specimens as well as non-clinical samples. One vial is sufficient for 1000 ml medium : M1181	**FD269-5VL**	**5 vl**	**1940**
Oleic Albumin Supplement recommended for the cultivation of *Mycobacterium tuberculosis*. One vial is sufficient for 200 ml medium : M179 / MV179 / M839 / MV839	**FD020-5VL** **FD020-5X5VL**	**5 vl** **5x5 vl**	**1415** **5020**
Oxford Selective Supplement recommended for the selective isolation of *Listeria* species. One vial is sufficient for 500 ml medium : M1145 / MV1145 / GM1145 / M1781 / M1145F	**FD071-5VL**	**5 vl**	**1535**
OxyT Selective Supplement recommended for the selective isolation and cultivation of yeasts and moulds. One vial is sufficient for 500 ml medium : M1467 / M639 / GM639 / M639I / GM639I	**FD032-5VL** **FD032-5x5VL**	**5 vl** **5x5 vl**	**1030** **3385**
PAc Selective Supplement recommended for the selective isolation of *Bifidobacterium* species. One vial is sufficient for 1000 ml medium : M1858	**FD285-5VL**	**5 vl**	**490**
PACRT Selective Supplement a selective supplement for the isolation of *Campylobacter* species from food and environmental samples One vial is sufficient for 1000 ml medium : M1893	**FD303-5VL**	**5 vl**	**1715**
PALCAM Selective Supplement recommended for the selective isolation and identification of *Listeria monocytogenes*. One vial is sufficient for 500 ml medium : M1064 / MV1064 / GM1064 / M1090 / MV1090 / GM1090	**FD061-5VL** **FD061-5x5VL**	**5 vl** **5x5 vl**	**1310** **4460**
PAN Selective Supplement recommended for selective cultivation of *Mycoplasma* associated with urogenital infections. One vial is sufficient for 500 ml medium : M1374	**FD175-5VL** **FD175-5X5VL**	**5 vl** **5x5 vl**	**1670** **3885**
PANC Selective Supplement for selective isolation and differentiation of *Listeria monocytogenes* and other *Listeria* species based on PCPLC activity. One vial is sufficient for 500 ml medium : M2009	**FD333-5VL**	**5 vl**	**2085**

All the above products to be stored between 2 - 8°C.

Understanding Microbes

CULTURE MEDIA BASES

Your perfect choice of media for utilizing raw materials as media ingredients for cultivation of bacteria in small scale and large scale. It is recommended for biomass cultivation required in fermentation studies in various applications; antibiotic manufacturing, enzyme manufacturing, vaccine manufacturing etc.

Product	Page
Culture Media Bases	**237-244**
• Peptones, Extracts, Hydrolysates, Infusions from Animal origin & Plant origin	
• Ingredients to suit Cell Culture Applications	
• Ingredients for Vaccine production, Antibiotic production etc.	
• Ingredients for Media Fill Trials	
• Range of Yeast Extracts	
• Range of Malt Extracts	
• Range of Soyapeptones	
• Equivalent Bacteriological ingredients of Plant origin	

Product	Page
• HiVeg™ Peptones	
• HiVeg™ Extracts	
• HiVeg™ Infusions	
• HiVeg™ Special Infusions	

Animal-free
HiVeg™
Culture Media
& Peptones

HiVeg™ MEDIA

Reduce millions of tonnes of carbon footprint each year

Over last two decades, rapid advances in Biotechnology research has given several quality choices to biologists in terms of resources. HiMedia being always a follower of cutting edge research products, it has successfully created a choice of using vegetable peptones over the animal based peptones for your manufacturing and research. We have substituted animal based peptones with HiVeg™ peptones in maximum range of dehydrated culture media. HiVeg™ peptones are made from grains and no animal is slaughtered for its production. It is eco-friendly and costs the same as animal based peptones.

100% ANIMAL FREE MEDIA

- Minimizing carbon footprint
- Ecofriendly
- Free from TSE / BSE risks

OUR RANGE INCLUDES

- Standard Pack Size of 500G
- Bulk Packs of 5KG, 10KG, 25KG etc.

Acicase (Casein Acid Hydrolysate) recommended specially for Pertussis Vaccine production.	RM498-500G	500gm	9370
Acicase, Certified (Casein Acid Hydrolysate, Certified) recommended for use in culture media where microbiological growth is measured optically, e.g. Antibiotic Assay Media.	CR013-500G	500gm	8290
Acicase, Certified (Casein Acid Hydrolysate, Certified) Sodium chloride less than 3%.	RM189-500G	500gm	9400
Acicase, Technical (Casein Acid Hydrolysate, Technical) used in antibiotic sensitivity test media, vaccine preparation media etc.	RM013-500G	500gm	5555
Acicase, Vitamin Free (Casein Acid Hydrolysate, Vitamin Free) used in bacteriological assay of vitamins and antibiotic sensitivity.	RM190-500G	500gm	8575
Agar powder Applicable for Plant Tissue Culture research and commercial aspects.	PCT0901-500G PCT0901-1KG PCT0901-5KG PCT0901-25KG	500gm 1kg 5kg 25kg	☛ ☛ ☛ On request
Agar powder Specially purified under controlled conditions to be free from nucleases recommended for Molecular Biology.	MB053-100G MB053-500G MB053-1KG	100gm 500gm 1kg	☛ ☛ ☛
Agar powder, Bacteriological grade Bacterial Content as per IP. Recommended for routine bacteriological work and particularly useful in pharmaceutical preparation where it passes in Microbial limit tests for the presence of bacteria.	GRM026P-500G	500gm	☛
Agar powder, Bacteriological grade Recommended for routine bacteriological work where compatibility with other ingredients is not a critical criteria.Bacteriological, gelling temperature not more than 40°C.	GRM026-100G GRM026-500G GRM026-5KG	100gm 500gm 5kg	☛ ☛ ☛
Agar Powder, Certified Extensively processed to guarantee the absence of inhibition, allowing growth of even the most sensitive microorganisms. It can be used in electrophoretic studies, immunodiffusion assays and tissue culture procedures.	CR301-500G	500gm	☛
Agar Powder, Ultrapure Recommended for use in immuno-electrophoretic procedures, nutritional studies (Vitamin Assay Media) or sensitivity testing procedure. Gelling temperature not more than 35°C (Equivalent to Nobel Agar).	RM459-500G	500gm	☛
Agar Powder, Extra pure, Bacteriological Grade Recommended for culture media, disc diffusion susceptibility tests where low mineral/metal content is desirable. Gelling temperature not more than 38°C.	RM301-500G RM301-1KG	500gm 1kg	☛ On request
Agar Granulated, Bacteriological Grade Recommended for culture media disc diffusion susceptibility test where salts have been reduced to minimum Also it is suitable for electrophoretic and immunodiffusion assay including Vitamin assays and tissue cultue work.	RM10848-500G	500gm	☛

Product	Code	Packing	Price in ₹
Agar powder, Purified, Bacteriological Grade Free from all nitrogenous compounds, inorganic salts and vitamins and therefore ideal for culture media and bacteriological work. Gelling temperature not more than 38°C.	RM201-500G RM201-5KG RM201-25KG	500gm 5kg 25kg	☛ On request On request
Agar PT, Pure Purified Agar recommended for general plant tissue culture work and micropropogation.	RM7695-500G RM7695-1KG	500gm 1kg	☛ ☛
Agar PT Recommended for general plant tissue culture work.	RM7691-500G RM7691-1KG	500gm 1kg	☛ ☛
Agar Agar, Type I Recommended for preperation of culture media for microbiological analysis.	GRM666-100G GRM666-500G GRM666-5KG	100gm 500gm 5kg	☛ ☛ ☛
Bile, Dried, Purified used for general purpose.	RM010-500G	500gm	3240
Bile, Dried, Certified used in culture media as a selective inhibitory agent	CR010-500G	500gm	6615
Bile, Bacteriological used in various culture media as a selective inhibitory agent.	RM621-100G RM621-500G	100gm 500gm	1330 4995
Bile Salts for use in Bacteriological culture media as selective inhibitory agent.	RM008-500G	500gm	9510
Bile Salts, Certified a specially manufactured extract of bile salts, prepared from fresh ox bile, is recommended as a selective inhibitory agent in microbiological culture media.	CR008-500G	500gm	10530
Bile Salts Mixture equivalent to Bile Salt No.3 for use in Bacteriological culture media as selective inhibitory agent.	RM009-100G	100gm	4480
Bile Salts Mixture, Certified recommended for use in microbiological culture media for selective isolation and cultivation of bile tolerant enteric bacteria.	CR009-100G	100gm	8075
Bio Peptone mixture of Casein & Meat Peptones employed in media used for cultivation of micro organisms.	RM021-500G	500gm	3035
HiVeg™ Peptone No. 5 growth performance at par with Bio peptone employed in media used for cultivation of microorganisms.	RM021V-500G ◉	500gm	3280
Bio Peptone, Certified provides a broad spectrum of peptides and amino acids which supports better microbiological growth characteristics to a large variety of organisms.	CR021-500G	500gm	4515
BHI Powder highly nutritious ingredient, used for cultivation of fastidious microorganisms.	RM188-500G	500gm	3430
HiVeg™ Special Infusion growth performance at par with Brain Heart Infusion, highly nutritious ingredient, used for cultivation of fastidious microorganisms.	RM188V-500G ◉	500gm	3700
Casein Acid Hydrolysate, Certified (Acicase, Certified) Sodium chloride less than 3%.	RM189-500G	500gm	9400

☛ For Price Refer Chemical Price List.
All the above products to be stored between 10-30° C.
◉ This product is purely of Vegetable origin free of TSE/BSE risks and free of GMO or allergens.

Product	Code	Packing	Price in ₹
Casein Acid Hydrolysate (Acicase) recommended specially for Pertussis Vaccine production.	RM498-500G	500gm	9370
Casein Acid Hydrolysate, Technical (Acicase, Technical) used in antibiotic sensitivity test media, vaccine preparation media etc.	RM013-500G	500gm	5555
HiVeg™ Acid Hydrolysate growth performance at par with Casein Acid Hydrolysate, Technical, used in antibiotic sensitivity test media, vaccine preparation media etc.	RM013V-500G ◉	500gm	6000
Casein Acid Hydrolysate, Certified (Acicase, Certified) recommended for use in culture media where microbiological growth is measured optically, e.g. Antibiotic Assay Media.	CR013-500G	500gm	8290
Casein Acid Hydrolysate (Acicase, Vitamin free) used in bacteriological assay of vitamins and antibiotic sensitivity.	RM190-500G	500gm	8575
♦Casitose, Type - I (Tryptone Type-1) tryptone, used in sterility testing, diagnostic media preparations.	RM014-500G RM014-2.5KG	500gm 2.5kg	3610 On request
HiVeg™ Hydrolysate growth performance at par with Casein Enzyme Hydrolysate used in sterility testing and diagnostic media preparations. Recommended for bulk production of enzymes and antibiotics.	RM014V-500G ◉	500gm	3900
♦Casitose, Certified (Tryptone, Certified) Tryptone, rich in tryptophan is used by a wide variety of microorganisms. Recommended in a number of media such as Sterility Testing media, Diagnostic media, media for biochemical characterization, etc.	CR014-500G	500gm	4300
♦Casitose, Type-II (Tryptone, Type II) equivalent to Casitone, used in Antibiotic Assay Media.	RM028-500G RM028-5KG	500gm 5kg	3095 On request
HiVeg™ Hydrolysate No. 6 growth performance at par with Casein Enzyme hydrolysate Type-II, used in Antibiotic assay media.	RM028V-500G ◉	500gm	3340
♦Casitose, Type-II, Certified (Tryptone, Type II, Certified) is a refined product providing high quality soluble source of amino acids,polypeptides and peptides. It is a very rich source of Amino Nitrogen. Recommended for Laboratory and fermentation media,for commercial production of antibiotics, toxins and enzymes.	CR028-500G	500gm	3500
♦Casitose, ES, (Tryptone, ES) recommended to be used as a microbial nutrient in laboratory media and fermentation. It is extra soluble as compared to other casein enzyme hydrolysates.	RM9111-500G	500gm	4015
♦Casitose (MB grade) (Tryptone, MB grade) suitable for recombinant strains growth and molecular biology work	RM7707-500G	500gm	4380
♦Casitose enzymic digest of milk protein.	RM714-500G RM714-2.5KG	500gm 2.5kg	3090 On request

Product	Code	Packing	Price in ₹
♦Casitose Soya Meat peptone (Revised as Casitose Soya HM peptone) a mixture of milk protein, soya and meat peptones that provides broad spectrum of peptides and amino acids that supports better microbiological growth characteristics.	RM4902-500G	500gm	6825
♦Casitose Yeast Peptone a mixture of casein and yeast peptones employed in media used for cultivation of wide variety microorganisms.	RM3875-500G	500gm	3090
Certified Peptone recommended as a source of organic nitrogen and growth factor for cultivation of wide variety of microorganisms.	CR031-500G	500gm	6915
Certified Heart Infusion (Revised as Certified HI) a rich nutritive component used in media for cultivation of fastidious microorganisms.	CR032-500G	500gm	7060
Cholic Acid, Sodium Salt see Sodium Cholate.	RM202-25G RM202-100G	25gm 100gm	1605 5655
Combipeptone (mixture of tryptone and yeast extract) it is a mixture of tryptone and yeast hydrolysate at a ratio of 65:35. The synergistic effect helps for the mass cultivation of microorganism and fermentation application.	RM10941-500G	500gm	3090
Fish Collagen, 95% A non-toxic protein from fish skin and scales as an alternative to animal collagen	RM10939-5KG RM10939-10KG	5kg 10kg	On request On request
Fish Peptone suitable for pharmaceutical and vaccine production to reduce Bovine Spongiform Encephalopathy (BSE) risk.	RM2580-500G	500gm	7080
Gelatin Peptone enzymic digest of gelatin used for antibiotic assay media and various fermentation media.	RM020-500G RM020-2.5KG	500gm 2.5kg	3290 On request
HiVeg™ Peptone No. 2 growth performance at par with Gelatin Peptone, used in microbiological culture media, for antibiotic assay media and various fermentation media.	RM020V-500G ◉	500gm	3550
Gluten Hydrolysate, Maize an enzymatic digest of corn protein using non-animal enzymes of microbial or plant origin. Recommended for use in microbial media or as fermentation nutrient.	RM6406-500G ◉	500gm	3340
Heart Infusion Powder (Revised as HI Powder) a rich nutritive component used in media employed for cultivation of fastidious organisms and antibiotics sensitivity test.	RM191-500G	500gm	4130
HiVeg™ Infusion growth performance at par with Heart Infusion, a rich nutritive component used in media employed for cultivation of fastidious organisms and antibiotic sensitivity test.	RM191V-500G ◉	500gm	4460
HiVeg™ Pea Hydrolysate ideal for industrial fermentations and excellent source as veg peptone for microbiological media.	RM9149-500G ◉	500gm	5010

♦ Casitose word equivalent to casein hydrolysate / casein peptone

All the above products to be stored between 10-30° C.

◉ This product is purely of Vegetable origin free of TSE/BSE risks and free of GMO or allergens.

Product	Code	Packing	Price in ₹
HiVeg™ Peptone F recommended for industrial fermentations which support excellent growth for *Streptomyces* species,specially *Actinomyces* species. Rich in nutritional value and is almost equivalent to cotton seed extract.	RM9150-500G	500gm	5015
HL Hydrolysate (Liver Hydrolysate) an ideal ingredient of culture media used for the cultivation of fastidious anaerobic bacteria.	RM023-500G	500gm	2990
HL Hydrolysate Neutralized (Liver Hydrolysate Neutralized) recommended for use in culture medium for cultivation of fastidious anaerobic bacteria.	RM6405-500G	500gm	3785
HL Extract Paste (Liver Extract Paste) used for cultivation of fastidious anaerobic bacteria and bulk production of vaccines, steroids, enzymes etc.	RM7710-500G	500gm	1320
HL Extract powder (Liver Extract Powder) for cultivation of fastidious anaerobic bacteria. Also for bulk production of vaccines, steroids, enzymes etc.	RM326-500G	500gm	3020
HL Infusion Powder (Liver Infusion Powder) suitable for vaccine manufacturing.	RM022-500G	500gm	2990
◗ **HM Peptone B, Paste (Meat Extract B Paste)** refined for use in microbial culture media.	RM274-500G RM274-2.5KG	500gm 2.5kg	1270 On request
◗ **HM Peptone B Powder (Meat Extract B Powder)** refined for use in microbial culture media.	RM002-500G RM002-2.5KG	500gm 2.5kg	2440 On request
◗ **HM Peptone B, Certified (Meat Extract B, Certified)** for the maximum recovery and growth of a wide variety of microorganisms. It is usually incorporated in a concentration of 0.3% to 0.5% when combined with suitable peptones.	CR002-500G	500gm	4340
◗ **HM Peptone B Powder, Type 1 (Meat Extract B Powder, Type 1)** used in media for routine cultivation and diagnostic purposes.	RM669-100G RM669-500G RM669-5KG	100gm 500gm 5kg	525 2495 On request
HM Extract Powder (Meat Extract Powder) used in general purpose and diagnostic media preparations.	RM003-500G	500gm	2810
HM Extract, Certified (Meat Extract, Certified) replaces the meat peptone which yields earlier and heavier growth of microorganisms. Used in bulk production of antibiotics, enzymes and other biological preparations.	CR003-500G	500gm	5040
HM Infusion Powder (Meat Infusion Powder) a highly nutritious ingredient, used in standard nutrient media and as an additive in vaccine preparation.	RM192-500G	500gm	3015
HM Peptone (Meat Peptone) for routine and mass scale cultivation of organisms for antibiotics, enzymes etc.	RM635-500G	500gm	2930
HM Peptone Type P (Meat Peptone Type P) peptone from meat (peptic) is obtained by proteolytic digest of meat with pepsin.	RM1049-500G	500gm	3960
HM Peptone Type T (Meat Peptone Type T) peptone from meat (tryptic) is obtained by proteolytic digest of meat with trypsin.	RM1050-500G	500gm	4125

Product	Code	Packing	Price in ₹
Lactalbumin Hydrolysate rich in essential amino acids and can be succesfully used to supplement microbial culture media for cultivation of Lactobacilli etc	RM012-500G	500gm	5600
HiVeg™ Hydrolysate No. 4 rich in essential amino acids and can be succesfully used to supplement microbial culture media for cultivation of Lactobacilli etc	RM012V-500G ◉	500gm	6050
Lactalbumin Hydrolysate, Certified rich in essential amino acids and can be succesfully used to supplement microbial culture media for cultivation of Lactobacilli etc	CR012-500G	500gm	13215
Lactose monohydrate, Sterile (γ-irradiated sterile powder) suitable for use in media fill trials	RM565G-5KG RM565G-50KG	5kg 50kg	On request On request
Lactose Monohydrate, Sterile powder, γ irradiated, Triple pack Lactose Monohydrate, Sterile powder, γ irradiated, Triple pack suitable for use in media fill trials.	RM565GT-5KG	5kg	On request
Liver Extract Paste (Revised as HL Extract Paste) used for cultivation of fastidious anaerobic bacteria and bulk production of vaccines, steroids, enzymes etc.	RM7710-500G	500gm	1320
Liver Extract Powder (Revised as HL Extract powder) for cultivation of fastidious anaerobic bacteria. Also for bulk production of vaccines, steroids, enzymes etc.	RM326-500G	500gm	3020
HiVeg™ Extract No. 2 growth performance at par with Liver Extract for cultivation of fastidious anaerobic bacteria. Also for bulk production of vaccines, steroids, enzymes etc.	RM326V-500G ◉	500gm	3260
Liver Hydrolysate (Revised as HL Hydrolysate) an ideal ingredient of culture media used for the cultivation of fastidious anaerobic bacteria.	RM023-500G	500gm	2990
HiVeg™ Hydrolysate No. 2 growth performance at par with Liver Hydrolysate, an ideal ingredient of culture media used for the cultivation of fastidious anaerobic bacteria.	RM023V-500G ◉	500gm	3230
Liver Hydrolysate Neutralized (Revised as HL Hydrolysate Neutralized) recommended for use in culture medium for cultivation of fastidious anaerobic bacteria.	RM6405-500G	500gm	3785
Liver Infusion Powder (Revised as HL Infusion Powder) suitable for vaccine manufacturing.	RM022-500G	500gm	2990
HiVeg™ Infusion No. 1 growth performance at par with Liver Infusion Powder, suitable for vaccine manufacturing and cultivation of fastidious organisms.	RM022V-500G ◉	500gm	3230
D(+) Maltose, monohydrate for bacteriological purpose.	RM018-100G RM018-500G	100gm 500gm	620 2660
D(+) Maltose, monohydrate, Extra pure NRC grade, for vaccine production.	RM569-100G RM569-500G	100gm 500gm	850 3865

Malt Extract Powder ideally suitable for use in media for cultivation of fungi.	RM004-100G RM004-500G	100gm 500gm	650 3090
Malt Extract Powder, Refined purified under controlled condition which is ideally suitable for broth media.	RM004B-500G	500gm	5280
Malt Extract, Certified ideally suitable for use in media for cultivation of fungi.	CR004-500G	500gm	5720
Meat Extract Powder (Revised as HM Extract Powder) used in general purpose and diagnostic media preparations.	RM003-500G	500gm	2810
HiVeg™ Extract No. 1 growth performance at par with Meat Extract used in general purpose and diagnostic media preparations, suitable for bulk production of steroid vaccines and enzymes.	RM003V-500G ◉	500gm	3035
Meat Extract, Certified (Revised as HM Extract, Certified) replaces the meat peptone which yields earlier and heavier growth of microorganisms. Used in bulk production of antibiotics, enzymes and other biological preparations.	CR003-500G	500gm	5040
Meat Infusion Powder (Revised as HM Infusion Powder) a highly nutritious ingredient, used in standard nutrient media and as an additive in vaccine preparation.	RM192-500G	500gm	3015
HiVeg™ Infusion No. 2 growth performance at par with HM Infusion Powder, highly nutritious ingredients, used in standard nutrient media and as an additive in vaccine preparation.	RM192V-500G ◉	500gm	3255
Meat Peptone (Revised as HM Peptone) for routine and mass scale cultivation of organisms for antibiotics, enzymes etc.	RM635-500G	500gm	2930

Product	Code	Packing	Price in ₹
HiVeg™ Peptone No. 1 growth performance at par with HM Peptone. Used for routine and large scale cultivation of organisms for production of antibiotics, enzymes etc.	RM635V-500G ◉	500gm	3165
Meat Peptone Type P (Revised as HM Peptone Type P) peptone from meat (peptic) is obtained by proteolytic digest of meat with pepsin.	RM1049-500G	500gm	3960
Meat Peptone Type T (Revised as HM Peptone Type T) peptone from meat (tryptic) is obtained by proteolytic digest of meat with trypsin.	RM1050-500G	500gm	4125
Mycological Peptone see Peptone M.	RM006-500G	500gm	3535
HiVeg™ Mycological Peptone see HiVeg Peptone No.4.	RM006V-500G ◉	500gm	3820
Mycological Peptone, Certified nutritious source for the isolation, cultivation and identification of saprophytic and dermatophytic fungi-yeast and moulds.	CR006-500G	500gm	4410
Oat Meal Powder recommended for cultivation of fungi in microbiological culture media.	RM2565-500G	500gm	1445
Papaic Digest of Casein (Revised as Papaic Digest of M-protein) it is rich in proteases, peptides and free aminoacids. Recommended for bulk production of antibiotics, enzymes and biomolecules production.	RM9185-500G	500gm	3710
Peptone, Bacteriological contains high tryptophan content. Used as culture media ingredient in variety of media. Also useful for commercial production of enzymes, vaccines, antibiotics and other products.	RM001-500G RM001-1KG RM001-2.5KG	500gm 1kg 2.5kg	2910 5290 On request
HiVeg™ Peptone growth performance at par with Peptone, contains high tryptophan content, used as culture media ingredient in variety of media. Also useful for commercial production of enzymes, vaccines, antibiotics and other products.	RM001V-500G ◉	500gm	3140
HiVeg™ Peptone Gamma irradiated Enzymic hydrolysate of vegetable proteins with comparable growth promoting properties as animal origin peptone. Recommended for commercial production of enzymes, vaccines, antibiotics and other products.	RM001VG-500G ◉	500gm	3410
Peptone, Certified recommended as a source of organic nitrogen and growth factors in culture media, fermentation processes and biological preparations.	CR001-500G	500gm	5225
Peptone M equivalent to Mycological Peptone. Suitable for cultivation of yeasts and moulds.	RM006-500G	500gm	3535
HiVeg™ Peptone No. 4 equivalent to Mycological Peptone. Suitable for cultivation of yeasts and moulds.	RM006V-500G ◉	500gm	3820
Peptone Special equivalent to Neopeptone. An enzymatic protein digest especially adapted for the preparation of media for culturing fastidious bacteria.	RM015-500G	500gm	3410

◗ Equivalent to Beef extract

All the above products to be stored between 10-30° C.

HiVeg™ Peptone Special equivalent to Neopeptone. An enzymatic protein digest especially adapted for the preparation of media for culturing fastidious bacteria.	RM015V-500G ◉	500gm	3680
Peptone Type I, Bacteriological used as culture media ingredient.	RM667-100G RM667-500G RM667-5KG	100gm 500gm 5kg	450 2140 On request
Peptone Type I, Bacteriological granulated Granulated form of Peptone Type I. Mixed enzymic hydrolysate of lean meat tissues. Recommended for general routine bacteriological work including mass cultivation.	RMG667-500G RMG667-5KG	500gm 5kg	2700 On request
Peptone Type III, Bacteriological recommended for general bacteriological work including mass cultivation	RM7709-500G	500gm	1525
Peptone Granulated Granulated form of peptone recommended for general bacteriological work including mass cultivation.	RMG7709-500G	500gm	1685
Peptonized SM Powder suitable for Lactobacilli, yeasts and moulds.	RM275-500G	500gm	3320
HiVeg™ Hydrolysate No. 3 growth performance at par with Peptonized Milk, suitable for Lactobacilli, yeasts and moulds.	RM275V-500G ◉	500gm	3585
Proteose Peptone a highly nutritious ingredient employed in media used for bulk production of antibiotics, enzymes, bacterial toxins etc.	RM005-500G RM005-2.5KG	500gm 2.5kg	3500 On request
HiVeg™ Peptone No. 3 growth performance at par with Proteose Peptone, a highly nutritious ingredient employed in media used for bulk production of antibiotics, enzymes, bacterial toxins etc.	RM005V-500G ◉	500gm	3780
Proteose Peptone, Certified a highly nutritious ingredient employed in media used for bulk production of antibiotics, enzymes, bacterial toxins etc.	CR005-500G	500gm	6780
Proteose Peptone A enzymic hydrolysate of protein, rich in proteoses, peptide and free amino-acids. Recommended for cultivation of fastidious pathogens and bulk production of antibiotics, enzymes,veterinary preparations and bacterial toxins, specially diphtheria toxin.	RM6394-500G	500gm	3570
HiVeg™ Proteose Peptone A growth performance at par with Proteose Peptone A. Rich in protein, proteoses, peptide and free amino acids. Recommended for cultivation of fastidious pathogens and particularly for bulk production of antibiotics, enzymes, veterinary preparations and bacterial toxins, specially diphtheria toxin.	RM6394V-500G ◉	500gm	3855
Proteose Peptone B enzymic hydrolysate of protein, rich in proteoses, peptide and free amino-acids. Provides superior nutrition for fastidious organisms including pyogenic cocci.	RM6392-500G RM6392-2.5KG	500gm 2.5kg	3480 On request
HiVeg™ Peptone B growth performance at par with Proteose Peptone B. Rich in proteoses, peptides and free amino acids. Provide superior nutrition for fastidious organisms including pyogenic cocci.	RM6392V-500G ◉	500gm	3760

Product	Code	Packing	Price in ₹
Protose enzymic digest of mixed proteins, recommended for fermentation & vaccine industries	RM280-500G	500gm	3100
Sodium Cholate Cholic acid, sodium salt as a selective inhibitory agent for bacteriological culture media.	RM202-25G RM202-100G	25gm 100gm	1605 5655
Sodium Deoxycholate as a selective inhibitory agent for bacteriological culture media.	RM131-25G RM131-100G	25gm 100gm	5320 18630
Sodium Taurocholate as a selective inhibitory agent for bacteriological culture media.	RM011-500G	500gm	8300
Sodium Taurocholate, Certified a purified component of Ox bile (free from bile acid) is recommended as a selective agent in microbiological culture media.	CR011-500G	500gm	9110
Sodium Tauroglycocholate as Selective inhibitory agent Bacteriological grade.	RM708-500G	500gm	8300
Soya Peptone papaic digest of soyabean meal, plant peptone.	RM007-500G RM007-5KG	500gm 5kg	3010 On request
Soya Peptone, Certified recommended in media that are required to support a short lag phase and smaller generation time to allow rapid luxuriant growth.	CR007-500G	500gm	5070
Soya Peptone Type I plant peptone, is a soluble end product of the enzymic digestion of soyabean meal by papain.	RM7714-500G RM7714-5KG	500gm 5kg	1775 On request
Special Peptone see Peptone Special.	RM015-500G	500gm	3410
HiVeg™ Special Peptone growth performance at par with Peptone Special, equivalent to Neopeptone. An enzymatic protein digest especially adapted for the preparation of media for culturing fastidious bacteria.	RM015V-500G ◉	500gm	3680
Special Peptone, Certified specifically designed to maximize the growth of fastidious microorganisms.	CR015-500G	500gm	5580
Tryptone Type-1 see Casitose Type-1	RM014-500G RM014-2.5KG	500gm 2.5kg	3610 On request
HiVeg™ Hydrolysate growth performance at par with Casein Enzyme Hydrolysate used in sterility testing and diagnostic media preparations. Recommended for bulk production of enzymes and antibiotics.	RM014V-500G ◉	500gm	3900
Tryptone, Certified (Casitose, Certified)♦ tryptone, recommended in a number of media such as Sterility Testing media, Diagnostic media and media for biochemical characterization, etc.	CR014-500G	500gm	4300
Tryptone-D, Type IV Tryptic digest of casein, recommended for vaccine production.	RM193-500G	500gm	4455
Tryptone, ES (Casitose, ES)♦ recommended to be used as a microbial nutrient in laboratory media and fermentation. It is extra soluble as compared to other casein enzyme hydrolysates.	RM9111-500G	500gm	4015
Tryptone T, Type-III for tetanus toxin, culture media ingredient.	RM029-500G	500gm	4360

CMB

♦ Casitose word equivalent to casein hydrolysate / casein peptone
All the above products to be stored between 10-30° C.

Tryptose bacteriological grade, enzymatic hydrolysate of protein that can replace meat infusion.	RM030-500G RM030-2.5KG	500gm 2.5kg	3960 On request
HiVeg™ Hydrolysate No. 1 growth performance at par with Tryptose. Enzymatic hydrolysate of protein that can replace tryptose.	RM030V-500G ◉	500gm	4280
Tryptose, Certified designed to promote luxuriant growth of highly fastidious microorganisms.	CR030-500G	500gm	6465
Tryptone, (MB grade) **(Casitose, MB grade)♦** suitable for recombinant strains growth and molecular biology work	RM7707-500G	500gm	4380
Tryptone, Type-II (Casitose, Type II)♦ equivalent to Casitone, used in Antibiotic Assay Media.	RM028-500G RM028-5KG	500gm 5kg	3095 On request
Tryptone, Type II, Certified (Casitose, Type-II, Certified)♦ is a refined product providing high quality soluble source of amino acids,polypeptides and peptides. It is a very rich source of Amino Nitrogen. Recommended for Laboratory and fermentation media,for commercial production of antibiotics, toxins and enzymes.	CR028-500G	500gm	3500
Yeast Autolysate extract from autolysing yeast cells (Saccharomyces) specially cultivated to obtain yeast autolysate.	RM194-500G	500gm	2915
Yeast Extract (Paste) Suitable for Culture Media	RM025-500G	500gm	1595
Yeast Extract Powder Yeast extract is manufactured from selected strains of *Saccharomyces cerevisiae* under control conditions by retaining all the nutritive values, amino acids, vitamins, especially B group and growth factors. It contains low salt and is recommended for microbiological media and for mass cultivation of various microorganisms.	RM027-500G RM027-2.5KG	500gm 2.5kg	2230 On request
Yeast extract Granulated Granulated form of peptone Yeast extract is manufactured from selected strains of Saccharomyces cerevisiae under control conditions by retaining all the nutritive values, amino acids, vitamins, especially B group and growth factors. It contains low salt and is recommended for microbiological media and for mass cultivation of various microorganisms.	RMG027-500G	500gm	2390
Yeast Extract Powder recommended for use in microbial culture media fermentation and other biological products.	RM027F-500G RM027F-2.5KG	500gm 2.5kg	2020 On request
Yeast Extract Powder, Certified rich in vitamins, especially those belonging to B-complex and used particularly for cultivation of microorganisms encountered in milk or other dairy products.	CR027-500G	500gm	3440
Yeast Extract Powder, Type I specially developed for routine bacteriological work.	RM668-100G RM668-500G RM668-5KG	100gm 500gm 5kg	520 2470 On request

MiCroBiology™
Understanding Microbes

ANTIMICROBIAL SUSCEPTIBILITY TESTING SYSTEMS

Your perfect choice of AST for in-vitro determination of antibiograms and minimum inhibitory concentration (MIC) of antibiotics against microbes.

It includes Sensitivity Discs, which are available as Single Discs and Multi Discs (combination of antibiotics) - Hexa, Octo, Dodeca and Icosa Discs.

HiMIC™ Plate Kit, HiComb™ MIC Strips, HiComb™ MIC Strips, Modified and Ezy MIC™ Strips to determine MIC of single, dual or multiple antibiotics using simplest technologies detection of microorganisms.

Product	Prefix	Page
• HiMIC™ Plate Kit	MPK	247-248
• Ezy MIC™ Strips	EM	
» Antibacterial Ezy MIC™ Strips (Single)		249-262

Factors affecting the performance of Sensitivity Discs

Effects of medium components

The quality of the medium plays major role in antimicrobial susceptibility system. Free electrolyte present in the medium can affect sensitivity of few antimicrobial agents. Hence, Mueller Hinton Agar should be monitored to make sure that it contains acceptable concentrations of divalent cations such as Ca^{++} and Mg^{++} as the increased concentration of Ca^{++} and Mg^{++} results in decreased activity of Aminoglycosides and Tetracyclines whereas the decreased concentration of Ca^{++} and Mg^{++} will have the opposite effect.

If Mueller Hinton Agar contains excessive amounts of thymine or thymidine content, they will reversibly inhibit the action of certain antimicrobial agents such as Sulfonamides, Trimethoprim, Trimethoprim-Sulphomethoxazole etc. which gives smaller or less distinct or even no zones and will be misinterpreted as resistant antibiotics. If zone of inhibition of Sulfonamides, Trimethoprim, Trimethoprim-Sulphomethoxazole will be ≤ 20 mm for *E. faecalis* ATCC 29212 can interpret as medium contains high thymine or thymidine content. Mueller Hinton Agar is low in thymine and thymidine content and it can be used successfully to study the susceptibility of antibiotics.

pH of medium

The pH of the prepared medium is one of the important parameter of disc diffusion method. The pH of prepared medium should fall within acceptable range which is 7.2 to 7.4 as per CLSI. If the pH is outside the stated parameters the zone sizes will be altered, with the degree of alteration determined by the antibiotic group.

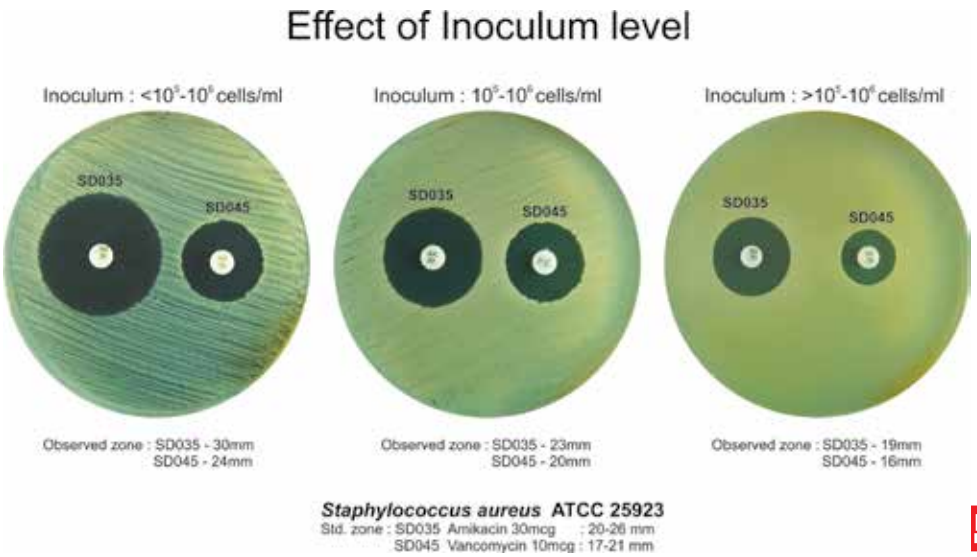
For e.g. an increase in pH will results in a decrease in Penicillins and Tetracyclines zones and increase in quinolones, macrolids and aminoglycosides zone; conversely, decrease in pH will results in increase in Penicillins and Tetracyclines zones and decrease in quinolones, macrolids and aminoglycosides zone; pH should perform as a part of the routine quality control tests for each batch of medium prepared.

Depth of agar medium in petri plates

For antimicrobial activity, growth rate of the test organism affects the rate of diffusion of the antimicrobial agent. Hence it is advisable to pour the plates on uniform bench to achieve depth of 4 to 5 mm (Usually 70 ml medium for 150 mm Petri plate, 25 to 30 ml medium for 100 mm Petri plate and 20 to 25 ml medium for 90 mm Petri plate). Variation in depth of medium will affect the zone of inhibition which can give false positive or negative results.

For e.g. If the depth of agar is too thin,larger zones will appear as the antimicrobial compound will diffuse further than it should. If the depth of agar is too thick, smaller zones will appear as the diffusion of antimicrobial agent will be restricted.

Inoculum level



The inoculum level is also one of the most important, and variable factors in susceptibility testing, and will have a profound effect on the zone size obtained. The zone edge is determined when the critical mass is achieved. If the inoculum is heavy, then the critical mass will be achieved in a shorter time and the zone will be smaller. If the inoculum is light, the critical mass takes longer to develop, the antibiotic diffuses further and a larger zone is achieved. It is advisable to use a technique which yields a uniform suspension of correct number of organisms i.e. 10^5-10^6 cells/ml. Even if the density of culture is adjusted due to improper inoculation false results could be obtained. Inoculation method includes correct & even swabbing of plates & correct placement of discs.

Incubation

Incubation for correct time and correct temperature is also very important parameter. Incubation at temperature above 35°C may fail to detect Methicillin Resistant Staphylococci. At temperatures lower than 35°C, the rate of growth of most bacteria is prolonged; also antimicrobial agents diffuse more slowely. Increased CO_2 atmosphere results in decreased pH, which affects the activity of some antimicrobial agents. The plates should therefore be incubated in ambient air atmosphere unless CO_2 is necessary for the growth of the organisms. Hence, calibration of instruments is a must at all stages.

Disc Storage

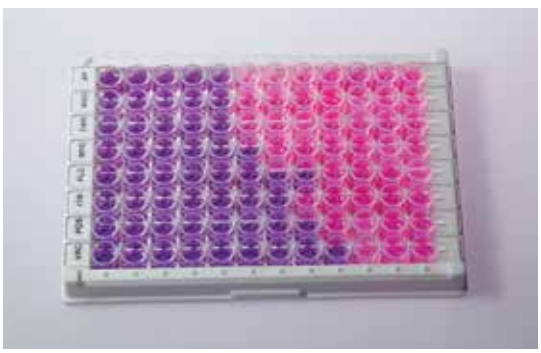
The antibiotic discs must be stored according to manufacturer's instructions i.e. between -20°C and +8°C in a sealed, desiccated environment. Cartridges not in use should be stored unopened in their original packaging in order to prevent moisture ingress. This is extremely important since it is well known that moisture is a major cause of antibiotic degradation. Opened cartridges must be refrigerated and sealed in the disc dispenser or other suitable container when not in use. Opened cartridges should not be stored for more than one week; cartridges containing ß-lactamase inhibitors (e.g. clavulanic acid, tazobactam and sulbactam) are particularly susceptible to moisture which may results in degradation of antibiotics.

HiMIC™ Plate Kit

Hassle free Broth Micro dilution Method

Innovation

- Wells are coated with the growth medium
- Wells are deposited with exact gradient of antibiotic
- Accurate evaluation of MIC using indicator based system



Key Features

- A breakthrough in the evaluation of MIC with ease and accuracy
- Easy breakpoint based visual evaluation
- No instrumentation required
- Interpretation for Sensitive, Intermediate and Resistance as per CLSI & EUCAST guidelines
- 7 concentrations in a single strip covering breakpoint scale
- 12 tests per kit with detachable strips inclusive of diluent, HiMIC™ reading card & separate incubation tray

Octofungi HiMIC™ Plate Kit - MPK901

Key Features

- A single plate to determine antifungal profile
- Eight antifungal agents with 11 concentrations in a single plate
- User friendly substitute of traditional broth micro dilution method.
- As per CLSI & EUCAST guidelines
- Recommended for Yeast and Fungi

Customer specific ranges of antibiotic other than the ones available can be designed as per the requirements.

On receipt all the products to be stored between -20°C to 8°C.

HIMEDIA®

Ezy MIC™ Strips

MIC DETERMINATION STRIPS

Ezy MIC™ Strip is a thin, inert and porous paper strip coated with antibiotic. Both sides of the strip are likewise printed with the MIC reading scale in mcg/ml and the two or three-letter symbol printed on the top of the strip helps in easy identification of the antibiotic. A predefined exponential gradient of antibiotic, dried and stabilized, is immobilized on either sides of the strip with the concentration maximum at one end and minimum at the other. The gradient covers a continuous concentration range across 15 two-fold dilutions of a conventional MIC method.

- Determines the MIC of fastidious, slow-growing or nutritionally deficient micro-organisms, or for a specific type of patient or infection.
- Confirms/ detects a specific resistant phenotype e.g. ESBL, MBL, VISA/ hVISA. AmpC, MRSA, HLAR.
- Detects low levels of resistance.
- Provides high medical value to critical care cases to, refine or guide treatment decisions. Also helps in determining the choice and dosage of antimicrobials in patients with sterile site infections (e.g. endocarditic), severe nosocomial infections, chronic infections (e.g. cystic fibrosis) and immuno suppressed patients.
- Promotes antibiotic stewardship.

Ezy MIC™ Strips Now Available in Individual Packing

- Recommended for determination of Minimum Inhibitory Concentration
- Individual packing helps in easy handling
- Reduces storage space
- CLSI and EUCAST Compliance

HiPer® Microbiology Teaching Kits

HTM006 – HiPer® Ezy MIC™ Teaching Kit

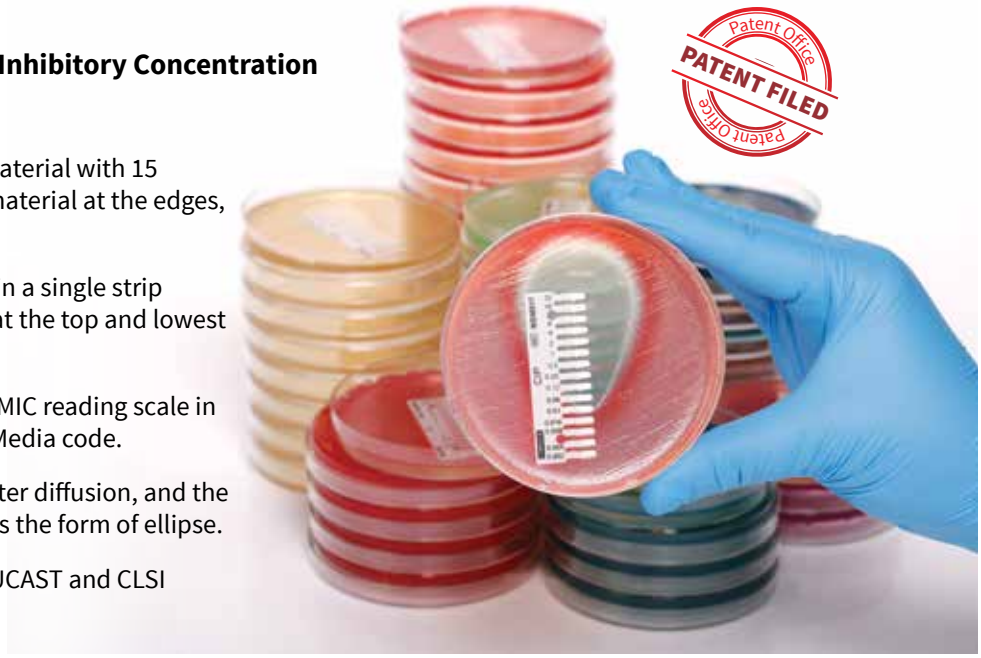
HiPer® Ezy MIC™ Teaching Kit ▲ HiMedia's HiPer® Ezy MIC™ Teaching Kit facilitates the determination of the Minimum Inhibitory Concentration (MIC) of an anti-microbial agent required to inhibit growth of a microorganism under defined condition. **Contents:** *S.aureus* culture, MIC Strips (Ciprofloxacin, Vancomycin, Azithromycin, Linezolid, Amikacin), Mueller Hinton Agar, Sterile cotton swabs, Applicator, Saline.		**HTM006-10PR**	**10pr#**	**6550**

#: Preparation ▲: Stored at 15 - 25°C except certain components specified in each kit (as specified on label).

Customer specific ranges of antibiotic other than the ones available can be designed as per the requirements.

* On receipt store at -20°C. On receipt all the other products to be stored between -20°C to 8°C.

For prolonged use, store at or below -20°C. ® : Registered Trade Mark of Croda International PLC.



EMXXXI correspondes to individually packed Ezy MIC™ Strips

HiComb™ MIC Strip, Modified

Gradient based 15 two fold dilutions in a single strip

Effortless & Precise Minimum Inhibitory Concentration (MIC) Determination

- The strip is made up of inert material with 15 extensions that carry porous material at the edges, resembling tooth of comb.
- It covers 15 two-fold dilutions in a single strip having highest concentration at the top and lowest concentration at the bottom.
- Towards the stem of the strip, MIC reading scale in mcg/ml is given along with HiMedia code.
- The gradient remains stable after diffusion, and the zone of inhibition created takes the form of ellipse.
- Quantitative analysis as per EUCAST and CLSI guidelines.

HIMEDIA®

HiComb™ MIC Test

Study 16 concentrations of an antibiotic at one time.

HiComb™ Strip

Easy, Accurate & Fast

Convenient and the most economical test for the assessment of minimum inhibitory concentration (MIC) of antimicrobial agent.

- *HiComb consists of a strip made of an inert material, with 8 extensions that carry the discs of 4 mm, resembling the `tooth` of a comb.*
- *Towards the stem of the strip, MIC reading scale in mcg/ml is given along with the HiMedia code.*
- *A defined concentration of antibiotic is loaded on each of the disc so as to form a gradient when placed on agar plate.*
- *When applied to the agar surface, the antibiotic instantaneously diffuses into the surrounding medium in high to low amounts from one end of the strip to the other.*
- *The gradient remains stable after diffusion, and the zone of inhibition created takes the form of ellipse.*

Antibacterial Agents

Chloramphenicol Range in µg A : 240-0.01 B : 8-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 8, 4, 2, 1, 0.5, 0.1, 0.01, 0.001	C	MD016-1PK	1pk	1305
Ciprofloxacin Range in µg A : 240-0.01 B : 2-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 2, 1, 0.5, 0.25, 0.01, 0.008, 0.004, 0.001	CIP	MD017-1PK	1pk	1305
Clarithromycin Range in µg A : 240-0.01 B : 16-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 16, 8, 4, 2, 1, 0.1, 0.01, 0.001	CLR	MD018-1PK	1pk	1305
Clindamycin Range in µg A : 240-0.01 B : 8-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 8, 4, 2, 0.5, 0.08, 0.06, 0.01, 0.001	CD	MD019-1PK	1pk	1305

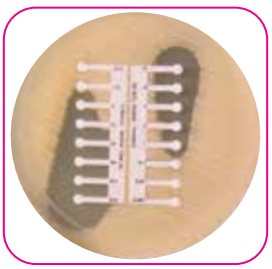
●: 1 Pack contains 10 strips of A + 10 strips of B.
On receipt all the other products to be stored between -20°C to 8°C.

* : On receipt, store at -20°C.
For prolonged use, store at or below -20°C.

Product	Symbol	Code	Packing	Price in ₹
Colistin (Methane Sulphonate) Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	CL	MD020-1PK	1pk	1725
Co-Trimoxazole (Sulpha/ Trimethoprim) Range in µg A : 240-0.01 B : 4-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 4, 2, 1, 0.5, 0.1, 0.05, 0.01, 0.001	COT	MD021-1PK	1pk	1305
Erythromycin Range in µg A : 240-0.01 B : 4-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 4, 2, 1, 0.5, 0.25, 0.1, 0.01, 0.001	E	MD022-1PK	1pk	1305
Fusidic Acid Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	FC	MD023-1PK	1pk	1725
Gatifloxacin Range in µg A : 64-0.01 B : 2-0.001 Levels in µg A : 64, 32, 16, 8, 4, 2, 0.1, 0.01 B : 2, 1, 0.5, 0.1, 0.03, 0.008, 0.004, 0.001	GAT	MD024-1PK	1pk	1385
Gemifloxacin Range in µg A : 240-0.001 B : 4-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 4, 2, 1, 0.5, 0.25, 0.1, 0.01, 0.001	GEM	MD076-1PK	1pk	1305
Gentamicin Range in µg A : 240-0.01 B : 5-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 5, 2, 1, 0.5, 0.25, 0.1, 0.01, 0.001	GEN	MD025-1PK	1pk	1305
Gentamicin Range in µg A : 1024-8 B : 8.192-0.064 Levels in µg A : 1024, 512, 256, 128, 64, 32, 16, 8 B : 8. 192, 4.096, 2.048, 1.024, 0.512, 0.256, 0.128, 0.064	GEN	MD061-1PK	1pk	1305
Kanamycin Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	K	MD026-1PK	1pk	1595
Levofloxacin Range in µg A : 240-0.01 B : 5-0.005 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 5, 4, 2, 1, 0.5, 0.25, 0.05, 0.005	LE	MD027-1PK	1pk	1305
Lincomycin Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	L	MD028-1PK	1pk	1305
Linezolid Range in µg A : 240-0.01 B : 8-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 8, 4, 2, 1, 0.5, 0.1, 0.01, 0.001	LZ	MD029-1PK	1pk	1305
Lomefloxacin Range in µg A : 240-0.01 B : 4-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 4, 2, 1, 0.5, 0.25, 0.1, 0.01, 0.001	LOM	MD030-1PK	1pk	1305
***Methicillin** Range in µg A : 240-0.01 B : 4-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 4, 2, 1, 0.5, 0.25, 0.1, 0.01, 0.001	MET	MD031-1PK	1pk	1305
Minocycline Range in µg A : 240-0.01 B : 4-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 4, 2, 1, 0.5, 0.25, 0.1, 0.01, 0.001	MI	MD032-1PK	1pk	1305
Moxifloxacin Range in µg A : 240-0.01 B : 32-0.005 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 32, 16, 8, 4, 0.1, 0.06, 0.03, 0.005	MO	MD033-1PK	1pk	1305
Mupirocin Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	MU	MD034-1PK	1pk	1305
Nalidixic Acid Range in µg A : 240-0.01 B : 8-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 8, 4, 2, 1, 0.5, 0.1, 0.05, 0.001	NA	MD035-1PK	1pk	1305

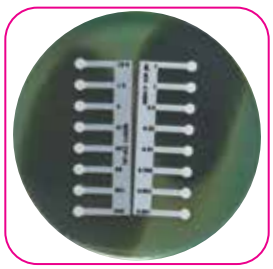
● : 1 Pack contains 10 strips of A + 10 strips of B.
On receipt all the other products to be stored between -20°C to 8°C.

* : On receipt, store at -20°C.
For prolonged use, store at or below -20°C.



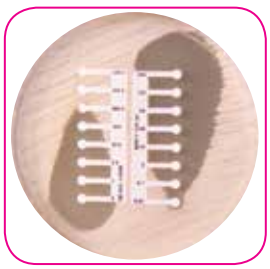
Product	Symbol	Code	Packing	Price in ₹
Neomycin Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	N	MD036-1PK	1pk	1305
Nitrofurantoin Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	NIT	MD037-1PK	1pk	1305
Norfloxacin Range in µg A : 240-0.01 B : 8-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 8, 4, 2, 1, 0.5, 0.1, 0.05, 0.001	NX	MD038-1PK	1pk	1305
Ofloxacin Range in µg A : 64-0.01 B : 8-0.001 Levels in µg A : 64, 32, 16, 8, 4, 2, 0.1, 0.01 B : 8, 4, 2, 0.5, 0.15, 0.06, 0.004, 0.001	OF	MD039-1PK	1pk	1305
***Oxacillin** Range in µg A : 256-2 B : 2.048-0.016 Levels in µg A : 256, 128, 64, 32, 16, 8, 4, 2 B : 2.048, 1.024, 0.512, 0.256, 0.128, 0.064, 0.032, 0.016	OX	MD065-1PK	1pk	1605
Pefloxacin Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	PF	MD040-1PK	1pk	1305
***Piperacillin** Range in µg A : 240-0.01 B : 5-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 5, 1, 0.5, 0.1, 0.08, 0.06, 0.01, 0.001	PI	MD041-1PK	1pk	1605
***Piperacillin/Tazobactam** Range in µg A : 240-0.01 B : 5-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 5, 1, 0.5, 0.1, 0.08, 0.06, 0.01, 0.001	PIT	MD042-1PK	1pk	1690
Polymyxin-B Range in µg A : 240-0.01 B : 32-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 32, 16, 8, 4, 1, 0.1, 0.01, 0.001	PB	MD043-1PK	1pk	1385
Pristinomycin (Quinupristin/Dalfopristin) Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	RP	MD044-1PK	1pk	1305
Rifampicin Range in µg A : 240-0.01 B : 32-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 32, 16, 8, 4, 1, 0.1, 0.01, 0.001	RIF	MD045-1PK	1pk	1305
Roxithromycin Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	RO	MD046-1PK	1pk	1305
Sparfloxacin Range in µg A : 64-0.01 B : 2-0.001 Levels in µg A : 64, 32, 16, 8, 4, 2, 1, 0.01 B : 2, 1, 0.5, 0.1, 0.06, 0.03, 0.004, 0.001	SPX	MD047-1PK	1pk	1305
Streptomycin Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	S	MD048-1PK	1pk	1385
Sulfasomidine Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	SO	MD049-1PK	1pk	1385
Sulphadiazine Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	SZ	MD050-1PK	1pk	1385
Sulphafurazole (Sulfisoxazole) Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	SF	MD051-1PK	1pk	1385
Sulphamethizole Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	SM	MD052-1PK	1pk	1385

●: 1 Pack contains 10 strips of A + 10 strips of B.
On receipt all the other products to be stored between -20°C to 8°C.



*: On receipt, store at -20°C.
For prolonged use, store at or below -20°C.

Product	Symbol	Code	Packing	Price in ₹
Sulphamethoxypyridazine Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	ST	MD053-1PK	1pk	1385
Sulphaphenazole Range in µg A : 240-0.01 B : 30-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 30, 15, 7.5, 3.0, 1.0, 0.1, 0.01, 0.001	SP	MD054-1PK	1pk	1385
Teicoplanin Range in µg A : 240-0.01 B : 1-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 1, 0.8, 0.5, 0.25, 0.1, 0.05, 0.01, 0.001	TEI	MD055-1PK	1pk	1605
Tetracycline Range in µg A : 240-0.01 B : 5-0.01 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 5, 3, 2, 1, 0.5, 0.25, 0.1, 0.01	TE	MD056-1PK	1pk	1305
***Ticarcillin** Range in µg A : 240-0.01 B : 16-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 16, 8, 4, 2, 1, 0.1, 0.01, 0.001	TI	MD057-1PK	1pk	1305



Product	Symbol	Code	Packing	Price in ₹
Tobramycin Range in µg A : 240-0.01 B : 16-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 16, 8, 4, 2, 1, 0.1, 0.01, 0.001	TOB	MD058-1PK	1pk	1385
Trimethoprim Range in µg A : 240-0.01 B : 32-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 32, 16, 8, 4, 2, 0.1, 0.01, 0.001	TR	MD059-1PK	1pk	1305
Vancomycin Range in µg A : 240-0.01 B : 4-0.001 Levels in µg A : 240, 120, 60, 30, 10, 5, 0.1, 0.01 B : 4, 2, 1, 0.5, 0.1, 0.05, 0.01, 0.001	VA	MD060-1PK	1pk	1305
Vancomycin Range in µg A : 256-2 B : 2.048-0.016 Levels in µg A : 256, 128, 64, 32, 16, 8, 4, 2 B : 2.048, 1.024, 0.512, 0.256, 0.128, 0.064, 0.032, 0.016	VA	MD063-1PK	1pk	1305

MD058 – Tobramycin
***Escherichia coli* ATCC 25922**

MD017 – Ciprofloxacin
***Pseudomonas aeruginosa* ATCC 27853**

MD017 – Ciprofloxacin
***Staphylococcus aureus* ATCC 25923**

Antifungal Agents

For prolonged use, store at or below -20°C.

Antibacterial Agents

Concentration of Antibiotics as per CLSI (formerly NCCLS) & EUCAST standards

Now HiMedia AST product range also offers Sensitivity discs as per EUCAST standard (The European Committee on Antimicrobial Susceptibility Testing). For more convenience of user we have separated the list of antibiotic discs as per CLSI, EUCAST & non CLSI & non EUCAST items. The following packaging are our standard packs for Antimicrobial Susceptibility Testing products.

1PK contains 5 cartriges = 5x50 discs in plastic container alongwith applicator.

1VL = 100 discs in vial

5VL = 5x100 discs in vial

5CT = 5x50 discs in blister pack alongwith applicator.

ESBL Identification Test Kit

Kit V for ESBL Identification (As per EUCAST)	SD304-1KT	1kit	1345

Kit contains :
1 Vial (100 discs) each of Cefotaxime (SD040), Cefotaxime/ Clavulanic acid (SD724), Ceftazidime (SD062), Ceftazidime/Clavulanic acid (SD207), Cefepime (SD219), Cefepime+Clavulanic acid (SD234)

KPC+MBL Detection Test Kit

KPC+MBL Detection Kit (As per EUCAST)	SD308-1KT	1kit	3700

Kit contains :
1 Vial (100 discs) each of Meropenem (SD727), Meropenem + Phenylboronic acid (SD299), Meropenem/ Cloxacillin (SD300), Meropenem/EDTA (SD860)

▲Packing : 1PK contains 5ct = 5x50 discs in plastic container,
1VL = contains 100 discs in vial,
5VL = 5x100 discs in vial,
5x50DS = 5 vials of 50 discs each,
5CT = contains 5x50 discs in blister pack.

* : On receipt, store at -20°C.
On receipt all the other products to be stored between -20°C to 8°C.

Antibacterial Agents

Concentration of Antibiotics not as per CLSI (formerly NCCLS) & not as per EUCAST standards

These codes do not have concentration of Antibiotics as per CLSI (formerly NCCLS) & EUCAST standards, However HiMedia provides these concentrations as required by our users. Although zone interpretative criteria for these codes can not be provided, Quality control limits of standard organisms can be made available.

▲Packing : 1PK contains 5ct = 5x50 discs in plastic container,
1VL = contains 100 discs in vial,
5VL = 5x100 discs in vial,
5x50DS = 5 vials of 50 discs each,
5CT = contains 5x50 discs in blister pack.

* : On receipt, store at -20°C.
On receipt all the other products to be stored between -20°C to 8°C.
For prolonged use, store at or below -20°C.

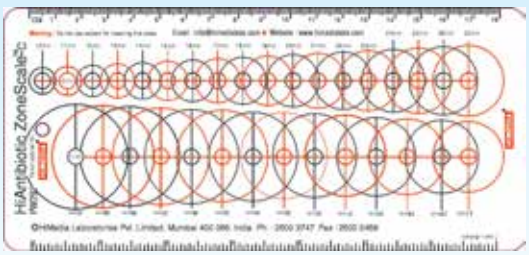
Antimicrobial Susceptibility Testing - Hexa Discs

HiMedia 6-in-one ready antibiotic combination modules
[To be used on 90 mm plates (PW008) or 100 mm plates (PW060)]

HEXA DISCS



Test 6 different antibiotics at once.

HX082 – Hexa G-plus 16

- *HiMedia`s Hexa discs are enhanced extensions of Single Discs. These series of discs gives the privilege to study 6 antibiotics on a single plate.*
- *These are flat circular rings, made of inert material w/ 6 equidistant arms on the outer periphery w/ a 6 mm filter paper disc at the end.*
- *These discs placed at a distance of 24 mm apart from each other are impregnated with 6 different antibiotics, w/ corresponding symbols & concentrations printed on the ring. The antibiotic impregnated discs function as individual antibiotic susceptibility discs, generating precise circular zones of inhibition for measurement of the zone diameter with minimal merging.*
- *The unique inert material used for making the rings allows faster absorption of the rings and hence a uniform diffusion of the antibiotics on to the medium.*
- *The discs are available in various pre-selected combinations of 6 antibiotics. However rings can be made as per individual customized specification.*
- *These discs are to be used on 100 mm plates like PW060/ 90mm plates like PW001/8. Also available are ready prepared media plates of Mueller Hinton Agar (90 mm) (MP173/MP1084) and Mueller Hinton Agar (100 mm) (MP173C) .*

For accurate measurement of Zone

PW297 – Antibiotic Zone Scale

Note: In product description column **Symbol** & **Quantity** are given in bracket after the Antibiotics name.

The Code nos. indicated in red have the concentration of antibiotics as per CLSI (formerly NCCLS) Standards.

OCTO DISCS

Test 8 different antibiotics in one shot

- *Available in two different sizes, HiMedia`s Octo Discs will help in testing 8 different antibiotics in one shot.*
- *These are flat circular rings, made of inert material w/ 8 equidistant arms on the outer periphery w/ a 6 mm filter paper disc at the end Available in 2 sizes, the smaller size can be used on 90 mm plates, whereas the bigger sizes are to be used on 120 mm plates.*
- *For the bigger size rings, the discs placed at a distance of 24 mm apart from each other are impregnated w/ 8 different antibiotics, w/ corresponding symbols & concentrations printed on the ring. The antibiotic impregnated discs function as individual antibiotic susceptibility discs, generating precise circular zones of inhibition for measurement of the zone diameter with minimal merging.*
- *However for smaller rings, the distance between the two discs is lesser than 24 mm which might lead to merging of zones.*
- *The unique inert material used for making the rings allows faster absorption of the rings and hence a uniform diffusion of the antibiotics on to the medium.*
- *The discs are available in various pre-selected combinations of 8 antibiotics. Also rings can be made as per individual customized specification.*
- *The smaller size rings are to be used on 100 mm plates like PW060 or on 90mm plates like PW001, PW008. Also available are ready prepared media plates of Mueller Hinton Agar (90 mm) (MP173/MP1084) and Mueller Hinton Agar (100 mm) (MP173C).*
- *For the bigger size rings, 120 mm plates like PW1146 are to be used. Also available are ready prepared media plates of Mueller Hinton Agar (120 mm) (MP173M).*

OD282 when tested with *Pseudomonas aeruginosa* ATCC 27853 gives clear unmerged zones.

OD282R when tested with *Pseudomonas aeruginosa* ATCC 27853 gives clear but merged zones.

Note: In product description column **Symbol** & **Quantity** are given in bracket after the Antibiotics name.

DODECA DISCS

12 different antibiotics, for testing on a single 150 mm plate

- *HiMedia`s Dodeca discs are enhanced extensions of Single Discs. These series of discs gives the privilege to study 12 antibiotics on a single plate.*
- *These are flat circular rings, made of inert material w/ 8 & 4 equidistant arms on the outer & inner periphery respectively w/ a 6 mm filter paper disc at the end.*
- *These discs are placed at a distance of 24 mm from each other.*
- *These discs are impregnated w/ 12 different antibiotics, w/ corresponding symbols & concentrations printed on the ring. The antibiotic impregnated discs function as individual antibiotic susceptibility discs, generating precise circular zones of inhibition for measurement of the zone diameter with minimal merging.*
- *The unique inert material used for making the rings aids in quicker absorption of the rings and hence a proper diffusion of the antibiotics on to the medium.*
- *The discs are available in various pre-selected combinations of 12 antibiotics. However rings can also be made as per individual customized specification.*
- *These discs are to be used on 150 mm plates like PW011. Also available are ready prepared media plates of Mueller Hinton Agar (150 mm) (MP173L).*

Dodeca G-I-Minus – DE003
Tested with *Pseudomonas aeruginosa* ATCC 27853

Note: In product description column **Symbol** & **Quantity** are given in bracket after the Antibiotics name.

Antimicrobial Susceptibility Testing - Dodeca Discs

HiMedia 12-in-one ready antibiotic combination modules
[To be used on 150 mm plates (PW011)]

Product	Code	Packing 1pk= 10 rings	Price in ₹
***Dodeca G-XII minus** Ceftazidime (CAZ - 30 mcg), Colistin (Methane Sulphonate) (CL - 10 mcg), Minocycline (MI - 30 mcg), Imipenem (IPM - 10 mcg), Tigecycline (TGC - 15 mcg), Cefuroxime (CXM - 30 mcg), Piperacillin/Tazobactam (PIT - 100/10 mcg) Levofloxacin (LE - 5 mcg), Co-Trimoxazole (COT - 25 mcg), Ciprofloxacin (CIP - 5 mcg), Aztreonam (AT - 30 mcg), Cefoperazone/Sulbactam (CFS - 75/30 mcg)	DE046-1PK	1pk	430
***Dodeca G-Minus 23** Amoxyclav (AMC - 20/10 mcg), Cefazolin (CZ - 30 mcg), Cefuroxime (CXM - 30 mcg), Cefotaxime (CTX - 30 mcg), Cefoperazone (CPZ - 30 mcg), Ceftazidime (CAZ - 30 mcg), Tobramycin (TOB - 10 mcg), Gentamicin (GEN - 10 mcg), Amikacin (AK - 30 mcg), Ciprofloxacin (CIP - 5 mcg), Ofloxacin (OF - 5 mcg), Tetracycline (TE - 30 mcg)	DE737-1PK	1pk	425
***Dodeca G-Minus 24** Ceftazidime/Tazobactum (CAT - 30/10 mcg), Ceftiaxone/Sulbactum (CIS - 75/30 mcg), Cefoperazone/Sulbactum (CFS - 75/30 mcg), Cefepime (CPM - 30 mcg), Piperacillin/Tazobactum (PIT - 100/10 mcg), Ticarcillin/Clavulanic Acid (TCC - 75/10 mcg), Imipenem (IPM - 10 mcg), Meropenem (MRP - 10 mcg), Levofloxacin (LE - 5 mcg), Prulifloxacin (PRU - 5 mcg), Cefotaxime/Clavulanic acid (CEC - 30/10 mcg), Cefixime/Clavulanic acid (CMC - 05/10 mcg)	DE738-1PK	1pk	505
***Dodeca G-Minus 26** Cefoperazone (CPZ - 75 mcg), Cefoperazone/Sulbactam (CFS - 75/10 mcg), Cefuroxime (CXM - 30 mcg), Cefepime (CPM - 30 mcg), Amoxyclave (AMC - 20/10 mcg), Ciprofloxacin (CIP - 5 mcg), Levofloxacin (LE - 5 mcg), Amikacin (AK - 30 mcg), Gentamicin (GEN - 10 mcg), Co-Trimoxazole (COT - 25 mcg), Piperacillin/Tazobactam (PIT - 100/10 mcg), Meropenem (MRP - 10 mcg)	DE743-1PK	1pk	505
***Dodeca Enterobacteriaceae-1** Ampicillin (AMP - 10 mcg), Gentamicin (GEN - 10 mcg), Amikacin (AK - 30 mcg), Ciprofloxacin (CIP - 5 mcg), Ofloxacin (OF - 5 mcg), Co-Trimoxazole (COT - 25 mcg), Amoxyclav (AMC - 30 mcg), Cefuroxime (CXM - 30 mcg), Ceftazidime (CAZ - 30 mcg), Ceftazidime/Clavulanic acid (CAC - 30/10 mcg), Cefepime (CPM - 30 mcg), Imipenem (IPM - 10 mcg)	DE053-1PK	1pk	475
***Dodeca Enterobacteriaceae-2** Cefotaxime (CTX - 30 mcg), Ceftriaxone (CTR - 30 mcg), Cefoxitin (CX - 30 mcg), Meropenem (MRP - 10 mcg), Piperacillin/Tazobactam (PIT - 100/10 mcg), Aztreonam (AT - 75 mcg), Gatifloxacin (GAT - 5 mcg), Ampicillin/Sulbactam (A/S - 10/10 mcg), Cefoperazone (CPZ - 75 mcg), Levofloxacin (LE - 5 mcg), Ceftizoxime (CZX - 30 mcg), Ticarcillin/Clavulanic acid (TCC - 75/10 mcg)	DE054-1PK	1pk	430
UTI Pathogenic Organisms			
***Dodeca UTI-I** Amikacin (AK - 30 mcg), Cefuroxime (CXM - 30 mcg), Cefadroxil (CFR - 30 mcg), Nalidixic acid (NA - 30 mcg), Netillin (NET - 30 mcg), Norfloxacin (NX - 10 mcg), Cefaclor (CF - 30 mcg), Ciprofloxacin (CIP - 5 mcg), Nitrofurantoin (NIT - 300 mcg), Gentamicin (GEN - 10 mcg), Cefoperazone (CPZ - 75 mcg), Ofloxacin (OF - 5 mcg)	DE004-1PK	1pk	405
***Dodeca UTI-II** Ceftriaxone (CTR - 30 mcg), Cefoperazone (CPZ - 75 mcg), Cefaclor (CF - 30 mcg), Co-Trimoxazole (COT - 25 mcg), Cefotaxime (CTX - 30 mcg), Ceftazidime (CAZ - 30 mcg), Cefadroxil (CFR - 30 mcg), Nitrofurantoin (NIT - 300 mcg), Furazolidone (FR - 50 mcg), Augmentin (AMC - 30 mcg), Cefalexin (CN - 30 mcg), Amikacin (AK - 30 mcg)	DE005-1PK	1pk	385
***Dodeca UTI-IV** Amikacin (AK - 30 mcg), Cefalexin (CN - 30 mcg), Ceftriaxone (CTR - 30 mcg), Cefixime (CFM - 5 mcg), Cefoperazone (CPZ - 75 mcg), Nalidixic acid (NA - 30 mcg), Kanamycin (K - 30 mcg), Nitrofurantoin (NIT - 300 mcg), Lomefloxacin (LOM - 30 mcg), Ofloxacin (OF - 5 mcg), Norfloxacin (NX - 10 mcg), Gentamicin (GEN - 10 mcg)	DE011-1PK	1pk	385
***Dodeca UTI - 15** Ampicillin/Sulbactam (A/S - 10/10 mcg), Cefoperazone/Sulbactam (CFS - 75/10 mcg), Cefuroxime (CXM - 30 mcg), Cefixime (CFM - 5 mcg), Co-Trimoxazole (COT - 25 mcg), Ciprofloxacin (CIP - 5 mcg), Levofloxacin (LE - 5 mcg), Ofloxacin (OF - 5 mcg), Amikacin (AK - 30 mcg), Nitrofurantoin (NIT - 300 mcg), Netilmicin (NET - 30 mcg), Meropenem (MRP - 10 mcg)	DE744-1PK	1pk	505

ICOSA DISCS

Test 20 different antibiotics in one shot - efficiently, easily and rapidly.

- *HiMedia`s Icosa discs are enhanced extensions of Single Discs. These series of discs gives the privilege to study 20 antibiotics at one time.*
- *These are flat circular rings, made of inert material w/ 12 & 8 equidistant arms on the outer & inner periphery respectively w/ a 6 mm filter paper disc at the end.*
- *These discs are impregnated w/ different antibiotics, w/ corresponding symbols & concentrations printed on the ring The antibiotic impregnated discs function as individual antibiotic susceptibility discs, generating precise circular zones of inhibition for measurement of the zone diameter.*
- *Moreover the discs are designed in such a way that each antibiotic disc on a single ring is atleast 24 mm apart from the others, thus reducing the merging of zones.*
- *The unique inert material used for making the rings enhances the absorption of the ring and hence a proper diffusion of the antibiotics on to the medium.*
- *The discs are available in various pre-selected combinations of 20 antibiotics. But rings can be made as per individual customized specification.*
- *These discs are to be used on 200 mm plates like PW010. Also available are ready prepared media plates of Mueller Hinton Agar (200 mm) (MP173XL).*

Antibiotic Zone Scale – PW297

Note: In product description column **Symbol** & **Quantity** are given in bracket after the Antibiotics name.

▼ : In accordance to Performance Standards for Antimicrobial Disk Susceptibility Tests, CLSI & EUCAST.

□ : Zone size interpretative criteria is as per **CLSI** standard. □ : Zone size interpretative criteria is as per **EUCAST** standard. Resistant criteria is below the given zone diameter.

For *E. coli, S. aureus, P. aeruginosa* : Mueller Hinton Agar (MHA). For *Haemophilus spp.* : Haemophilus Test Medium;

For *S. pneumoniae* : Mueller Hinton Agar with 5% sheep blood; For *N. gonorrhoeae* : GC Agar Base with 1% defined growth supplement.

▼ : In accordance to Performance Standards for Antimicrobial Disk Susceptibility Tests, CLSI & EUCAST.
▯ : Zone size interpretative criteria is as per **CLSI** standard. ▯ : Zone size interpretative criteria is as per **EUCAST** standard. Resistant criteria is below the given zone diameter.
For *E. coli, S. aureus, P. aeruginosa* : Mueller Hinton Agar (MHA). For *Haemophilus spp.* : Haemophilus Test Medium;
For *S. pneumoniae* : Mueller Hinton Agar with 5% sheep blood; For *N. gonorrhoeae* : GC Agar Base with 1% defined growth supplement.
θ : Deterioration in Oxacillin disc content is best assessed with QC Organism *S. aureus* ATCC 25923, with an acceptable zone diameter of 18-24 mm.
* : Not included in CLSI chart; FDA approved performance standards for Antimicrobial Discs obtained from drug manufacturers.

HiCFU Counter C™

NEW

Usage

Instrument with camera for the automated determination of the colony count or CFU (Colony forming unit) on Agar plate

Advantages

- AI Enabled Automated system for determination of colony count or CFU (Colony forming unit) on Agar plate.
- Results under 30 seconds.
- Avoids manual errors
- Can be trained to read colonies based on individual customer needs.
- Widespread application in all industrial sectors including pharma, food, water, dairy and research institutes.
- Finds application in CFU determination while performing GPT (Growth Promotion Test).
- Economical

* Not included in CLSI chart.

: Isolates of *C.krusei* are assumed to be intrinsically resistant to Fluconazole. The results of Fluconazole susceptibility testing should not be interpreted using this criterion for this species.

: For Itraconazole, the data are based entirely on experience with mucosal infections, and data supporting breakpoints for invasive infections due to Candida spp. is not available.

b : For Flucytosine, RPMI 1640 agar w/ MOPS & 2% Glucose w/o Sodium Bicarbonate is to be recommended.

** : *C. krusei* ATCC 6258 is now known as *Issatchenkia orientalis* ATCC 6258.

a : Limits may not match with CLSI guidelines.

Stains play an important role in morphological determination of micro organisms which is a preliminary step used by microbiologist to identify pathogens.

HiMedia offers vast array and valuable cost effective, ready-to-use stains and staining kits for microbiological/ pathological laboratories, hospitals, research settings and educational institutes. These stains augment tissue morphology, demonstrate important cellular components, aid in the evaluation of diseases, and identifies pathogenic organisms. Thus it is an important tool used by pathologists to often guide patient's treatment.

***Optochin (5 mcg) (50 discs / vl)** for identification of *Streptococcus pnuemoniae*.	Op	DD009-1VL	1vl	230
***Oxidase Discs (50 discs / vl)** for Oxidase testing (10 mm).		DD018-1VL	1vl	270
****Spore Strips (25 strips / pack)** steam sterilization monitor strips, *Bacillus stearothermophilus*, 10^6 spores per strip.		DD032-1PK	1pk	725
****Spore Strips (*B. pumilus*) (25 strips / pack)** radiation sterilization monitor strips, *Bacillus pumilus*, 10^6 spores per strip.		DD039-1PK	1pk	725
Sterile Discs, 10mm		DD036-1VL	1vl	160
Sodium Biselenite Disc (50 discs / vl) 1 Disc per 10ML tube of Medium		DD056-1VL	1vl	345
***X Factor (50 discs / vl)** for presumptive identification of *Haemophilus* species.	X	DD020-1VL	1vl	380
▼X+V Factor (50 discs / vl) for presumptive identification of *Haemophilus* species.	X+V	DD022-1VL	1vl	365
***Urease Discs (50 discs / vl)** for urea utilization test, particularly, *Proteus* species and its differentiation from *Salmonella* species.	New	DD058-1VL	1vl	460
▼V Factor (50 discs / vl) for presumptive identification of *Haemophilus* species.	V	DD021-1VL	1vl	380
***Vibrio O129 Differential Disc (10 mcg) (50 discs / vl)** For differentiation of *Vibrio* species based on sensitivity to Vibriostatic agent O129.		DD047-1VL	1vl	1705
***Vibrio O129 Differential Disc (150 mcg) (50 discs / vl)** For differentiation of *Vibrio* species based on sensitivity to Vibriostatic agent O129		DD048-1VL	1vl	4495

M028 Peptone Water with added Nitrate Discs (DD041)

1. Control
2. *Salmonella* Typhimurium ATCC 14028 (WDCM 00031) +
3. ⅄ *Klebsiella aerogenes* ATCC 13048 (WDCM 00175) +
4. *Escherichia coli* ATCC 25922 (WDCM 00013) +
5. *Acinetobacter calcoaceticus* ATCC 23055 —

Key : ⅄ = formaly known as *Enterobacter aerogenes*
+ = red or pink colour formation on addition of Nitrate test reagents
— = No colour change

1) X Factor (DD020)
2) V Factor (DD021)
3) X+V Factor (DD022)

Haemophilus influenzae ATCC 35056

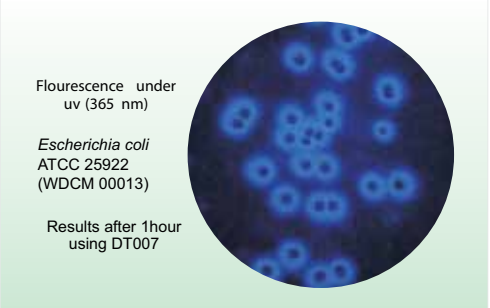
HiDtect™ Rapid Identification Disc

HiMedia has always been in frontline in finding solutions to the existing challenges in the field of microbiology and this urge has helped in the development of a wide range of products.

Latest and economical range of diagnostic product HiDtect™ Rapid Identification Disc has been developed which helps in direct identification of microorganisms from clinical samples, water samples, food samples, environment etc.

HiMedias new range of HiDtect™ Rapid Identification Discs is simple to perform. It eliminates the use of Selective Medias and further study elaborate biochemical tests.

Around twenty such unique discs are developed (DT001 to DT020) which finds application in various sectors of Food & Dairy industry, Water industry, Pharmaceuticals Laboratory Testing, Cosmetics industry, Environmental & Sanitary Testing, Clinical Diagnosis etc.



In either fields it involves the use of Enriched and Selective medias. The isolate is often presumptively identified morphologically by special staining methods and plated out on diagnostic medias. Further elaborate biochemical tests are done for confirmation of isolate recovered. Overall the whole procedure is time consuming, expensive and laborious. Hence there is continuous search for a technology that could aid in rapid, reliable, simple and economical diagnosis worldwide.

HiDtect™ Rapid Identification Discs have been developed which enables rapid and reliable detection of microorganisms.

It can detect metabolic activity as DNase activity of bacteria; useful for identification of pathogenic Staphylococci (DT004), identify pathogens causing UTI (DT001), study esculin hydrolysis and identify Group D Streptococci from food and pharmaceutical products (DT014). Discs identifying bacterias as *Salmonella* (DT002), *Pseudomonas* (DT003), *Bacillus* (DT011) *E.coli* and total coliforms (DT012 and DT013) also form part of HiDtect™ Rapid Identification Discs. On basis of Lactose Fermentation and Non lactose fermentation DT009 Discs detects *Enterobacteriaceae* and gram negative bacteria.

Ability to ferment sugars as Glucose (DT016), Lactose (DT017), Mannitol (DT018), Xylose (DT019), Sucrose (DT020) and characteristion of organisms can be studied within 1-4 hours using these discs. Besides these the organisms can be detected from environment (DT015), pathogens detected from foods (DT010) and microbial limit test organisms detected in pharmaceutical preparations using Universal Test Disc (DT005).

Detection of *E.coli* from water and food samples can be done using DT006, DT007, DT008 discs. HiDtect™ UTI identification Disc (DT001) helps identifying causing urinary tract infections, HiDtect™ Bacillus Identification disc (DT011) is also available for differentiation and identification of *Bacillus* from mixed cultures.

A method of detecting target organisms comprises following steps:

Step I Inoculation, Isolation and Incubation

Step II Replication and Identification

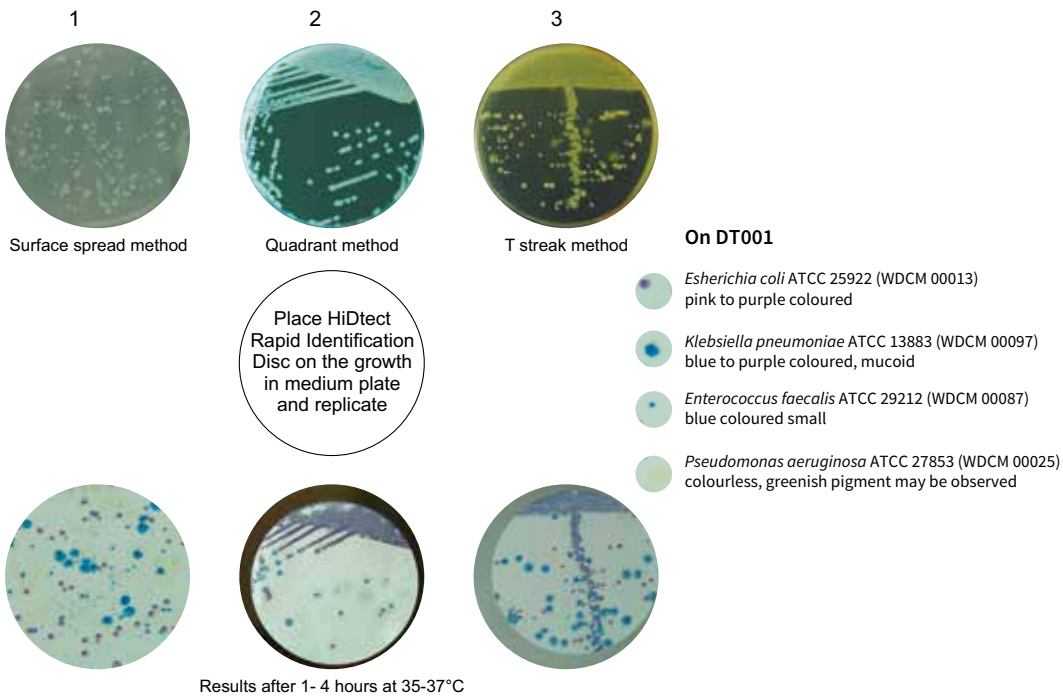
Testing method

It involves routine inoculating and isolation technique followed by replication and direct identification

Step I

Inoculate the organisms from sample on any of general purpose media, Nutrient Agar, Soyabean Casein Digest Agar, Plate Count Agar etc.

Adopt any of surface plating methods as; Spread Plate Method, Quadrant (four or five) streak pattern or T streak method so as to obtain isolated colonies from inoculums. Incubate at 35-37°C for 18-24 hours.

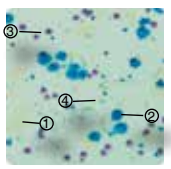


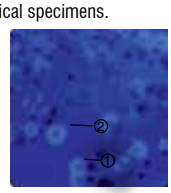
Check for bacterial growth

Step II

Place the HiDtect™ Rapid Identification disc of choice (suspected organisms) on the surface of Agar plate. Perform this step for maximum of 30 seconds. Mark the corresponding orientation of paper. This is replication technique.

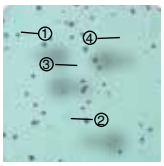
Incubate the replicated identification disc in empty sterile petridish at 35-37°C for 1-4 hours. Alternately the disc may be kept for incubation on growth media at 35-37°C for 1-4 hours.

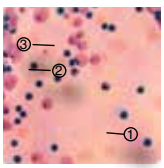


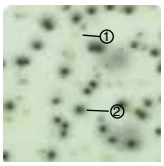


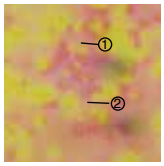
Observe for development of colour and interpret results.

HiDtect™ Rapid Identification Disc









- Economical, Convenient, Rapid and Reliable test for confirmation of bacteria
- Beneficial to Clinical, Food & Meat industry, Dairy, Water, Pharmaceutical, Environmental and Cosmetic industry
- Direct application without any preparations, Results in just 1-4 hours.

Product	Code	Packing	Price in ₹
HiDtect™ UTI Identification Disc For rapid detection and confirmation of microorganisms mainly causing urinary tract infection, for eg. *E.coli, Proteus, Klebsiella, Pseudomonas, S.aureus* & *Enterococcus* species. 1)*Pseudomonas aeruginosa* ATCC 27853 (WDCM 00025) 2)*Klebsiella pneumoniae* ATCC 13883 (WDCM 00097) 3)*Esherichia coli* ATCC 25922 (WDCM 00013) 4)*Enterococcus faecalis* ATCC 29212 (WDCM 00087) 	DT001-10DS DT001-25DS DT001-50DS	10discs 25discs 50discs	2255 3985 6765
HiDtect™ Salmonella Identification Disc For rapid detection of *Salmonella* species from coliforms.	DT002-10DS DT002-25DS DT002-50DS	10discs 25discs 50discs	4415 7805 13255
HiDtect™ Pseudomonas Identification Disc For rapid detection of *Psuedomonas aeruginosa* from clinical and nonclinical specimens. 1) *Pseudomonas aeruginosa* ATCC 27853 (WDCM 00025) flourescence *2) Esherichia coli* ATCC 25922 (WDCM 00013) blue coloured no flourescence 	DT003-10DS DT003-25DS DT003-50DS	10discs 25discs 50discs	6990 12300 20920

Product	Code	Packing	Price in ₹
HiDtect™ DNase Identification Disc For rapid detection of deoxyribonuclease (DNA) activity of bacteria especially for identification of pathogenic Staphylococci.	DT004-10DS DT004-25DS DT004-50DS	10discs 25discs 50discs	820 1455 2470
HiDtect™ Universal Microbial Limit Test Disc Recommended for detection of pathogenic microorganisms such as *E.coli, S.aureus, P. aeruginosa* and *Salmonella* species from pharmaceutical preparations, raw materials, cosmetic samples etc.	DT005-10DS DT005-25DS DT005-50DS	10discs 25discs 50discs	2255 3985 6765
HiDtect™ E.coli Chromogenic Identification Disc For rapid detection & confirmation of *Escherichia coli* in water and food samples.	DT006-10DS DT006-25DS DT006-50DS	10discs 25discs 50discs	2280 4135 6845
HiDtect™ E.coli Fluorogenic Identification Disc For rapid detection & confirmation of *Escherichia coli* in water and food samples on the basis of fluorogenic emission at 365 nm. *Escherichia coli* ATCC 25922 (WDCM 00013) 	DT007-10DS DT007-25DS DT007-50DS	10discs 25discs 50discs	1620 2860 4865

All products to be stored between 2 to 8°C.

Product	Code	Packing	Price in ₹
HiDtect™ Dual Confirmation of E.coli Identification Disc For rapid detection & confirmation of *Escherichia coli* in water and food samples. *Esherichia coli* ATCC 25922 (WDCM 00013) Blue colour 	DT008-10DS DT008-25DS DT008-50DS	10discs 25discs 50discs	3280 5775 9815
HiDtect™ Differential Identification Disc For rapid differentiation of Lactose fermenting and Lactose non fermenting enteric bacteria from water, food, dairy products, cosmetics, pharmaceutical preparations etc.	DT009-10DS DT009-25DS DT009-50DS	10discs 25discs 50discs	665 1160 1980
HiDtect™ Universal Food pathogen Identification Disc For rapid detection of food pathogens such as *E.coli, E.coli* O157:H7, *Staphylococcus aureus, Salmonella, Bacillus, Listeria* and *Shigella* species etc. from various food, dairy, fish, and meat products. 1) *Listeria monocytogenes* ATCC 19111 (WDCM 00020) 2) *Esherichia coli* ATCC 25922 (WDCM 00013) 3) *Esherichia coli* O157:H7 NCTC 12900 (WDCM 00014) 4) *Pseudomonas aeruginosa* ATCC 27853 (WDCM 00025) 	DT010-10DS DT010-25DS DT010-50DS	10discs 25discs 50discs	2255 3985 6765
HiDtect™ Bacillus Identification Disc For rapid detection and differentiation between various species of *Bacillus* such as *B.subtilis*, *B.cereus*, and *B.thuringiensis* from food, meat, fish, cosmetic and pharmaceutical preparations.	DT011-10DS DT011-25DS DT011-50DS	10discs 25discs 50discs	2255 3985 6765
HiDtect™ Total Coliform Identification Disc For qualitative detection of coliforms from water, pharmaceutical preparations, dairy and food products. 1) *Esherichia coli* ATCC 25922 (WDCM 00013) Dark blue coloured 2) *Enterobacter cloacae* ATCC 23355 (WDCM 00082) Salmon to red coloured 3) *Klebsiella pneumoniae* ATCC 13883 (WDCM 00097) Light pink mucoid coloured 	DT012-10DS DT012-25DS DT012-50DS	10discs 25discs 50discs	3160 5560 9465

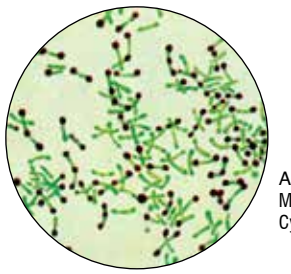
Biochemical Identification Test Kits	
HiIMViC™ Biochemical Test Kit a combination of 12 tests for differentiation of *Enterobacteriaceae* species.	**KB001**
HiAssorted™ Biochemical Test Kit a combination of 12 tests for identification of Gram-negative rods.	**KB002**
Hi25™ Enterobacteriaceae Identification Kit a combination of 25 tests for identification of *Enterobacteriaceae* species.	**KB003**
HiStaph™ Identification Kit a combination of 12 tests for identification of *Staphylococcus* species.	**KB004**
HiStrep™ Identification Kit a combination of 12 tests for identification of *Streptococcus* species.	**KB005A**
HiCandida™ Identification Kit a combination of 12 tests for identification of *Candida* species.	**KB006**
HiVibrio™ Identification Kit a combination of 12 tests for identification of *Vibrio* species.	**KB007**
HiNeisseria™ Identification Kit a combination of 12 tests for identification of *Neisseria* species.	**KB008**
HiCarbo™ Kit a combination of 36 tests for utilization of carbohydrate tests. Kit contains Part A, Part B & Part C	**KB009**
HiCarbo™ Kit- Part A	**KB009A**
HiCarbo™ Kit- Part B	**KB009B1**
HiCarbo™ Kit- Part C Note : KB009 is available as a total kit and also individually as Part A, Part B & Part C	**KB009C**
HiE. coli™ Identification Kit a combination of 12 tests for identification of *E. coli.*	**KB010**
HiSalmonella™ Identification Kit a combination of 12 tests for identification of Salmonella species.	**KB011**
HiListeria™ Identification Kit a combination of 12 tests for identification of *Listeria* species.	**KB012A**
HiBacillus™ Identification Kit a combination of 12 tests for identification of *Bacillus* species.	**KB013**
HiAcinetobacter ™ Identification Kit a combination of 12 tests for identification of *Acinetobacter* species.	**KB014**
Motility Biochemical Test Kits	
HiMotility™ Biochemical Kit for E.coli a combination of 12 tests for confirmation of *E.coli* based on motility and other biochemical tests.	**KBM001**
HiMotility™ Biochemical Kit for Salmonella a combination of 12 tests for confirmation of *Salmonella* based on motility and other biochemical tests.	**KBM002**
HiMotility™ Biochemical Kit for Listeria a combination of 12 tests for confirmation of *Listeria* based on motility and other biochemical tests.	**KBM003A**

Readymade Stains

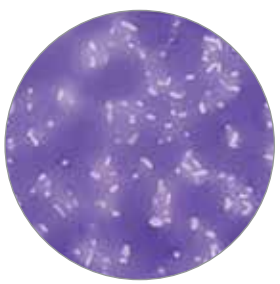
Stains for Gram Staining ▲



Product	Code	Packing	Price in ₹
Gram Stains - Kit (contains S012, S032, S013 and S027 or S038)	**K001-1KT**	**1kt**	**1380**
Gram's Crystal Violet	S012-125ML	125ml	210
Gram's Decolourizer	S032-2x125ML	2x125ml	895
Gram's Iodine	S013-125ML	125ml	230
Safranin, 0.5% w/v (Gram's Counterstain)	S027-125ML	125ml	225
Basic Fuchsin 0.1% w/v (Gram's counterstain)	S038-125ML	125ml	225
Gram Stains - Kit (contains S012, S032, S013 and S027 or S038)	**K001L-1KT**	**1kt**	**4840**
Gram's Crystal Violet	S012-500ML	500ml	730
Gram's Decolourizer	S032-2x500ML	2x500ml	3120
Gram's Iodine	S013-500ML	500ml	805
Safranin, 0.5% w/v (Gram's Counterstain)	S027-500ML	500ml	785
Basic Fuchsin 0.1% w/v (Gram's counterstain)	S038-500ML	500ml	785

Gram Stains Kit (K001)
Gram - positive : violet coloured
Gram - negative : pinkish red coloured

Stains for Metachromatic Staining ▲



Product	Code	Packing	Price in ₹
Methylene Blue (Loeffler's)	S022-125ML S022-500ML	125ml 500ml	230 810
Albert`s Metachromatic Stains - Kit (contains S001 and S002)	**K002-1KT**	**1kt**	**425**
Albert's Stain A	S001-125ML	125ml	250
Albert's Stain B	S002-125ML	125ml	250

K156 HiVibri-O-Trap Kit

Salient features :

- Highly nutritious, supports the growth of desired microorganisms - *Vibrio* sp
- Chromogenic technology imparts distinct colours making identification easier
- Selective medium helps to inhibit the unwanted microbial flora
- Microbial Enumeration and differentiation steps are easier
- Disinfectant solution provided to ensure safe disposal

K158 Rapid HiUTI Kit

- Ready-to-use kit for detection of UTI pathogens
- Chromogenic technology imparts distinct colours making identification easier
- Enumeration and differentiation of UTI pathogens is easier

HiPetri Slim™ Plate

Salient features :

- Ready-to-use medium in dry and concise form
- Recommended for testing liquid samples
- Widespread Industrial application (Water, Food & Cosmetics)
- Compact packing reduces storage space
- No Preparation time
- User-friendly ready-to-use products
- Available in wide range of products that can be customized as per requirement

ATCC® Credible leads to incredible™

The Global Bioresource Centre

We are authorised distributor of ATCC products and services.

Premier microbiology resources from world's largest collection at your doorstep
"Zero passage" cultures and much more…

Global Priority Superbugs

Enhance your antimicrobial resistance research efforts

ATCC has assembled a collection of clinically relevant and extensively characterized multidrug-resistant isolates with validated genotypic and phenotypic activity against a variety of critical drug classes. With each strain in the ATCC® Global Priority Superbugs collection, you can expect:

- Susceptibility data – MIC values and susceptibility profiles for targeted drugs
- Genetic data – NGS-assembled whole-genome sequence with predicted annotated antibiotic resistance and rRNA genes
- Source information – Data such as geography, collection date, and collection site

Get your research started faster

With the ATCC® Global Priority Superbugs collection, we have taken the guesswork out of strain selection! Using our super-charged search capabilities, you can quickly browse the collection by annotated genes, susceptiblity profile, geographical isolation, biosafety level, and species. Make fast, intelligent choices with our comprehensive and easy-to-use search features!

Support research on priority pathogens

In response to the growing levels of antimicrobial resistance among pathogens, the World Health Organization prepared a list of priority pathogens in 2017 to help direct research and development efforts toward the production of novel drugs. This list is organized into critical (1), high (2), and medium (3) priority levels.

To support these efforts, ATCC provides strains within the ATCC® Global Priority Superbugs collection that represent critical priority 1 pathogens:

- Acinetobacter baumannii – carbapenem-resistant
- Pseudomonas aeruginosa – carbapenem-resistant
- Enterobacteriaceae – carbapenem-resistant, 3rd generation cephalosporin-resistant

A portfolio of products to meet your needs

Intelligent research and reliable data starts with consistent controls. Whether you are developing innovative molecular-based detection methods, evaluating antibiotic susceptibility profiles, designing novel therapeutics, or testing clinical settings for contamination, ATCC has the dependable products and services you need to advance your research, including:

Antimicrobial-resistant strains isolated from clinical and environmental sources
Microbial panels comprising drug-resistant microorganisms
Primary cells for drug toxicity screening studies
Media, reagents, and growth kits that support cellular expansion

Additionally, ATCC has a long history of experience with biomaterial services and management, cell and microbial authentication, preservation and storage, and international shipping. By collaborating with ATCC, you will gain access to our wide range of services and customized solutions, including:

- Cellular and microbial expansion (MCB, WCB)
- Small- and large-scale production of nucleic acids
- Quantification (titering, qPCR, ddPCR™)
- Inactivation of microbial strains
- Viral purification
- Cell line authentication (STR analysis, CO1 testing, mycoplasma testing)
- Cell derivation (primary, hematopoietic, iPS cells)
- Biorepository ServicesSM with global distribution
- Patent deposit service

Authorised Distributor of ATCC

ATCC Microbiology and allied products, services and standards

Products

Collections : ATCC's collections include a wide range of biological materials for research, including cell lines, molecular genomics tools, microorganisms, and bioproducts.

Focus area : ATCC offers a wide assortment of cell cultures, microbial strains, and molecular tools to support your research in a variety of focus areas, such as disease mechanisms, quality control testing, product development, and environmental research.

Disease / Model : ATCC offers a wide assortment of cell cultures and microbial strains to support disease-based research in several key areas, such as cancer research and infectious disease.

Microbial Panels : ATCC Microbial Panels enable faster, more intelligent choices when selecting cultures for microbial-based disease research. Each panel is comprised of ATCC Genuine Cultures grouped together based on their utility in research related to infectious disease, antibiotic-resistance mechanisms, food and environmental testing, and population studies. Cultures included in each panel are further characterized by ATCC for relevant strain traits.

Ready to use : ATCC Minis - QC Strains
Bacteria : Cultures from the ATCC Bacteriology Collection are useful in a variety of research and industrial applications, and include methicillin-resistant/sensitive research materials, quality control organisms for commercial identification systems, a wide selection of extremophile strains from a variety of environmental sources, and genomic DNA from well-characterized microbial strains suitable for amplification by PCR.

Fungi and Yeast : ATCC is a trusted resource center housing a diverse assortment of filamentous fungi and yeasts, representing over 7,600 species. The collection offers over 32,000 yeast genetic strains, including the historic Yeast Genetic Stock Center (YGSC) strains, the open reading frame (ORF) deletion strains of the Saccharomyces cerevisiae Genome Deletion Project (SGDP), and a collection of *Cryptococcus neoformans* ORF deletion strains.

Global Priority Superbugs : As priority pathogens list of WHO, to help direct research & development efforts toward the production of novel drugs, ATCC provides Global Priority Superbugs collection that represent critical priority Pathogens. It includes

- *Acinetobacter baumannii* – carbapenem-resistant
- *Pseudomonas aeruginosa* – carbapenem-resistant
- *Enterobacteriaceae* – carbapenem-resistant, 3rd generation cephalosporin-resistant

Each multidrug-resistant strain delivers expanded levels of source metadata and genomic characterization, creating essential tools for all stages of the discovery and development process for novel antimicrobials and therapeutics, molecular-based detection assays, and updated sterility protocols.

ATCC Licensing Information : This page provides FAQ's related to Material Transfer Agreements at ATCC along with the ability to request a transfer, report a transfer or submit a new inquiry to our Licensing team.

Commercial Use : The licensing program for commercial use of ATCC products and use of the MTA for ATCC products in research both help protect the ability of ATCC to supply reference standards for the benefit of the scientific community.

ATCC®

Authorised Distributor of ATCC

Research Use : The ATCC Material Transfer Agreement (MTA) explains the rights and responsibilities of end users' use of ATCC materials. For your convenience, we have provided answers to FAQs in our database and these can also be found through the general site search.

Search FAQs : If you find that your question regarding the MTA is not answered, please contact us at contacts@atcc.org with your specific inquiry.

Services

Cell and Microbial Authentication : Cell and microbial authentication is of the utmost importance. Skipping the authentication step can lead to lost time, money and publications owing to cross-contamination and misidentification. ATCC can quickly and easily help you confirm the identity of almost any cell or microbe using a range of analytical techniques.

Cell and Microbial Banking : ATCC has been the authority on cell and microbial banking for over 90 years. The expertise of our dedicated staff includes every stage of the deposit, accession, and banking process.

Our laboratory and storage facilities are first in class for the large-capacity storage of cell lines, microorganisms, and other biological materials. We will work with you at all stages of the cell bank development process from the initiation of your project to the large scale production of your cells and microbes.

Controls and Derivatives : ATCC designs and produces external controls and derivatives in a variety of formats to verify, validate, and/or routinely monitor the performance of workflows and assays. We custom extract, produce and purify related biologicals such as both qualitative and quantitated nucleic acids, and provide alternative formats such as cell pellets, formalin-fixed, paraffin-embedded (FFPE) samples and inactivated microbial strains, which can be used as whole process controls for molecular assays.

Biorepository Services SM : Our biobanking services are consistent with ATCC's practices for handling & storage of materials entrusted with us since our founding in 1925.

BioEscrow® Deposit : ATCC's BioEscrow® deposit provides neutral, third-party assistance for the exchange of proprietary biological materials, information or technology as part of license agreements or other proprietary arrangements. Our service helps eliminate and mitigate potentially risky elements of the technology transfer process to the licensing parties when biological materials are involved.

It includes : Security

- Confidentiality
- ISO and cGMP compliant storage facilities
- Auditable
- Neutral third-party oversight
- Added level of intellectual property protection

ATCC Distribution Policy : Adherence to federal regulations worldwide, and compliance with U.S. export and import requirements, permits, and licenses.

ATCC ships materials direct to all countries except those restricted by the U.S. government or those who have an official ATCC distributor.

Authorised Distributor of ATCC

Anyone ordering from ATCC or a distributor must have an approved, current account. Potential customers must be able to demonstrate that their expertise and their institution's facilities are appropriate for handling biological materials.

General Collections Service : We are a private, nonprofit biological resource center (BRC) and research organization that hold contributions of research materials that are assets to the scientific community.

To inquire about depositing materials into the ATCC General Collection Service, please complete the deposit inquiry form. An ATCC representative will contact you following the review of your deposit inquiry.

Type Strain Depository : The nomenclatural strain depository is for researchers publishing a valid description regarding the type of a species or subspecies.

Patent Depository : ATCC is an International Depository Authority (IDA) for biological material for the purposes of patenting under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure. ATCC assumes no liability for the correctness of the depositors' information concerning patent deposits. All deposits are strictly confidential until the relevant patent is issued.

We have provided dependable storage of materials for patent purposes since 1949. Our Patent Depository contains more than 40,000 strains of biological materials in a facility specially designed for secure long-term storage.

US National Park Service Collection : Microorganisms isolated from National Parks in the United States are now available through the National Park Service Special Collection at ATCC. Approximately 100 bacteria, fungi, and protozoa are currently available in this Special Collection, and the list will continue to grow. These organisms offer a fascinating study of microbial ecology, from the hot springs of Yellowstone to the deserts of Big Bend National Park.

Standards

ATCC Standards Development Organization : In 2007, the ATCC® Standards Development Organization (SDO) became the first biological resource organization to become an American National Standards Institute (ANSI) accredited SDO. The ATCC® Standards Development Organization (SDO) is a developer and publisher of stakeholder-proposed, industry-relevant, national consensus standards for biomaterials and related processes.

ATCC® Proficiency Standard® Program : The goal for the ATCC® Proficiency Standard® Program is to positively impact the public health, welfare and safety by providing standardized biological materials in line with a program that addresses the need for security and traceability in the proficiency testing sector.

Certified Reference Materials (CRMs) : ATCC Certified Reference Material is reference material which is homogeneous and stable with respect to one or more specified properties and for which traceability and values of uncertainty at a stated level of confidence are established, where applicable.

Quality Control Solutions for Food Testing

ATCC® offers an expanding portfolio of quality control products to ensure the accuracy and reliability of your food safety programs. Through the development of customer-driven products, ATCC is making it easier for food manufacturers, processors, and contract testing laboratories to ensure the safety of consumable goods in accordance with FDA, the Food Safety Modernization Act, and food testing accreditation. Choose from among a variety of ATCC Quality Control Solutions, including:

- ATCC Reference Strains – including those cited in published laboratory methods
- ATCC Genuine Nucleics supporting the development and validation of rapid microbial methods
- ATCC Reporter-labeled Strains – including the USDA-cited GFP-labeled Escherichia coli O157

Trust ATCC Quality Control Solutions for accuracy, reliability, and the reproducibility needed to maintain outstanding food safety programs!

ATCC Food Testing Reference Strains

The validity of any microbial-based assay is dependent upon minimally passaged, fully characterized control organisms. One of our top priorities at ATCC is to provide high-quality reference strains for use in the routine testing of food products. Each ATCC reference strain is backed by meticulous laboratory procedures that ensure viability, identity, functionality, and purity, not only for our master seed stocks, but also for every distribution lot that we ship to your lab.

ATCC reference strains are frequently cited in published laboratory methods used by industry (see page 6 for details), and include a variety of cultures frequently associated with foodborne illness, such as:

- Campylobacter spp.
- Escherichia coli
- Listeria monocytogenes
- *Chronobacter sakazakii*
- Bacillus spp.
- Salmonella enterica
- Shigella spp.
- And more!

Salmonella is one of the leading causes of foodborne illness in the United States

Don't take chances on the quality of your cultures. Insist on products that meet ATCC's world-renowned standards for high quality and safety. Visit our Food Testing page at www.atcc.org/Food to learn more!

ATCC® Minis – making it easy for you to ensure the accuracy of your assays

ATCC Minis are the same ATCC Genuine Cultures you've come to trust for your quality control assays, now offered in a convenient, single-use, "mini" format that allows you to get your assays moving faster.

- Put an end to do-it-yourself banking with each six-pack of ready-to-use quality control strains in glycerol stock
- Enjoy using the same ATCC strains you've come to trust with easy-to-open screw-cap tubes
- Make recordkeeping a snap with peel-off labels you can stick directly into your lab notebook
- Conveniently store your strains up to one year at -20°C*

It's easy to ensure the quality of your products with ATCC Minis – just open, plate, and go! Visit us online at www.atcc.org/minis to learn more.

*Some fastidious strains are not stable at -20°C. Please refer to the product sheet for an item's appropriate storage temperature.

ATCC microbial panels – taking the guesswork out of validation studies

ATCC Microbial panels enable faster, more intelligent choices when selecting cultures for microbial-based disease research, including the development of novel detection methods for Salmonella enterica, Big-six non-O157 Shiga toxin-producing Escherichia coli (STEC), and enteric protozoa. Find your ATCC Microbial Panel for food testing online at www.atcc.org/mp.

ATCC®	Description	Application
MP-4™	Clostridioides difficile Panel	Building and testing new methods to detect Clostridioides difficile toxinotypes
MP-9™	Big-Six Escherichia coli Strains Panel	Quality control assays for non-O157 Shiga toxin-producing Escherichia coli (STEC)
MP-10™	Big-Six Escherichia coli Genomic DNA Panel	Quality control assays for non-O157 Shiga toxin-producing Escherichia coli (STEC)
MP-14™	Enteric Protozoa Genomic DNA Panel	Development of molecular-based assays used to diagnose intestinal disease caused by clinically relevant protozoa
MP-15™	Salmonella enterica Panel	Quality control assays for Salmonella enterica subsp. enterica serovars commonly associated with contaminated food or water
MP-20™	Big-Six Non-Toxigenic Escherichia coli Strains Panel	Non-toxigenic quality control strains for research on the Big-Six non-O157 serogroups
MP-26™	Non-pathogenic Escherichia coli Surrogates Indicators Panel	Validation applications include beef carcass intervention, beef processing, and selected antimicrobial treatments for E. coli O157:H7 or Salmonella enterica

ATCC reference strains used in the quality control of media

ATCC is dedicated to the continual improvement and diversification of our collection of food testing reference materials. To this end, we are constantly improving the technology used to characterize and authenticate the materials in our portfolio. Only ATCC delivers high quality microorganisms for food testing applications that are authenticated through a polyphasic approach incorporating genotypic, phenotypic, proteotypic, and functional analyses, including:

- Antibiotic susceptibility testing
- Biochemical analyses
- ELISA
- Immunofluorescence
- Morphological analyses
- Sterility testing
- Phenotypic microarray
- Sequencing
- Serotyping
- Toxinotyping
- Viability testing
- VITEK® MS

The high quality nature of our products makes them ideal for use as QC organisms for ensuring the quality and functionality of culture media frequently used in food testing assays, including:

Organism	Selective Media	Quality Control Strains
Bacillus cereus	Mannitol-Egg Yolk-Polymyxin (MYP) Agar	Bacillus cereus (ATCC® 11778™), B. cereus (ATCC® 14579™), B. megaterium (ATCC® 14581™), B. circulans (ATCC® 61™), B. subtilis (ATCC® 6633™)
Campylobacter	Campylobacter Blood-free Selective Medium (CCDA)	Campylobacter jejuni (ATCC® 33291™), C. jejuni (ATCC® 33292™), C. coli (ATCC® 43478™), Escherichia coli (ATCC® 25922™)
Escherichia coli O157:H7	CHROMagar™ O157	Escherichia coli O157:H7 (ATCC® 43888™), E. coli (ATCC® 25922™), E. coli (ATCC® 13047™), Enterococcus faecalis (ATCC® 29212™)
Listeria	PALCAM Agar	Escherichia coli (ATCC® 25922™), Enterococcus faecalis (ATCC® 29212™) Listeria monocytogenes (ATCC® 7644™), L. monocytogenes (ATCC® 19114™), L. monocytogenes (ATCC® 19116™), Staphylococcus aureus subsp. aureus (ATCC® 25923™)
Salmonella	Salmonella-Shigella (SS) Agar Bismuth Sulfite (BS) Agar	Salmonella enterica (ATCC® 14028™), Shigella flexneri (ATCC® 12022™), Escherichia coli (ATCC® 25922™), Enterococcus faecalis (ATCC® 29212™)
Staphylococcus aureus	Baird Parker Agar	Staphylococcus aureus subsp. aureus (ATCC® 25923™), S. aureus subsp. aureus (ATCC® 29213™), S. epidermidis (ATCC® 12228™)
Vibrio	Thiosulfate Citrate Bile Salts Sucrose (TCBS) Agar	Vibrio parahaemolyticus (ATCC® 17802™), Escherichia coli (ATCC® 25922™), Proteus mirabilis (ATCC® 12453™)

ATCC®

Microbiome Research

Optimize your research with the right controls

The complexities associated with microbiome research have made assay standardization challenging. ATCC has the solution: microbiome standards. Throughout each stage of your workflow, ATCC® Microbiome Standards enable you to optimize your diverse research applications with confidence and improve the consistency and reproducibility of your data run after run. These standards support a broad array of applications ranging from method optimization to data interpretation, and they serve as superior controls for microbial community testing and assay development on any platform.

ATCC Resources and Services

Culture Guides

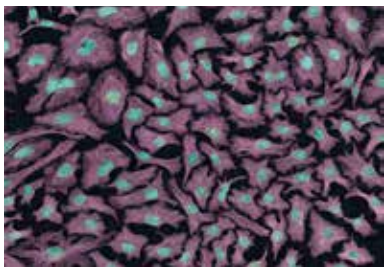
Culturing biological materials can be challenging at times even for the expert culturist. With nearly a century of expertise with cell and microbial cultures, ATCC has acquired and developed a vast body of best practices to aid researchers at all levels of proficiency to maximize the return on their biomaterials investment. The guides below deliver that knowledge and insight to the end user in a portable, easy-to-follow format.

https://www.atcc.org/resources/culture-guides

ATCC Genome Portal

The ATCC Genome Portal makes it easy to find the high-quality whole-genome sequencing data needed for your research. With a free account, you can easily search, download, and analyze hundreds of high quality genomes.

https://genomes.atcc.org/?_ga=2.231870175.198900398.1676951861-650617004.1676951861



Webinars

Collaboration and knowledge sharing are key components in accelerating scientific discoveries and advancing global health. Explore our expanding collection of webinars to learn more about the innovative research and development being performed by t hought leaders in science.

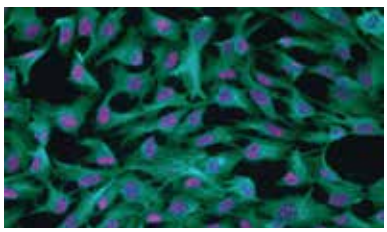
Cell Authentication



Confirm the Identity and Purity of your cells!

Research results are only valid and reproducible when the cell cultures and materials used in experiments are accurately identified and uncontaminated. ATCC offers scientists a range of high-quality cell authentication testing services backed by nearly a century of experience in biomaterial management and authentication standards.

- Human Cell STR Profiling
- Mouse Cell STR Profiling
- Mycoplasma Testing

cGMP Cell Banking and Biorepository

For nearly a century, ATCC has been regarded as a pioneer in cell banking and storage, using the most reliable and standardized procedures and equipment to manufacture and preserve your critical biomaterials. ATCC supports multiple stages of the cell banking process, from initial development to master/working cell bank production runs in efforts to streamline and expedite your timelines. In tandem, our cGMP biorepository experts can characterize, package, store, and distribute your biological materials to ensure the security and integrity of your cell banks.

Packing Information

Individual Lyophilized Microorganisms

LYFO DISK® Vials
A vial of 6 lyophilized pellets.
Order by the catalog number with the suffix "L".

KWIK-STIK™ Duopaks
Duopaks include 2 KWIK-STIKS™
Order by the catalog number with the suffix "P".

Other Products

EZ-CFU™
Available in kits containing: 20 lyophilized pellets of a single quantitative QC microorganism, 10 vials of hydrating fluid (2 ml in each vial), Delivering 10-100 cfu per 0.1 ml inoculum, following 1:10 dilution step.

EZ-CFU™ One Step
Available in kits containing: 20 lyophilized pellets of a single quantitative QC microorganism, 10 vials of hydrating fluid (2 ml in each vial), Designed to deliver 10-100 cfu per 0.1 ml inoculum.

EZ-PEC™
Available in kits containing: 20 lyophilized pellets of a single enumerated QC microorganism, 10 vials of hydrating fluid (2 ml in each vial), instructions for use

EZ-Accu Shot™
Available in kits containing: 5 vials of a single quantitated microorganism (1 lyophilized pellet per vial); 5 vials of hydrating fluid (1.2 mL in each vial); Illustrated instructions for use; upto 50 tests per kit

EZ-Accu Shot™ Select
Available in kits containing: 6 vial each of 6 different microorganism (1 lyophilized pellet per vial); 6 vials of hydrating fluid (1.2 mL in each vial); Illustrated instructions for use, upto 60 tests per kit

KWIK-STIK™ Plus
Available in canisters of 5 KWIK-STIK units and a Certificate of Analysis.

Lab-Elite™ CRM
Available in kits containing: One self-contained device including a lyophilized microorganism pellet, ampoule of hydrating fluid and inoculating swab (KWIK-STIK™ format.); Certificate of Analysis

Microbiology QC Slides
Available in boxes of 10 slides.

Helix Elite™ molecular standard
Available in kit containing : 1 vial of dried, stabilized RNA or DNA (approximately 100 reactions), 1 vial of molecular standard water for rehydration
Instructions for Use, Certificate of Analysis

E Power™ / E Power™ CRM
Kit contains : Vial of 10 quantitated lyophilized microorganism pellets, Certificate of analysis, Instructions for use

UV-Bio TAG™
Kit contains : UV- Bio TAG Swab :- 6 all-in-one devices including lyophilized microorganism pellet, ampoule of hydration fluid and inoculating swab, UV-Bio TAG Vial :- 6 lyophilized microorganism pellets in glass vials, Instruction for Use

Parasite Suspensions
Kit contains : Vial containing 1ml suspension of parasite species, Certificate of performance

Microbiology QC Sets and Panels
Kit contains : KWIK-STIK™ 2 Pack (2 STIKs of each microorganism), Synthetic DNA/RNA QC Sets and Panels, Inactivated Microorganism QC Sets and Panels

EZ SPORE™
Kit contains : Vial of 10 lyophilized pellets, Illustrated Instructions for use

Cultures are available to actual users only.
Products included in this section are free from Excise duty.

* ATCC Licensed Derivative™ The ATCC Licenced Derivative Emblem, the ATCC Licensed Derivative word mark, and the ATCC catalog marks are trademarks of ATCC. MicroBioLogics, Inc. is licensed to use these trademarks and to sell products derived from ATCC® cultures.

HIMEDIA®

Lab-Elite™

Lab-Elite™ CRM
CERTIFIED REFERENCE MATERIAL

Kit Includes:

- One self-contained device including a lyophilized microorganism pellet, ampoule of hydrating fluid and inoculating swab (KWIK-STIK™ format.)
- Certificate of Analysis

Lab-Elite™ Applications:

- For use in ISO 17025 accredited labs
- Qualitative QC microorganism one passage from the reference strains for ultimate authenticity
- For validation verification of processes and instruments

Following microorganism preparation is *First passage* from the reference culture

KWIK-STIK™ Plus

KWIK-STIK™ Plus - (5 Pack)

KWIK-STIK™ Plus
Limited Passage Microorganisms
KWIK-STIK™ Plus microorganisms are designed to meet the needs of laboratories requiring QC microorganisms that are fewer passages from the reference culture. Each KWIK-STIK™ Plus QC microorganism preparation is just two passages from the reference culture, allowing for more subcultures. Conveniently packaged in a KWIK-STIK™ device featuring a lyophilized QC microorganism pellet, inoculating swab and ampoule of hydrating fluid, KWIK-STIK™ Plus is ready to use and affordable. For added convenience, a peel-off identification label on each stick is included for quality control documentation. KWIK-STIK™ Plus includes five STIKS of a single strain.

Following microorganism preparation is *two passages* from the reference culture

Microbiology QC Sets and Panels

QC sets and panels offer a wide range of bundled QC sets and Panels for the most commonly used technologies and standards. Each set or Panel contains the manufacturer recommended quality control strains for a particular instrument or test method in a simple, ready to use format. Each set or Panel also contains the regulation specific (eg. CLSI or EUCAST) recommended quality control strains.

Kit contains :

Live Culture QC Sets and Panels

- KWIK-STIK™ 2 Pack (2 STIKs of each microorganism)

Helix Elite Molecular Standards QC Sets and Panels

- Synthetic DNA/RNA QC Sets and Panels
- Inactivated Microorganism QC Sets and Panels

Carbapenem - resistant Enterobacteriaceae (CRE) Control Panel (Inactivated Swab)	8187	2 sticks	On Request
Charles River Axcess Filamentous Fungi Qualification Panel	5259P	2 sticks	On Request
Enteric Pathogens Control Panel (Inactivated Pellet)	8184	2 sticks	On Request
Human Papillomavirus (HPV) Control Panel	8214	2 sticks	On Request
Human Papillomavirus (HPV) Verification Panel	8216	2 sticks	On Request

Multi - Strain Human Papillomavirus (HPV) Control Panel (Inactivated Pellet)	8234	2 sticks	On Request
Multi - Strain Human Papillomavirus (HPV) Verification Panel (Inactivated Pellet)	8235	2 sticks	On Request
Respiratory Control Panel (22 Targets)	8247	2 sticks	On Request
Rifampicin - Resistant Mycobacterium tuberculosis Positive Control Panel (Inactivated Pellet)	8206	2 sticks	On Request
SA Organism Set (Live Culture)	8178	2 sticks	On Request

ATCC

* ATCC Licensed Derivative™ The ATCC Licenced Derivative Emblem, the ATCC Licensed Derivative word mark, and the ATCC catalog marks are trademarks of ATCC. MicroBioLogics, Inc. is licensed to use these trademarks and to sell products derived from ATCC® cultures.
Each lyophilized microorganism preparation is two passages from the reference culture.

Individual Lyophilized Microorganisms

Individual Lyophilized Microorganisms
LYFO DISK® and KWIK-STIK™

Authentic and Traceable Reference Stock Cultures

Each lyophilized microorganism preparation is not more than Three passages from the reference culture, *requires no pre-incubation, and comes with a shelf-life of 6-24 months in refrigerated storage.*

LYFO DISK®: A vial containing 6 qualitative lyophilized pellets of an individual microorganism strain. This is the most economical reference stock culture option.

KWIK-STIK™: Self-contained units, each includes a lyophilized microorganisms pellet, reservoir of hydrating fluid, and inoculating swab. This is the most convenient and easy-to-use option. Available in a DuoPak of 2 units or 6

Following microorganism preparation is not more than *Three passages* from the reference culture

EZ-CFU™ One Step

EZ-CFU™ One Step
QC Microorganisms For Growth Promotion Tesing

The Growth Promotion Test (GPT) is an important function in the United States (USP), European (Ph. Eur.) and Japanese (JP) Pharmacopoeias. EZ-CFU™ One Step quantitative QC microorganism preparations are used to perform Growth Promotion Tests of culture media with ease. No dilutions are required. EZ-CFU™ One Step is designed to deliver 10-100 CFU with each 0.1 ml inoculum. Each 2 ml vial of hydrated suspension offers 19 inocula. EZ-CFU™ One Step can be used for up to eight hours after hydration if the suspension is refrigerated between uses. Online Certificate of Analysis provides detailed strain information.

EZ-CFU™ One Step kits include:
- *20 quantitative lyophilized microorganism pellet*
- *10 vials of hydrating fluid (2 ml in each vial)*
- *Illustrated instruction for use*

Following microorganism preparation is not more than *Three passages* from the reference culture

EZ-Accu Shot™

For Growth Promotion Testing

EZ-Accu Shot™ is a quantitative microorganism preparation designed for performing Growth Promotion Tests of culture media with ease. Each EZ-Accu Shot™ lyophilized microorganism preparation is designed to deliver 10-100 CFU per 0.1mL of hydrated suspension as recommended by the USP/JP/Ph. Eur. With little to no preparation time required and up to eight hours of stability, Each 1.2 mL vial of hydrated suspension offers 10 inocula. Applicable in methods requiring low cfu concentrations. EZ-Accu Shot™ adds efficiency and flexibility to QC laboratories' busy schedules.

EZ-Accu Shot™ kits include:

- 5 vials of a single quantitated microorganism (1 lyophilized pellet per vial)
- 5 vials of hydrating fluid (1.2 mL in each vial)
- Upto 50 tests per kit
- Illustrated instructions

Following microorganism preparation is of *three passages* or *less* from the reference culture

EZ-Accu Shot™ Select

For Growth Promotion Testing

EZ-Accu Shot™ Select boasts all the same features and benefits as the original EZ-Accu Shot™, but includes 6 compendial microorganism strains for Growth Promotion Testing in one convenient package. EZ-Accu Shot™ Select lyophilized microorganism preparations are designed to deliver 10 - 100 CFU per 0.1mL of hydrated suspension as recommended by the USP/JP/Ph. Eur. With little to no preparation time required and up to eight hours of stability after rehydration, EZ-Accu Shot™ Select adds efficiency and flexibility to QC laboratories' busy schedules. Each 1.2 mL vial of hydrated suspension offers 10 inocula. For added convenience, individual peel-off informational labels are included for each strain.

EZ-Accu Shot™ Select kit includes:

- 6 vials of 6 quantitated microorganisms strain (1 lyophilized pellet per vial)
- 6 vials of hydrating fluid (1.2 mL in each vial)
- Illustrated instruction for use

Licensed, traceable strains:

Aspergillus brasiliensis ATCC® 16404™*
Bacillus subtilis subsp. *spizizenii* ATCC® 6633™*
Candida albicans ATCC® 10231™*
Escherichia coli ATCC® 8739™*
Pseudomonas aeruginosa ATCC® 9027™*

EZ-CFU™

EZ-CFU™
Microorganisms for Growth Promotion Challenges

EZ-CFU™ is used to perform Growth Promotion Tests of culture media with ease. EZ-CFU™ lyophilized QC microorganism preparations deliver 10-100 CFU per 0.1 ml inoculum, following a simple 1:10 dilution in pH 7.2 phosphate buffer. Following the dilution step, EZ-CFU™ provides over 90 inocula using the same suspension. EZ-CFU™ are less than or equal to three passage from the reference strains.

EZ-CFU™ kits include:

- *20 lyophilized pellets of a single quantitative QC microorganism*
- *10 vials of hydrating fluid (2 ml in each vial)*
- *Illustrated instruction for use*

EZ-PEC™

EZ-PEC™

QC Microorganisms For Antimicrobial Effectiveness and Preservative Efficacy Testing

Ready-to-use EZ-PEC™ quantitative QC microorganism preparations are designed to provide the required microorganism challenge concentrations for Antimicrobial Effectiveness Tests and Preservative Efficacy Tests. When processed as directed, EZ-PEC™ delivers a final concentration of $1.0x10^5$ to $1.0x10^6$ CFU per ml of the product being tested. Strains are less than or equal to 3 passages from reference cultures.

EZ-PEC™ kits include:

- 20 lyophilized pellets of a single enumerated QC microorganism
- 10 vials of hydrating fluid (2 ml in each vial)
- Illustrated instruction for use

E Power™

Epower™ product provides all of your QC needs – from media QC and presence/absence testing to enumeration testing, water testing, and disinfectant testing. Each quantitative microorganism pellet delivers a specific range of CFU. Epower™ can be manipulated to deliver virtually any concentration. It is available in concentrations ranging from 10^2 and 10^8 CFU per pellet. It can be combined for a mixed microorganism population.

Kit contains :

- Vial of 10 quantitated lyophilized pellets
- Illustrated instructions

Following microorganism preparation is less than or equal to *Three passage* from the reference culture

E Power™ CRM

E Power™ CRM quantitative quality control microorganisms are just one passage from reference strain. Each microorganism pellet has a pre-determined range of CFUs. Available in concentrations ranging from 10^2 and 10^7 cfu per pellet. Can be combined for a mixed microorganism population. For ISO 17025 accredited lab, E Power™ CRM helps to meet the requirements of section 5.6.2(b), regarding reference materials.

Kit contains :

- Vial of 10 quantitated lyophilized microorganism pellets
- Certificate of analysis
- Instructions for use

Following microorganism preparation is not more than *One passage* from the reference culture

EZ SPORE™

EZ Spore™ provides quantitative microorganism preparation for validating their spoilage detection methods or for disinfectant qualification studies and daily food process controls. EZ Spore™ preparations provide a concentration of 10^4 cfu per pellet, making microbiological challenge testing for spore formers quicker and easier.

Kit contains :

- Vial of 10 lyophilized pellets
- Illustrated Instructions for use

Following microorganism preparation is not more than *Three passage* from the reference culture

Geobacillus stearothermophilus ATCC® 7953™*	0871SPR	1kit	On Request

UV-BioTAG™

UV- Bio TAG, line of reference strains containing green fluorescent Protein (GFP) markers, make it easy to distinguish standard microorganism strain from laboratory control strains. Optimized for highly visible fluorescence, UV- Bio TAG strains provide better stability because the GFP marker is integrated into the chromosome rather than plasmid.

Benefits :

- Fluoresces under UV light to distinguish QC strains from other possible contaminants
- Instant dissolve pellet reduces preparation time
- Ready-to-use format saves time and money
- Refrigerated storage is easy and economical

Kit contains :

- UV- Bio TAG Swab :- 6 all-in-one devices including lyophilized microorganism pellet, ampoule of hydration fluid and inoculating swab
- UV-Bio TAG Vial :- 6 lyophilized microorganism pellets in glass vials
- Instruction for Use

Helix Elite™ Molecular Standard

Helix Elite™ Molecular Standards are used as controls for developing, validating, and monitoring molecular instruments and assays. It comes in 3 distinct formats: Inactivated, Synthetic Nucleic acids and Genomic Extracts. Each format has been designed for efficiency and usability.

Benefits of Helix Elite™ products provide:

- Non-hazardous materials for safe handling
- Ideal for pathogens which are difficult to grow
- Optimized for time and labor savings
- Independent external controls provide accurate, reliable results
- Convenient room temperature storage

Synthetic Helix Elite™ Molecular standard kit contains :
1 vial of dried, stabilized RNA or DNA (approximately 100 reactions)
1 vial of molecular standard water for rehydration

Parasite Suspensions

Parasite Suspensions is versatile to help labs QC their parasitology diagnostic kits and methods, microscopic examinations, staining procedures, and proficiency programs. Designed to mimic a patient sample for simple control processing, these economical and easy-to-use Parasite Suspensions outperform similar products on the market. They are packaged in a vial containing a 1 ml suspension of a specific parasitic population with known characteristics, formalin and fecal matter. Parasite Suspensions are CE Marked as an In-Vitro Diagnostic (IVD) Medical Device and include a Certificate of Performance which provides detailed information about the parasite.

Benefits :

- Convenient test ready format saves you time and money
- Designed to mimic a patient sample for simple control processing (For QC of diagnostic test kits and methods, Microscopic examinations, Proficiency tests, Educational purposes)
- Includes a Certificate of Performance that provides a detailed description of the specimen
- CE Marked as an In-Vitro Diagnostic (IVD) Medical Device
- 2 year shelf life
- Room temperature storage

Kit contains :

- Vial containing 1ml suspension of parasite species
- Certificate of performance

EZ-Rapid Shot Kit

EZ-Rapid Shot - Simplify your Growth Promotion Testing

- Easy to disperse lyophilized culture makes preparation faster.
- Isotonic rehydration fluid maintains the viability of organisms.
- Avoid cumbersome serial dilution and extensive culture maintenance activities.
- Both cultures & rehydration fluid are supplied together in a kit format and can be stored at 2-8°C.

For Growth Promotion Testing

EZ-Rapid Shot is a quantitative microorganism preparation designed for performing Growth Promotion Tests of culture media and delivers 10-100 CFU per 0.1mL of hydrated suspension as recommended by the USP/JP/Ph. Eur.

With little to no preparation time required and up to eight hours of stability, Each 1.2 mL vial of hydrated suspension offers 10 inocula.

EZ-Rapid Shot kit include below mentioned based on the pack size :

- 10 or 20 vials of a single quantitated microorganism (1 lyophilized pellet per vial)
- 10 or 20 vials of hydrating fluid (1.2 mL in each vial)

AccuBET™

ENDOTOXIN ASSAY KITS (BET)

Your perfect choice of premium quality, cost-effective reagents for Bacterial Endotoxin Assay

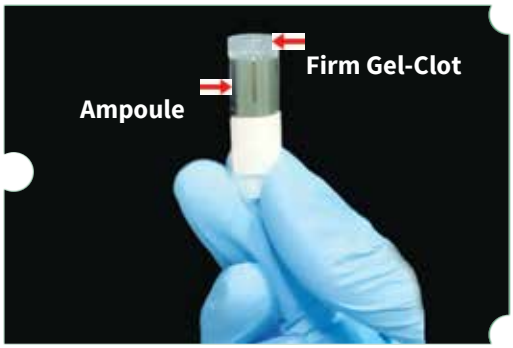
ADVANTAGES

- Single-test ampoule format, popular across 15 countries, available for all lysate sensitivities
- High-stability Control Standard Endotoxin (CSE) provided with the kit
- Cost effective premium quality reagents
- Ampoule packing eliminates the need for reconstitution of the lysate thereby saving endotoxin free water
- Ampoule packing also reduces need for pyrogen free tubes.
- Simplified protocol - add sample/ CSE dilution, mix and incubate!

INTENDED USE

- Qualitative and semi quantitative detection of endotoxin in pharmaceuticals, biological products, radioactive medicine and medical devices, hemodialysis solution, dialysis water and ACD solution
- Pyrogen control or endotoxin detection during production processes of above products as well as of associated raw materials

POTENTIAL USER SEGMENTS



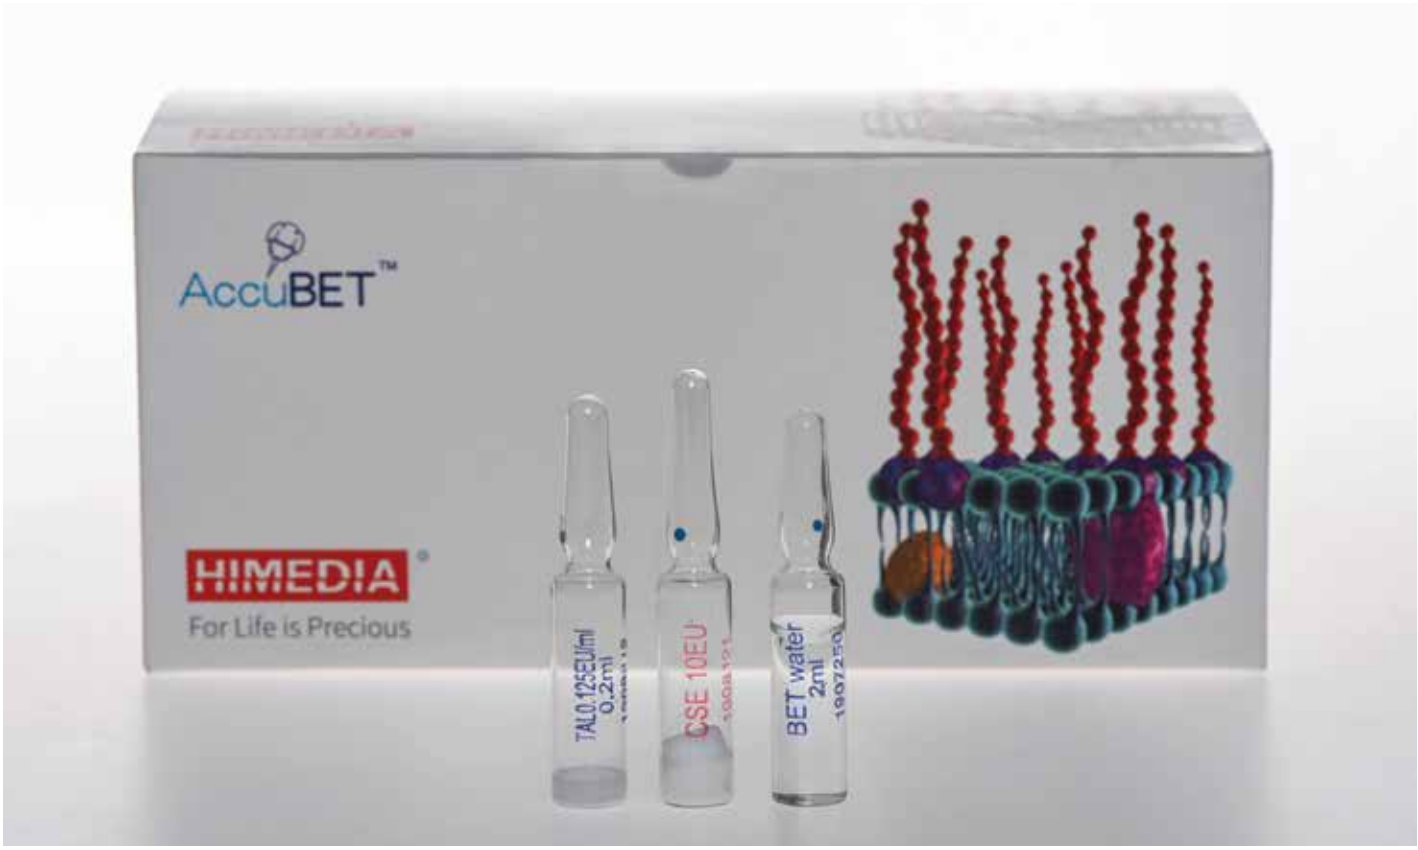
- Bio-pharmaceuticals
- Hospitals & Diagnostic labs
- Pharmaceuticals
- Medical device manufacturers

Gel-Clot Endotoxin Limit Method for Qualitative and Semi Quantitative Detection of Bacterial endotoxin

The Gel-clot range of bacterial endotoxin testing products comes equipped with assorted kits, reagents and accessories to help you perform the qualitative gel-clot bacterial endotoxin assay with ease. **Our assorted kits provide you with all the reagents required for the assay namely the Tachypleus Horseshoe Crab Amoebocyte Lysate (TAL), Control Standard Endotoxin (CSE) and Bacterial Endotoxin Testing (BET) Water.** The reagents are separately available for refilling as per your requirement thus imparting great flexibility to your assay performance. You can choose the Ampoule format thereby ensuring maximal utilization and minimal wastage of the assay reagents.

Gel-Clot Endotoxin Assay Principle

- Presence of the endotoxin activates factor C in the horseshoe crab amoebocyte lysate
- Activated factor C further activates factor B
- Pre-clotting enzyme (inactive) is cleaved by activated factor B into clotting enzyme (active)
- Active enzyme reduces Coagulogen into Coagulin thereby leading to clot formation



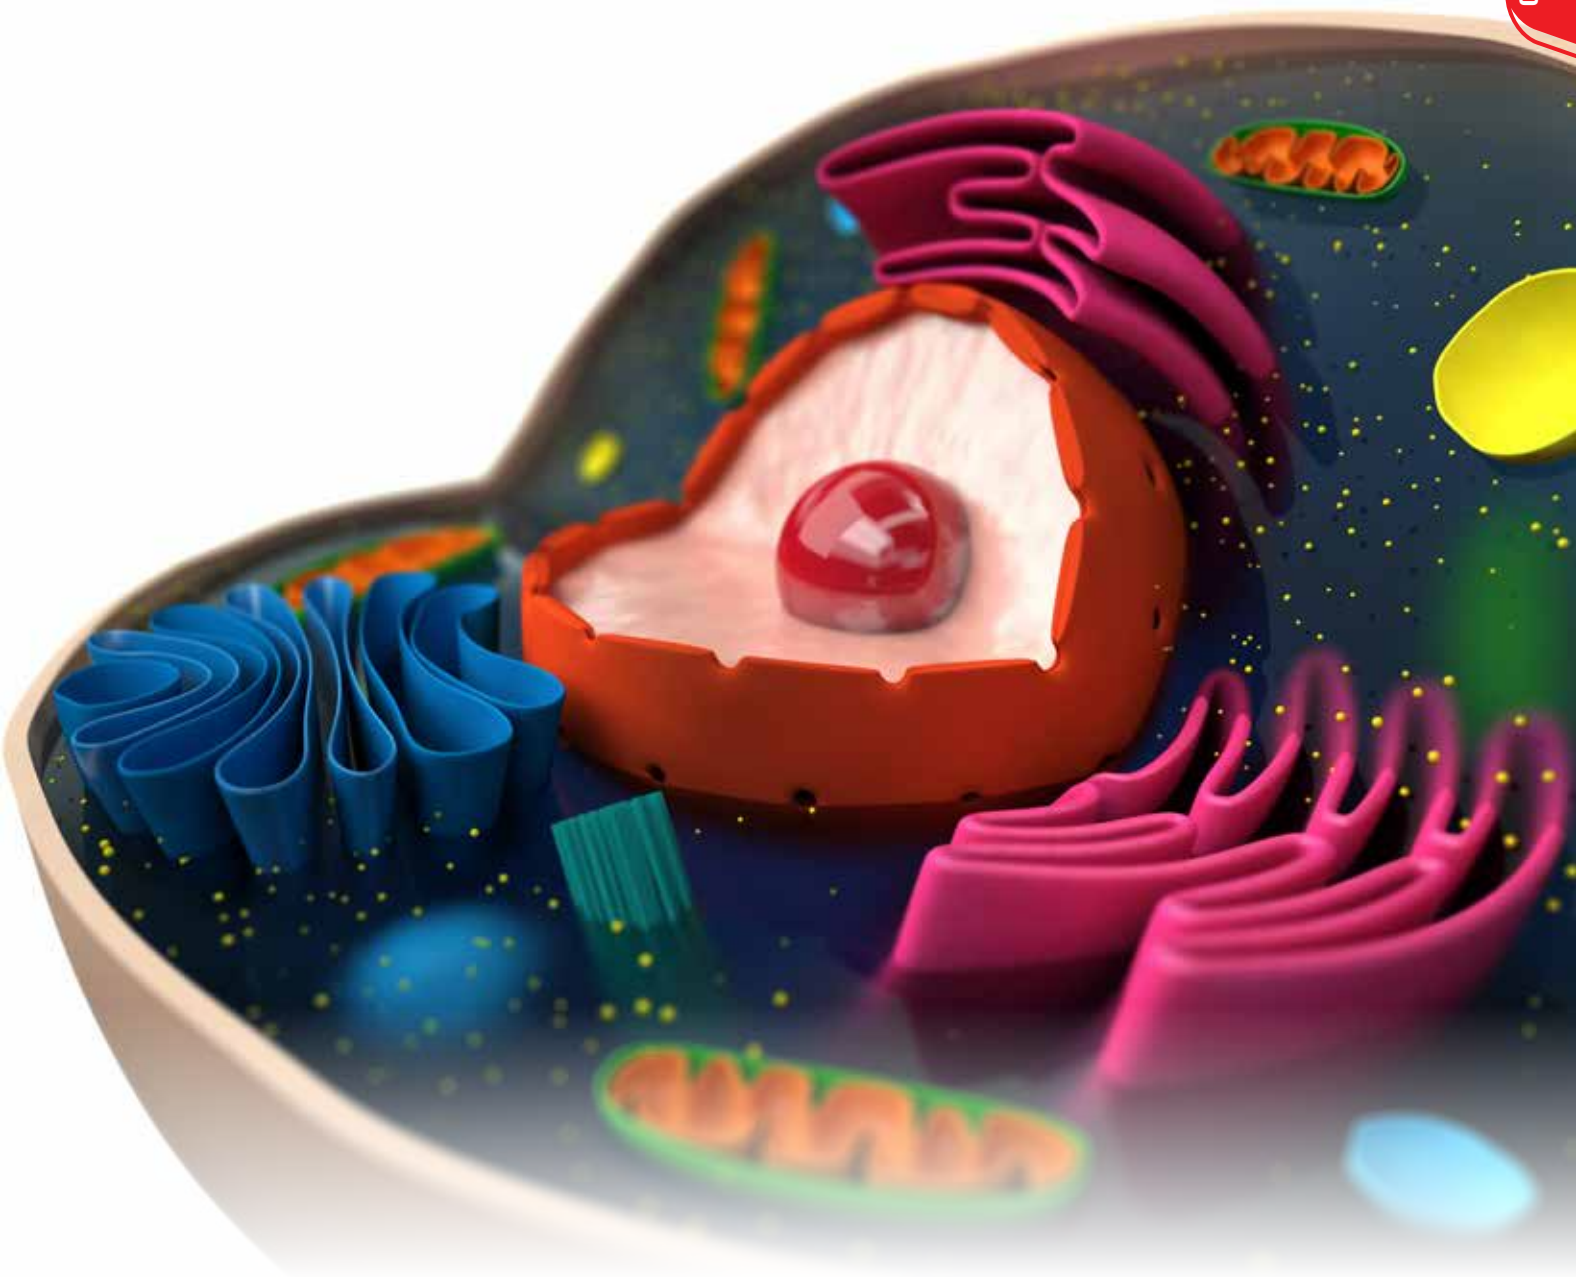
Gel-clot formation - Ampoule format

BET

HIMEDIA®

Gel-Clot Endotoxin Assay Kit (Vial format)

Gel-clot Endotoxin Assay Kits & Reagents



Bacterial Endotoxin Test (BET) Kits

Product	Code	Packing	Price in ₹
Endotoxin Assay Kit (gel-clot) TAL(0.5 EU/mL) 0.2 mL×44 pcs; BET water 2 mL×5 pcs Control Standard Endotoxin ×1 pcs; 44 tests/kit (Ampoule Packing)	**THG10-0500**	**1kit**	**On Request**
Endotoxin Assay Kit (gel-clot) TAL(0.25 EU/mL) 0.2 mL×44 pcs; BET water 2 mL×5 pcs Control Standard Endotoxin ×1 pcs; 44 tests/kit (Ampoule Packing)	**THG10-0250**	**1kit**	**On Request**
Endotoxin Assay Kit (gel-clot) TAL(0.125 EU/mL) 0.2 mL×44 pcs; BET water 2 mL×5 pcs; Control Standard Endotoxin ×1 pcs; 44 tests/kit (Ampoule Packing)	**THG10-0125**	**1kit**	**On Request**
Endotoxin Assay Kit (gel-clot) TAL(0.06 EU/mL) 0.2 mL×44 pcs; BET water 2 mL×5 pcs Control Standard Endotoxin ×1 pcs; 44 tests/kit (Ampoule Packing)	**THG10-0060**	**1kit**	**On Request**
Endotoxin Assay Kit (gel-clot) TAL(0.03 EU/mL) 0.2 mL×44 pcs; BET water 2 mL×5 pcs Control Standard Endotoxin ×1 pcs; 44 tests/kit (Ampoule Packing)	**THG10-0030**	**1kit**	**On Request**

Product	Code	Packing	Price in ₹
Horseshoe Crab Amoebocyte Lysate			
TAL(gel-clot) 0.5 EU/mL, 0.2 mL×50 pcs/pack Ampoule Packing	HG020500	1pk	On Request
TAL(gel-clot) 0.25 EU/mL, 0.2 mL×50 pcs/pack Ampoule Packing	HG020250	1pk	On Request
TAL(gel-clot) 0.125 EU/mL, 0.2 mL×50 pcs/pack Ampoule Packing	HG020125	1pk	On Request
TAL(gel-clot) 0.06 EU/mL, 0.2 mL×50 pcs/pack Ampoule Packing	HG020060	1pk	On Request
TAL(gel-clot) 0.03 EU/mL, 0.2 mL×50 pcs/pack Ampoule Packing	HG020030	1pk	On Request
Gel-Clot Endotoxin Assay Accessories			
Accessories			
Control Standard Endotoxin 10-50 EU, 50 pcs/pack Ampoule Packing	ET-20	1pk	On Request
Control Standard Endotoxin 51-200 EU, 50 pcs/pack Ampoule Packing	ET-120	1pk	On Request
Endotoxin indicator 2000 EU-5000 EU,18 pcs/pack Ampoule Packing	DCV-2000	1pk	On Request
Endotoxin indicator 2000 EU-5000 EU,50 pcs/pack Ampoule Packing	DCV50-2000	1pk	On Request
Endotoxin indicator 4000 EU,18 pcs/pack Ampoule Packing	DCV-4000	1pk	On Request
Endotoxin indicator 4000 EU, 50 pcs/pack Ampoule Packing	DCV50-4000	1pk	On Request
Endotoxin indicator 10000EU, 18pcs/box Ampoule packing	DCV-10k	1pk	On Request
Endotoxin indicator 10000EU, 50pcs/box Ampoule packing	DCV50-10k	1pk	On Request

Product	Code	Packing	Price in ₹
BET water 2 mL×50 pcs/pack, endotoxin free(<0.001 EU/mL) Ampoule Packing	WP-02	1pk	On Request
BET water 5 mL×10 pcs/pack, endotoxin free(<0.001 EU/mL) Ampoule Packing	WP-05	1pk	On Request
BET water 50 mL×20 pcs/pack, endotoxin free(<0.001 EU/mL) Vulcanized Glass Bottle Packing	WP-50	1pk	On Request
BET water 100 mL×20 pcs/pack, endotoxin free (<0.001 EU/mL) Vulcanized Glass Bottle Packing	WP-100	1pk	On Request
pH buffer (acidity) 2 mL×50 pcs/pack, endotoxin free Ampoule Packing	PH-S-2	1pk	On Request
pH buffer (alkaline) 2 mL×50 pcs/pack, endotoxin free Ampoule Packing	PH-J-2	1pk	On Request
Pyrogen-free Ampoules 2 mL×50 pcs/pack, endotoxin free, glucan free	WP-SG-2	1pk	On Request
Pyrogen-free Ampoules 5 mL×10 pcs/pack, endotoxin free, glucan free	WP-SG-5	1pk	On Request
Pyrogen-free pipette tips 250 uL×200 pcs/pack, plastic, endotoxin free, glucan free	WP-XZ-025	1pk	On Request
Pyrogen-free pipette tips 1000 uL×100 pcs/pack, plastic, endotoxin free, glucan free	WP-XZ-100	1pk	On Request
Borosilicate glass tubes 10 x 85mm, 40 pcs/pack endotoxin free, glucan free	GT-1285	1pk	On Request
AntiEnhance 2 mL×10 pcs/pack, endotoxin free Ampoule Packing	AE-A-2	1pk	On Request

CELL BIOLOGY

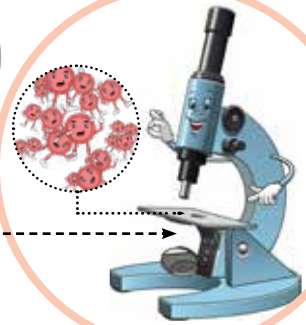
Thawing
Winter's over, let the cell-tastic thaw party begin

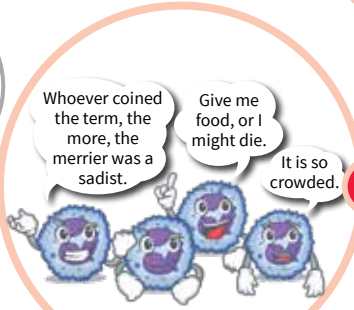
1



Cell Seeding
Just planting ourselves in this T-Flask party, ready to grow and glow

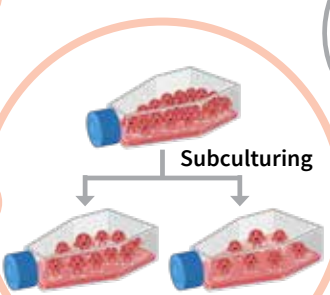
2

Cell Observation
Oh look, it's the paparazzi again! Strike a pose



3

Incubation
Sippin' on nutrients, catching some Zzz's, and acing the 37-degree challenge – our secret to being cell-ibrated superstars



4

Medium Change
Upgrade complete, time to party in fresh nutrient style!

5

Cell Passaging
Level up, fellow cells! It's time to enter the cozy flask and embark on a cellular adventure.

6

Preserve & Freezing
Winter is coming, and so are we – preserving ourselves like cell-sicles for the future

7

Product codes as per application

THAWING

1. Cell Growth Medium- **AL047A, AL007A, AL028A, AT007, AT020, AT047**
2. Serum- **RM10432, RM1112, RM9952**
3. Serum Replacement Solution- **TCL280**
4. Culture Flasks- **Adherent: TCG6, TCG4, TCP221, TCP205**
   Suspension: TCS6, TCS6, TCS8
5. Incubator-**AI005, AI006, AI0092**
6. Disposable Pipettes -**PW1193, PW1194, PW1196**
7. Centrifuge Tubes-**TCP105H, TCP106H**
8. Automated Cell Counter-**AI001**
9. Multi-well plates-**Adherent: TPP96, TPP6, TPP12**
   Suspension: TPG96, TPG12, TPG6

MEDIUM CHANGE

1. Cell Growth Medium- **AL047A, AL007A, AL028A, AT007, AT020, AT047**
2. Serum- **RM10432, RM1112, RM9952, RM10436**
3. Serum Replacement Solution - **TCL280**
4. Disposable Pipettes – **PW1193, PW1194, PW1196**

SUBCULTURING/PASSAGE

1. Cell Growth Medium- **AL047A, AL007A, AL028A, AT007, AT020, AT047**
2. Balanced Salts- **TS1006, TL1006, TL1031, TL1101**
3. Serum- **RM10432, RM1112, RM9952, RM10436**
4. Serum Replacement Solution **- TCL280**
5. Antibiotics- **A002A, A001A, A011, A005**
6. Cell Dissociation- **TCL007, TCL047, TCL028, TCL137, TCL153**
7. Cell Scraper- **TCP223**
8. Centrifuge tube- **TCP105H, TCP106H**
9. Culture Vessels- **Adherent: TCG4, TCG6, TCP205, TCP007**
   Suspension: TCS4, TCS8,TCP011
10. Multi-well plates-**Adherent: TPP96, TPP6, TPP12**
    Suspension: TPG96, TPG12, TPG6
11. Centrifuge tube- **TCP105H, TCP106H**
12. Disposable Pipettes -**PW1191, PW1192, PW1193, PW1194, PW1196, PW1197**
13. Incubator- **AI005, AI006, AI0092**

CELL SEEDING

1. Cell Culture Medium: Suitable cell culture medium containing the necessary nutrients, growth factors, and supplements to support cell growth. **AL007A, AL028A, AL047A, AT007, AT020, AT047**
2. Serum- **RM10432, RM1112, RM9952**
3. Serum Replacement Solution - **TCL280**
4. Antibiotics- **A002A, A001A, A011, A005**
5. Culture Flasks- **Adherent: TCG6, TCG4, TCP221, TCP205**
   Suspension: TCS6, TCS6, TCS8
6. Roller bottle- **Adherent: TCG15, TCG16, TCG18**
   Suspension: TCS9, TCS10
7. Culture Dish- **Adherent: TCP007, TCP008**
   Suspension: TCP010, TCP027
8. Disposable Pipettes – **PW1193, PW1194, PW1196**
9. Automated Cell Counter-**AI001**

CELL OBSERVATION

1. Microscope - **AI003, AI004**
2. Incubator - **AI005, AI006, AI0092**

CRYOPRESERVATION/FREEZING

1. Media-**TCL285, TCL098**
2. Cryoprotectant- **TC450M, TC185**
3. Cryovials- **TCP076, TCP216, TCP212**
4. Freezing Tubes- **TCP092, TCP094**

Our Mesenchymal

Sources of stem cells

Umbilical cord
Fat tissue
Dental Pulp

Isolation of Stem cells

An enzymatic digestion processes

Stem cell culture & Subculture

Human Wharton's Jelly-MSC
Human Adipose Derived-MSC
Human Dental Pulp-SC

Media & Reagents

- DPBS-**TL1006, TL1023, TS1006**
- Antibiotics-**A002A, A001A**

Consumables

- Tissue Dissociation Enzymes-**TCL118, TCL116, TCL114, TC303, TC212**
- Culture Dishes-**TCP008, TCP009**
- Serological Pipettes-**PW1191, PW1193, PW1197, PW1194**
- Centrifuge Tubes-**TCP106H**

Media & Reagents

- Cells **-CL001, CL007, CL008**
- Stemin1™- **AL520**
- Media with Serum - **AL512**
- Sera**-RM10832**
- Coating Factor- **TCL127, TCL109**
- Trypsin -**TCL007, TCL049**
- Trypsin Inhibitor - **TCL068**

Stem Cell Portfolio

Cell Characterization & Differentiation

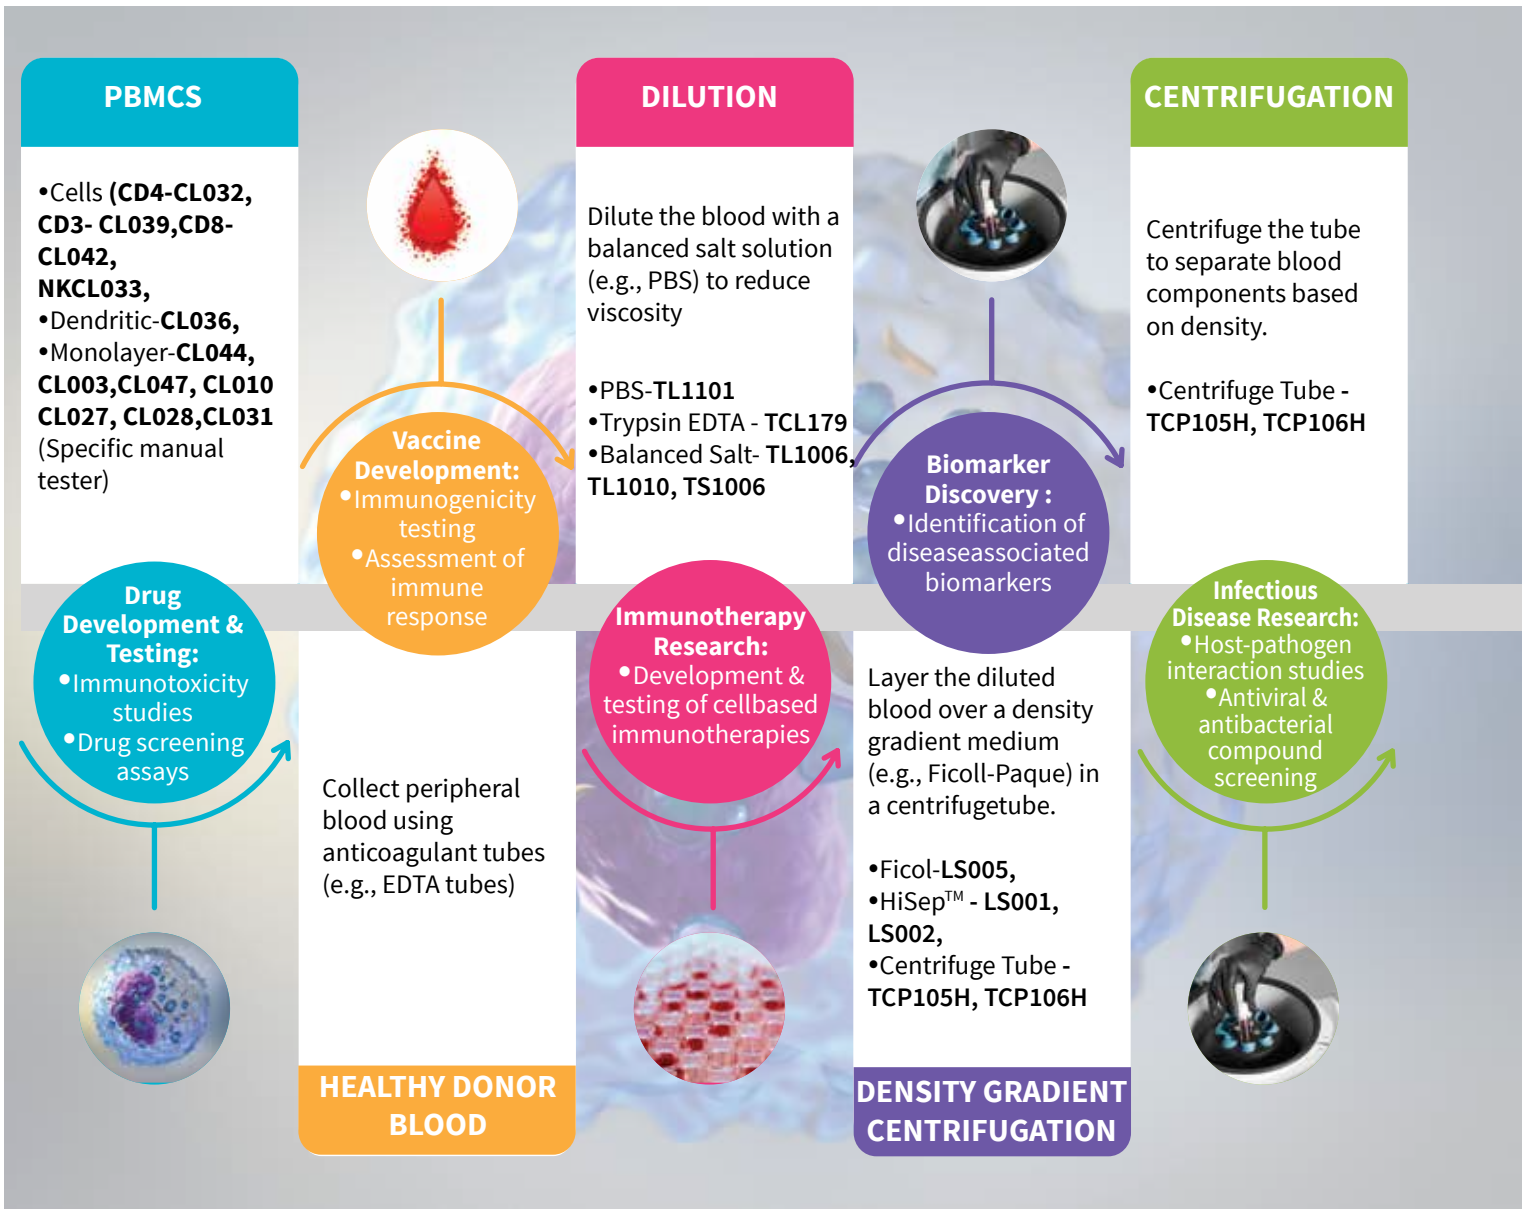
Cell Characterization using flow cytometer instrument & cell differentiation media

Media, Reagents & Kits

- Cell Differentiation Media- **AL522, AL521, AL523**
- Cell Differentiation Kits- **CCK011, CCK049**
- Cell Staining Kits- **CCK013, CCK030, CCK029**
- Marker Analysis services by Flow Cytometer is provided

Consumables

- Plates- **TPP6, TPP12, TPP24, TPP48, TPP96**
- Flask- **TCG1, TCG2, TCG4, TCG6**
- Scaffold-**TCP235**



Cryopreservation of stem cells

Cryo-preservation at -196 degree Celsius for long term storage of Stem Cell

Media & Reagents

- Freezing Media- **TCL107, TCL285, TCL098, TCL093**
- Cryoprotectant- **TC450M, TC185**
- Cryovials- **TCP076, TCP216, TCP212**

Work Flow for Isolation of Peripheral Blood Mononuclear Cells (PBMC's)

Work Flow for Isolation of Peripheral Blood Mononuclear Cells (PBMC's)

PBMC COLLECTION

PBMC collection into a tube

WASHING

Wash the collected PBMCs with a balanced salt solution (e.g., PBS) to remove any residual

- Balanced salt- **TL1006, TL1010, TS1006**
- PBS-**TL1101,**
- Trypsin EDTA **-TCL179**

Autoimmune Disease Research:
- Investigation of immune system dysregulation

Cancer Research:
- Investigating immune response to cancer
- Advancing immunotherapies & cancer vaccines

CELL COUNTING

Use a hemocytometer or an automated cell counter to determine the concentration and viability of isolated PBMCs

- Cell Counter- **AI001,**
- Microscope- **AI003, AI004**

Transplantation Medicine:
- Modeling & study of Graft-Versus-Host Disease (GVHD)

VIABILITY STAINING

Stain a small aliquot of PBMCs with a dye (e.g., trypan blue) to assess cell viability

- Viability Staining- **TC193, TCL046, TCL005**

Diagnostic Assays:
- Assessment of immune system function
- Tests for immuno-deficiency disorders

CRYOPRESERVATION

If needed, freeze PBMCs in a cryoprotective solution for long-term storage

- Media-**TCL285**
- Cryoprotectant **TC450M, TC185**
- Cryovials- **TCP076, TCP216, TCP212**
- Freezing Tubes- **TCP092, TCP094**

Personalized Medicine:
- Development of patient-specific therapies using ndividual PBMCs

Workflow For Karyotyping

Product Codes		Procedure
	Sample Blood/ Tissue)	**Collect Blood or Tissue Samples (Placenta/Bone Marrow).**
Media:- **AL047A, AL028A, AL165A** Antibiotic:- **A002A** Serum:- **RM10432, RM1112, RM9952** Balanced Salts:- **TL1006, TL1010** Plasticware:- **TPP6, TPP12, TCG2** Incubator:- **AI005**	**Cell Culturing**	**Cells are grown in RPMI 1640, fetal bovine serum, antibiotics and incubated to promote cell growth. For blood complete media can be used.**
Mitotic Inhibitors: **TCL062, TCL074 & TCL133**	**Mitotic Inhibition**	**Addition of Mitotic Inhibitor colchicine aid karyotyping by arresting cells in metaphase for efficient chromosome analysis.**
Blood Karyotyping: **AL165A, AL173A** Amniotic Fluid Karyotyping: **AL202A** Bone Marrow Karyotyping: **AL301A** Mitotic Stimulators: **TCL061 & TCL071** Serum:-**RM10432, RM1112** Antibiotic:-**A002A, A001A, A011, A005** Trypsin EDTA:-**TCL007** Plasticwares:-**TCP106H**	**Cell Harvesting**	**Centrifuge cells to separate from the medium and use trypsin or other detachment reagents to release them from culture dishes.**
Potassium Chloride: **TC010**	**Fixation & Hypotonic Treatment**	**Spread chromosomes by treating cells with a hypotonic solution (e.g., KCl) and fix with Carnoy's fixative (methanol and acetic acid) for structural preservation.**
Trypsin Solution for G-Banding: **TCL122** Cell Dissociation Reagent:-**TCL137, TCL028, TCL047, TCL007, TCL068** Gurr Buffer Solution pH 6.8: **TL1139** Giemsa Stain Solution: **TCL083** (Hoechst 33258)-**TC225** DAPI dihydrochloride- **TC229**	**Slide Preparation & Staining**	**Prepare slide by dropping fixed cells onto a glass slide and stain with Giemsa chromosomal stain.**
Microscope: **AI003, AI004**	**Microscopic Observation**	**Examine the stained slide under a light microscope to observe chromosome spread.**

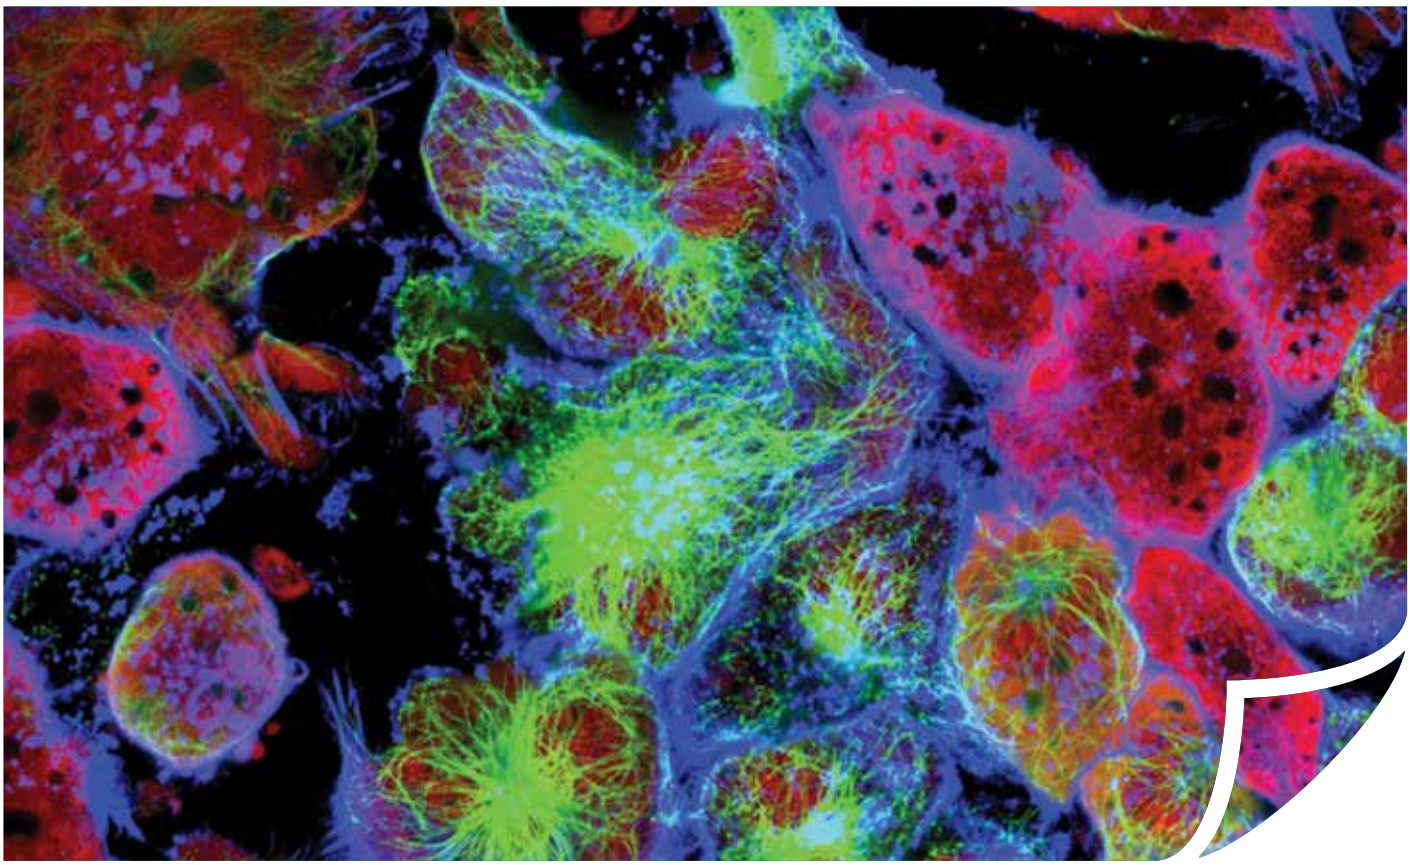
HIMEDIA®
For Life is Precious

ATCC®

Authorized Distributor of ATCC

Cell lines and
Cell line related services

ATCC offers a complex array of human, animal, insect, fish and stem cells to choose from.



Dear Patrons,

HiMedia is here to serve you as an Authorized Distributor of all ATCC products and services in India.

We are delighted to serve you with this new product range, and we are thankful for your continued trust in our service.

For additional product information, contact us at **atcc.sales@himedialabs.com**

For detailed information about the ATCC portfolio, visit the ATCC website online at **www.atcc.org**

Cells Lines

- Animal Cells
- Human Cells
- Reporter-labeled Cell Lines
- Cell Lines by Genetic Mutation
- Human Primary Cells
- Misidentified Cell Lines
- Tumor/Normal Matched Cell Lines
- Human Induced Pluripotent Stem (IPS) Cells
- hTERT Immortalized Cell Lines
- Hybridomas
- Stem Cells
- Tumor Cell Panels
- Cell Line Genomic DNA
- Organoids

Cell Culture Reagents

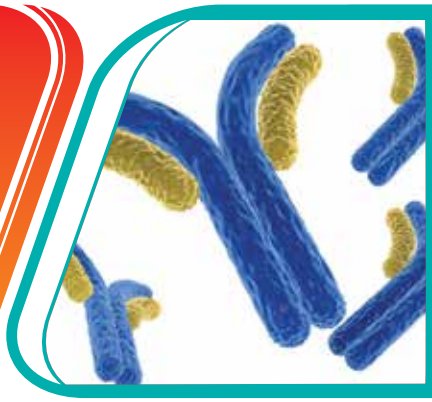
- Antibiotics
- Buffers and Stains
- Cryopreservation Reagents
- Dissociation Reagents
- Feeder Layer Cells
- Hybridoma Development
- Molecular Grade Water
- Media
- Supplements
- Substrates
- Polysaccharides
- Sera
- Transfection Reagents

New Product Launches

- Human Cancer Models
- Isogenic Cell Lines
- Luciferase Cell Lines
- EMT/MET Reporter Cells

A wide array of human, animal insect, fish and stem cells to choose from...

Custom Solutions



- **Cell and Microbial Authentication**
- **Cell and Microbial Banking**
- **Controls and Derivatives**
- **CRISPR/Cas9 Genome Editing**

Testing & Characterization Services

- **Cell Proliferation Assay Kits**
- **Mycoplasma Testing**
- **STR Profiling for Human Cells**
- **STR Profiling for Mouse Cells**

BIOPRODUCTION PLATFORM

HiMedia offers clone specific range of serum free media and feeds for recombiont CHO cells for production of biomolecules.

Product	Prefix	Page
Serum Free Medium	SFM	404
Universal Feed Suppliment	SFF	404
Serum Free Supplements	TCL	405
BioProduction Services		406-408

Bio-Production Platform

Antibodies are amongst one of the most expensive therapeutics being used. This is mainly due to their widespread applications in chronic diseases such as cancer in high doses (more than 100 mg) due to their low potency. Large scale processes are required to produce 10-100 kg per year to cope up with market demands. One of the major factor contributing to the high cost of therapeutic antibodies is the medium used for cultivation. Understanding the growing need for anti-cancer antibodies, we predict that our affordable lower cost SFM will eventually make our Pharma companies more competitive in the highly competitive global Biosimilar market with a fairly priced final product and will enable them to provide these medicines at affordable cost in developing as well as developed nations.

CELLBIO™

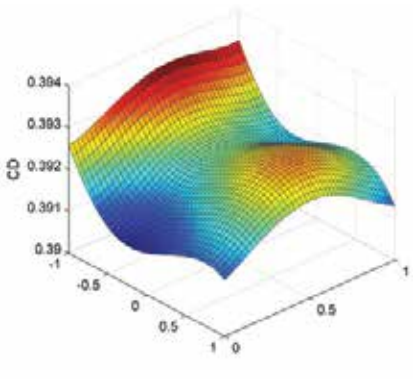
Bio Production Services		
Media Development	Spent Media Analysis	Media Optimization

Media Development Service

Clone Security Assured

Rely on us for optimizing media and feed for your high-value clones

At the core of a bio manufacturing process for recombinant proteins is the production cell line. It influences the productivity and product quality. Its characteristics also dictate process development, as the process is optimized to complement the producing cell to achieve the target productivity and quality.



We are firmly committed to honor your intellectual property. We have a complete understanding of the confidentiality of your process. All your information is handled confidentially and we assure you that it will never be disclosed. We sign a confidentiality agreement to ensure that the integrity of your

- Legal contract in form of non-disclosure agreement
- Dedicated liquid nitrogen storage tanks for clone banking
- Access to Bio-Production laboratory controlled by retina security scanner

Clone and process is not compromised.

Systematic Media Development

Each recombinant CHO clone engineered to produce therapeutic proteins exhibits unique metabolic demands. Optimal productivity of each clone at large scale requires clone-specific medium and feed.

With the help "Design of Experiments", our scientists follow a systematic approach for customization of media and feed. In a comprehensive approach, our R&D scientists can create an optimal nutritional environment, developing media formulations specifically suited to your working clone. We can formulate nutrient supplements to your specifications for bioreactor feed strategies.

Accuracy of the results is further assured by using high-throughput automated instruments and minimal manual intervention.

HIMEDIA®

Spent Media Analysis Service

Biochemical Analysis	Amino Acid Analysis
Estimation of primary indicators of culture kinetics Glucose, Lactate, Glutamine, Ammonia, Sodium, Potassium, Calcium, pO_2, pCO_2	Estimation of rate-limiting and productivity influencing factors Free amino acids

Nutrient consumption pattern over time provides critical understanding of what the cells are using and what do they require throughout culture period. This supports rational fine-tuning of specific nutrient requirements to improve cell viability, peak culture density and longevity, finally resulting in highest productivity and quality of output.

Spent medium analysis is therefore a major tool to analyse CMAs, CPPs and CQAs in critical processes such as

- Media screening and development
- Clone screening and selection
- Process development
- Optimization of feeding strategy

Spent Media Analytical Service offers you a complete set of tests required to analyse nutrient profile of your spent media. Using a complete regime of advanced analytical instruments, our team of experience scientists has optimized and validated methods for analysis of cell culture supernatants.

Trace Elements, Metals and Major Ions Analysis

Vitamins Analysis

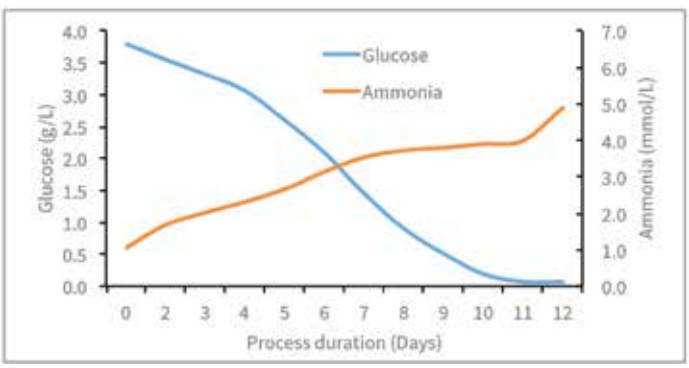
Nucleotide Analysis

Proteins/Proteome Characterization

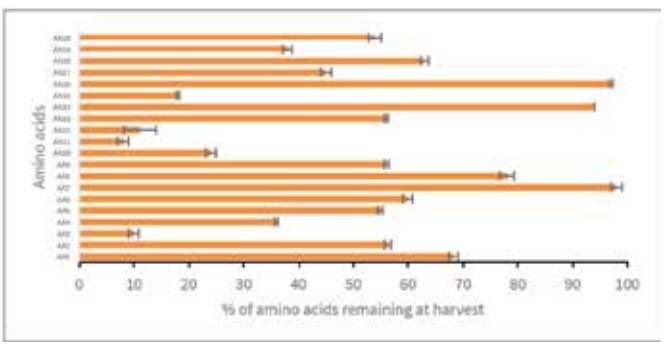
Biochemical Analysis

Chemistry	Limit of Detection
Glucose	0.10g/L
Lactate	0.10g/L
Glutamine	0.1mmol/L
Glutamic acid	0.1mmol/L
Ammonia	0.2mmol/L
Sodium	40mmol/L
Potassium	1.00mmol/L
Calcium	0.1mmol/L
pO_2	3.0mmHg
pCO_2	3.0mmHg

Amino Acid Analysis



Standard AA Profile (18 amino acids)

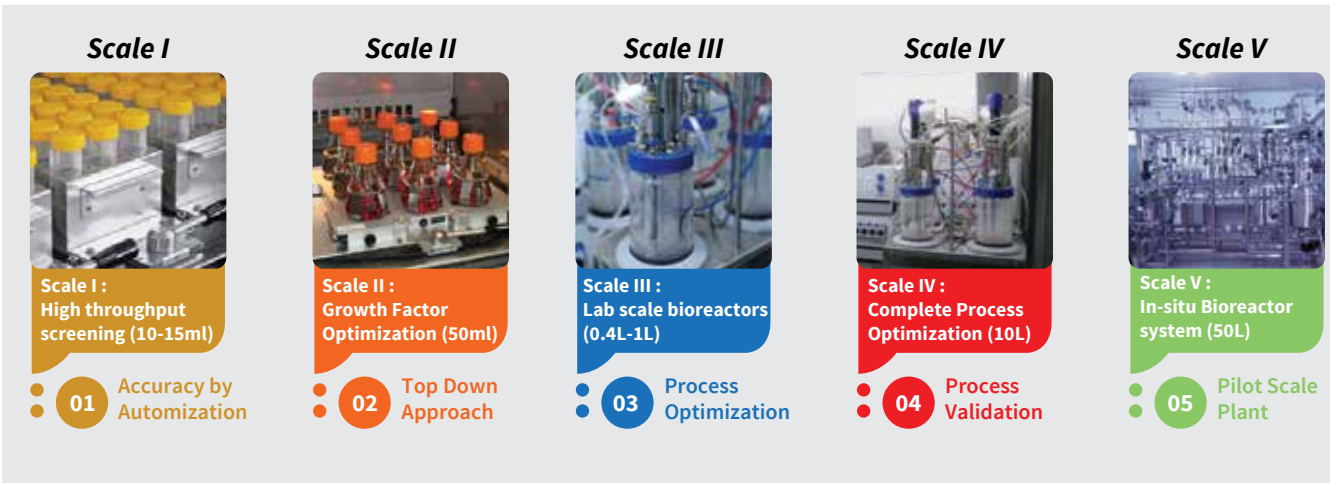


Alanine, Arginine, Aspartic acid, Cystine, Glutamic acid, Glycine, Histidine, Isoleucine, Leucine, Lysine, Methionine, Phenylalanine, Proline, Serine, Threonine, Tryptophan, Tyrosine, Valine

Advanced AA Profile (total 35 amino acids)

18 standard amino acids + 1-methyl histidine, 3-methyl histidine, Alpha-amino-adipic acid, Alpha-amino-butyric acid, Asparagine, β-alanine, β-amino isobutyric acid, Carnosine, Citruline, Gaba aminobutyric acid, Hydroxyproline, Ornithine, Phosphoethanolamine, Phosphoserine, Taurine, Urea

[Limit of Detection : Varies as per amino acid (~100nM)]



[Glucose consumption and ammonia accumulation pattern in a typical CHO-GS culture in batch mode]

Media Optimization Service

Scale up validation service is specially designed for laboratories that may have limited time, personnel, lab space and resources. And also for the laboratories which require third party validation.

SYSTEMATIC SCALE UP APPROACH

CELLBIO™

HEKin1™ CELLin1™ | Media for Viral Vaccine Production

Serum Free & Animal Component Free Media Designed for Growth of HEK293 & VERO Cells

HEKin1™ for Recombinant COVID-19 Vaccine Production

HEK-based vaccine manufacturing processes require a highly efficient and productive medium at each step starting from cell banking, till cell expansion and virus production in bioreactor.

Try out our **HEKin1™**, a fully optimized medium for production of HEK-based recombinant COVID-19 vaccine.

CELLin1™ for Inactivated COVID-19 Vaccine Production

Vero is a potential host cell line used for SARS-CoV-2 virus replication & manufacturing of inactivated COVID-19 viral vaccine.

Try out our **CELLin1™**, to achieve high viral titers using Vero cells in 2D and 3D cultures. CELLin1™ has also been optimized for production of other viral vaccines using PK-15, MDCK and MDBK cells.

- Scalability for use in shake flasks & bioreactors
- Save time with simplified purification and downstream processing
- Supports high cell density, culture longevity and increased yield

Media for FMD & other Human Vaccine Production

BHKin1™ PrimaVac™

Chemically defined Animal free, Serum free media designed for growth of BHK-21 & Chick embryo primary fibroblasts

Assisting you at every step of Viral Vaccine Production

Step1 : Cell Banking

Step 2 : Upstream Processing - Virus Production

Step 3 : Downstream Processing - Virus harvest

CELLBIO™

CUSTOM SERVICE PLATFORM

Your experiments… Our expertise…

Cell culture experiments are time consuming, require premium quality resources and triplicate repetitions for obtaining statistically significant results. Seek our services for faster and accurate results.

Our Custom Testing Services provide you with a complete solution to make your experiments easier and faster, assuring you the accuracy and authenticity of results.

With more than a decade of experience in Animal Cell Culture, we possess a comprehensive array of premium quality media, reagents and kits. A team of competent scientists at our lab have optimized and validated numerous cell culture techniques. Equipped with high throughput automated instruments complying with the latest technology, we also have advanced analytical tools for statistical analysis of the experimental data. From a wide variety of cancerous cell lines, stem cells and primary cells, you can select the cell line of your choice depending on your experimental requirement!

Save your precious time… Depend on us…

FEATURES

- Validated method of analysis
- Save your time and resources
- Detailed statistical analysis and comprehensive report
- Accuracy of results assured by the use of high throughput, automated instruments

SERVICES OFFERED

DRUG SCREENING Viability and Cytotoxicity	CELL AUTHENTICATION
High throughput colorimetric and fluorometric assays for drug screening MTT, XTT, MTS, WST-1, WST-8, EZBlue	▪ STR profiling (service provided by ATCC) ▪ Marker analysis (flow cytometry)
MYCOPLASMA TESTING	**SCALE UP OF CELLS**
▪ Direct testing by culture method ▪ Indirect testing by Hoechst staining ▪ PCR testing (16s rRNA sequence) ▪ PCR testing (16s - 23s rRNA space region)	Large scale propagation of cells using multi-layer flasks and cell factories

If you don't find the assay you want, contact us with your project requirements at atc@himedialabs.com

Advanced Analytical Services

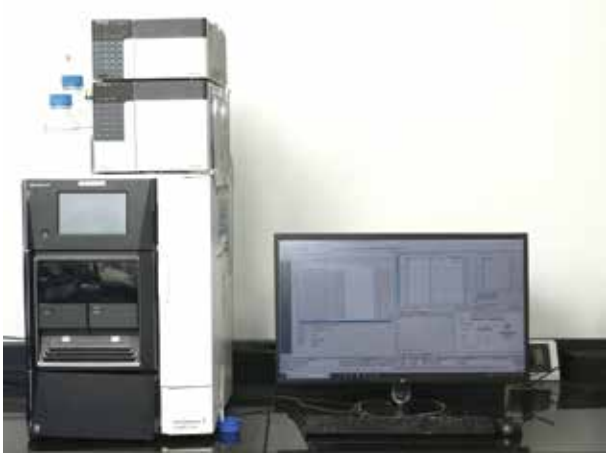
A Step Towards Accuracy and Precision

Optimize Decision-Making with Our Advanced Analytical Services

Introducing Advanced Analytical Lab of Cell Biology at HiMedia offers services to Pharma, Biopharma, and Bioscience Companies with our high technological analytical instruments.

Venture into the world of accuracy and creativity with HiMedia's CellBio. We are excited to present our Advanced Analytical Services, which will use modern technology to strengthen your efforts in biotechnology, biopharmaceutical, pharmaceutical, and scientific fields. Our offerings have been carefully developed to assist your business conducting scientific research by providing unparalleled insights through powerful data analytics. We offer complete support with a persistent commitment to excel for your requirements in quality assurance and research & development. Discover the limitless possibilities that our modern analytical services allow to enhance productivity, stimulate innovation, and guarantee success in the constantly evolving fields of pharma, biopharma, bioscience, and biotechnology.

FEATURES



- **Advanced Instrumentation:**
  - Utilize advanced analytical instruments for precise and sensitive measurements.
- **Thorough Biomolecule Analysis:**
  - Analyze a wide range of biomolecules, including proteins, nucleic acids, lipids, and metabolites.
- **High-throughput Screening:**
  - Accelerate research with efficient high-throughput screening for large sample sets.
- **Customized Assay Development:**
  - Custom assays to specific project needs, ensuring relevance and accuracy.
- **Sensitive Detection Methods:**
  - Employ advanced detection methods for trace-level analysis and increased sensitivity.
- **Quantitative Analysis:**
  - Provide accurate and reliable quantitative measurements for precise data interpretation.
- **Proteomics and Metabolomics Solutions:**
  - Offer services for in-depth proteomics and metabolomics profiling.
- **Regulatory Compliance:**
  - Ensure adherence to regulatory standards, providing reliable data for submissions.
- **Data Interpretation and Reporting:**
  - Deliver comprehensive data interpretation and detailed reports for informed decision-making

AMINO ACID ANALYZER (SYKAM S453)

- Physiological Amino acids Analysis by post Column Derivatization Method (~35 Amino Acid)
- Hydrolysate Amino acids Analysis by post Column Derivatization Method ~17 Amino Acids

HPLC

- Related Substances and impurity analysis - method development and Validation by HPLC.
- IgG titer estimation by Protein-A Affinity Chromatography
- Aggregates analysis by Size Exclusion-HPLC
- Charge Variants Analysis by Cation-Exchange Chromatography
- Hydrophobic interaction chromatography
- Assay Method development and validation by HPLC
- Cleaning validation by HPLC
- Vitamin Analysis

UHPLC

- Released N-Glycan Analysis by 2AB-labelled HILIC
- Qualitative Peptide Mapping by RP-UHPLC

LC-MS (Triple Quadrupole Mass Spectrometer)

- Development and Method Validation by LCMS/MS
- Spent Media Analysis by LCMS/MS
- Vitamin analysis (Water and Fat soluble) by LC-MS
- Amino acid analysis by LC-MS
- Impurity Profiling by LCMS/MS
- Residual Pesticides Analysis
- Primary Metabolites Analysis
- Veterinary Drugs Analysis
- Short Chain Fatty Acid Analysis
- Lipid Mediators Analysis
- Bile Acid Analysis
- Modified Nucleotides Analysis
- Method For analyzing Per- and Polyfluoroalkyl substances in drinking water

UHPLC-HRMS (Orbitrap Fusion Tribrid Lumos)

- Intact protein analysis by UHPLC-HRMS
- Top-down analysis by UHPLC-HRMS
- Bottom-up analysis by UHPLC-HRMS
- Protein Sequence confirmation by Peptide mapping UHPLC-HRMS/MS
- Disulfide bond analysis by UHPLC-HRMS/MS
- Post translation modification confirmation by UHPLC-HRMS/MS
- Released N-glycan analysis by UHPLC-HRMS
- Glycoprotein / Glycopeptide analysis UHPLC-HRMS
- Host cell proteins (HCP) identification and characterization by UHPLC-HRMS/MS
- MSn fragmentation analysis (n=10)
- Multiplexed protein quantitation
- Lipidomic analysis by UHPLC-HRMS
- Metabolomics analysis by UHPLC-HRMS
- Culture media component or spent media analysis and structure confirmation by UHPLC-HRMS
- Oligonucleotide analysis
- mRNA mapping

UV Spectroscopy

- OD280 protein concentration analysis
- Cleaning validation by UV spectroscopy
- Assay by UV spectroscopy
- Identification test by UV spectroscopy

NGC-FPLC

- Purification of mAbs and non-mAbs protein cell harvest by NGC-FPLC purification system

ICPMS

- Trace Element Analysis using ICPMS
- Elemental impurities Method development & Validation by ICPMS

www.himedialabs.com

CELL CULTURE PLATFORM

HiMedia's core expertise in cell culture media enables us to provide the widest range of cell culture media along with a wide range of quality assured cell culture reagents, supplements and sera.

Product	Prefix	Page
Cell Culture Media		
Classical Media (Liquid)	AL	423-427
HiGlutaXL™ Media	AL***G	428
LoSera™ Media	RSL	429
Classical Media (Powder)	AT	430-433
Insect Media	IML / IM	433
HiSep™ Lymphocyte Separation Media	LS	434
CryoXL™ Cell Freezing Media	TCL	435
Cell Culture Reagents		
Antibiotic Solutions	A	436
Balanced Salts	TS / TL	437-438
Cell Dissociation Reagents	TCL	439-441
Miscellaneous Reagents	TCL	442
Cell Culture Supplements		
Amino Acid Concentrates	AC / ACL	443
Hydrolysates	TC / TCL	443
Vitamin Solutions	VA	443
Specialty Product Segment		
Hybridoma Platform	AT/ AL/ T / TCL	444

Cytogenetics Platform	AL/ TCL/ TL /CCK	445-446

Product	Prefix	Page
Viral Transport Systems		
HiViral™ Transport Media & Kits	AL/MS	447-449
COVID*Safe*™ Virus Inactivation Media	AL/MS	450-451
ELISA Cross-Selling Products		451
Sera		
NuSera™	TCL	452-456
Fetal Bovine Sera	RM	457-458
Speciality Fetal Bovine Sera	RM	459
New Born Calf Sera	RM	459
Adult Bovine Sera	RM	459
Other Animal Sera	RM	460

Cell Culture Platform

The introduction of cell culture methodology to the biological sciences ushered in a new era of rapid and exciting advances in the fields of virology, cytology, drug discovery, toxicology, cancer and stem cell research and therapy. Our comprehensive portfolio in cell culture platform includes classical media, sera, cell culture reagents, cell culture supplements and many more.

Media : HiMedia's core expertise lies in manufacturing cell culture media, both in powdered as well as liquid form, for mammalian and insect cell. Comprehensive design of experiments, rigorous raw material qualification and media production with no manual intervention using automated liquid handling platform and automatic filling line are our strengths that enable us to provide the widest range of cell culture media.

Customized Media : It has been our endeavor to help researchers with their specific requirements related to media and cell culture reagents. We provide customized products as per the unique requirements of the customer in terms of : media formulations, packaging, labeling, documentation (e.g. certificates of origin, BSE/ TSE risk statements) and additional QC testing (e.g. virus testing, mycoplasma detection, amino acid profiling). We are firmly committed to maintain the confidentiality of your project and we sign a confidentiality agreement to ensure that the integrity of your project is not compromised.

Sera : HiMedia provides a wide range of quality assured serum over decades that helps achieving consistency in cell growth. Our product listing includes sera from bovine fetus, adult bovine, newborn calf and other animals and speciality sera. All lots of sera undergo comprehensive quality control testing that include sterility testing against mycoplasma, viruses and bacteria, antibody testing, analysis of growth promotion capacity, protein profiling, endotoxin content and physicochemical analysis.

Karyotyping Solutions : HiMedia offers media, reagents, and supplements that are specifically formulated to deliver clear, reproducible results. Each media has been designed and optimized for the analysis of peripheral blood lymphocytes, amniotic fluid cells, chorionic villus samples and bone marrow cells respectively.

Viral Transport System : Simplify collection, transport, maintenance and frozen storage of viruses, chlamydia, mycoplasma and ureaplasma specimens with the HiViral™ Transport Media and Swab.

CELLBIO™

HiSep™ Lymphocyte Separation Media

PRODUCTION

Manufactured in GMP, ISO 13485 and ISO 9001 certified facility

CERTIFICATION

CE Marked for IVD (98/79/EC)

QUALITY

Endotoxin level less than 0.3 EU/ml

YIELD

95 ± 5% mononuclear cells

3 ± 2% granulocytes

More than 90% viability

Product	Code	Packing	Price in ₹
HiSep™ LSM 1077 Density: 1.077+ 0.0010 g/ml. Recovery: viable human mononuclear cells (Lymphocytes and monocytes). **Equivalent to: Ficoll- Paque™ Plus and Histopaque® 1077.**	**LS001-100ML** **LS001-500ML**	**100ml** **500ml** **6X100ml** **6X500ml** **12X500ml**	**3420** **11205** **15570** **56015** **106365**
HiSep™ LSM 1073 Density: 1.073+ 0.0010 g/ml. Recovery: lower density human mononuclear cells (eg- mesenchymal stromal cells or monocytes). **Equivalent to: Ficoll- Paque PREMIUM 1.073.**	**LS002-100ML** **LS002-500ML**	**100ml** **500ml** **6X100ml** **6X500ml** **12X500ml**	**3420** **11205** **15570** **56015** **106365**
HiSep™ LSM 1084 Density: 1.084+ 0.0010 g/ml. Recovery: large number of viable mononuclear cells from chicken, rats, mice and other mammals. **Equivalent to: Ficoll- Paque PREMIUM 1.084 and Histopaque® 1083.**	**LS003-100ML** **LS003-500ML**	**100ml** **500ml** **6X100ml** **6X500ml** **12X500ml**	**3420** **11205** **15570** **56015** **106365**
GranuloSep™ GSM 1119 Density: 1.119+ 0.0010 g/ml. Recovery: When combined with HiSep™ LSM 1077, it permits separation of mononuclear cells and granulocytes. **Equivalent to: Histopaque® 1119.**	**LS004-100ML** **LS004-500ML**	**100ml** **500ml** **6X100ml** **6X500ml**	**3420** **11205** **15570** **56015**
Ficoll 400-20% A 0.2 micron filtered, non-ionic synthetic polymer of sucrose. It is used in electrophoresis, as a hapten carrier and most commonly used to prepare density gradients.	**LS005-25ML** **LS005-50ML**	**25ml** **50ml**	**6230** **10720**

SELECT THE RIGHT DENSITY

Code	Product Name	Density	Cell type separated	Species	Tissue Types
LS001	HiSep™ LSM 1077	1.077 g/ml	Mononuclear cells (Lymphocytes and monocytes)	Human	Blood
LS002	HiSep™ LSM 1073	1.073 g/ml	Lower density human mononuclear cells (eg- mesenchymal stromal cells or monocytes).	Human	Peripheral blood
LS003	HiSep™ LSM 1084	1.084 g/ml	Mononuclear cells of higher density	Chicken, Rats, Mice and other Mammals.	Peripheral blood
LS004	GranuloSep™ GSM 1119	1.119 g/ml	Mononuclear cells and granulocytes	Human	Peripheral blood
LS005	Ficoll 400-20%	Ficoll 400-20%	Commonly used to prepare density gradients	-	-

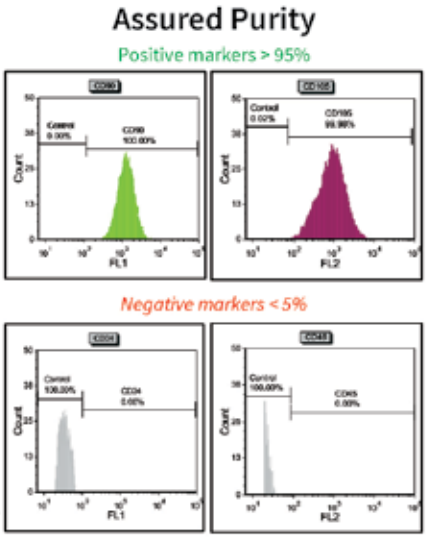
HIMEDIA®

Cryo XL™ Series of Cell Freezing Media



CryoLITE™

DMSO free formulation for cryopreservation of your most precious cells

CryoLITE was found to be as effective as the competitor in terms of post-thaw viability on various primary cells, stem cells, and cell lines

Immunophenotyping of Human Adipose Derived Mesenchymal Stem Cells, 3 days post revival

CELL BIOLOGY

Product	Code	Packing	Price in ₹
Freezing media for regular and sensitive cell lines			
CryoXL™ Cell Freezing Medium-DMSO, 1X w/ FBS and DMSO w/o Antibiotics Sterile filtered	**TCL043-50ML**	**50ml**	**11515**
CryoXL™ Cell Freezing Medium-DMSO, 1X w/ FBS and DMSO w/o Antibiotics Sterile filtered This medium contains high concentration of FBS and can be used for freezing of sensitive cell lines.	**TCL093-50ML**	**50ml**	**14275**
CryoXL™ Cell Freezing Medium-DMSO, 1X w/ FBS and DMSO w/o Antibiotics and Phenol red Sterile filtered	**TCL056-50ML**	**50ml**	**11515**
CryoXL™ Cell Freezing Medium-Glycerol, 1X w/ FBS and Glycerol w/o Antibiotics Sterile filtered	**TCL044-50ML**	**50ml**	**10880**
CryoXL™ Cell Freezing Medium-Glycerol, 1X w/ FBS and Glycerol w/o Antibiotics and Phenol red Sterile filtered	**TCL078-50ML**	**50ml**	**10880**

Product	Code	Packing	Price in ₹
Animal origin-free and serum-free cell freezing media			
FREEZin1™ w/ DMSO w/o Antibiotics, Antimycotics and Phenol red Sterile filtered	**TCL098-50ML**	**50ml**	**17670**
CyroLITE™ DMSO Free freezing Medium w/o DMSO, Antibiotics, Antimycotics and Phenol red Sterile filtered	**TCL285-50ML**	**50ml**	**17120**
Stem cell freezing media			
CryoXL™ Stem Cell Freezing Medium w/ FBS and DMSO w/o Antibiotics Sterile filtered	**TCL107-50ML**	**50ml**	**16640**
Hybridoma cell freezing media			
CryoXL™ Hybridoma Cell Freezing Medium, DMSO, 1X w/ FBS and DMSO w/o Antibiotics This medium is optimized for cryopreservation of hybridoma cells	**TCL123-50ML**	**50ml**	**17535**

Antibiotic Solutions

Product	Code	Packing	Price in ₹
Amphotericin B Solution 250µg/ml Cell Culture Tested	A011-20ML	5x20ml	6710
Ampicillin solution w/ 10mg/ml Ampicillin sodium salt in sterile tissue culture grade water	A022-20ML	20ml 5x20ml	2850 8575
Ampicillin Solution w/ 100mg/ml Ampicillin sodium salt in sterile tissue culture grade water	A023-20ML	20ml	8390
Antibiotic Solution 100X Liquid, Endotoxin tested w/ 10,000 U Penicillin and 10mg Streptomycin per ml in 0.9% normal saline	A001A-50ML A001A-100ML	50ml 5x50ml 100ml 5x100ml	1860 6735 2385 10475
Antibiotic Solution 100X Liquid w/ 10,000U Penicillin and 10 mg Streptomycin per ml in citrate buffer	A014-50ML A014-100ML	5x50ml 5x100ml	7470 11635
Antibiotic Solution 100X Liquid w/ 10,000U Penicillin, 5mg Streptomycin per ml in 0.9% normal saline	A018-50ML A018-100ML	5x50ml 5x100ml	7470 11635
Antibiotic Antimycotic Solution 100X Liquid, Endotoxin tested w/10,000 U Penicillin, 10mg Streptomycin and 25 µg Amphotericin B per ml in 0.9% normal saline	A002A-20ML A002A-50ML A002A-100ML	20ml 5x20ml 5x50ml 100ml 5x100ml	1535 7415 11145 3920 19415
Antibiotic Solution 50X Liquid w/ 5,000 U Penicillin and 5 mg/ml Streptomycin in 0.9% normal saline	A003-50ML	50ml 5x50ml	1105 4105
Carbenicillin Solution 100mg/ml w/ 100 mg/ml Carbenicillin in sterile tissue culture grade water	A019-20ML	20ml 5x20ml	4810 8915
Ciprofloxacin 2% Solution, 5X # w/ 2% Ciprofloxacin in sterile tissue culture grade water	A032-100ML	100ml	2935
Geneticin Solution (G418 Solution) w/ 50 mg/ml Geneticin in sterile tissue culture grade water	A016-20ML	20ml 5x20ml	13100 47975
Gentamicin Solution # w/ 50 mg/ml Gentamicin in sterile tissue culture grade water	A005-20ML A005-100ML	20ml 1x100ml	2925 5855
Gentamicin Solution # w/ 10mg/ml Gentamicin sulfate in sterile tissue culture grade water	A010-20ML A010-100ML	20ml 5x20ml 100ml	2380 5620 5075
Gentamicin L-Glutamine Solution w/ 200mM L-Glutamine and 5 mg/ml Gentamicin in 0.9% normal saline	A006-20ML	5x20ml	8595
Gentamicin-Amphotericin B Solution 1000X w/ 30mg/ml Gentamicin and 25µg/ml Amphotericin B in sterile tissue culture grade water	A031-20ML	20ml 5x20ml	7975 27910
Hygromycin B Solution # w/ 50 mg/ml Hygromycin B in sterile tissue culture grade water	A015-20ML	20ml 5x20ml	9095 37365
Kanamycin Solution # w/ 10 mg/ml Kanamycin in 0.9% normal saline	A008-20ML	20ml 5x20ml	1900 5675
Kanamycin Solution # w/ 50 mg/ml Kanamycin in 0.9% normal saline	A009-20ML	20ml 5x20ml	4475 7550
Neomycin sulphate Solution # w/ 10 mg/ml Neomycin in 0.9% normal saline	A024-20ML	20ml 5x20ml	1765 5650
Nystatin Suspension w/ 10,000units Nystatin per ml in Dulbecco's Phosphate Buffered Saline	A012-20ML A012-50ML	5x20ml 5x50ml	5015 9520
Polymyxin B Solution # w/ 50mg/ml Polymyxin B in sterile tissue culture grade water Suitable for vaccine production	A027-20ML	5x20ml	10010
L-Glutamine-Penicillin-Streptomycin Solution w/ 200mM L-Glutamine, 10,000 units/ml Penicillin and 10 mg/ml Streptomycin in 0.9% normal saline	A007-20ML A007-100ML	5x20ml 5x100ml	5265 10945
Penicillin-Streptomycin-Neomycin Solution w/ 5000 units Penicillin, 5mg Streptomycin and 10mg Neomycin per ml in Citrate buffer	A028-20ML	5x20ml	8560
Penicillin Streptomycin Powder w/ 5000 units Penicillin and 5 mg Streptomycin per ml in 0.9% normal saline when reconstituted with sterile tissue culture grade water to indicated volume	A004-50ML A004-100ML	5x50ml 5x100ml	5565 11110
Puromycin dihydrochloride Solution w/ 10mg/ml Puromycin dihydrochloride in Cell Culture grade water	A038-20ML	20ml 5x20ml	42600 149100

Trypsin Solutions			
Trypsin 0.1% Solution 1X 0.1% Trypsin in Dulbecco's Phosphate Buffered Saline w/o Phenol red	TCL011-100ML TCL011-500ML	100ml 5x100ml 500ml 6x500ml	1235 5645 4315 14445
Trypsin 0.25% Solution 1X 0.25% Trypsin in Dulbecco's Phosphate Buffered Saline w/o Phenol red	TCL006-100ML TCL006-500ML	100ml 5x100ml 500ml 6x500ml	1235 5645 4315 14445
Trypsin 0.25% Solution 1X 0.25% Trypsin in Hanks' Balanced Salt Solution w/ Phenol red w/o Calcium and Magnesium	TCL047-100ML TCL047-500ML	100ml 5x100ml 500ml 6x500ml	1235 5645 4315 14445
Trypsin 0.25% Solution 1X 0.25% Trypsin in Hanks' Balanced Salt Solution w/o Calcium, Magnesium and Phenol red	TCL151-100ML	5x100ml	9320
Trypsin 2.5% Solution 10X 2.5% Trypsin in Hanks' Balanced Salt Solution 10X w/o Phenol red	TCL008-100ML TCL008-500ML	100ml 5x100ml 500ml	4605 9320 7885
Trypsin 0.25% Solution 1X 0.25% Trypsin in Citrate buffer w/o Phenol red	TCL111-100ML	5x100ml	5645
Trypsin Solutions			
Trypsin - EDTA Solution 1X 0.25% Trypsin and 0.02% EDTA in Dulbecco's Phosphate Buffered Saline w/o Phenol red	TCL007-100ML TCL007-500ML	100ml 5x100ml 500ml 6x500ml	1235 5970 4315 13995
Trypsin - EDTA Solution 1X 0.25% Trypsin and 0.02% EDTA in Hanks' Balanced Salt Solution w/ Phenol red	TCL049-100ML TCL049-500ML	100ml 5x100ml 500ml 6x500ml	1255 6165 4415 14550
Trypsin - EDTA Solution 1X 0.25% Trypsin and 0.02% EDTA in Hanks' Balanced Salt Solution w/o Calcium, Magnesium and Phenol red	TCL152-100ML TCL152-500ML	100ml 5x100ml 500ml 6x500ml	1255 6165 4415 14550
Trypsin - EDTA Solution 1X 0.25% Trypsin and 0.02% EDTA in 0.8% normal saline w/ 0.4 g/L Potassium chloride, 1.0g/L Glucose, 0.35 g/L Sodium bicarbonate and 0.01 g/L Phenol red	TCL165-100ML	5x100ml	6165
Trypsin-EDTA Solution 1X 0.25% Trypsin Gamma irradiated and 0.02% EDTA in Hanks' Balanced Salt Solution w/ Phenol red	TCL155-100ML TCL155-500ML	100ml 5x100ml 500ml 6x500ml	1445 6990 4480 15295
